JAMBOREE 2018

LEPCOL 2018

# ILC

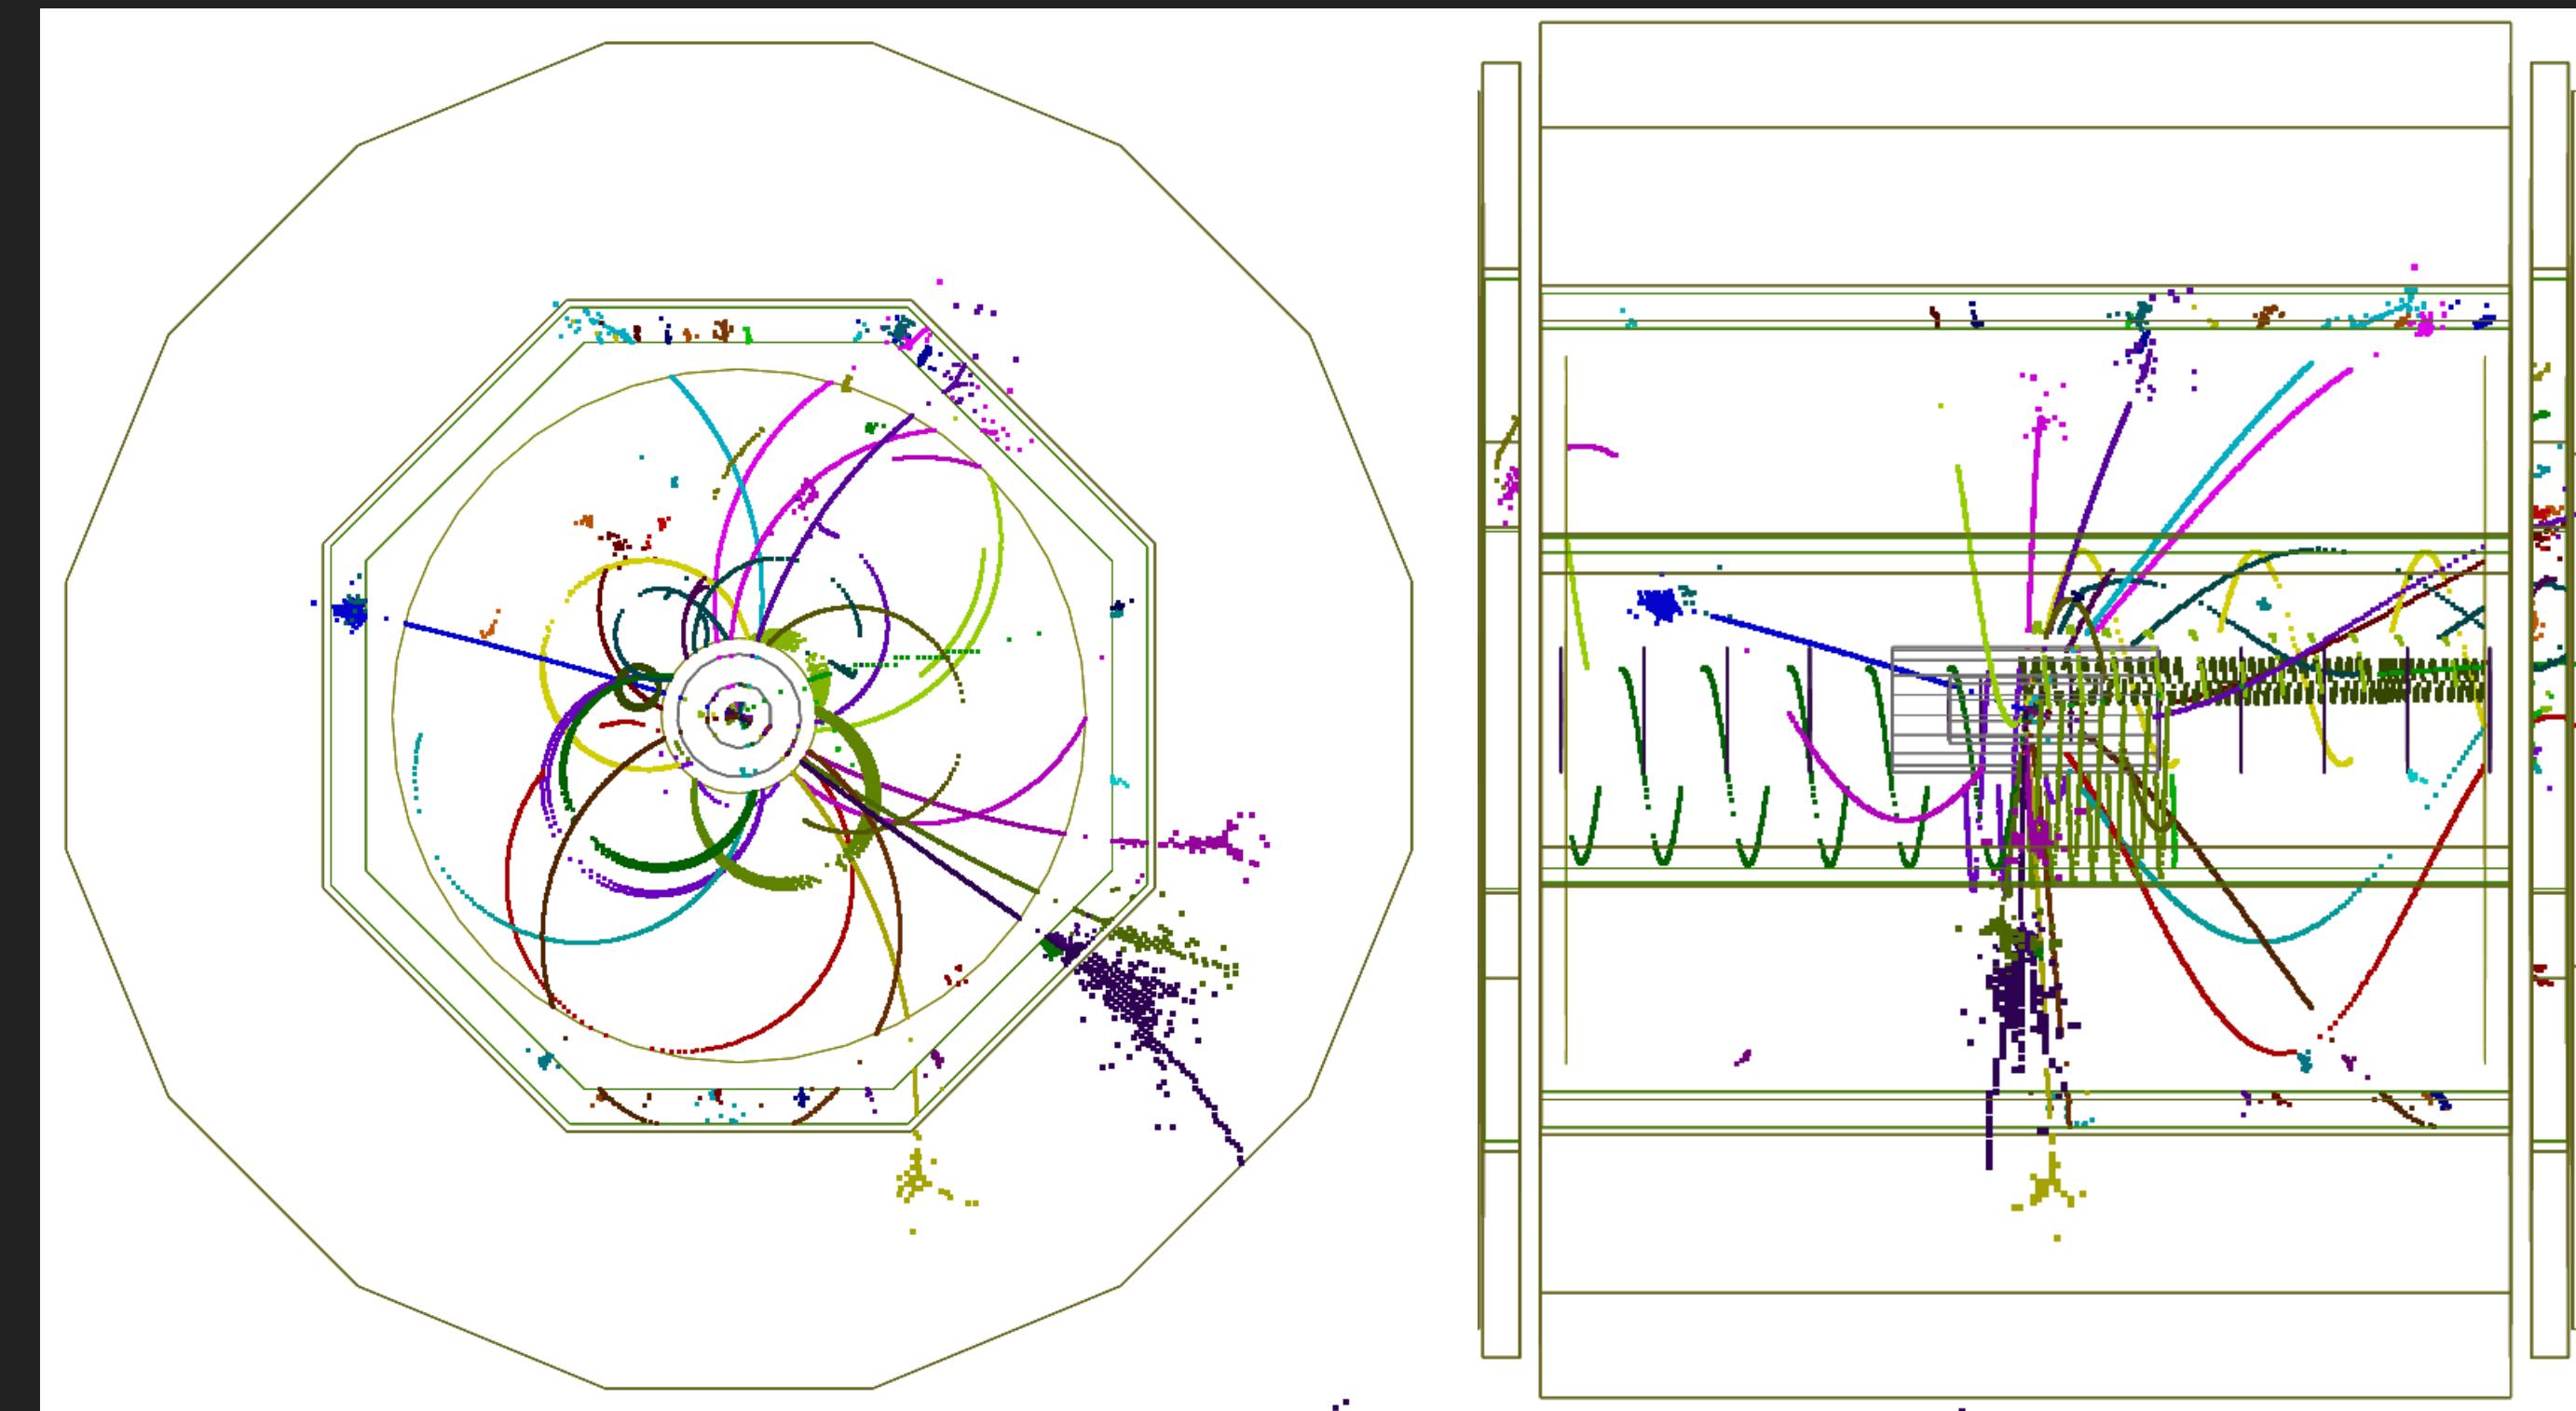

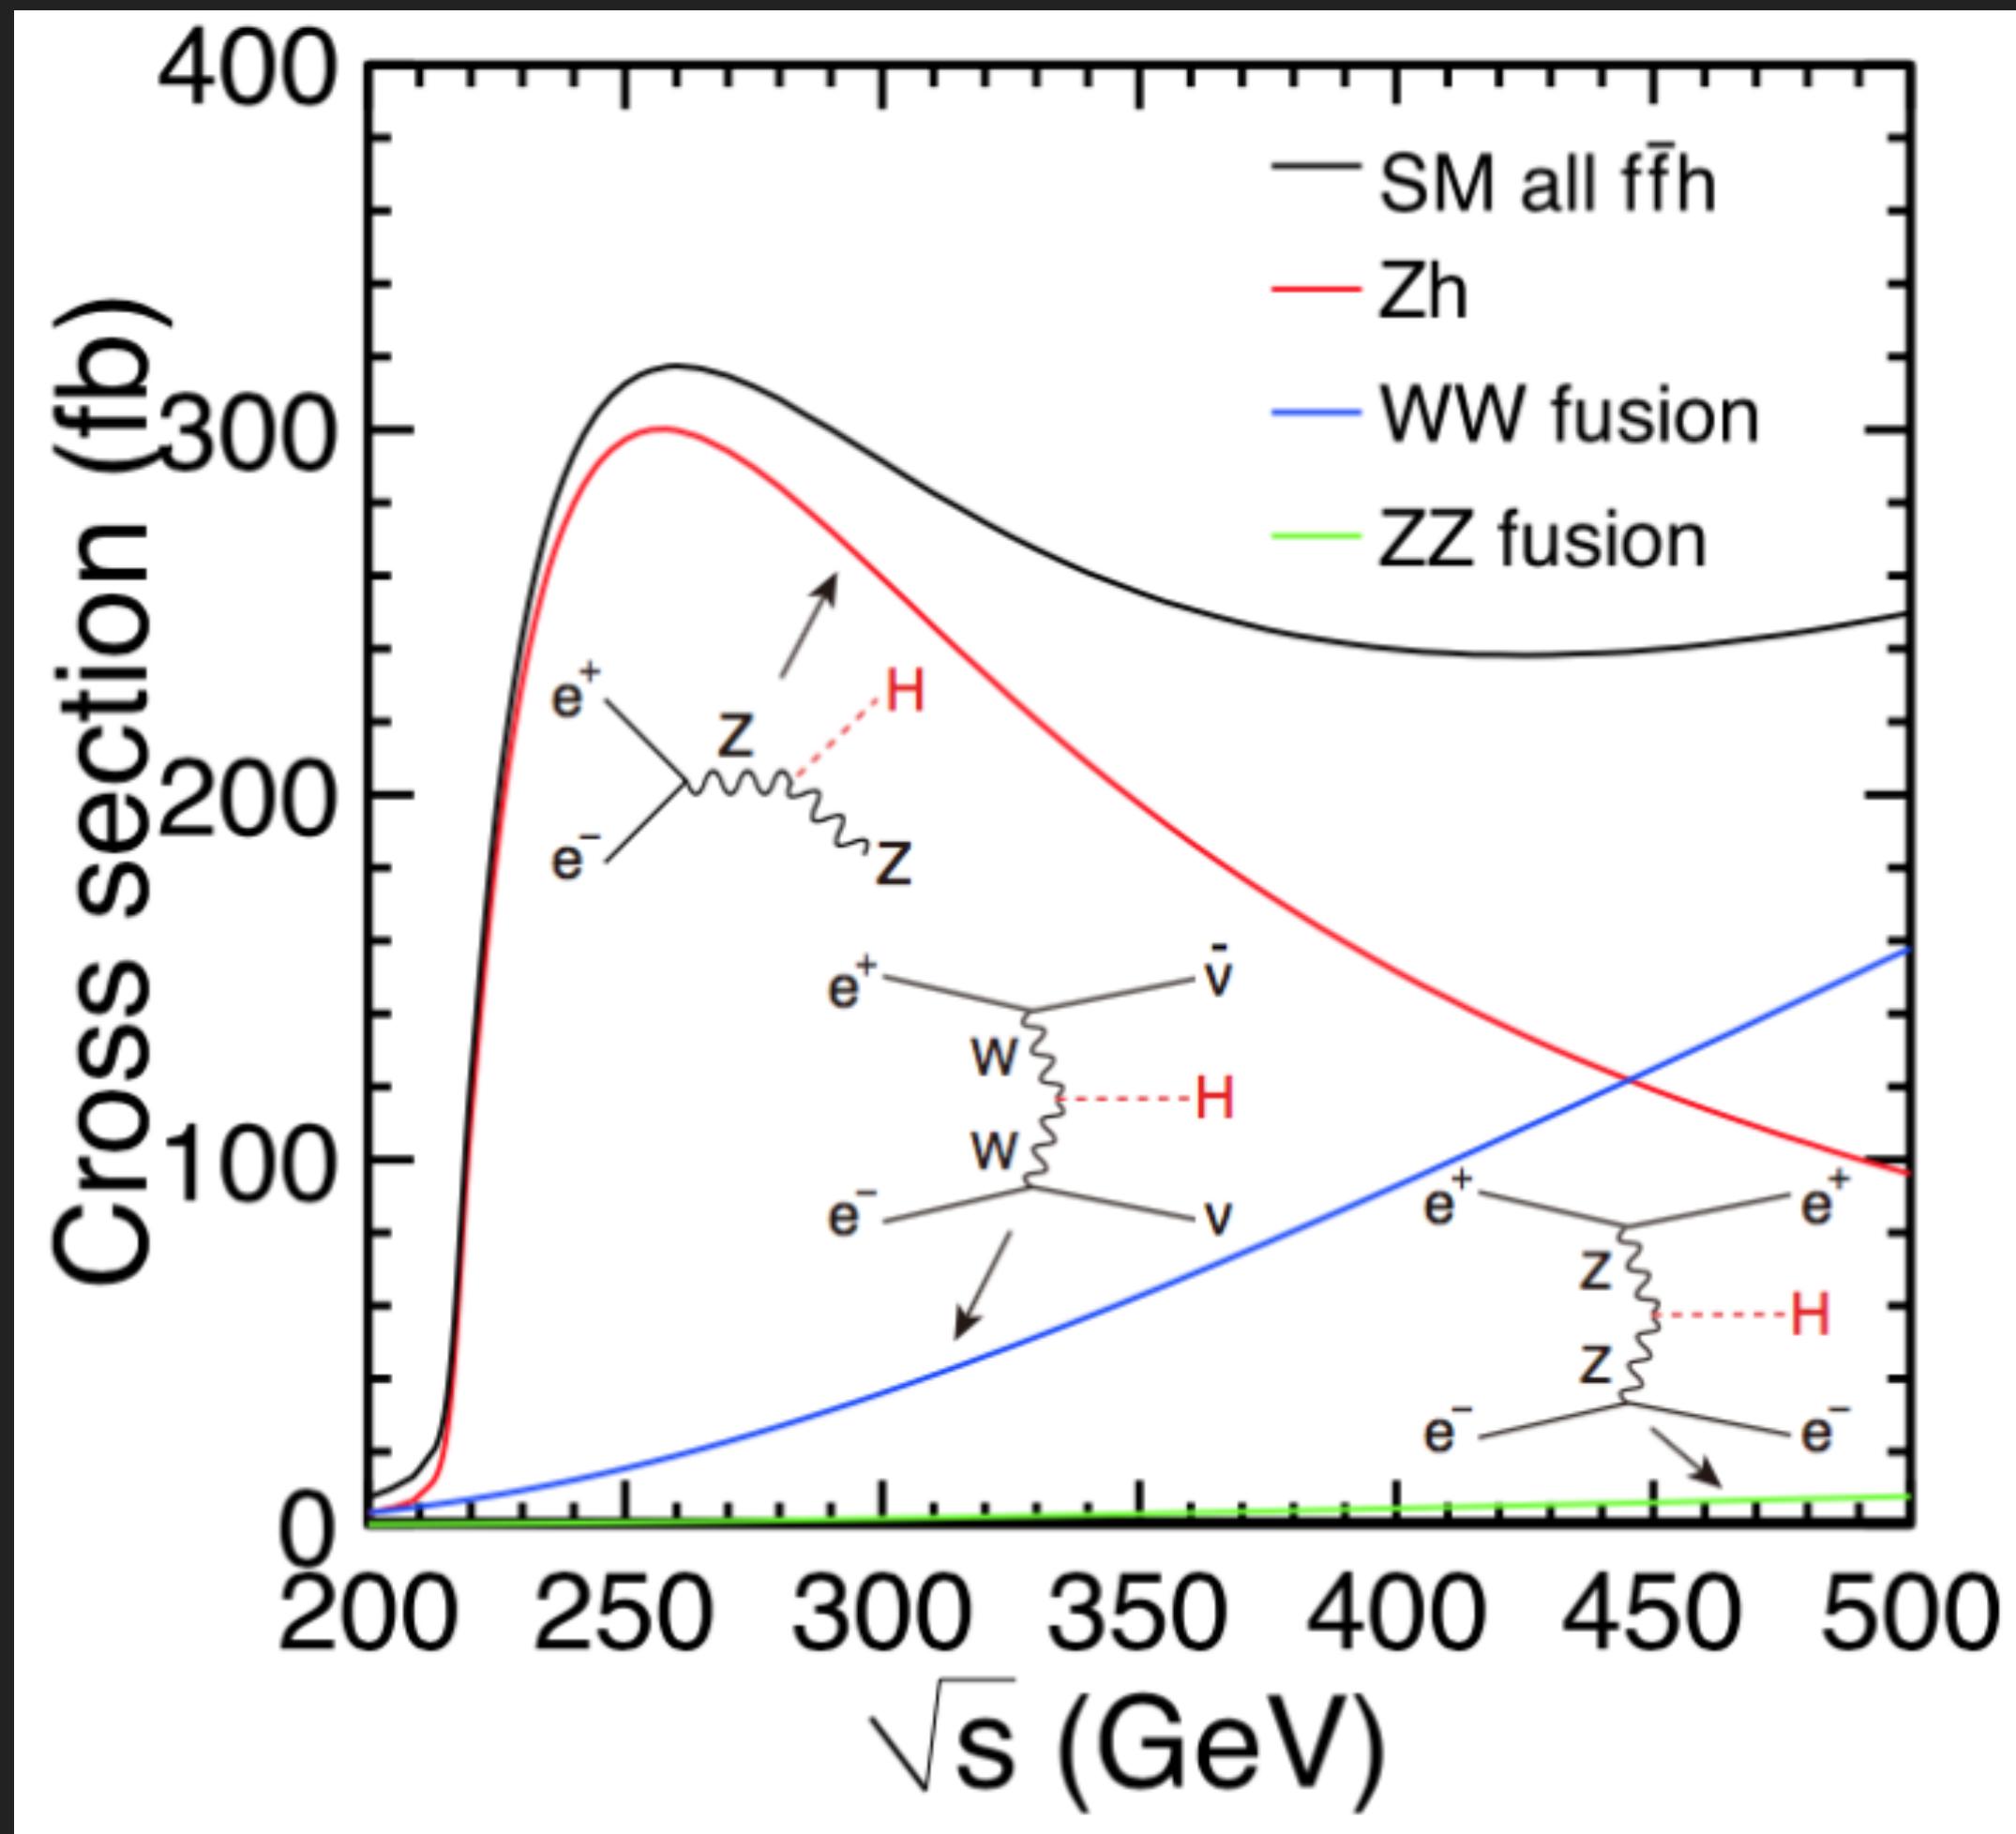

- ▶  $e^+e^-$  collider with polarized beams
- ▶ First stage: 250 GeV Higgs factory; extendable to >500 GeV

## PHYSICS @ ILC

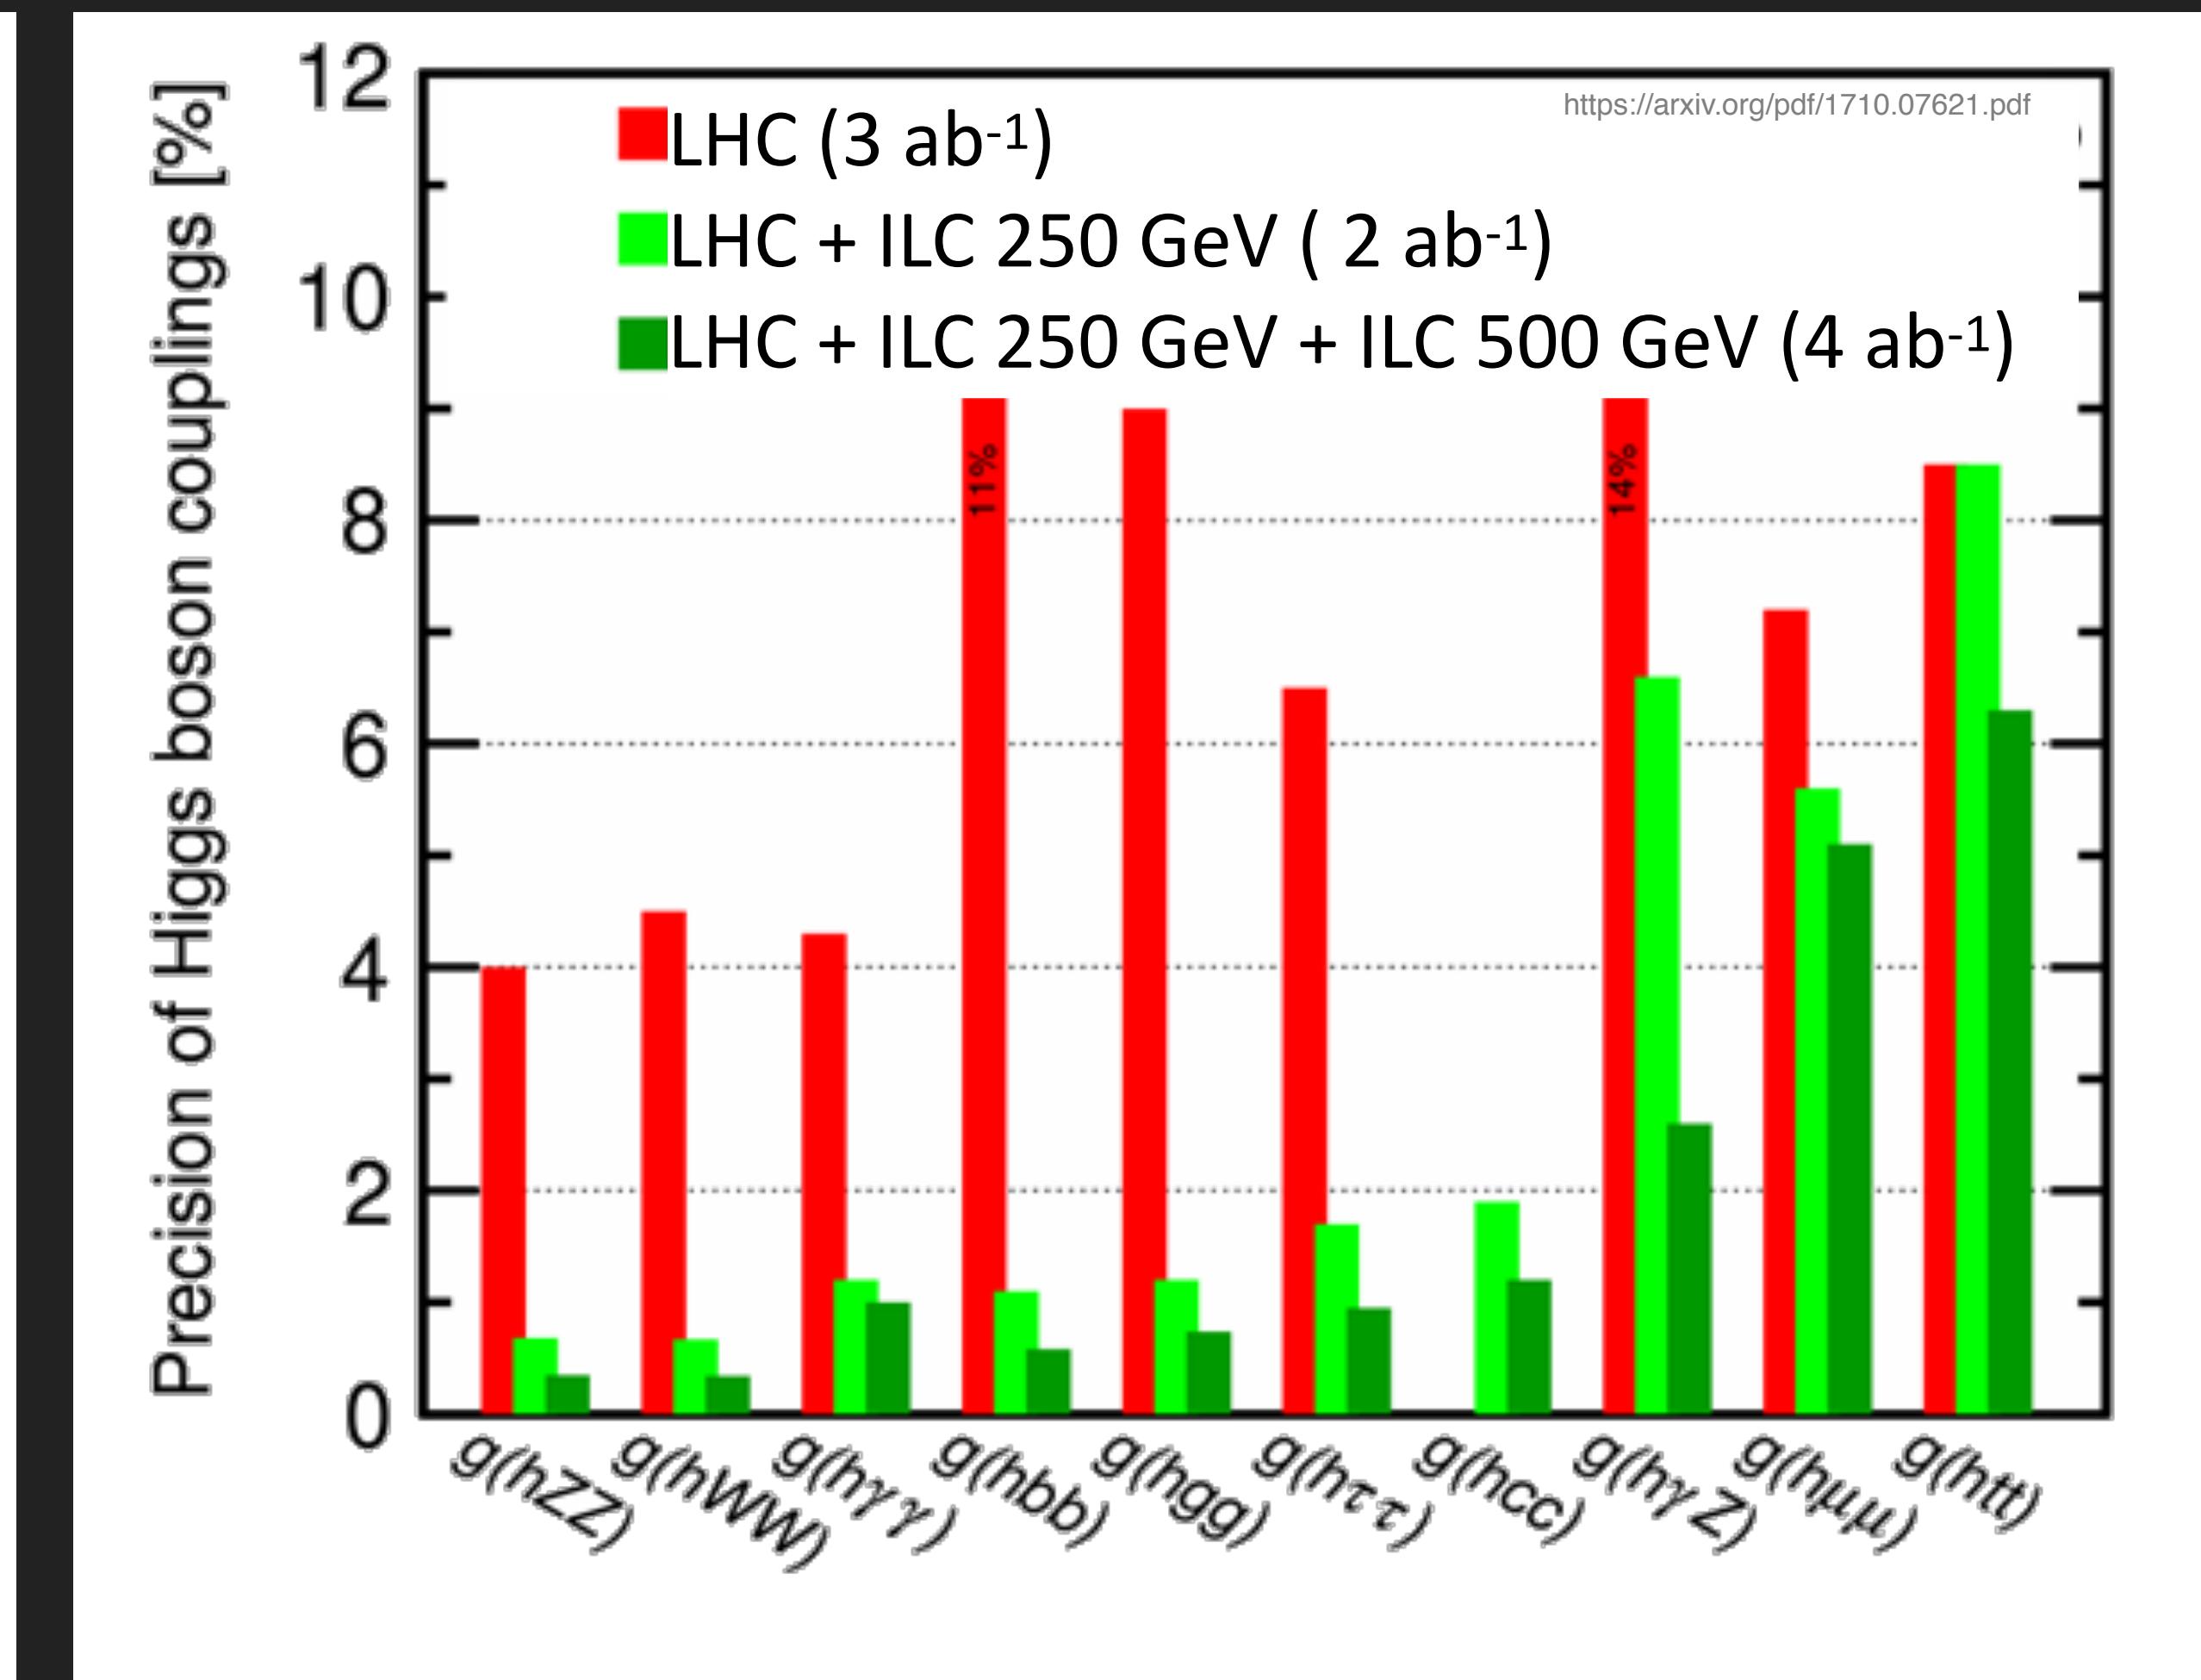

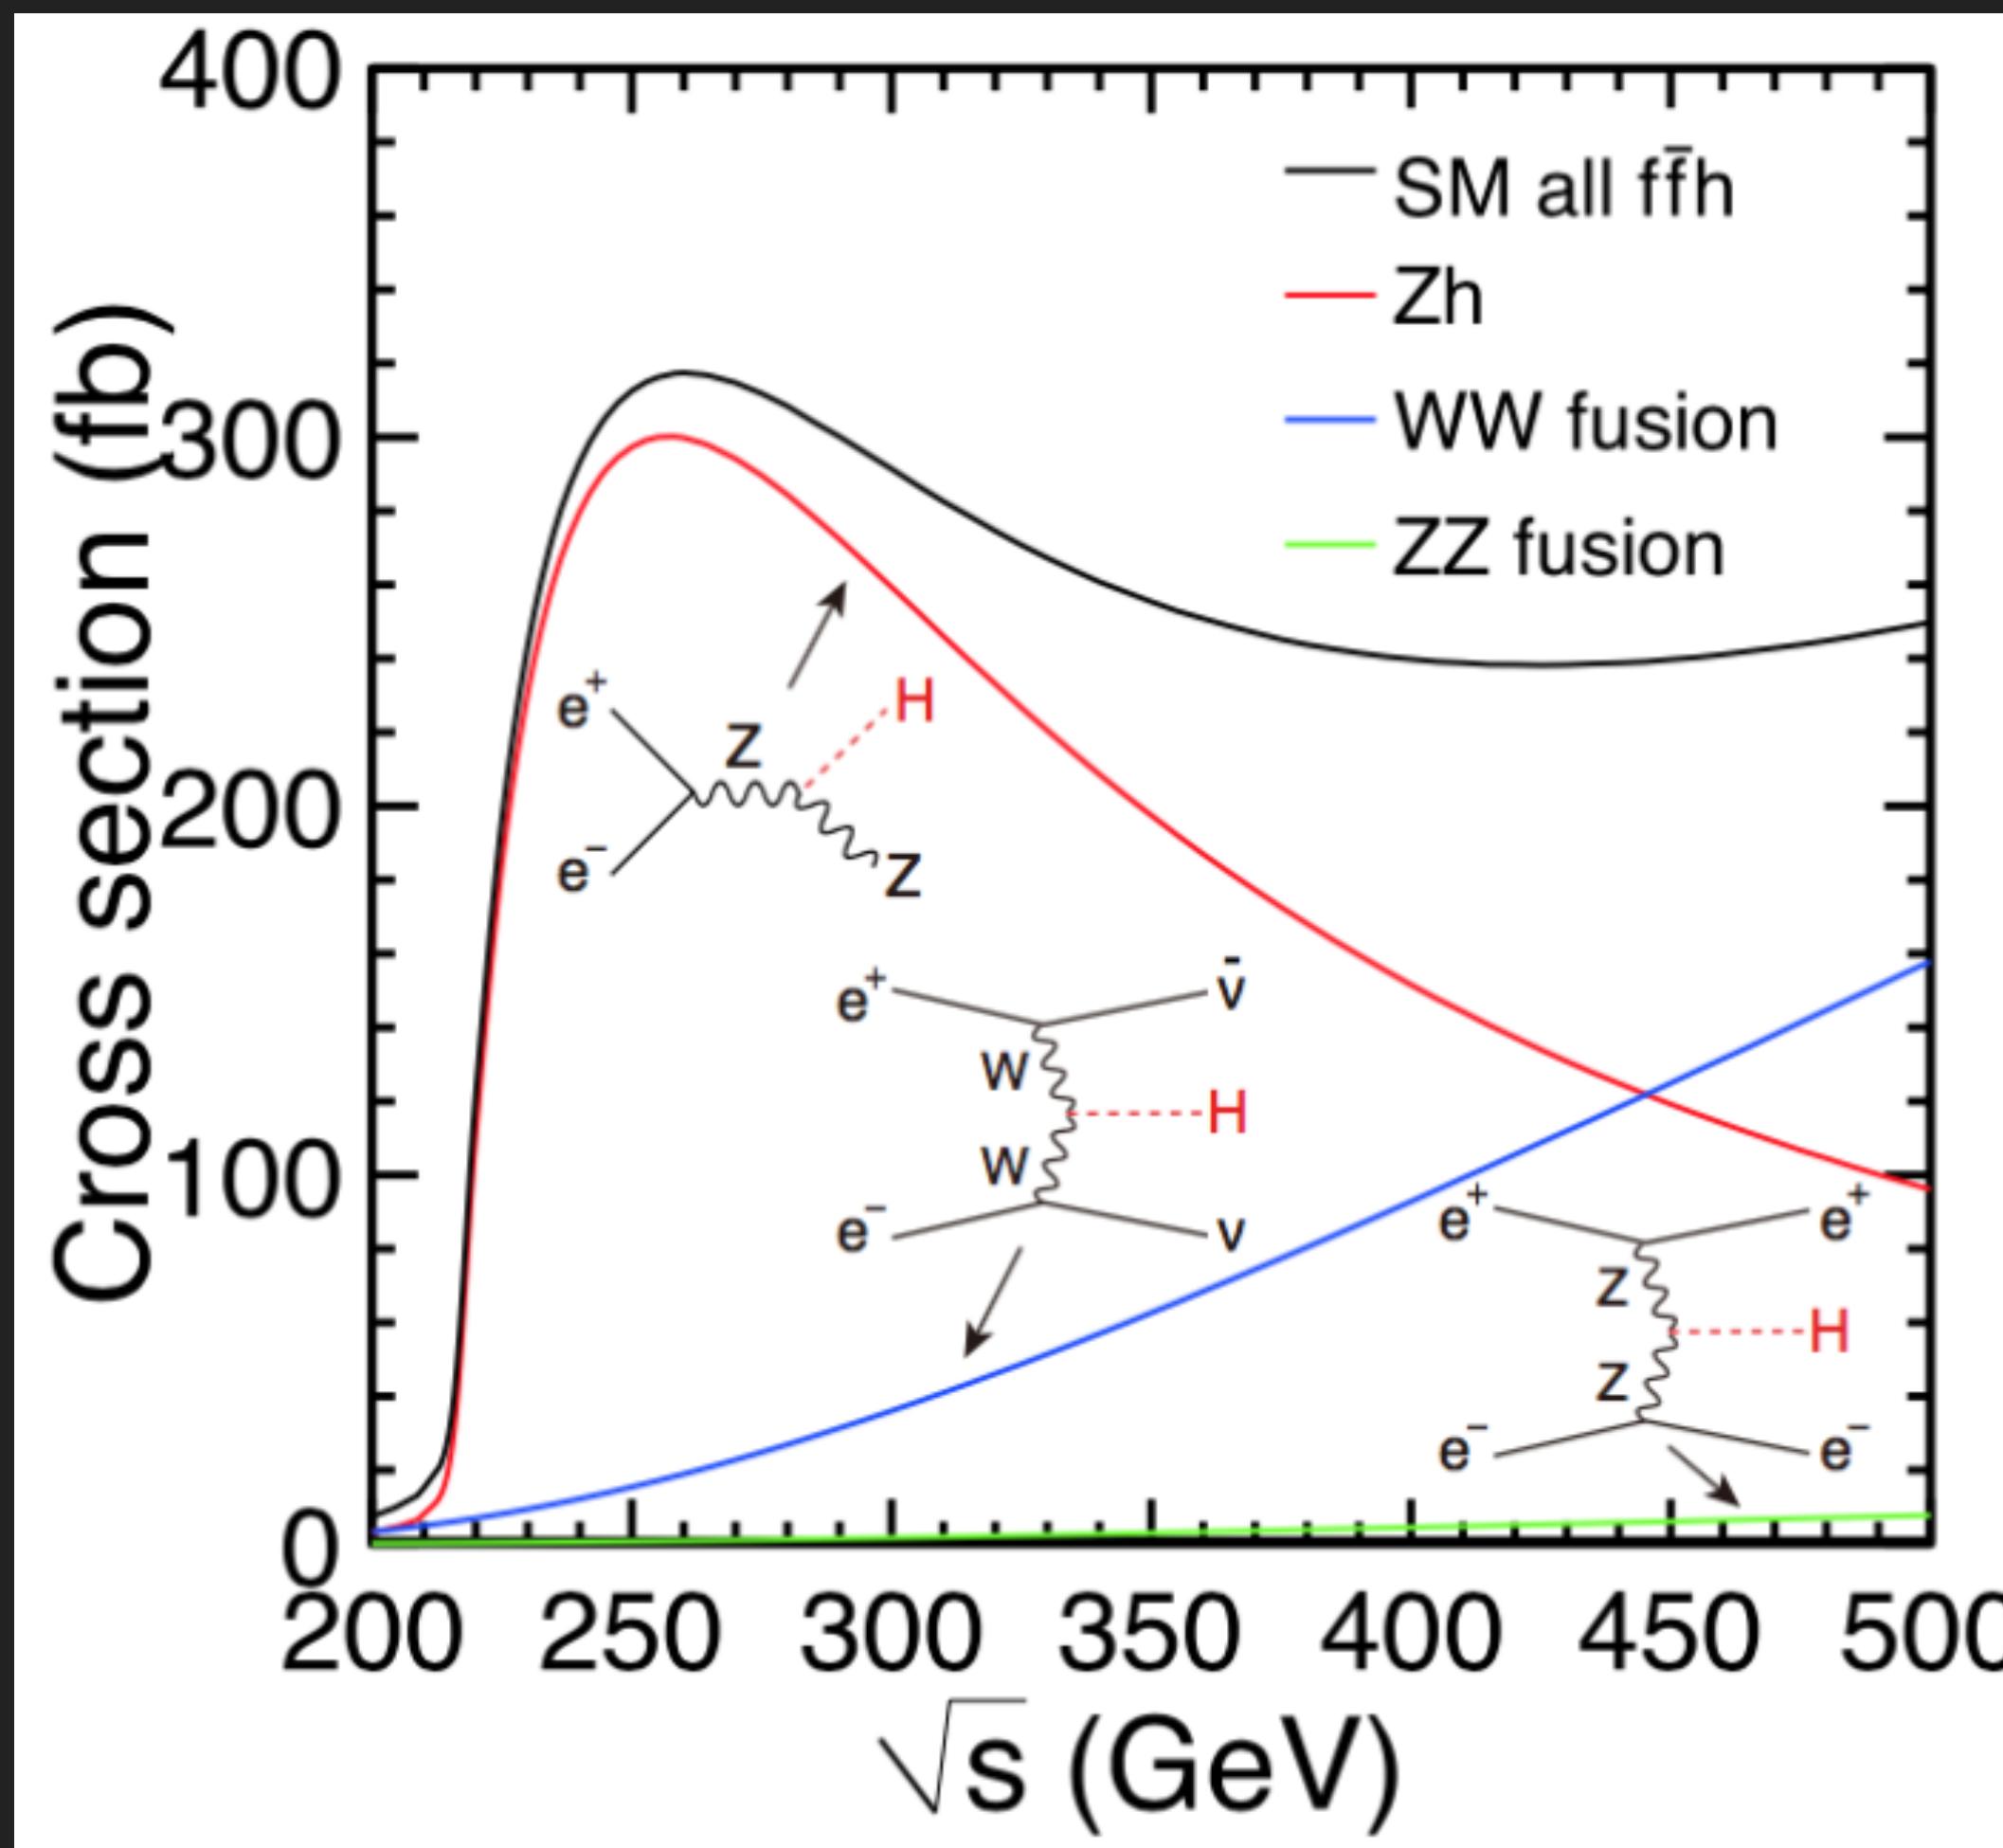

# PHYSICS @ ILC & ILD

$e^+e^- \rightarrow H( \rightarrow b\bar{b}) Z( \rightarrow q\bar{q})$  @  $\sqrt{s} = 250$  GeV

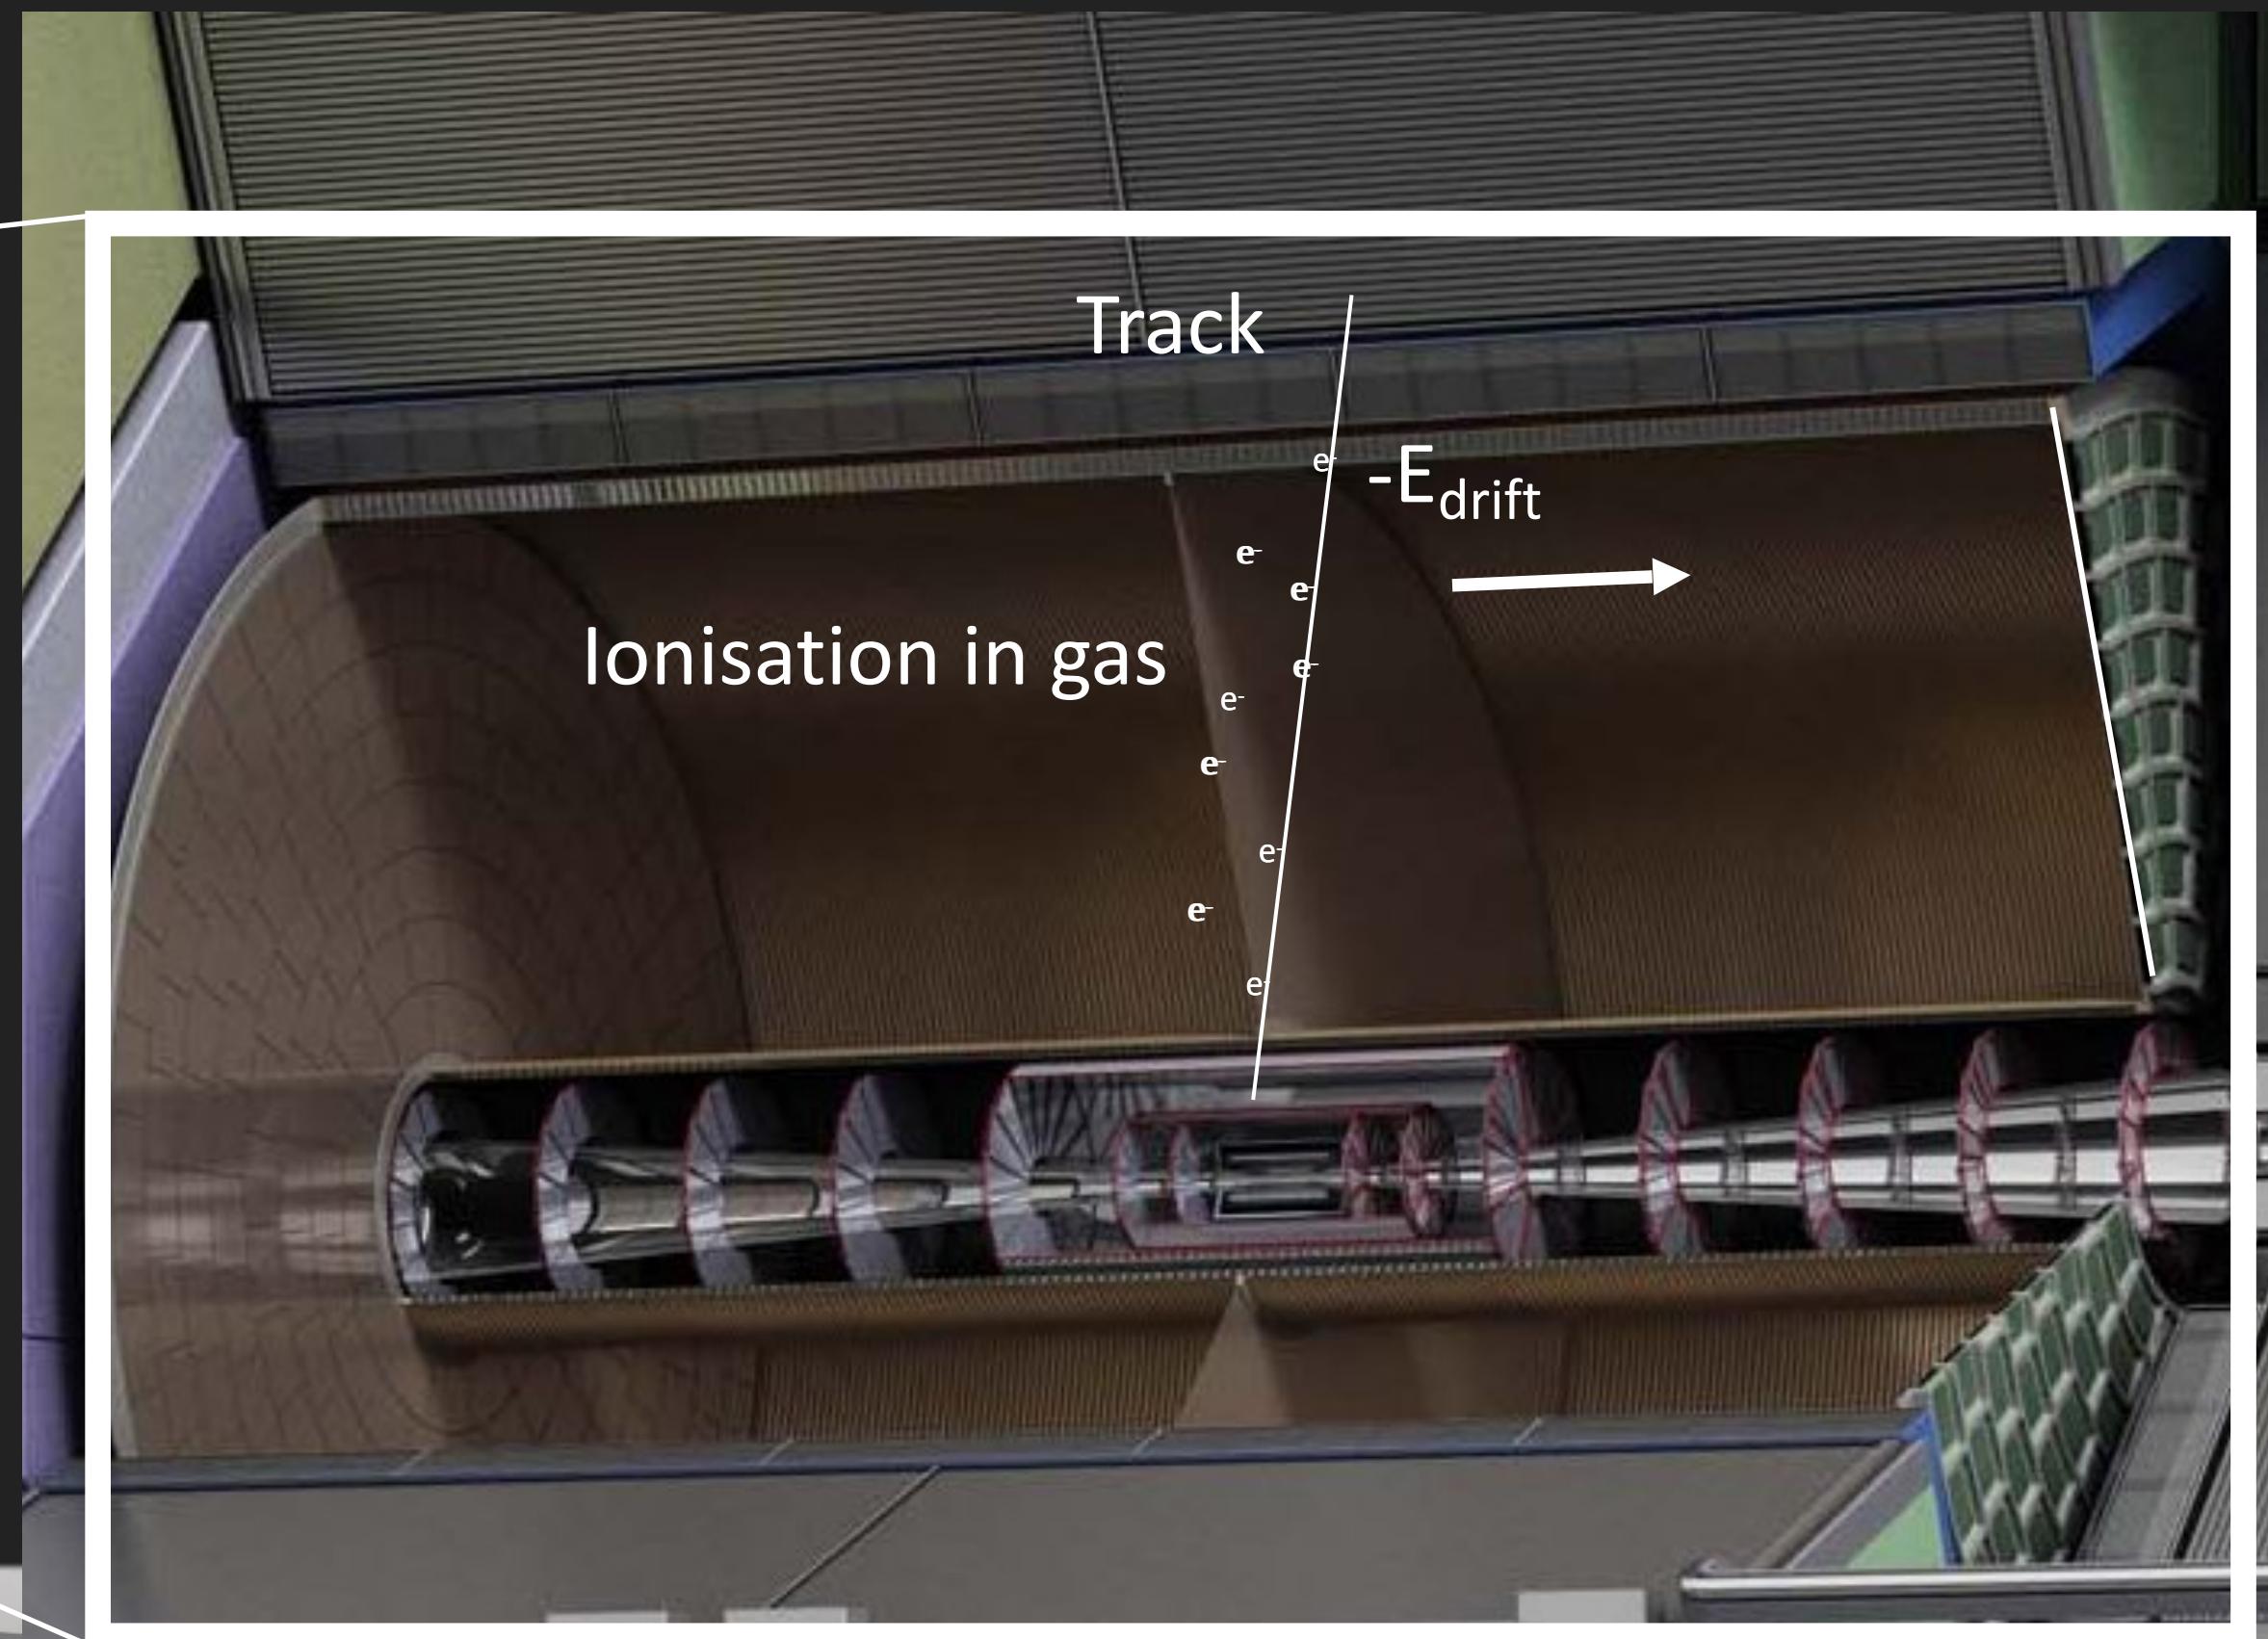

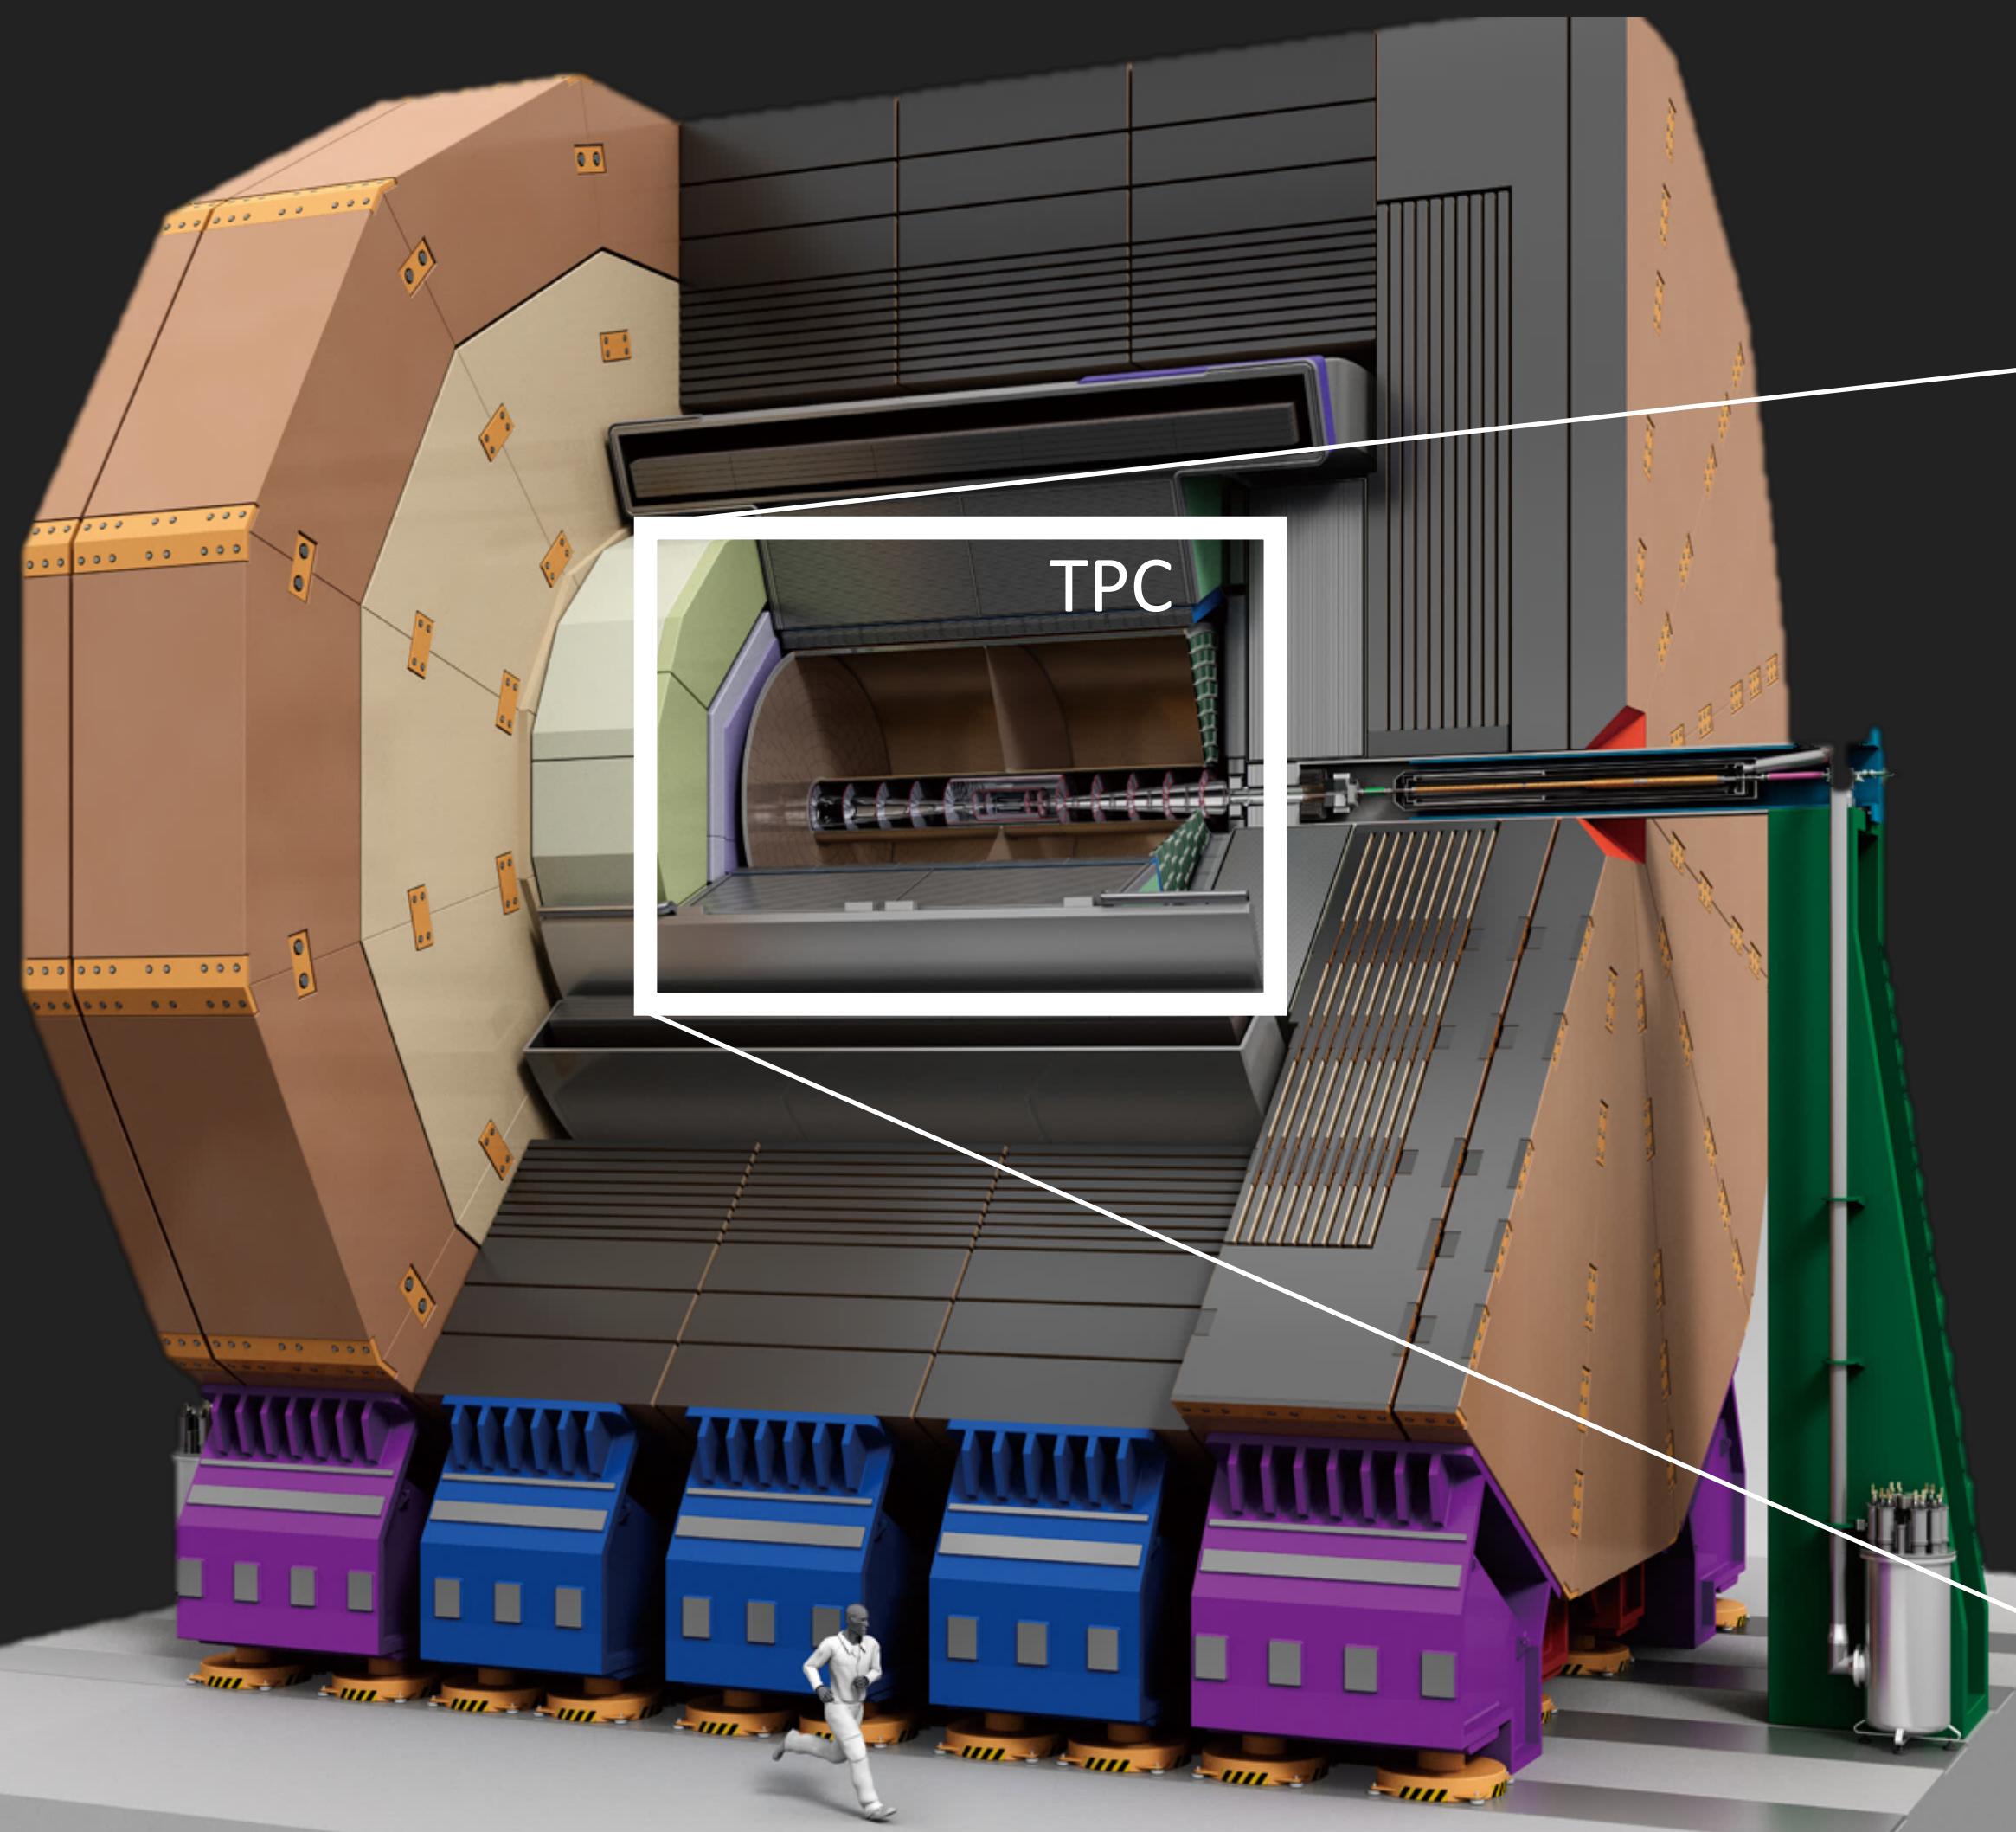

# PHYSICS @ ILC & ILD

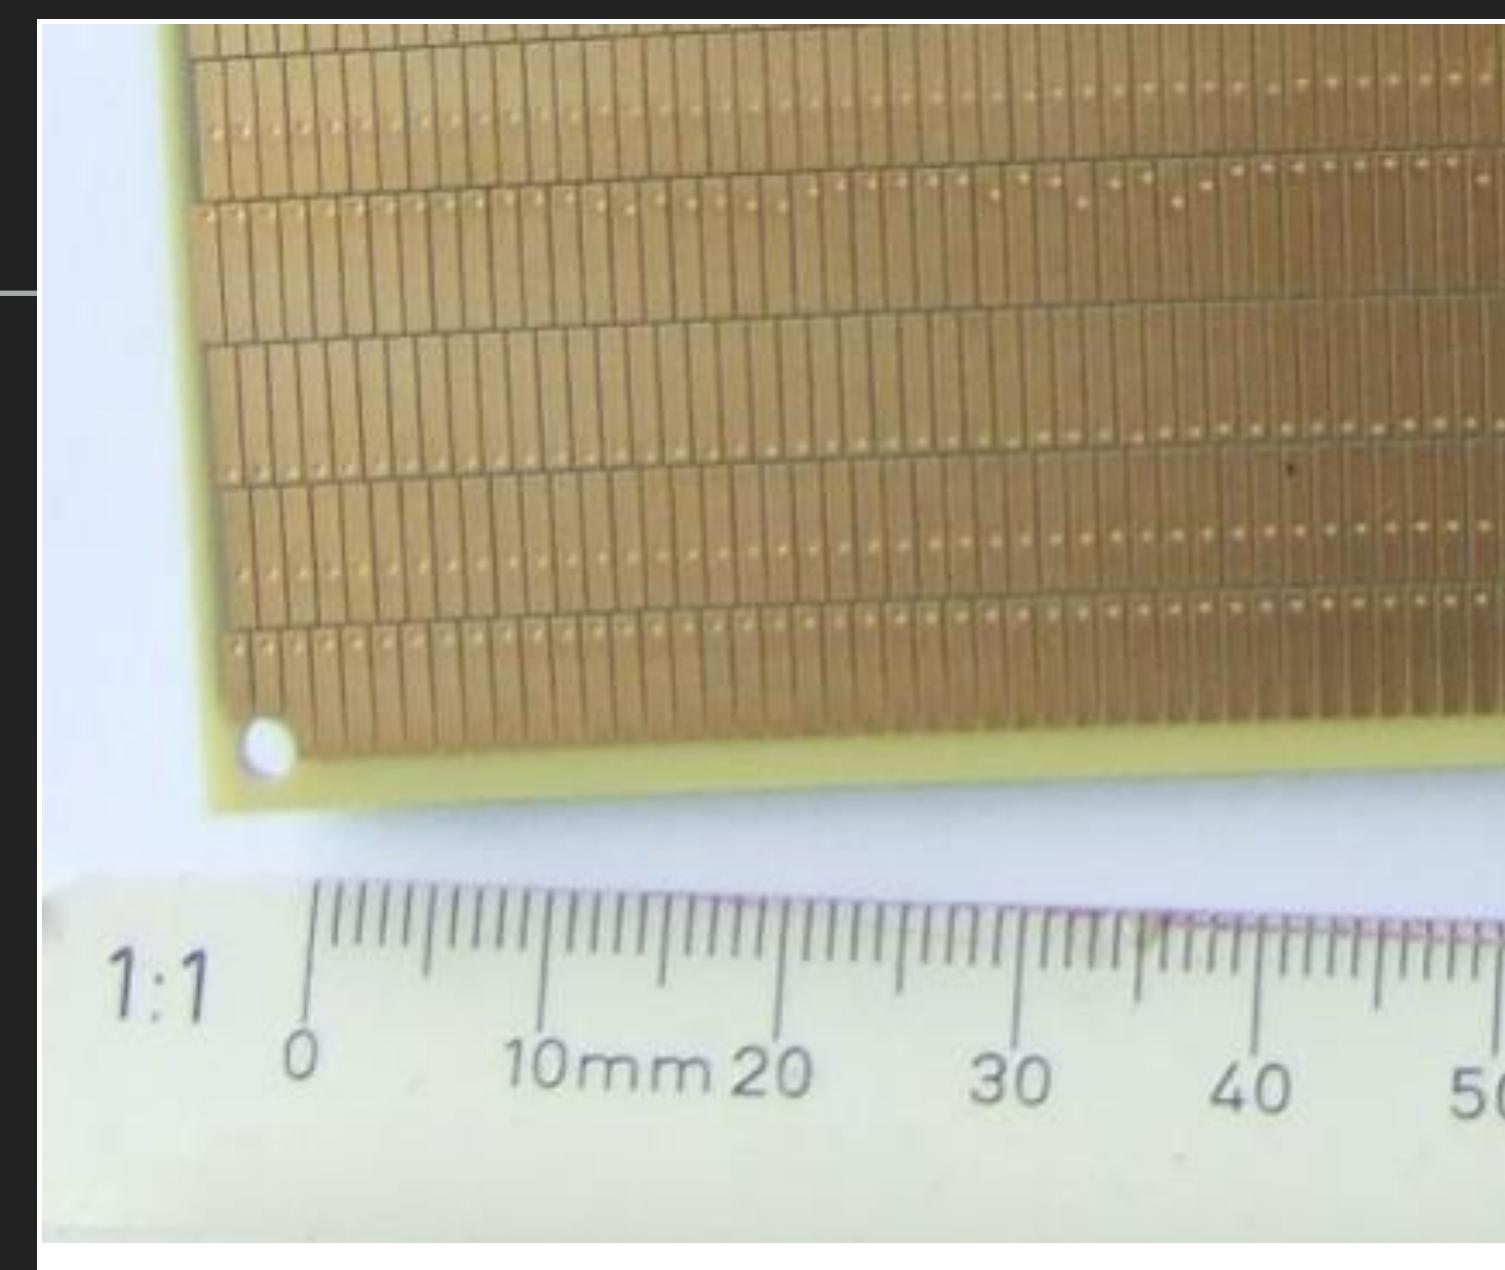

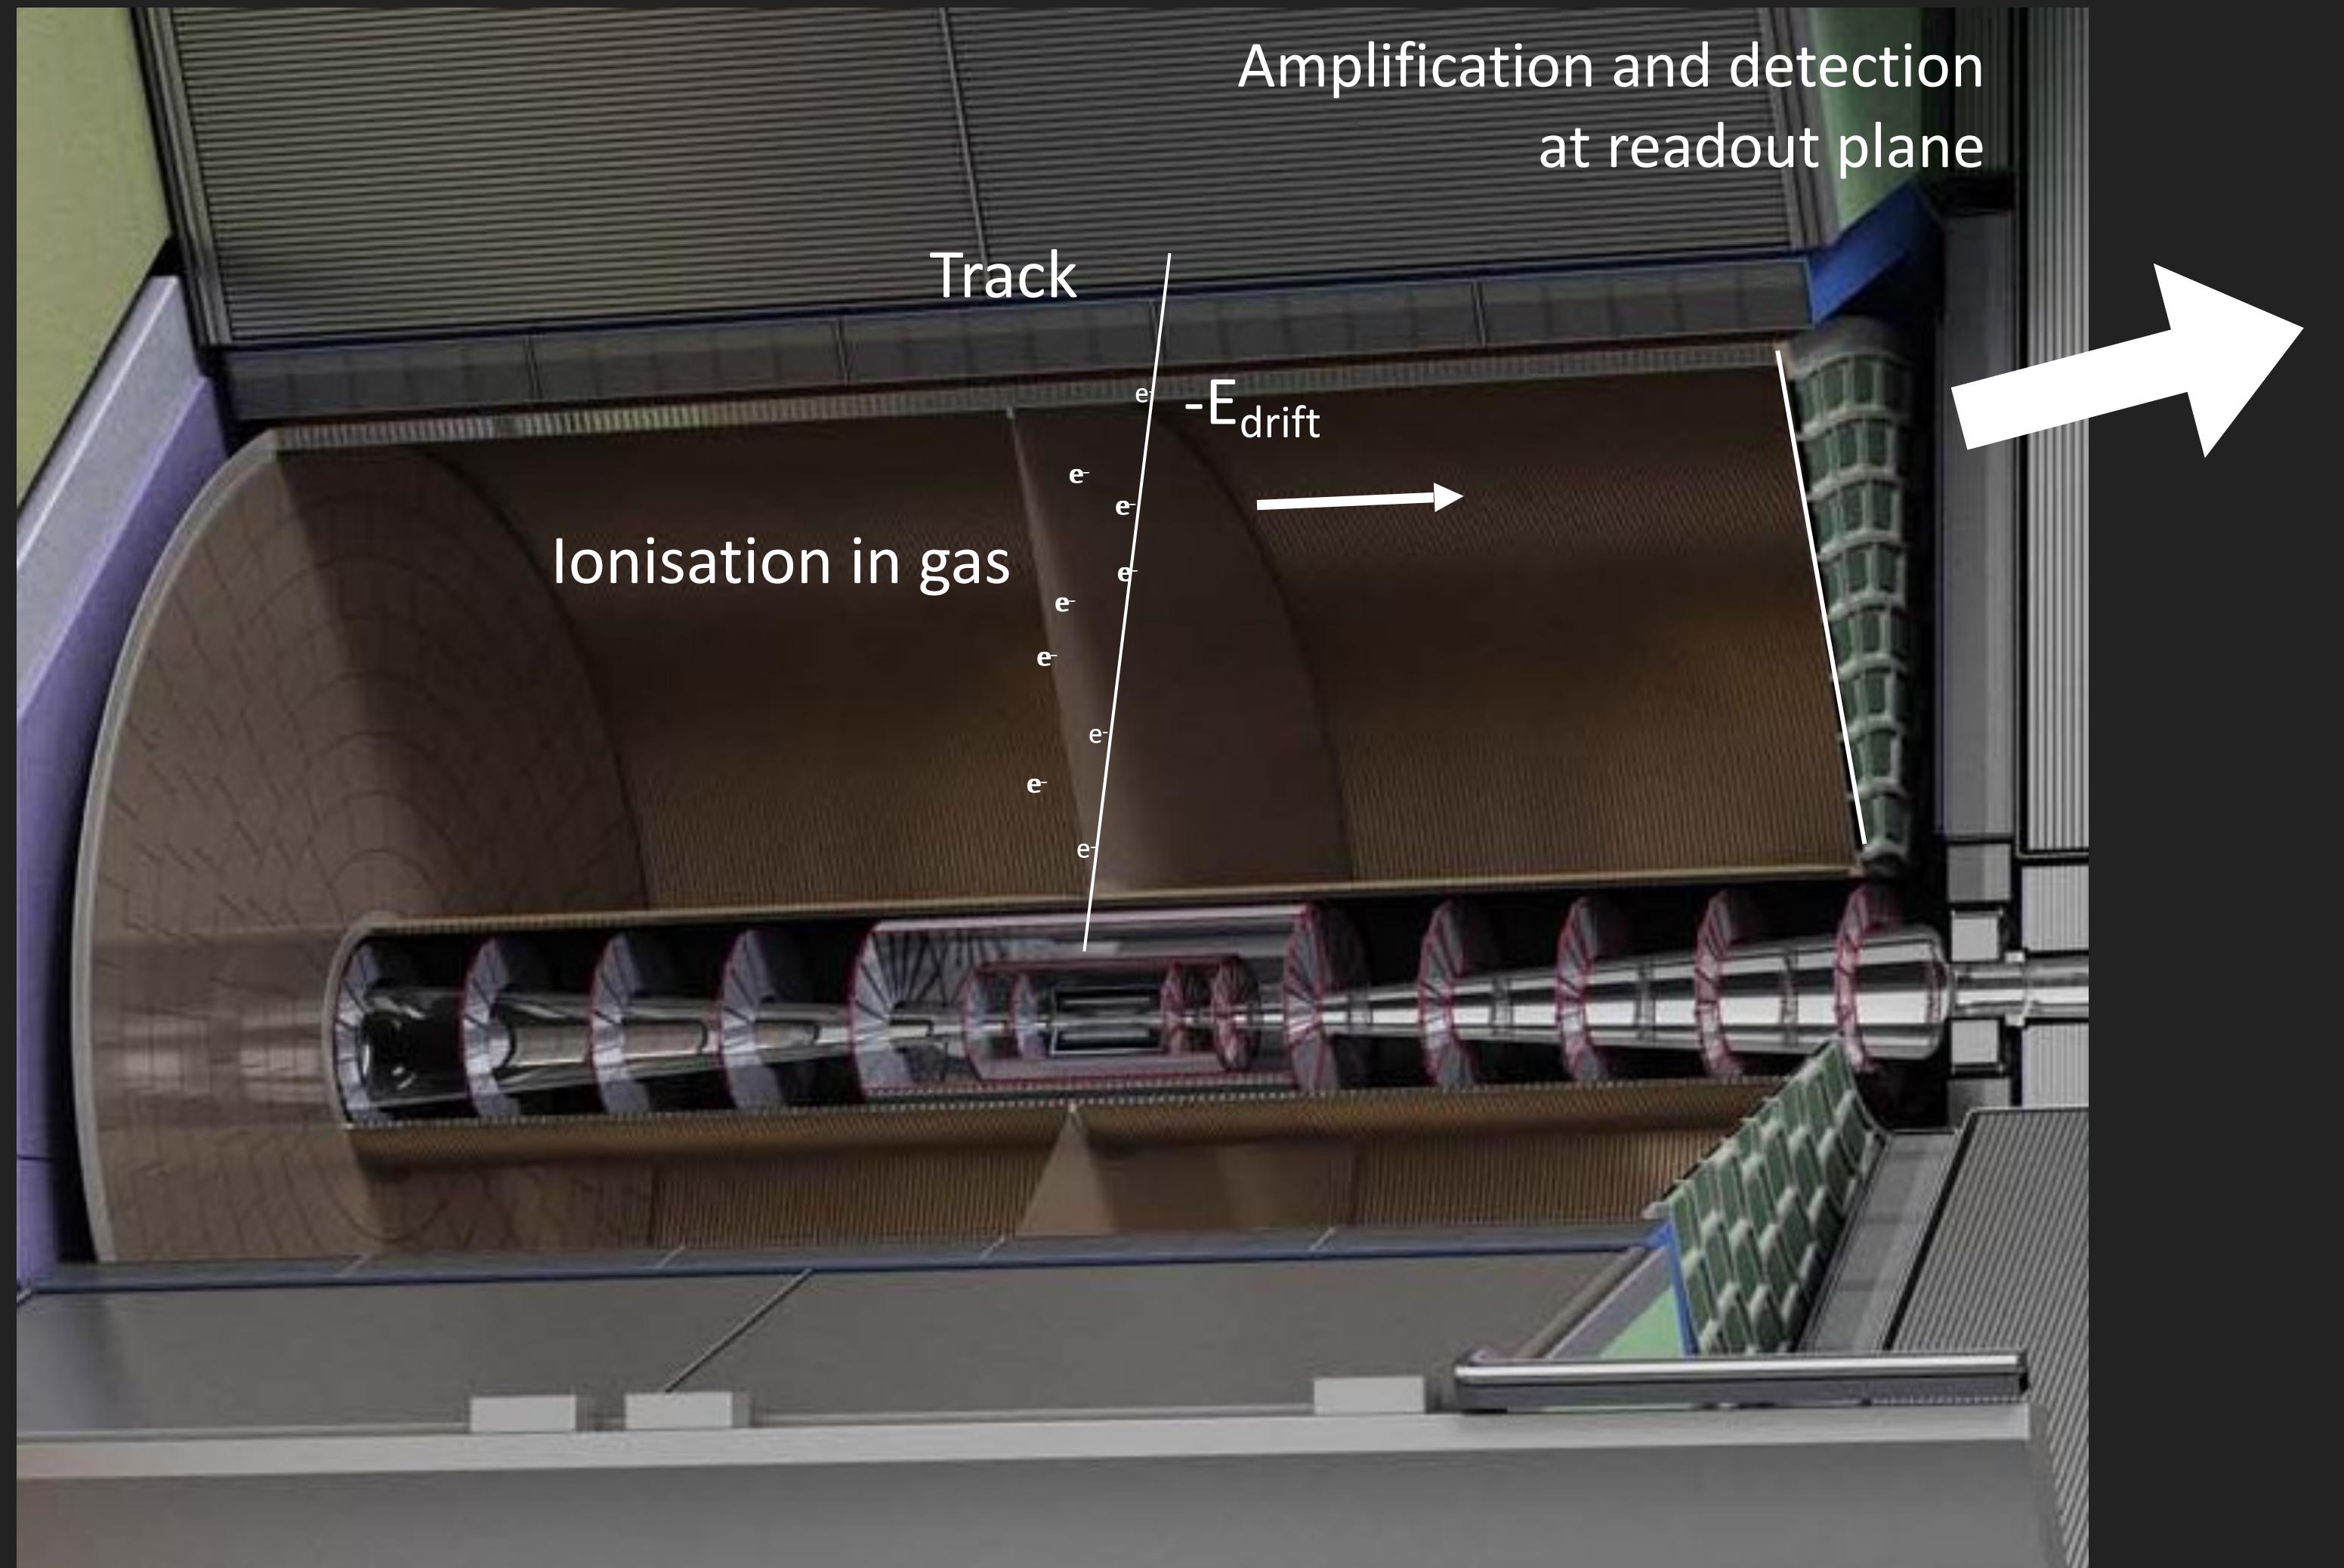

LEPCOL

ILD

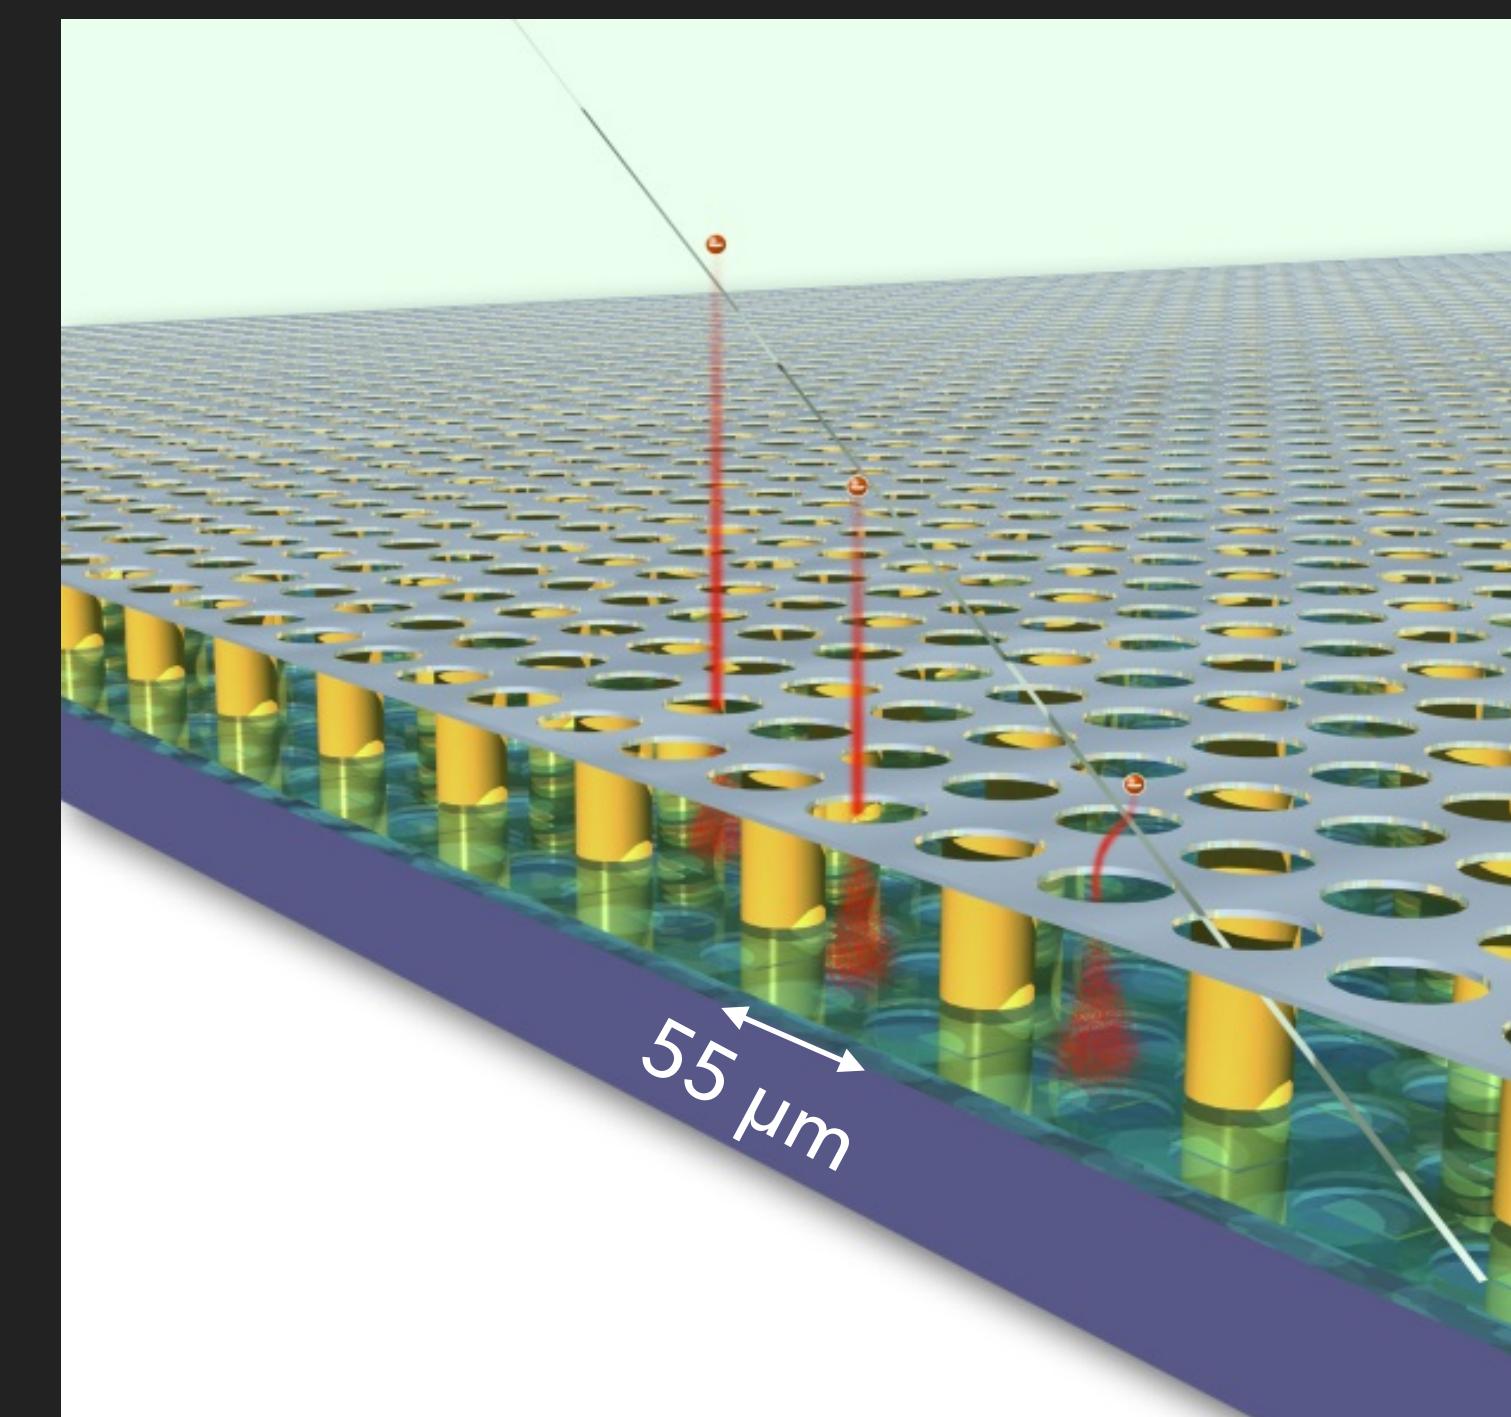

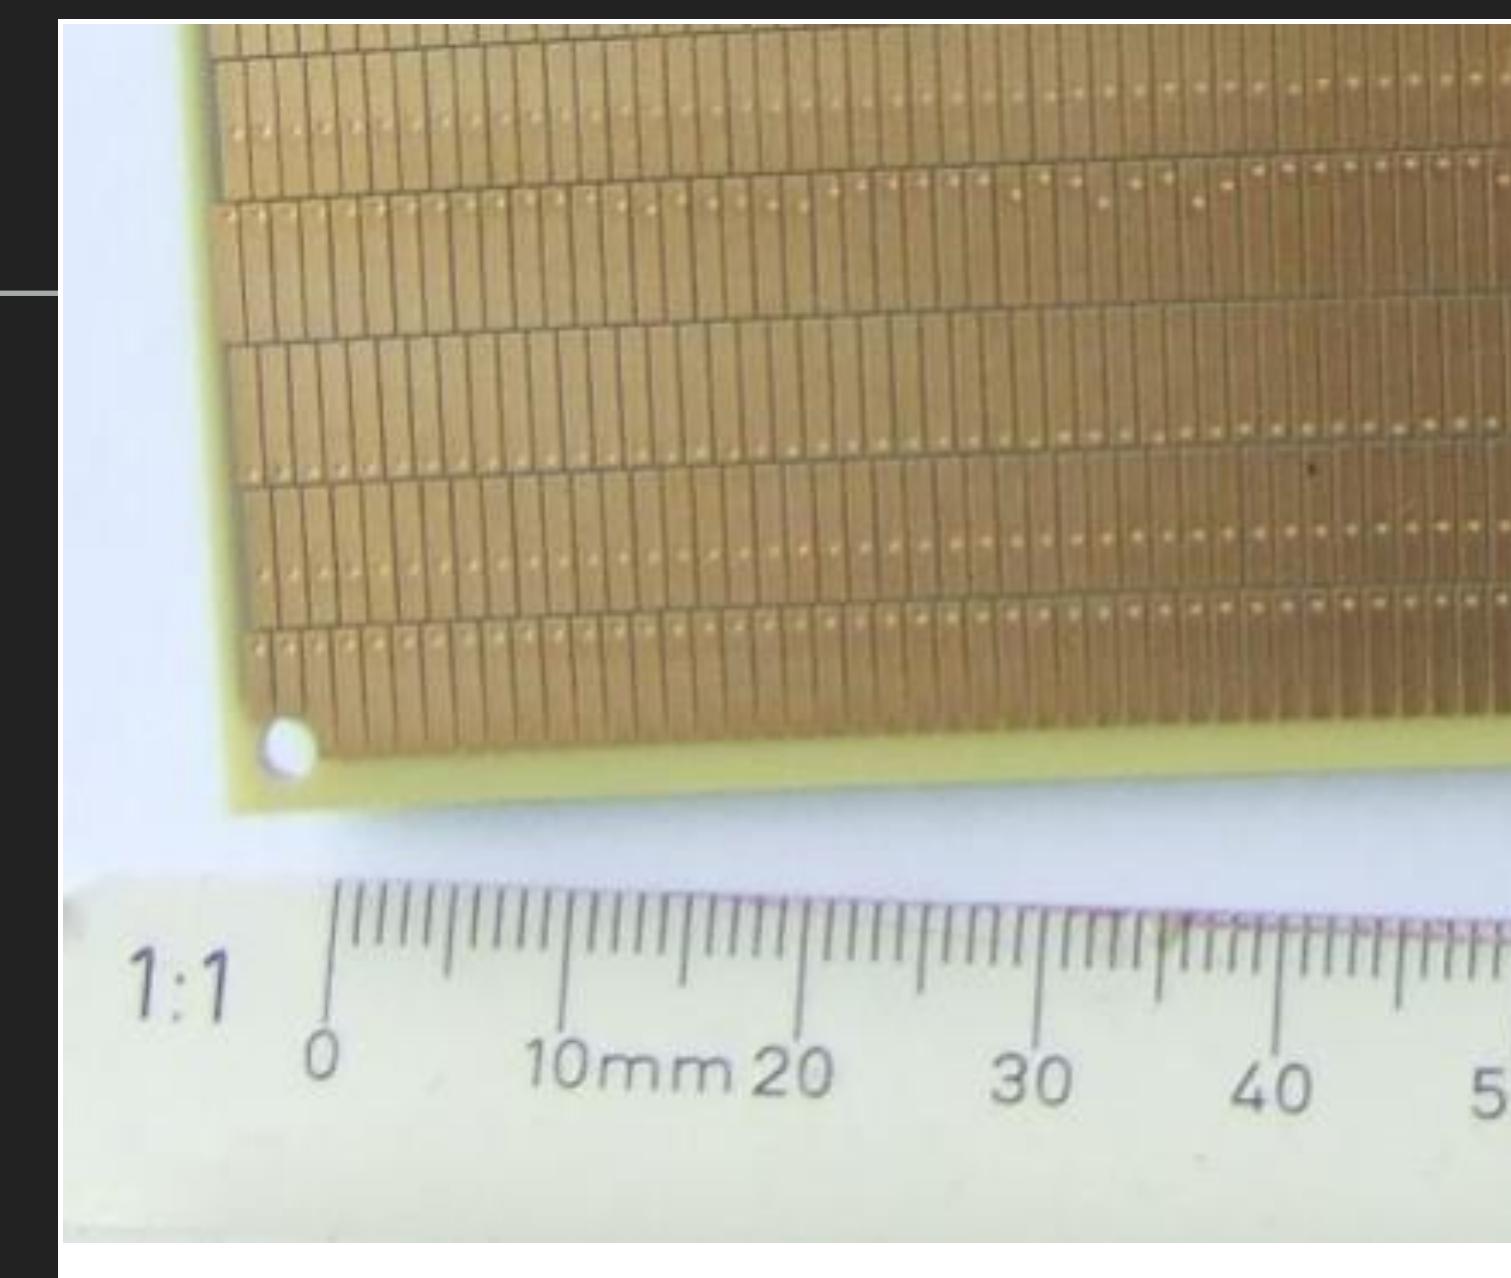

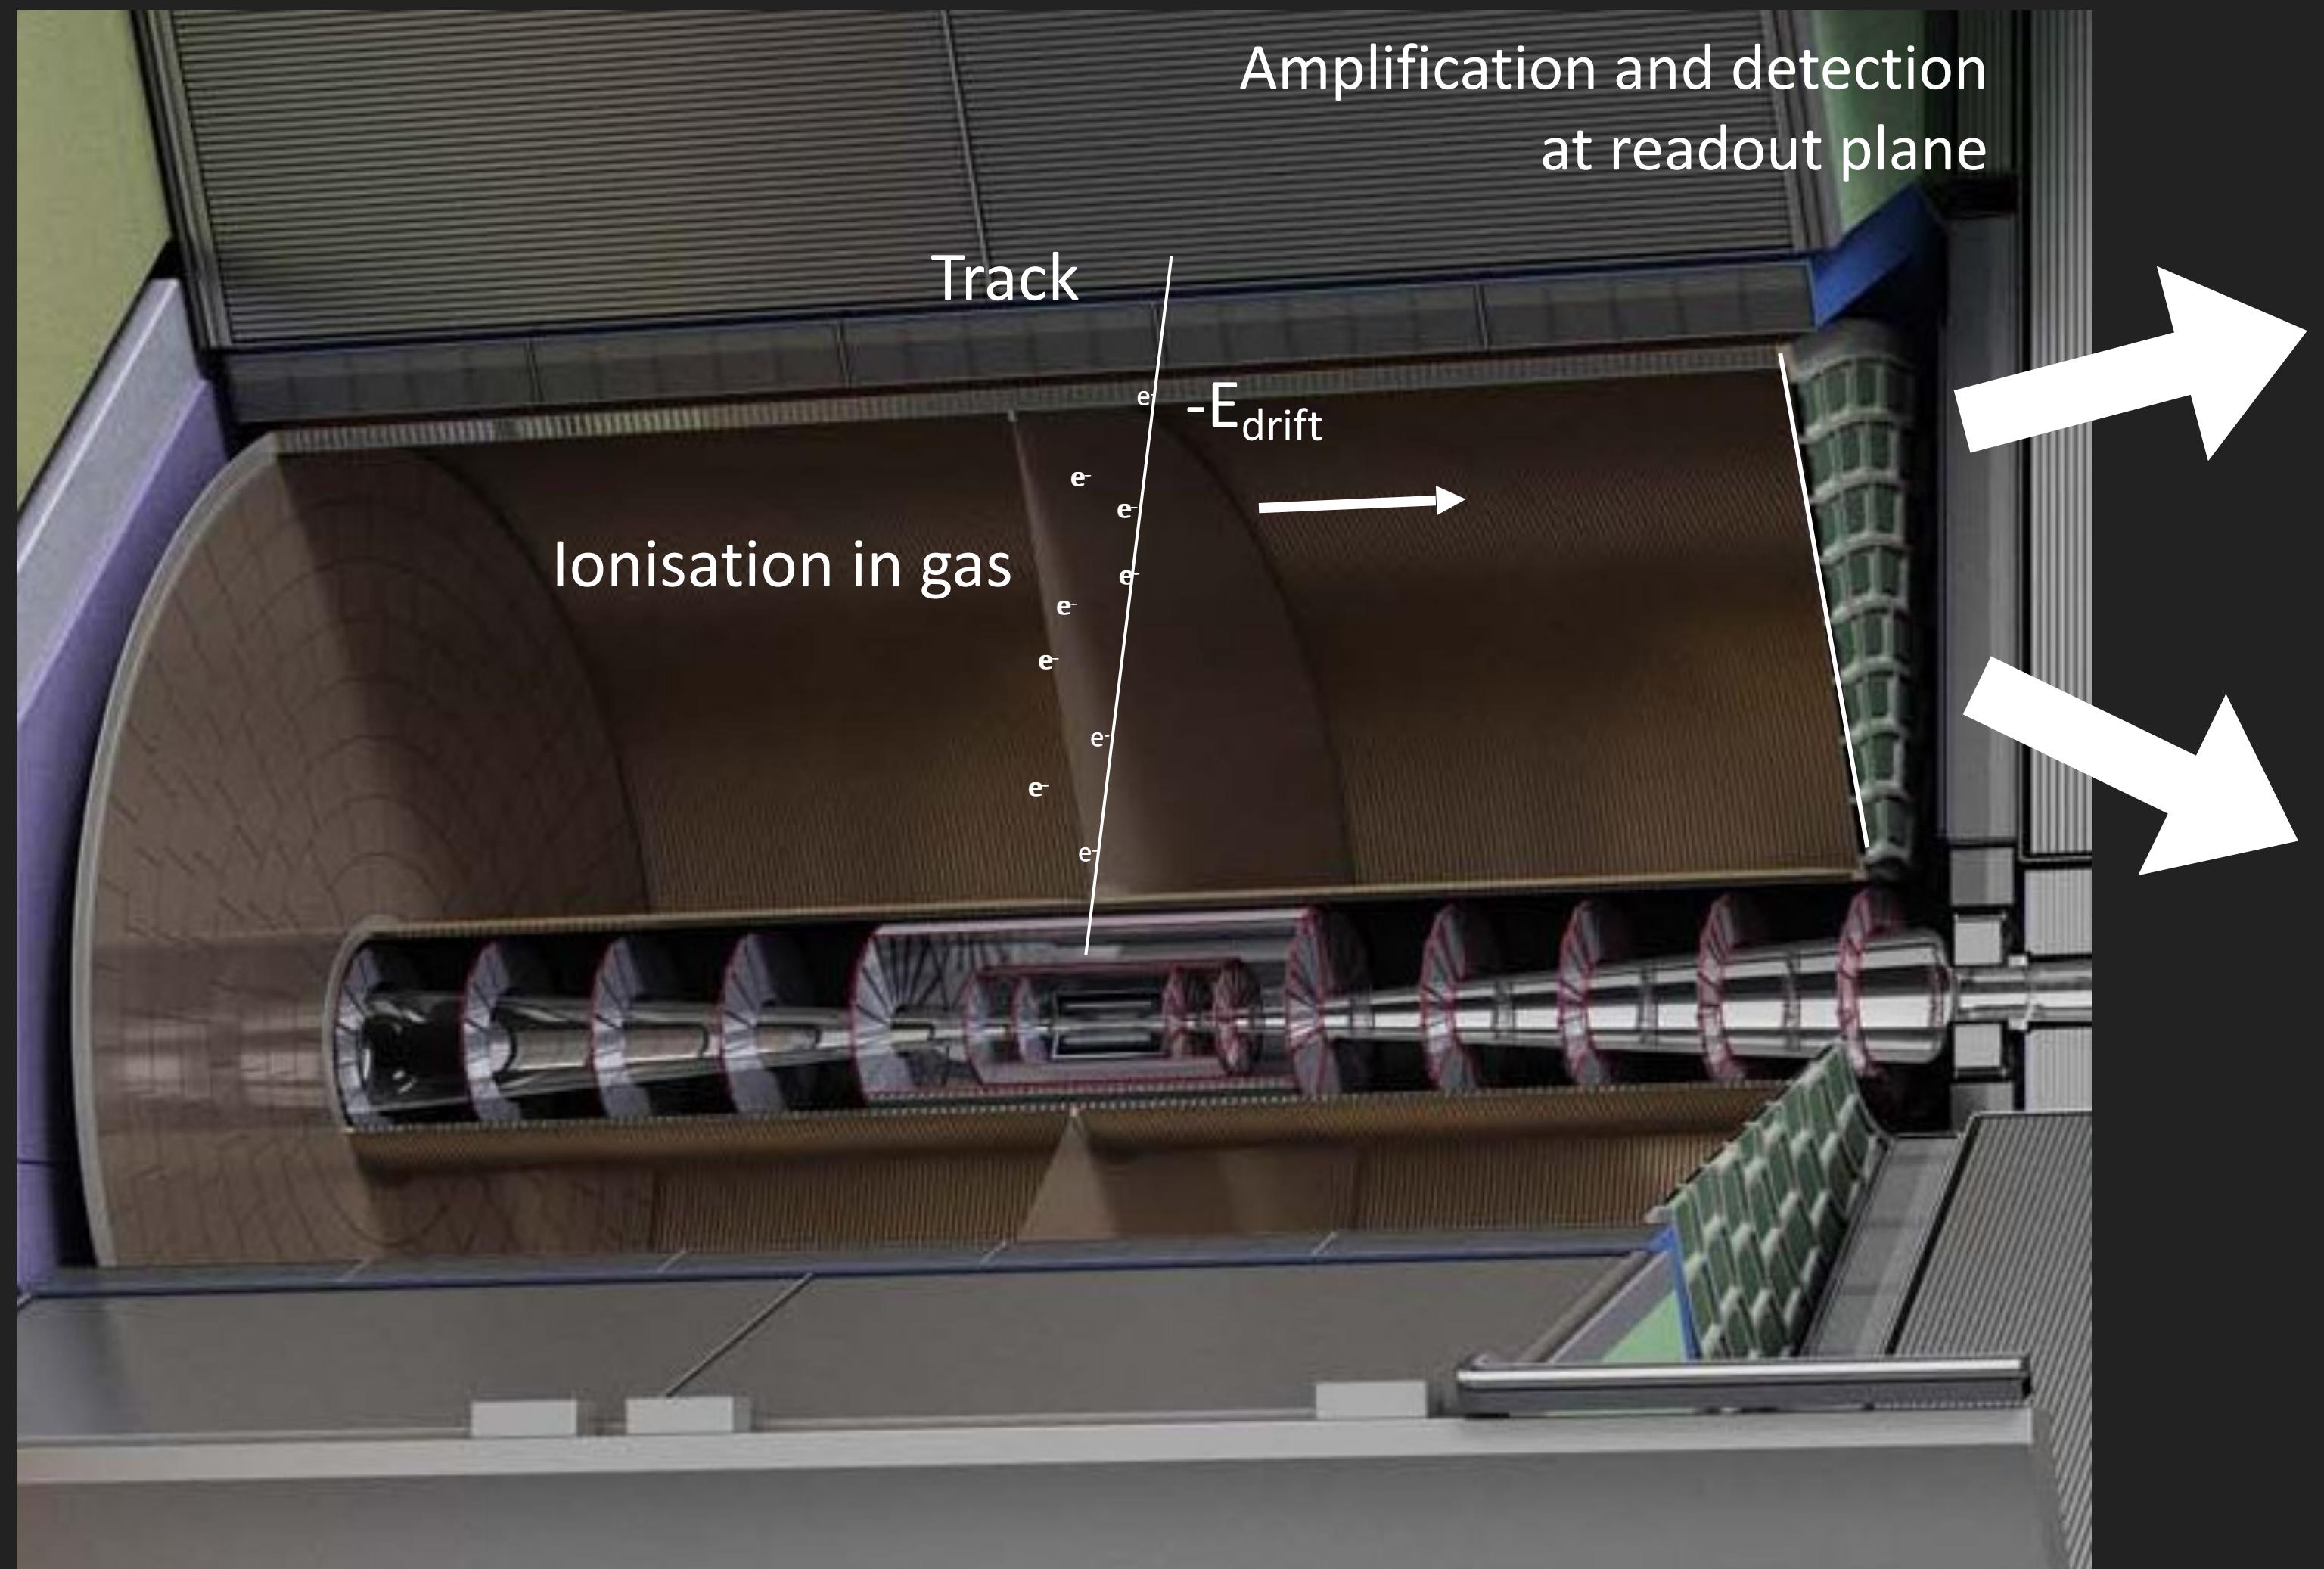

## TPC

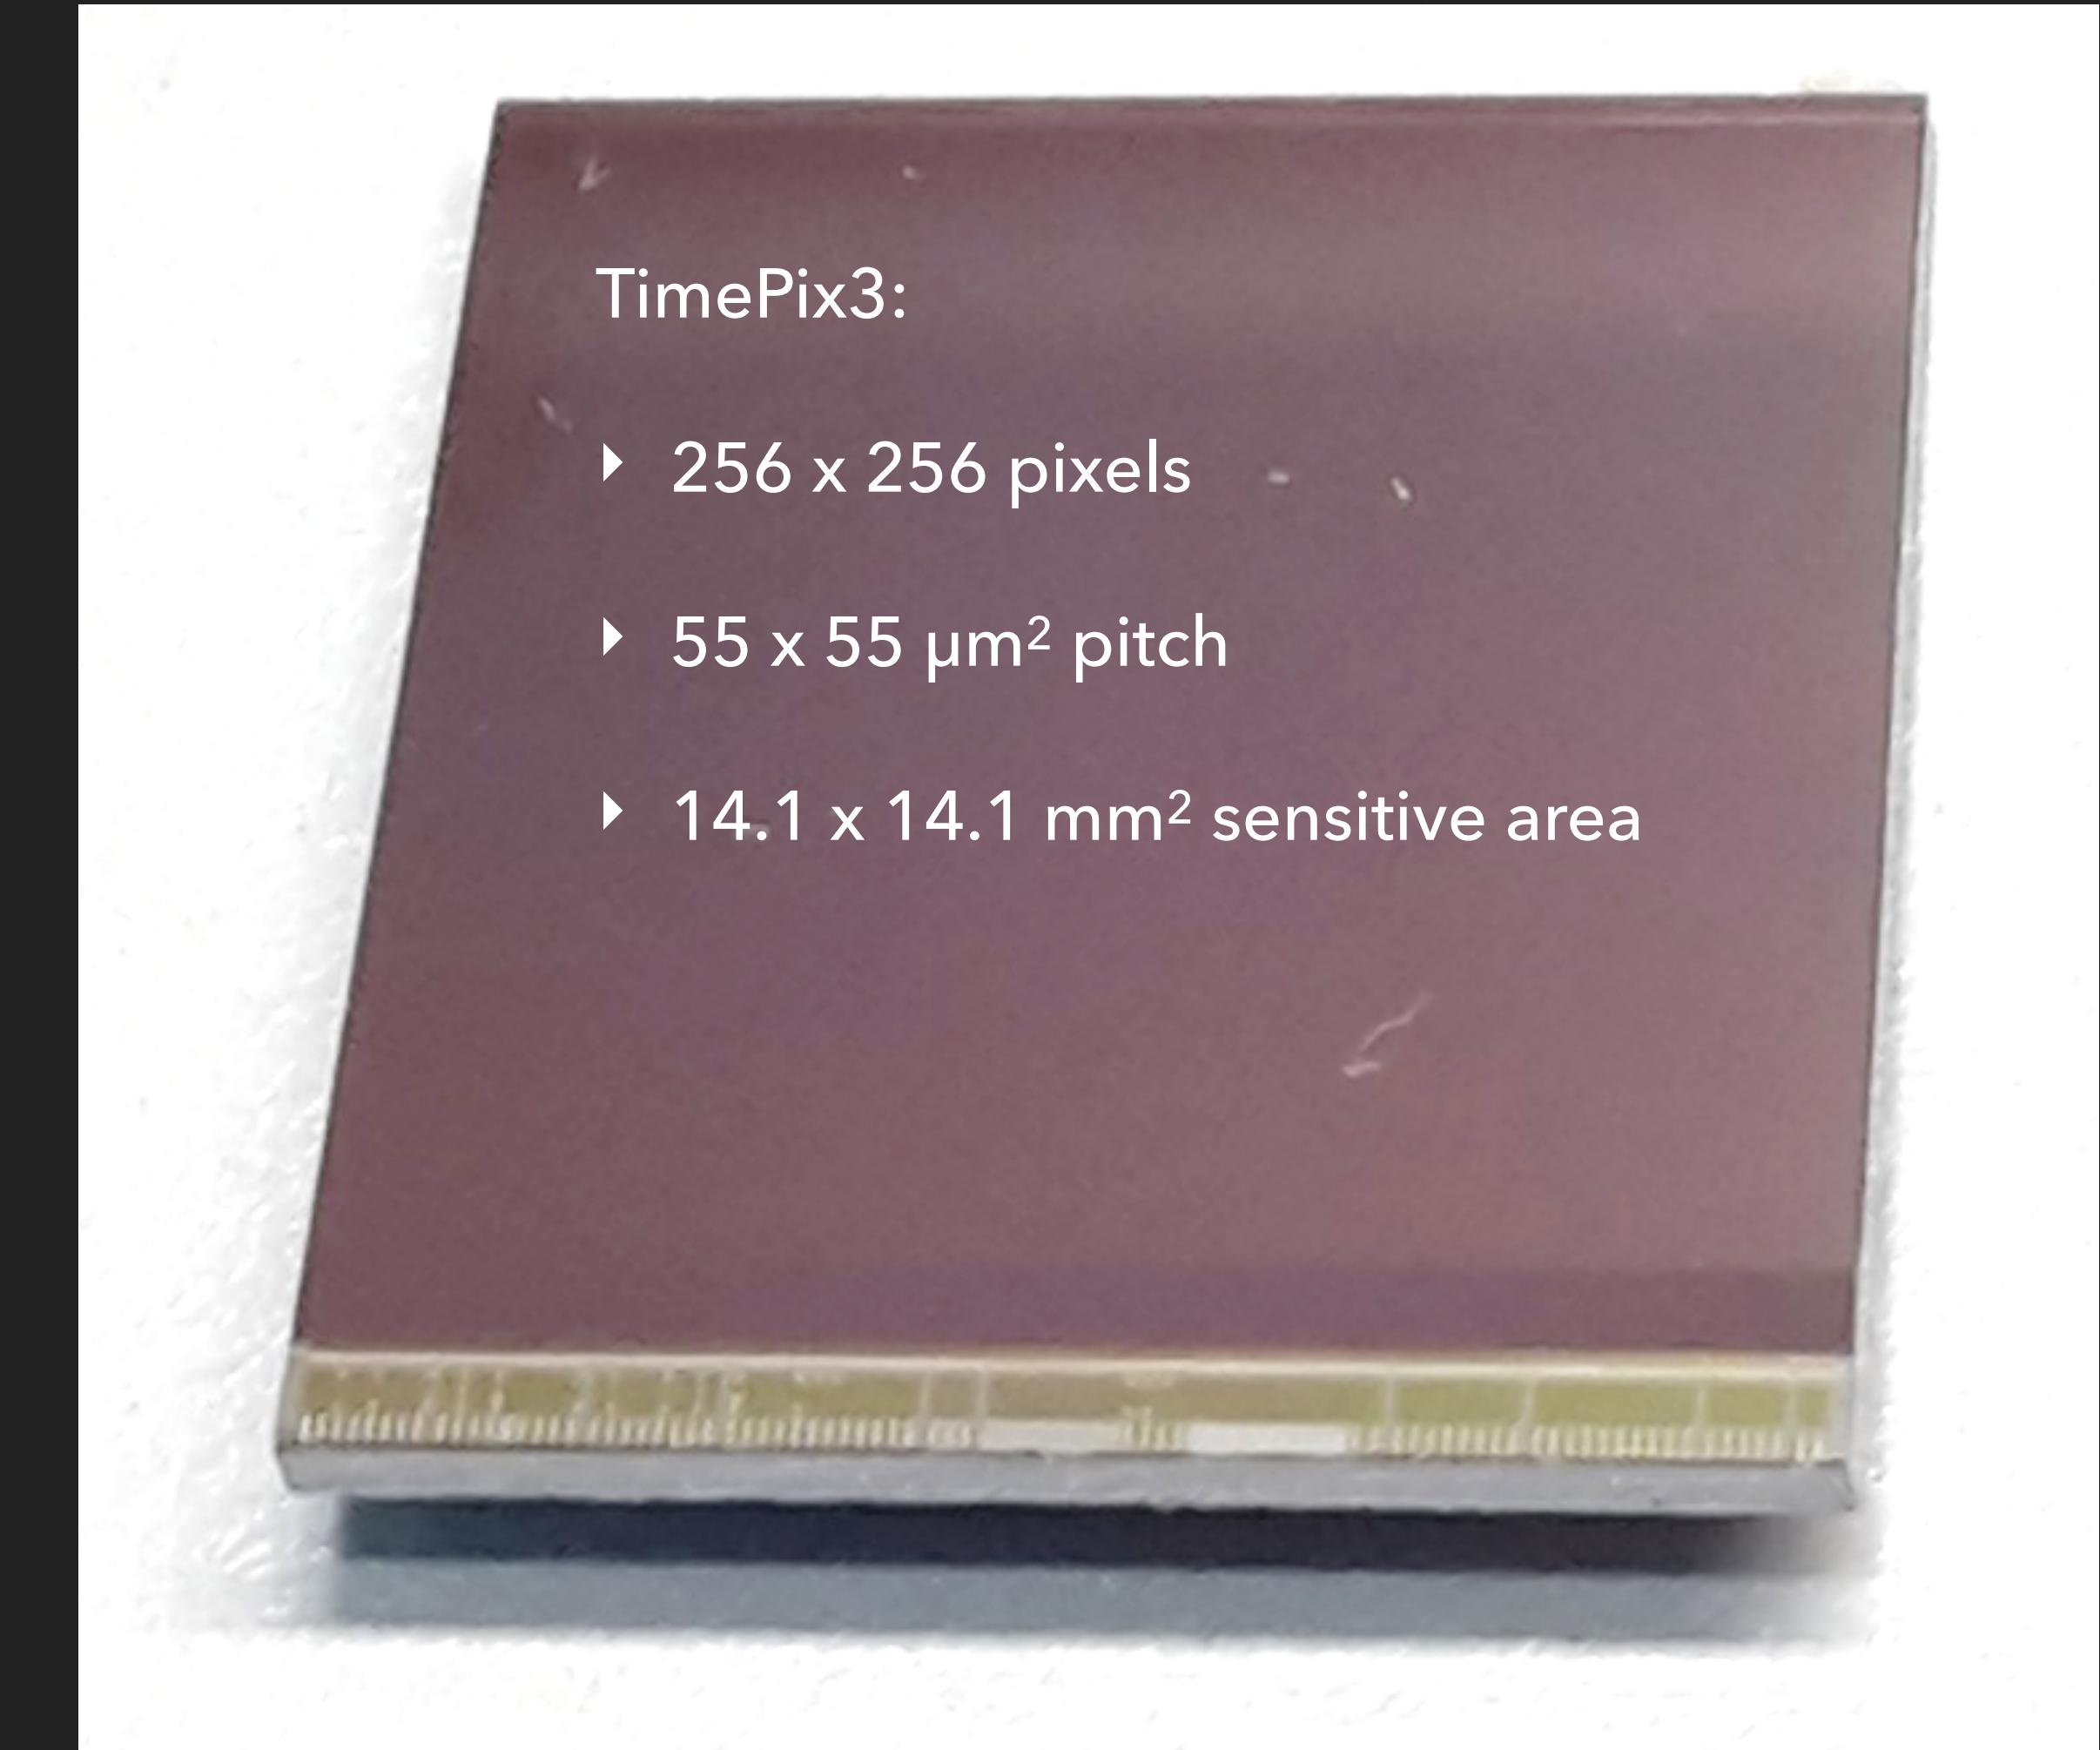

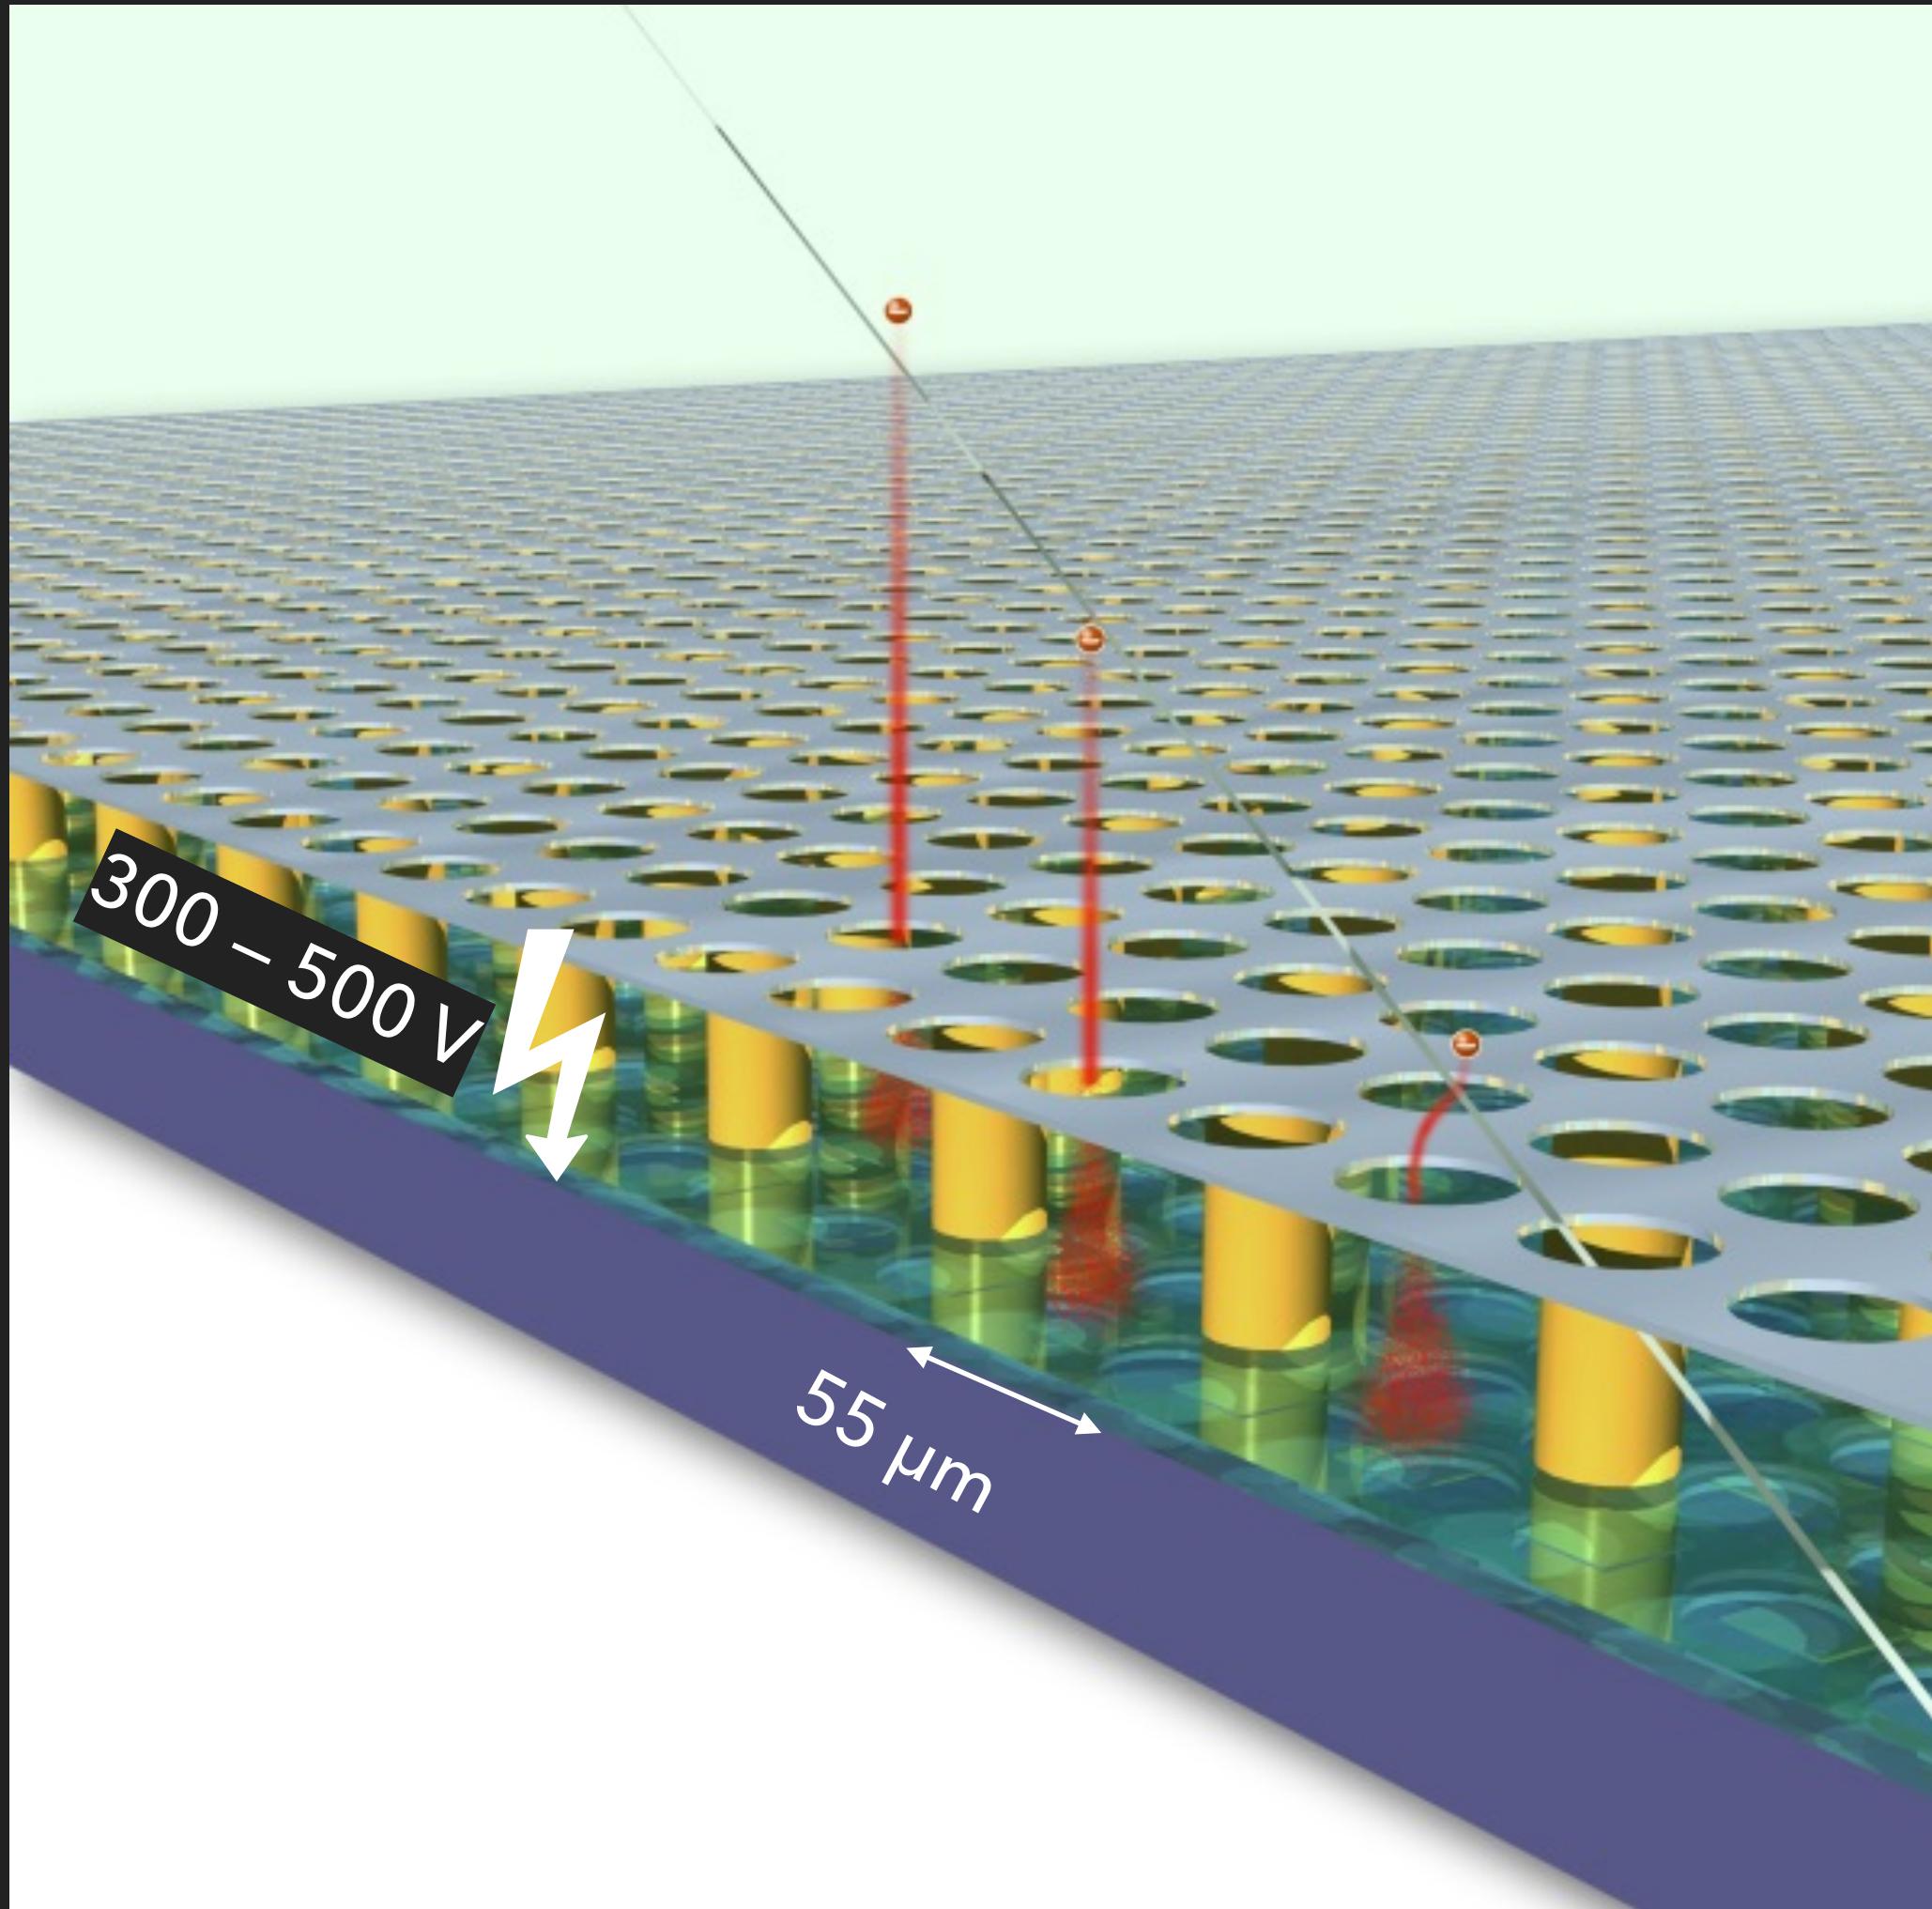

LEPCOL

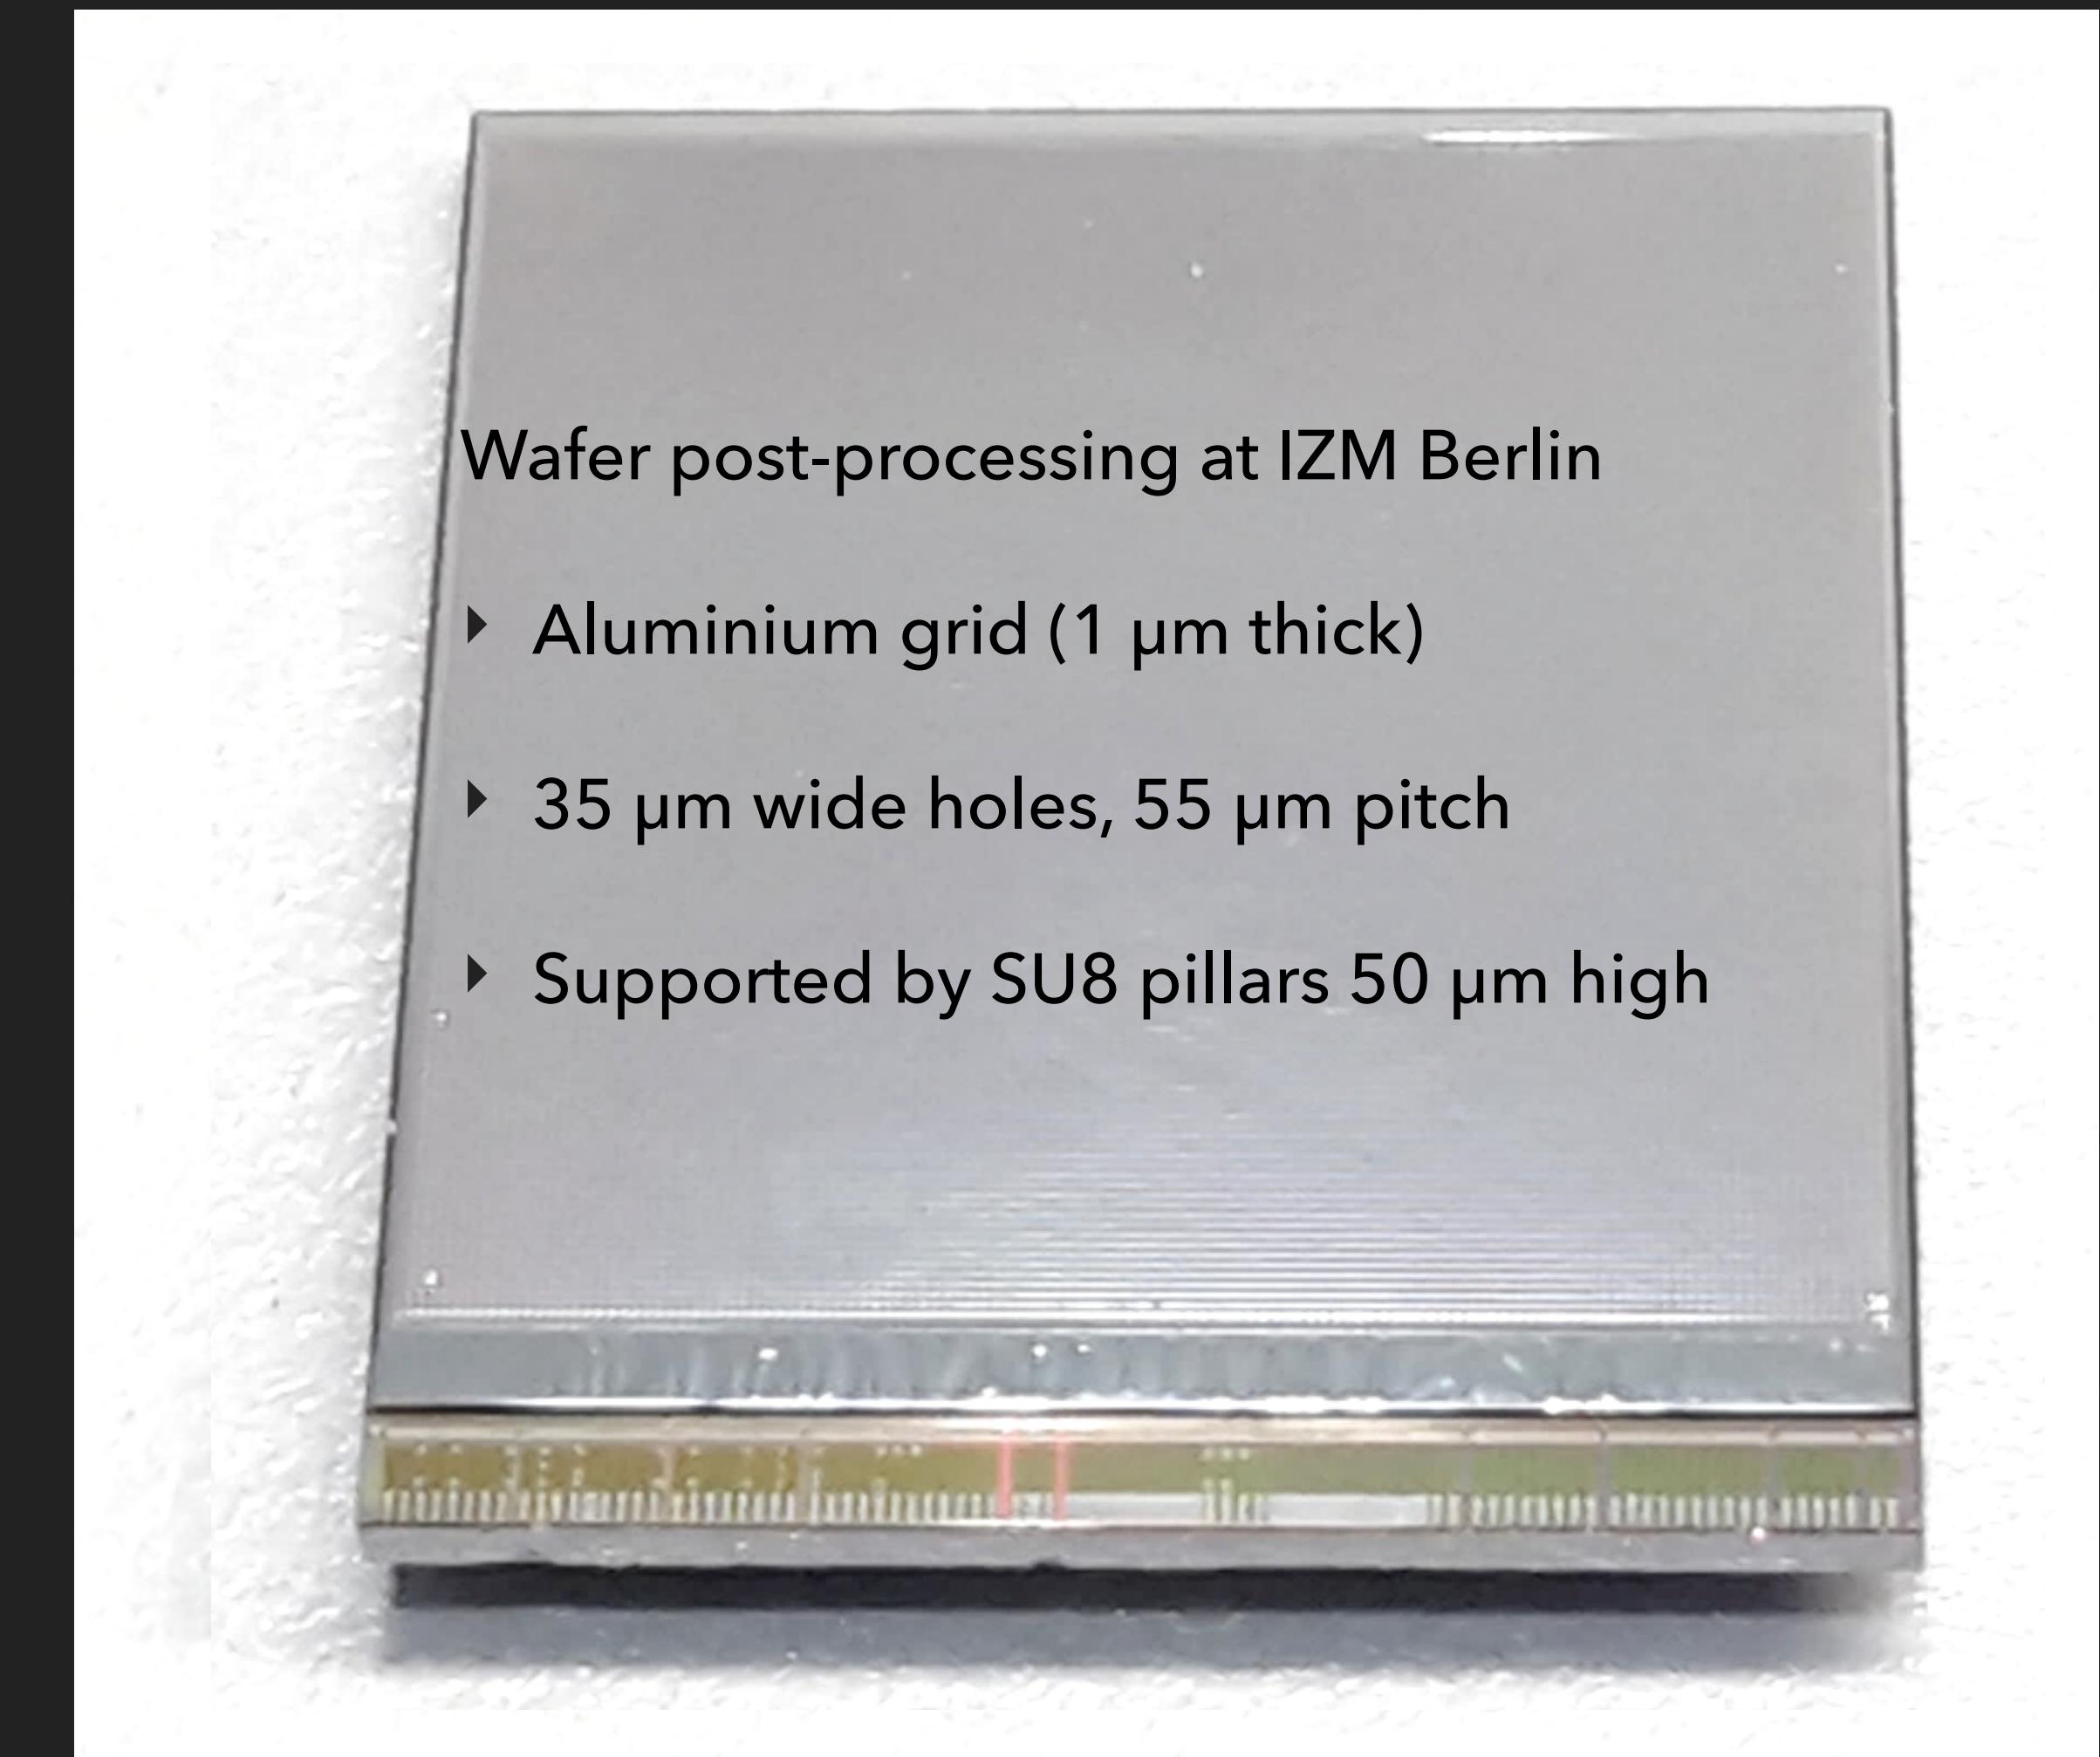

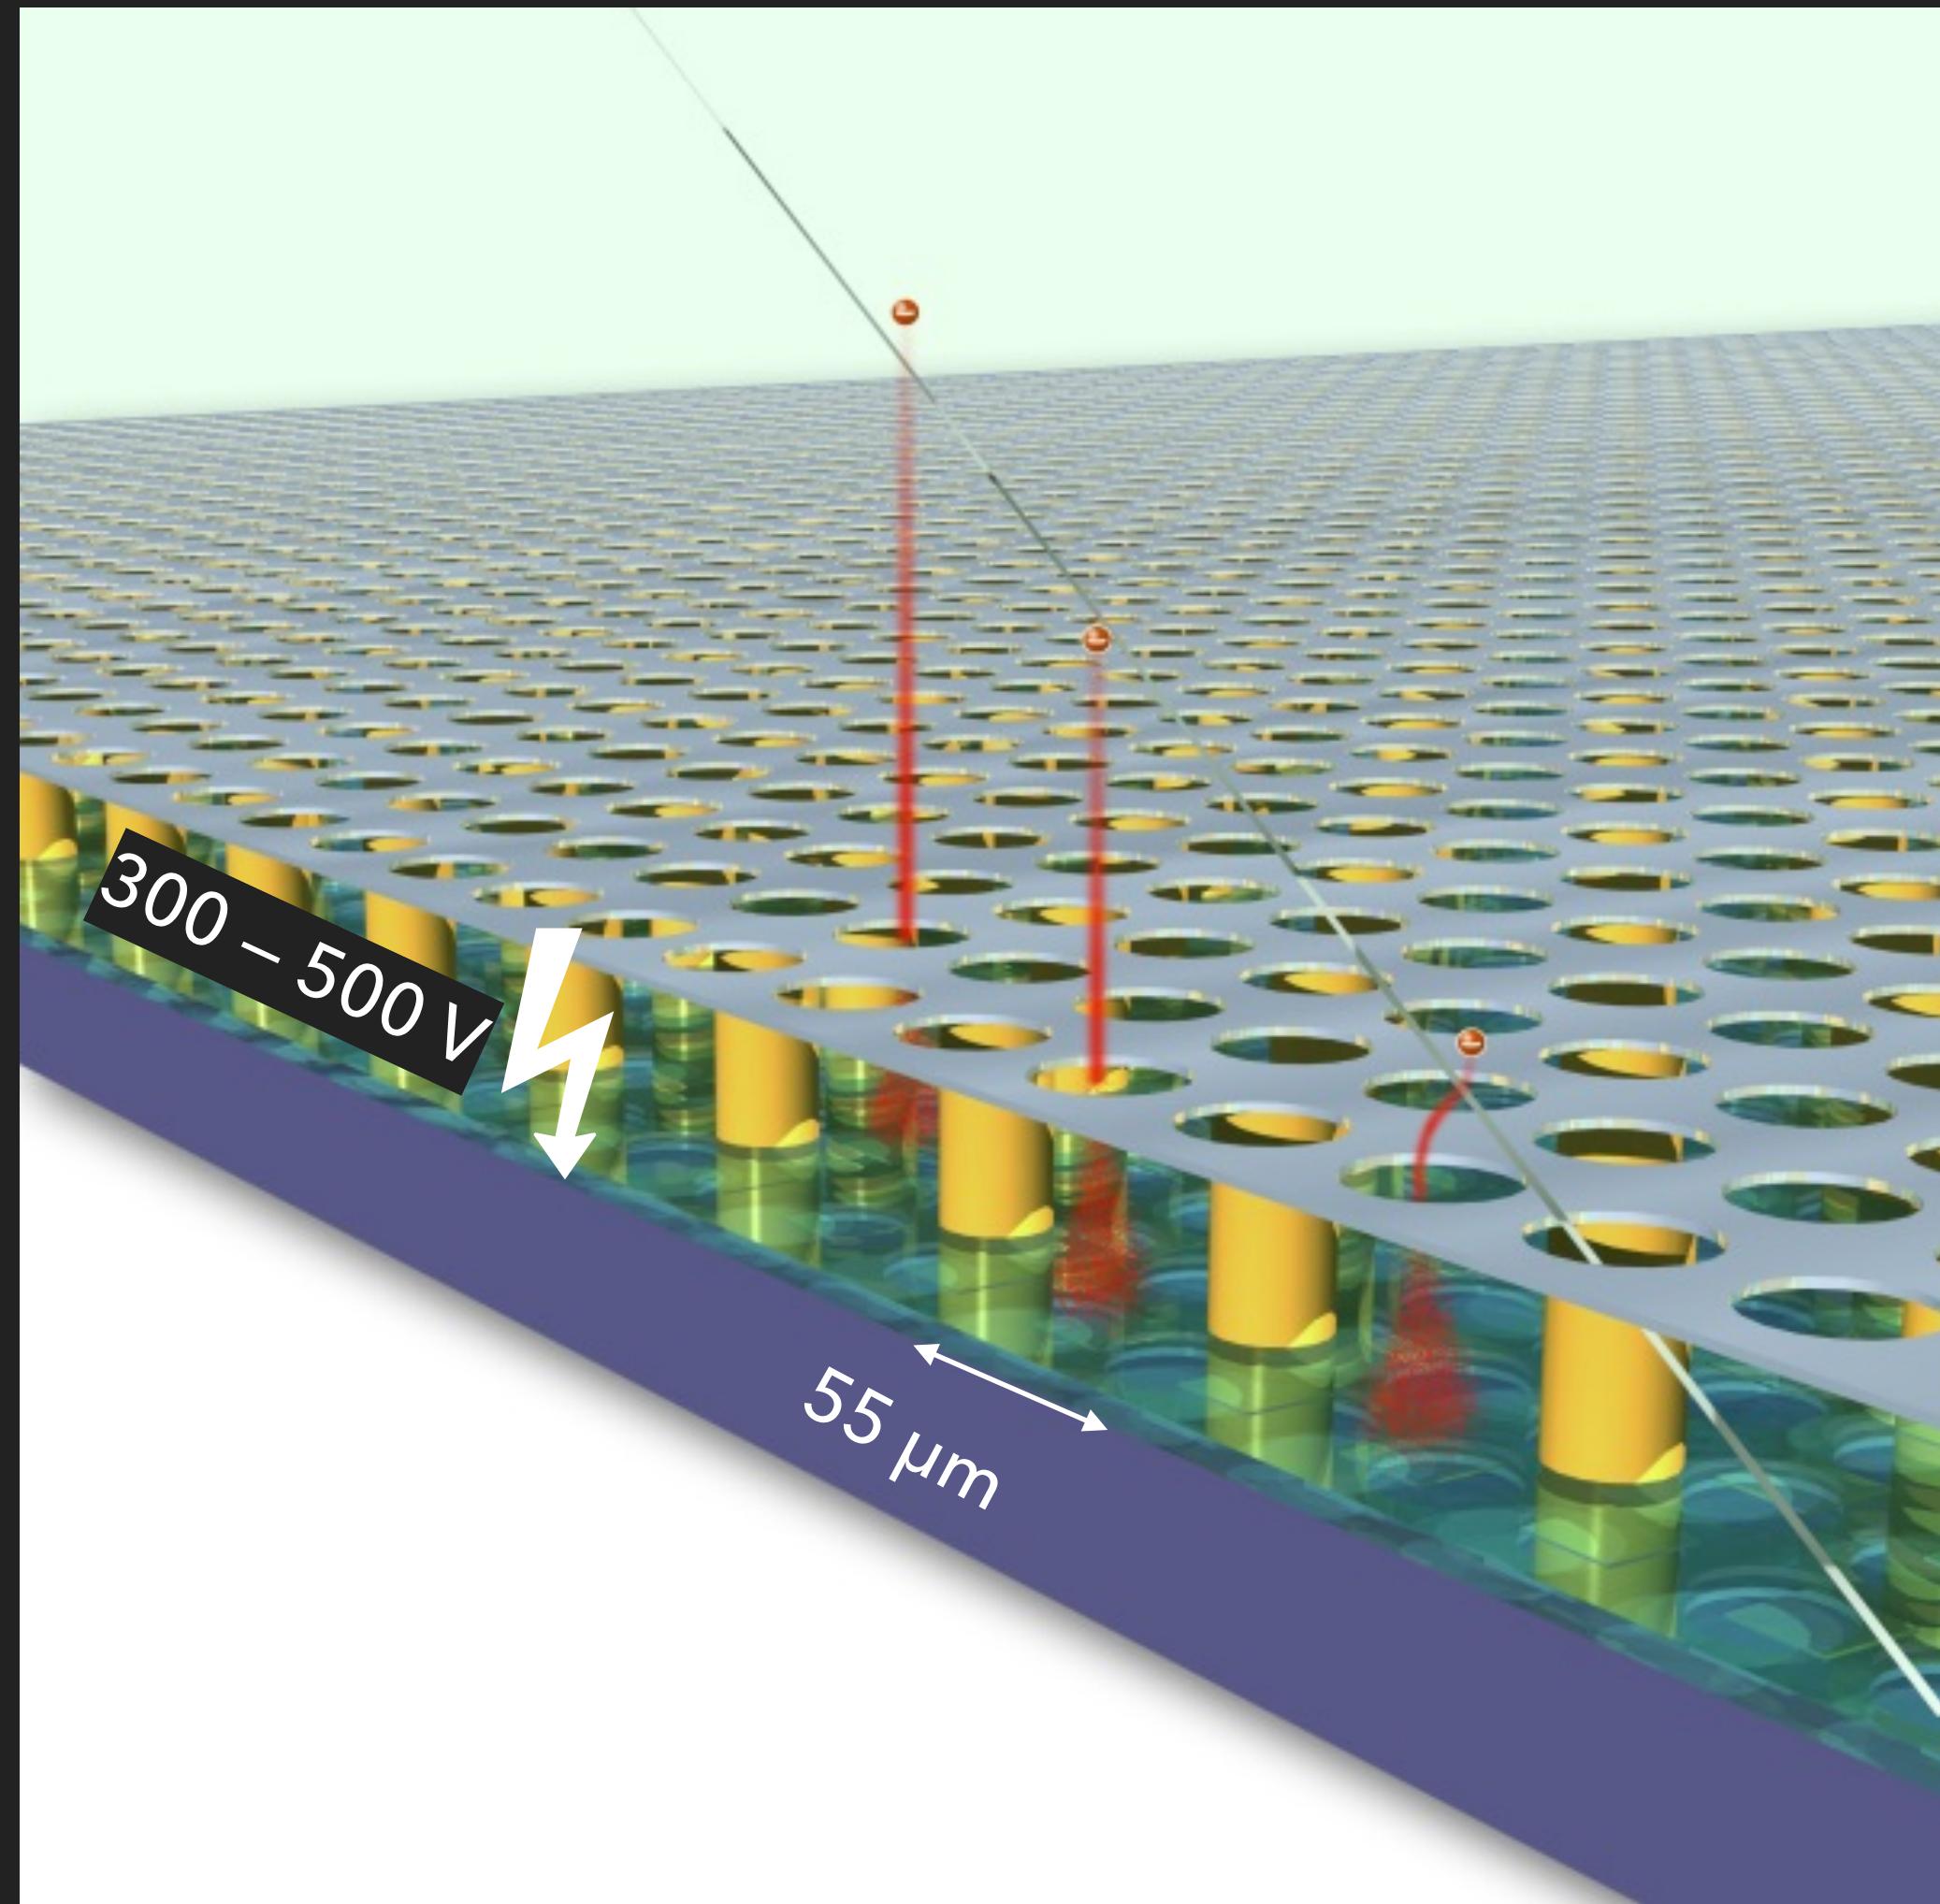

TPC

# TIMEPIX3 + GRID = GRIDPIX

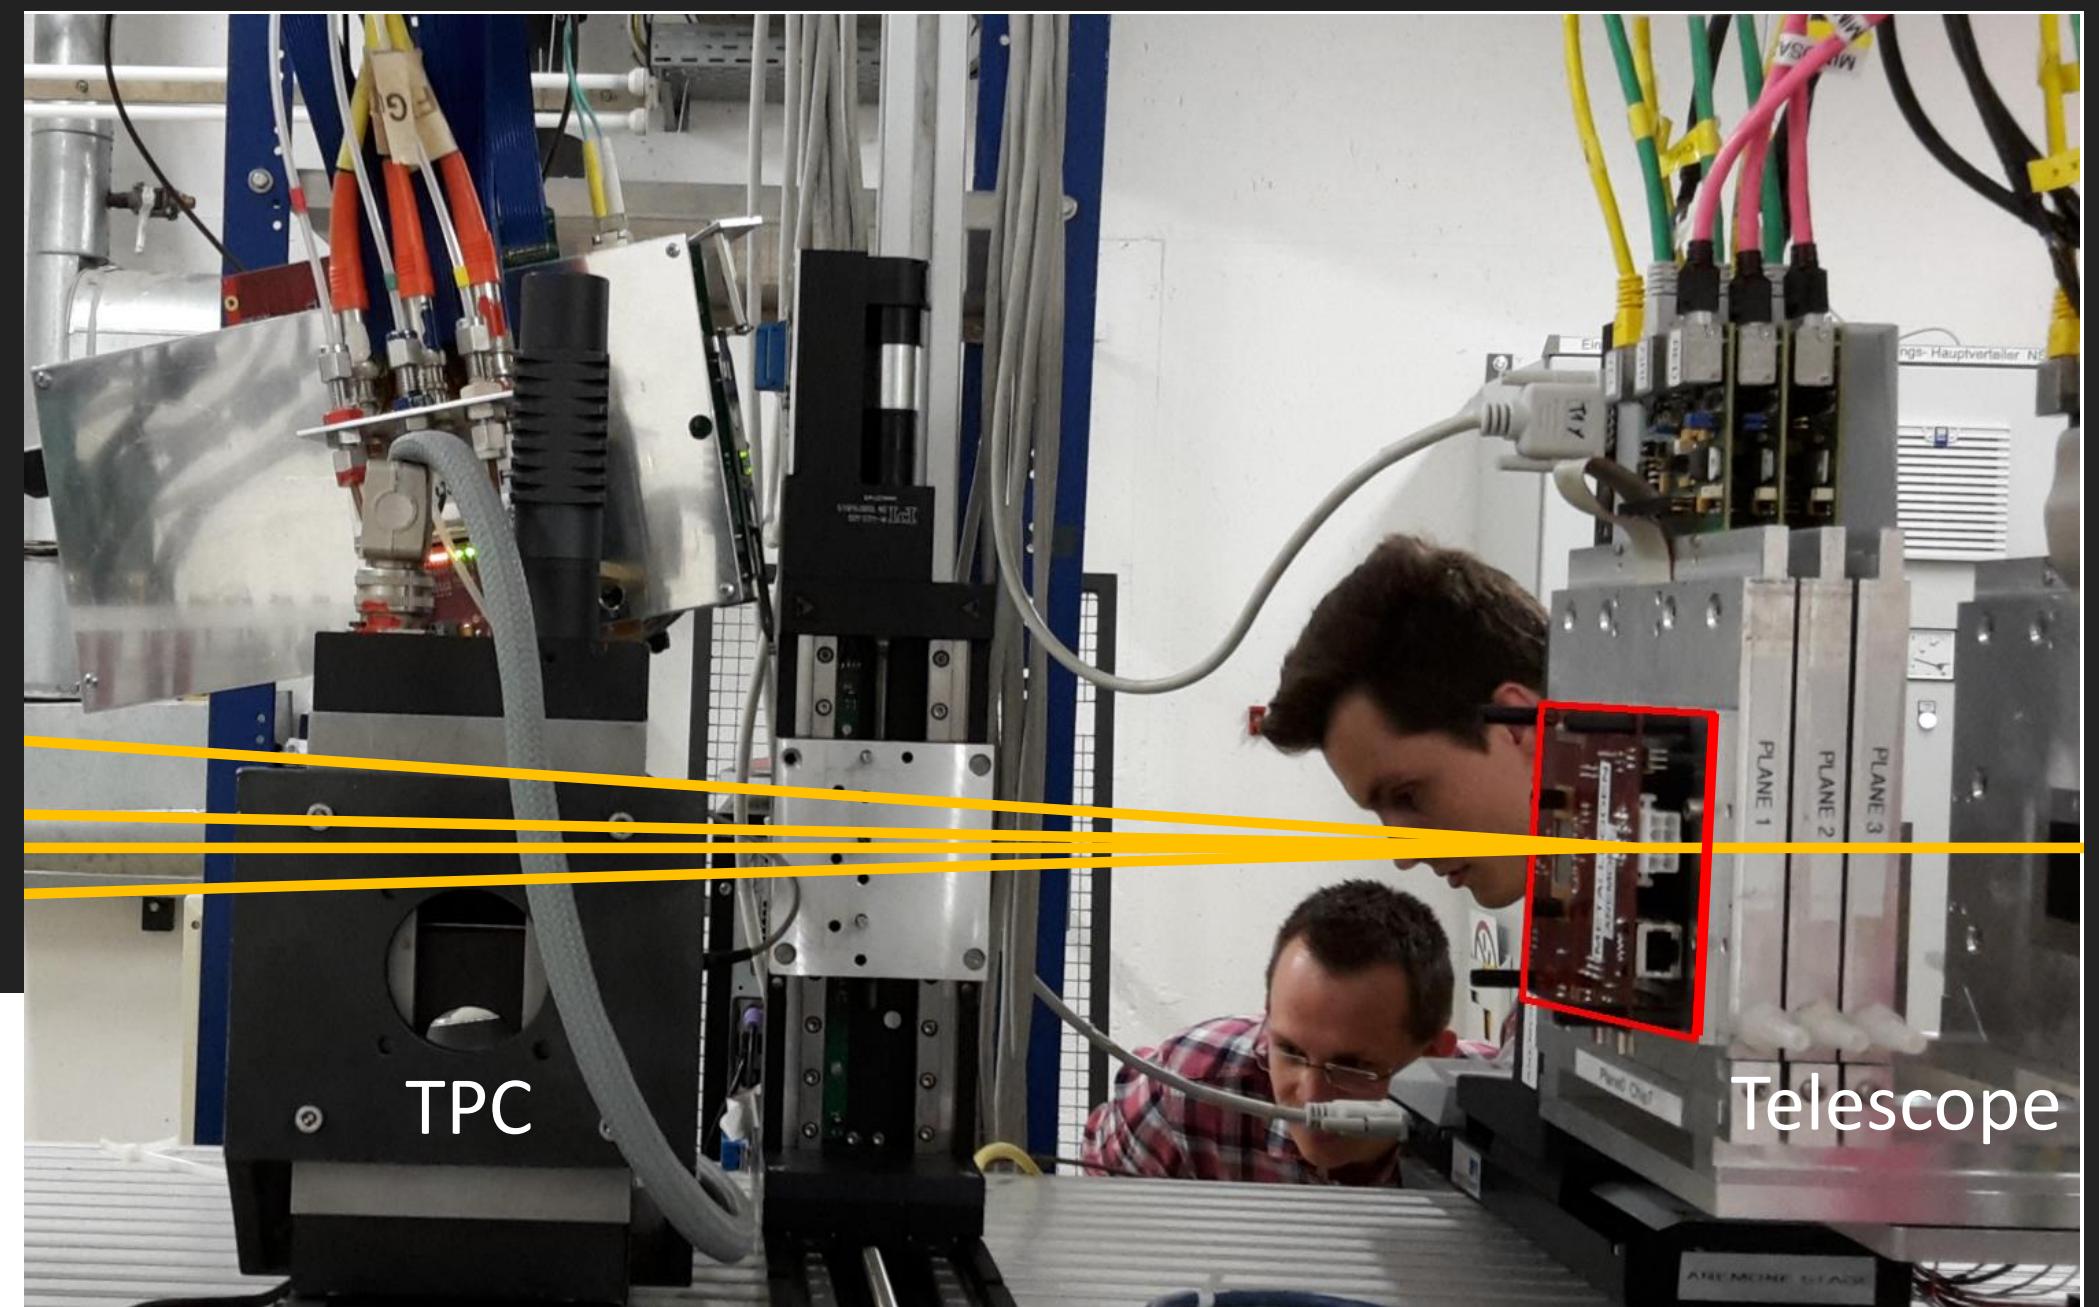

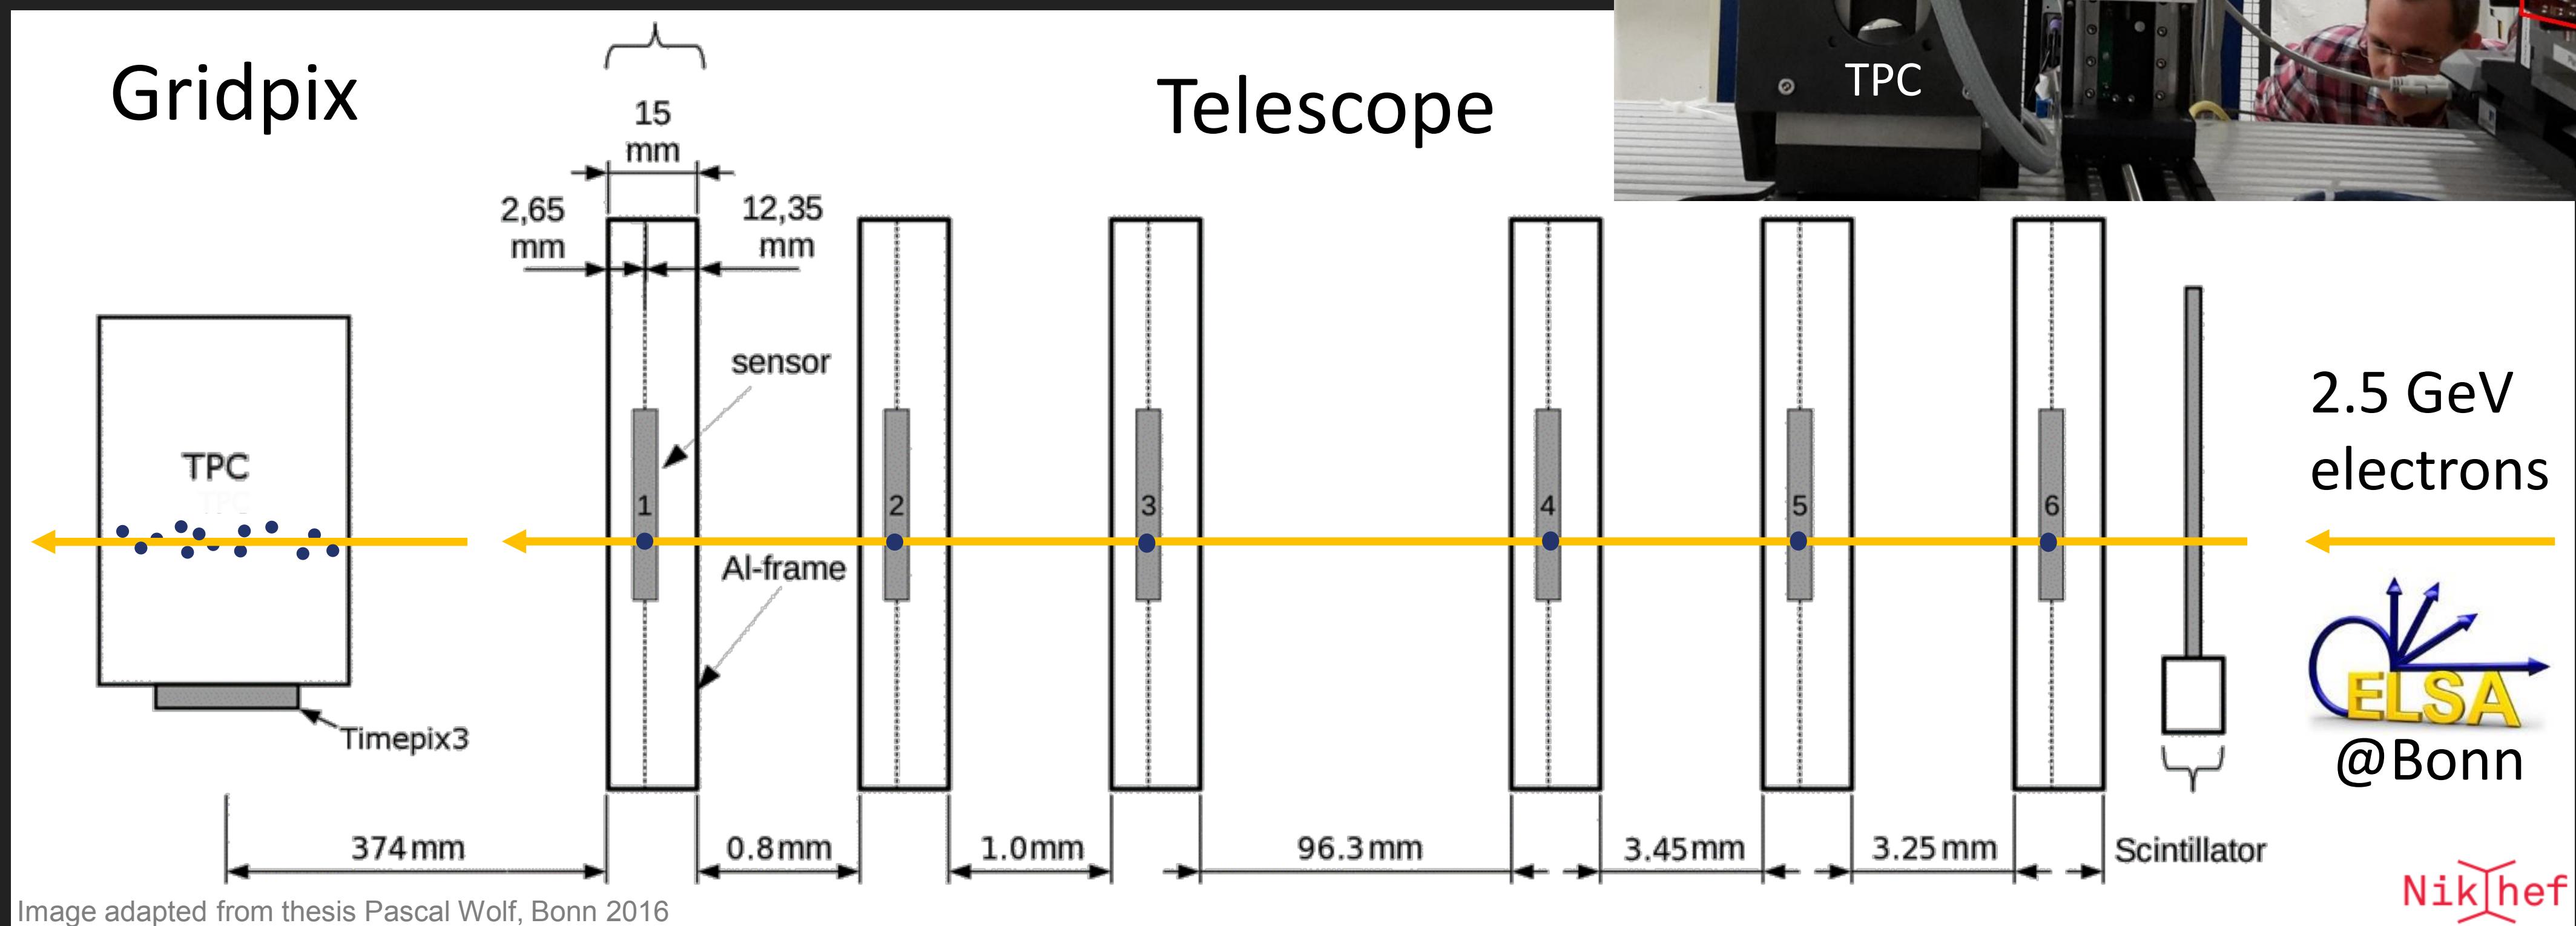

# TIMEPIX3 + GRID = GRIDPIX

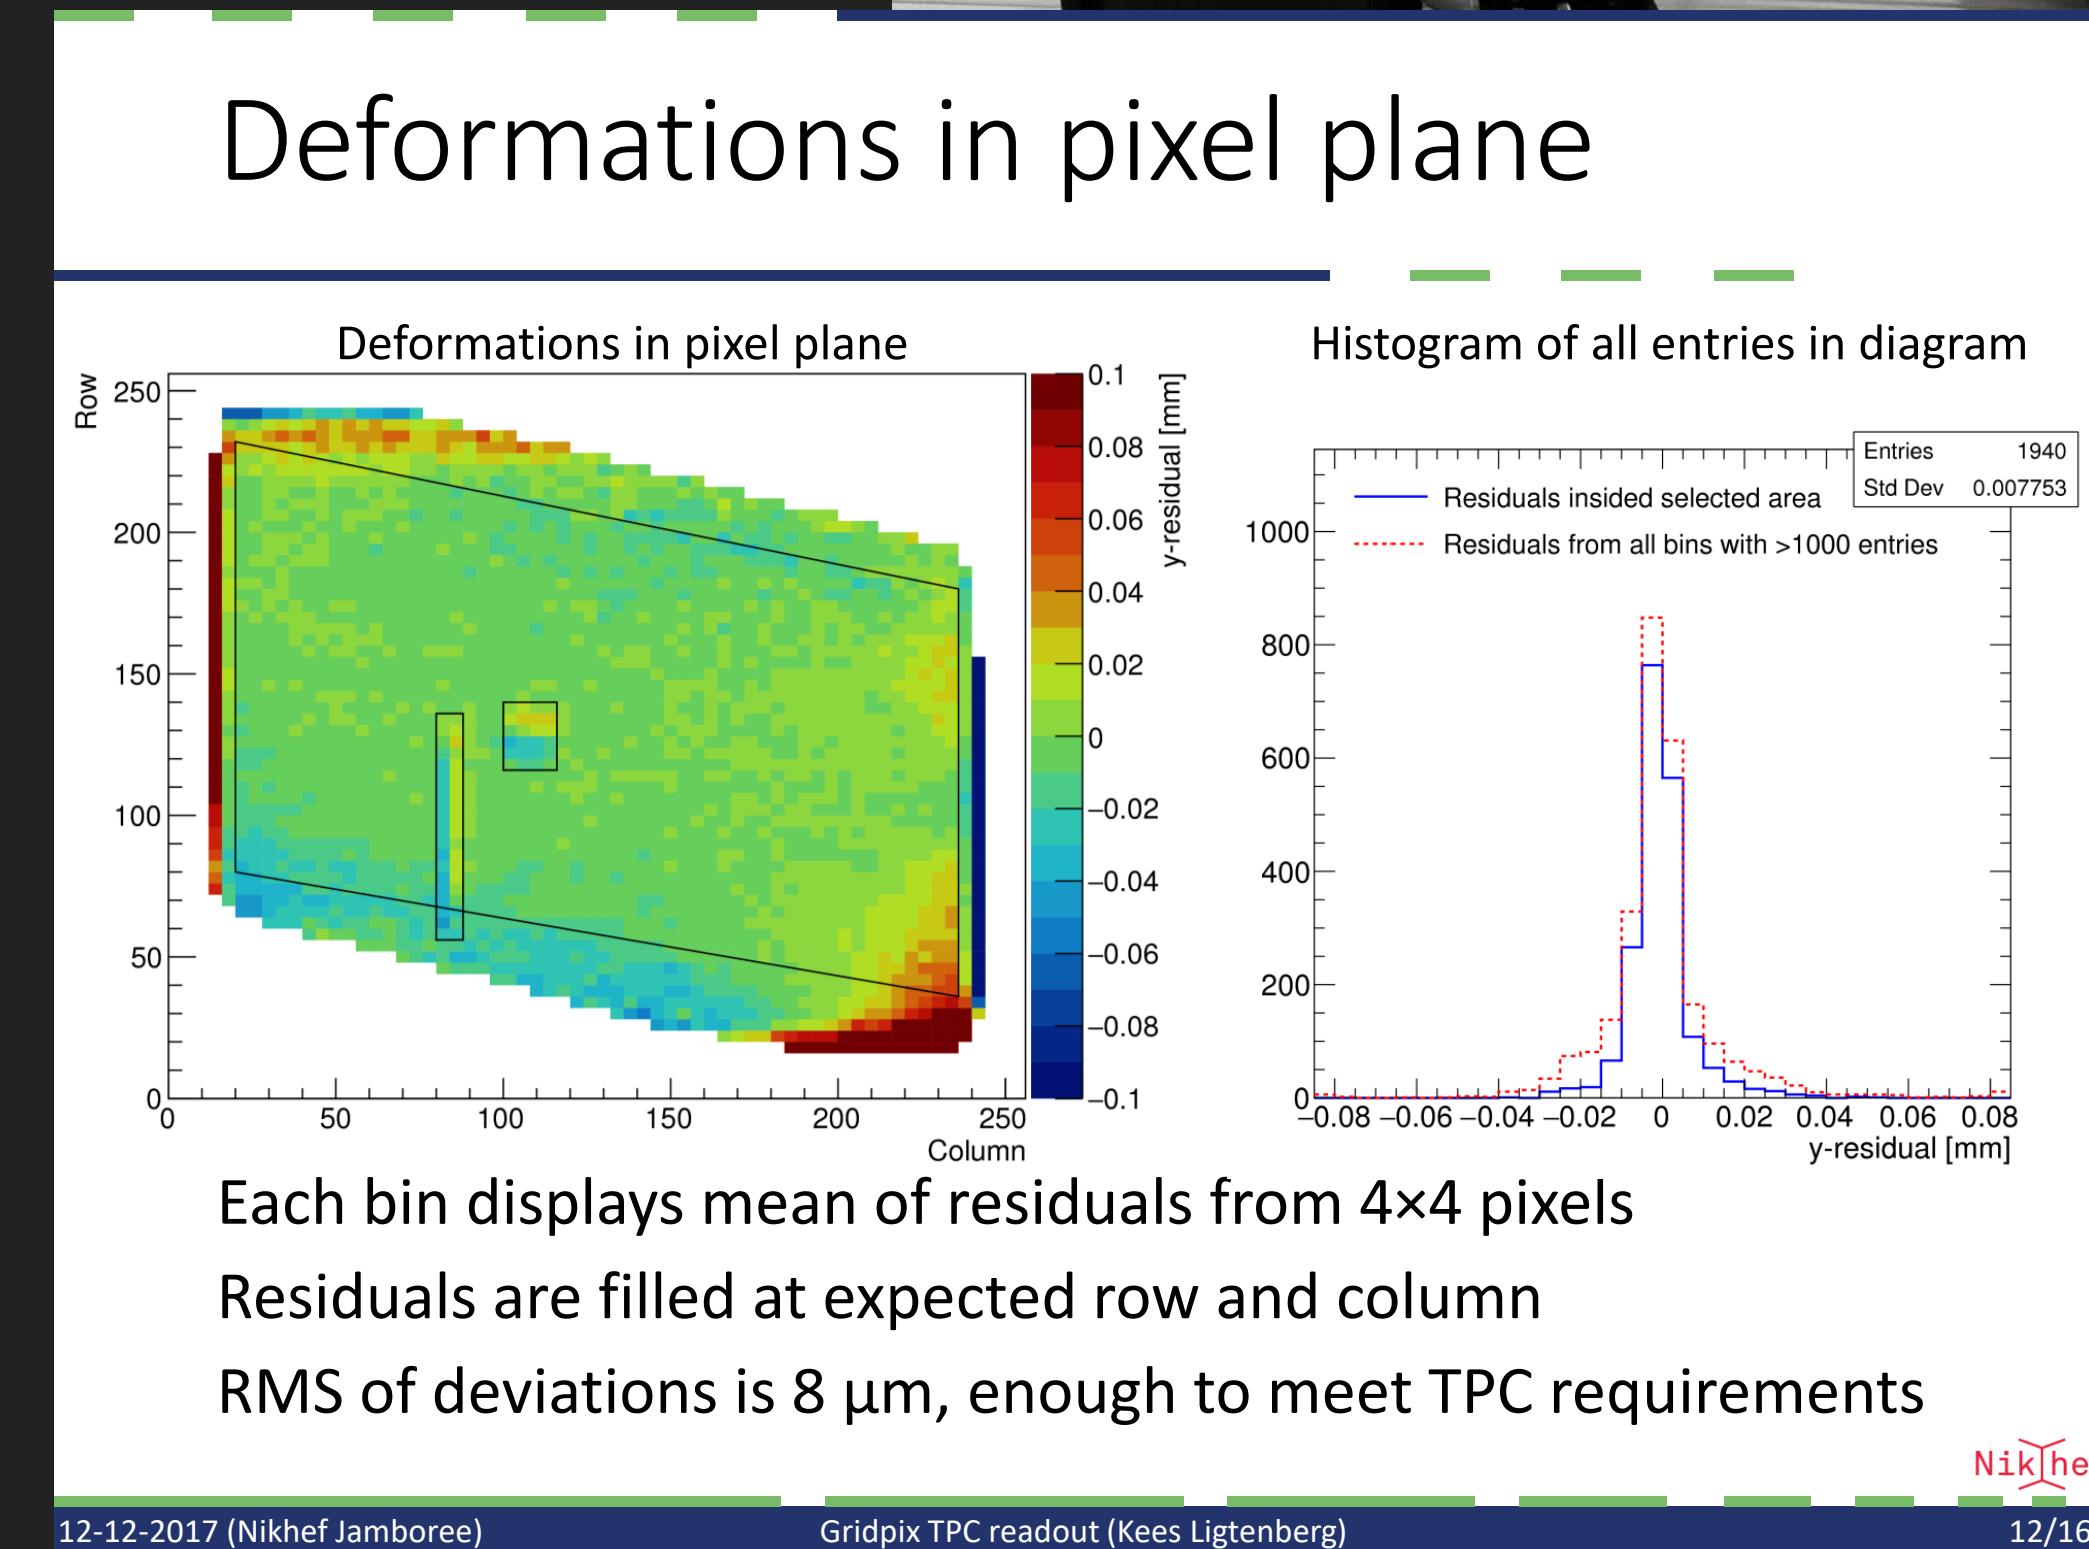

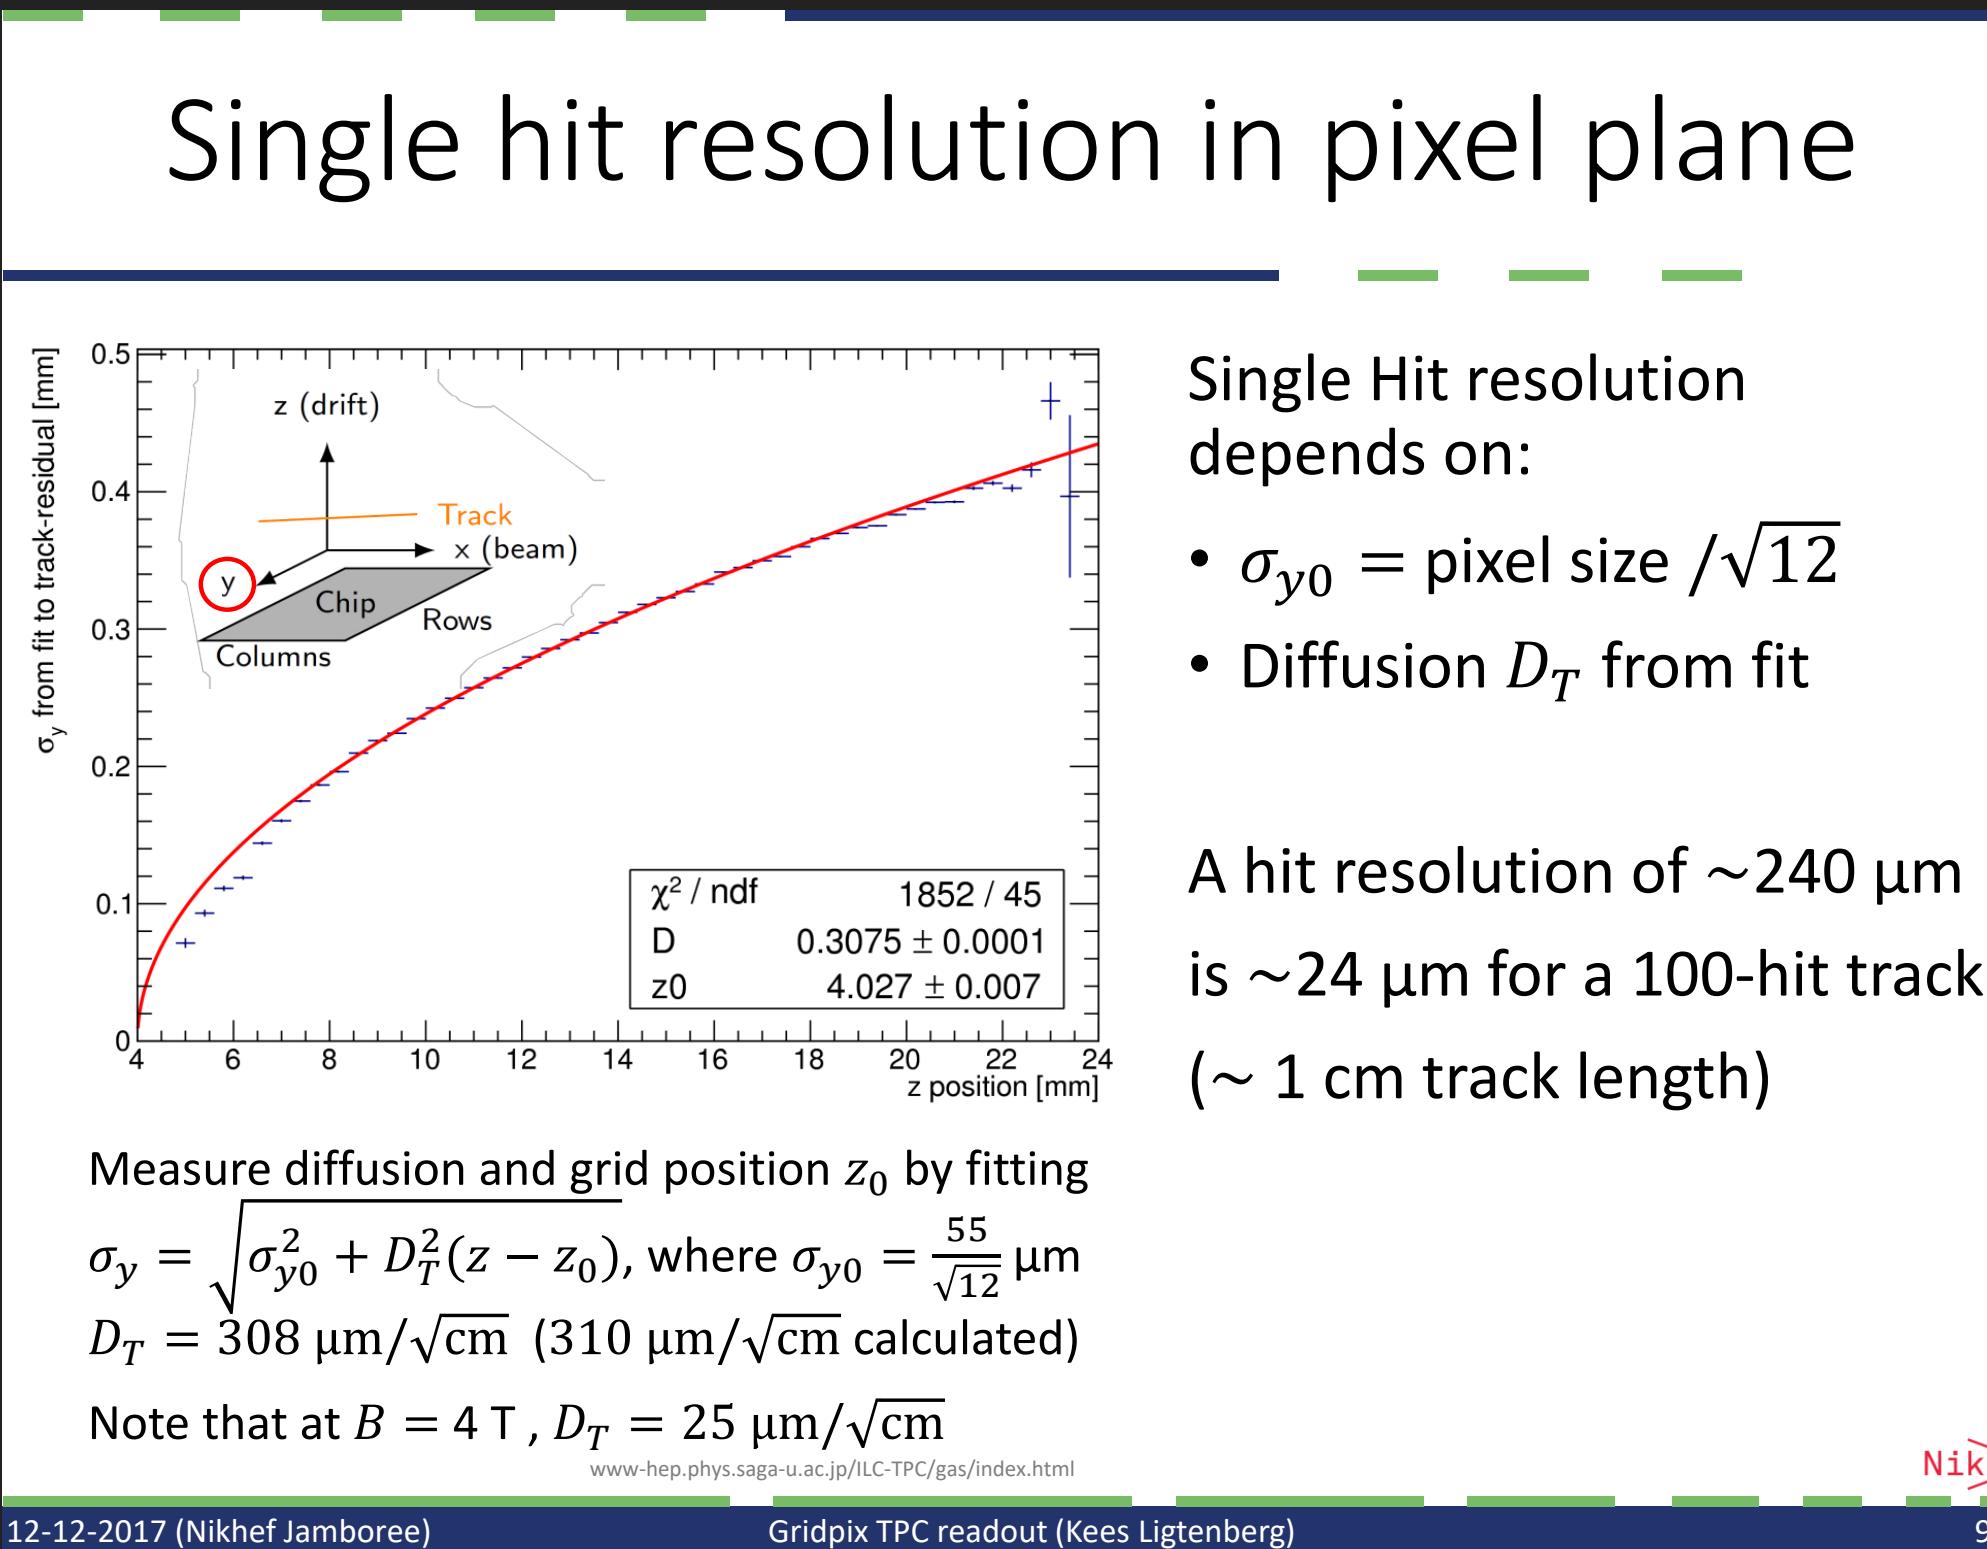

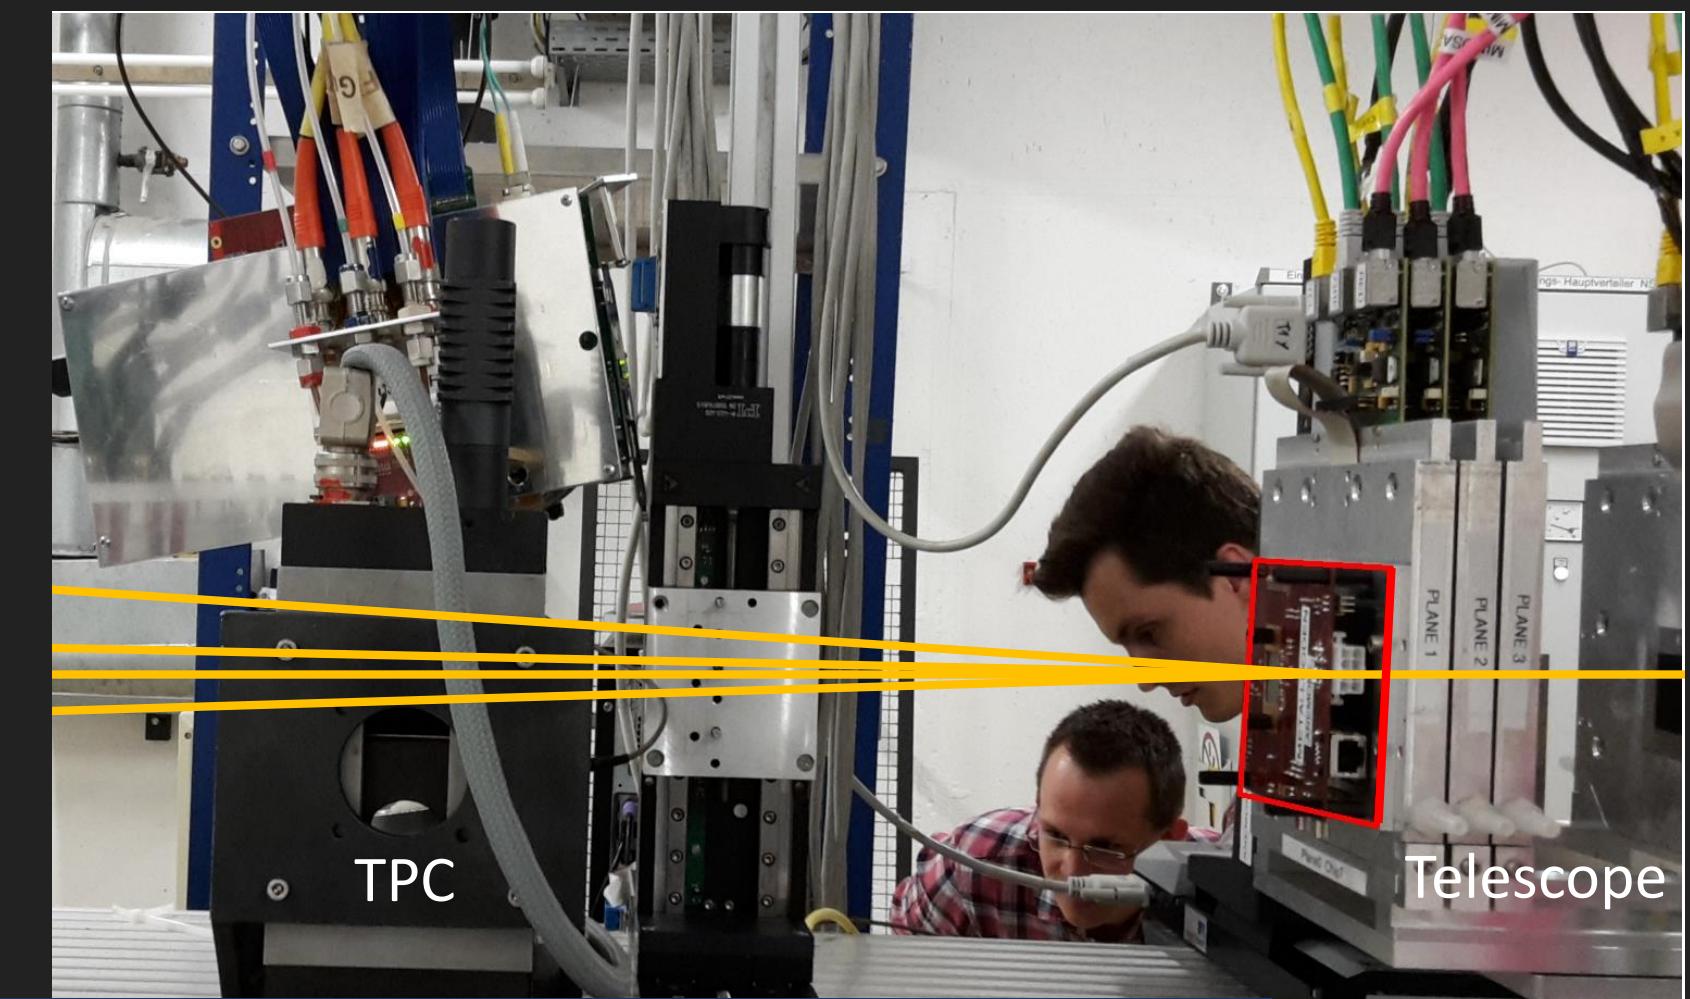

# SINGLE CHIP TESTBEAM 2017

- ▶ Kees' [talk @ last year's jamboree](#)
- ▶ <https://doi.org/10.1016/j.nima.2018.08.012>

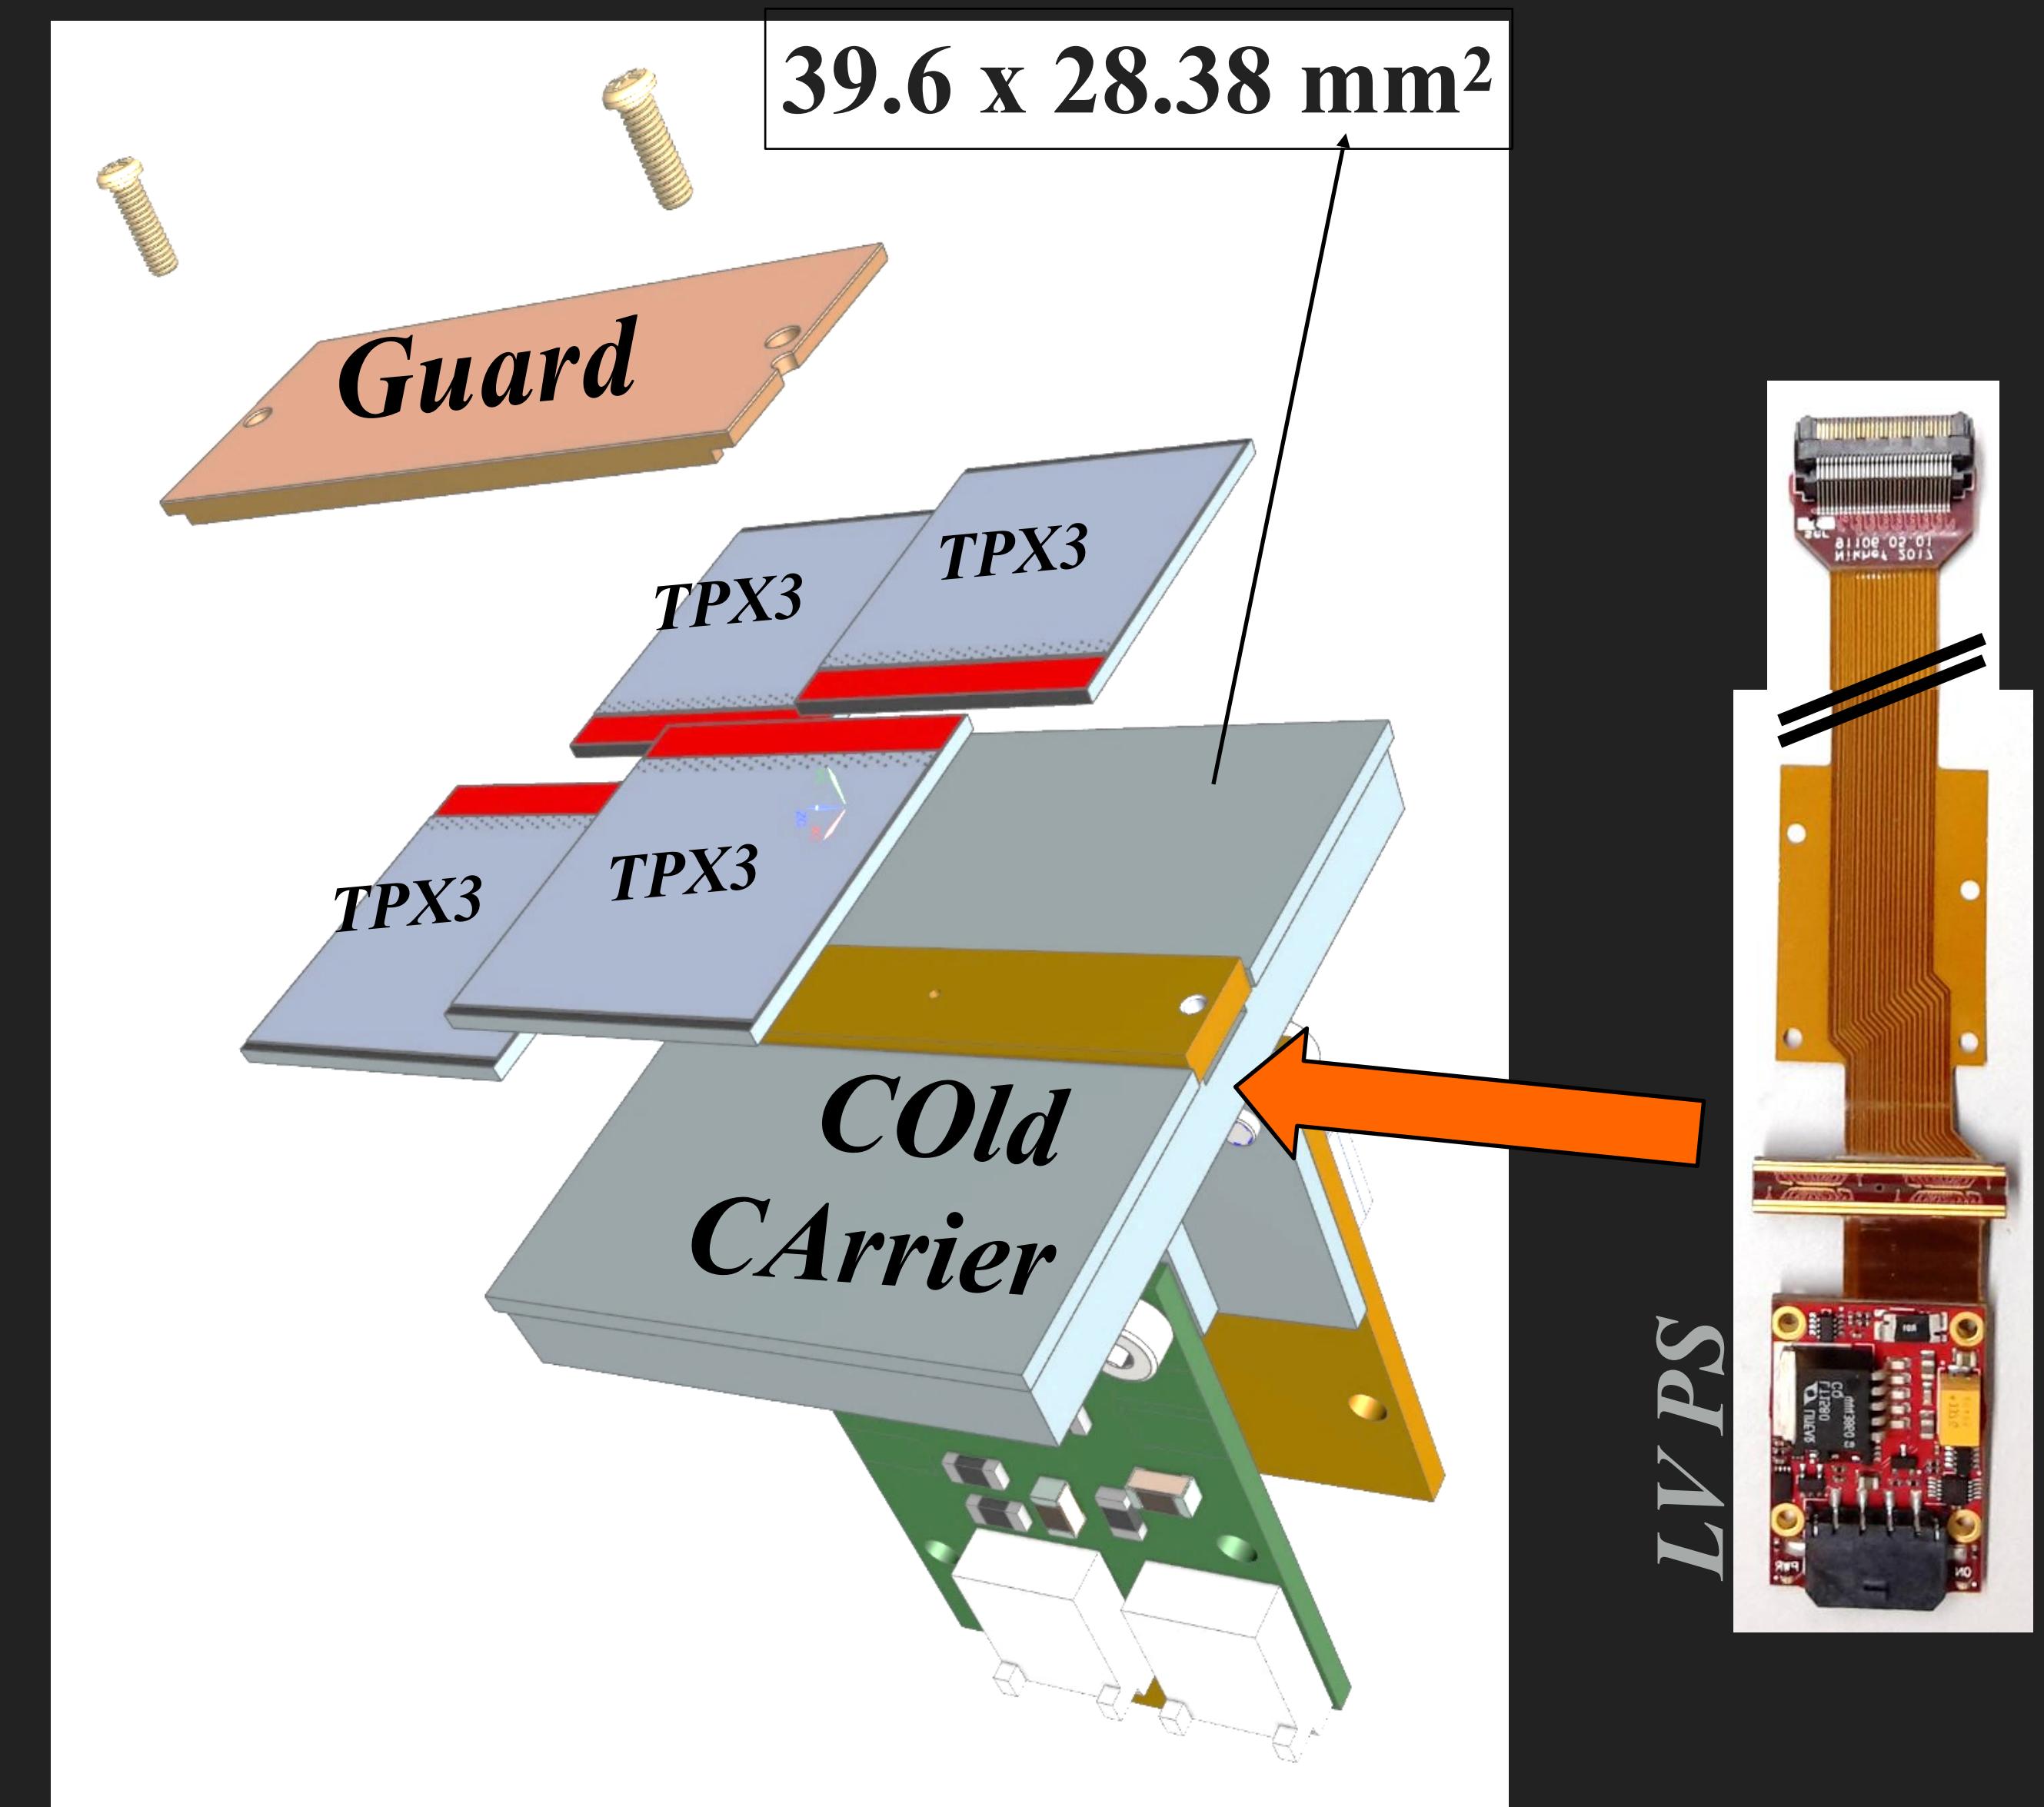

# SINGLE CHIP TESTBEAM 2017

- ▶ Kees' [talk @ last year's jamboree](#)
- ▶ <https://doi.org/10.1016/j.nima.2018.08.012>

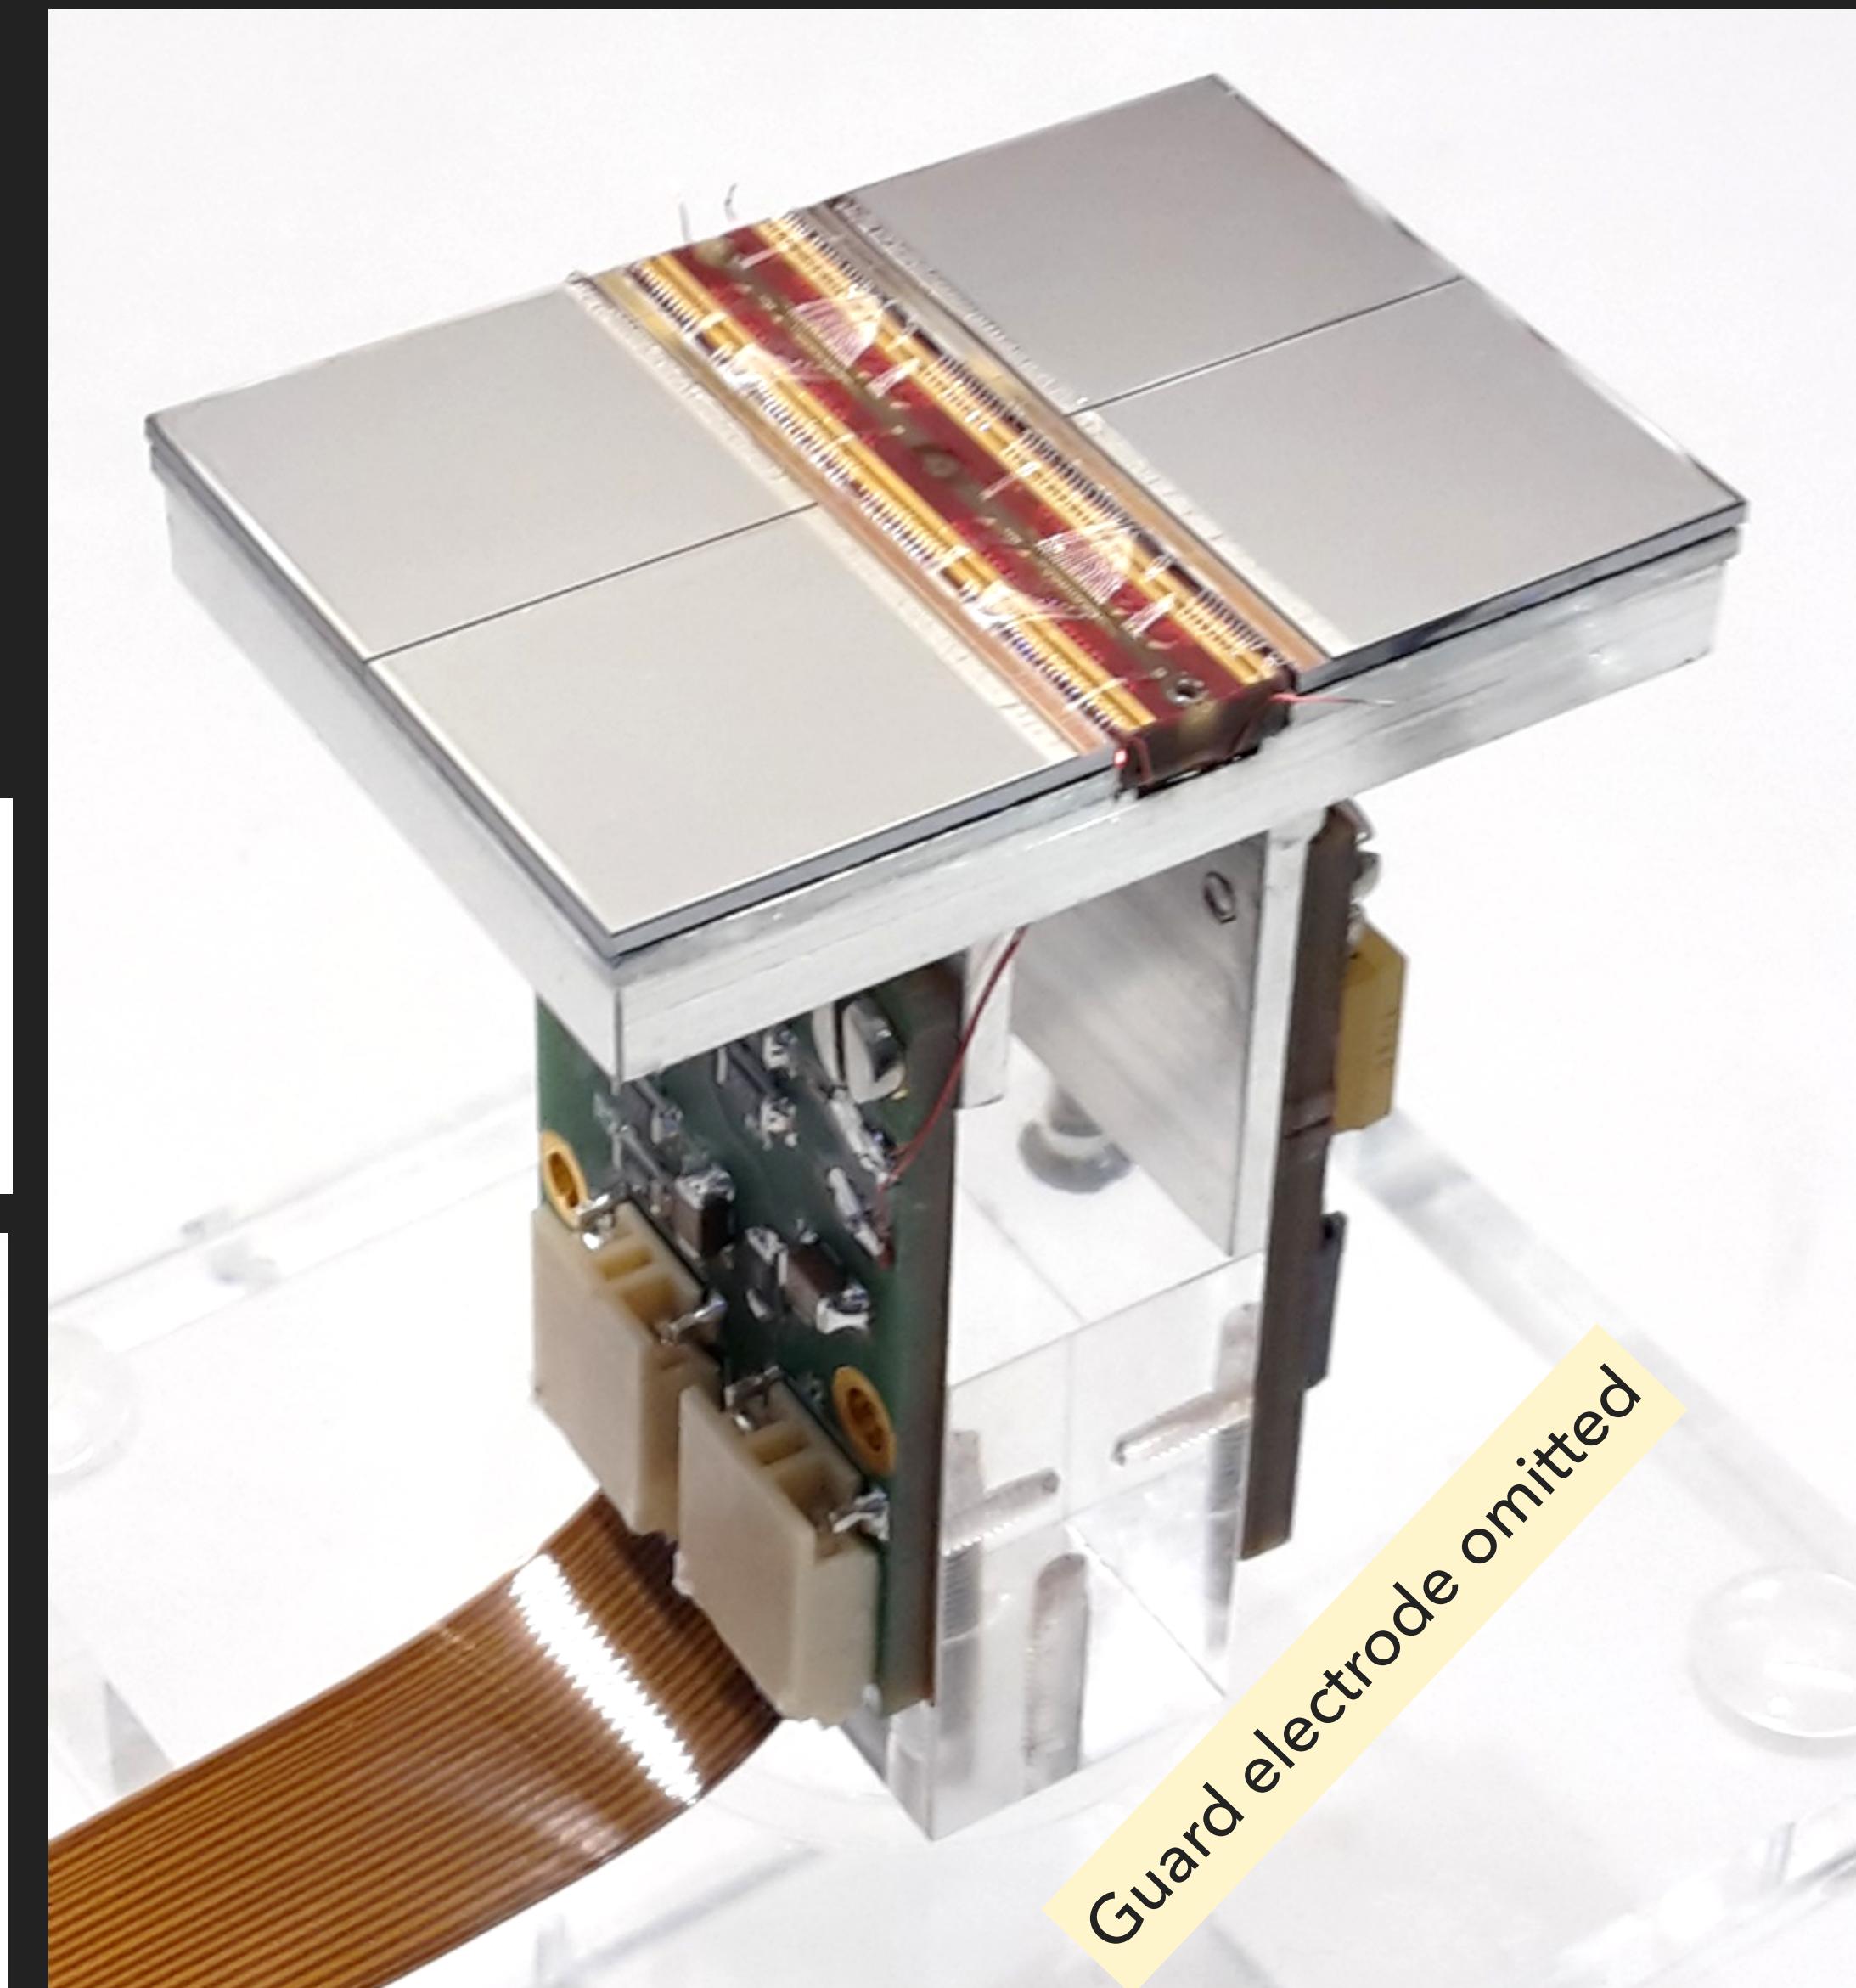

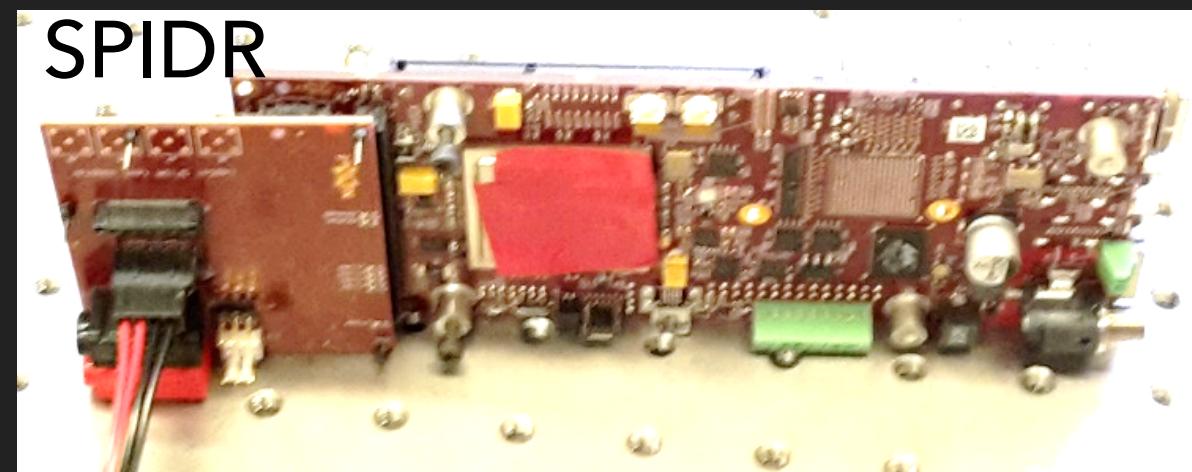

## SCALING TO LARGE AREAS: QUAD

- ▶ 4 TimePix3 chips
- ▶ Services (signal IO, LV power) located **underneath** detection surface
- ▶ SPIDR readout
- ▶ Detection surface extendable by adding QUADs on 4 sides
- ▶ No limit on detection area

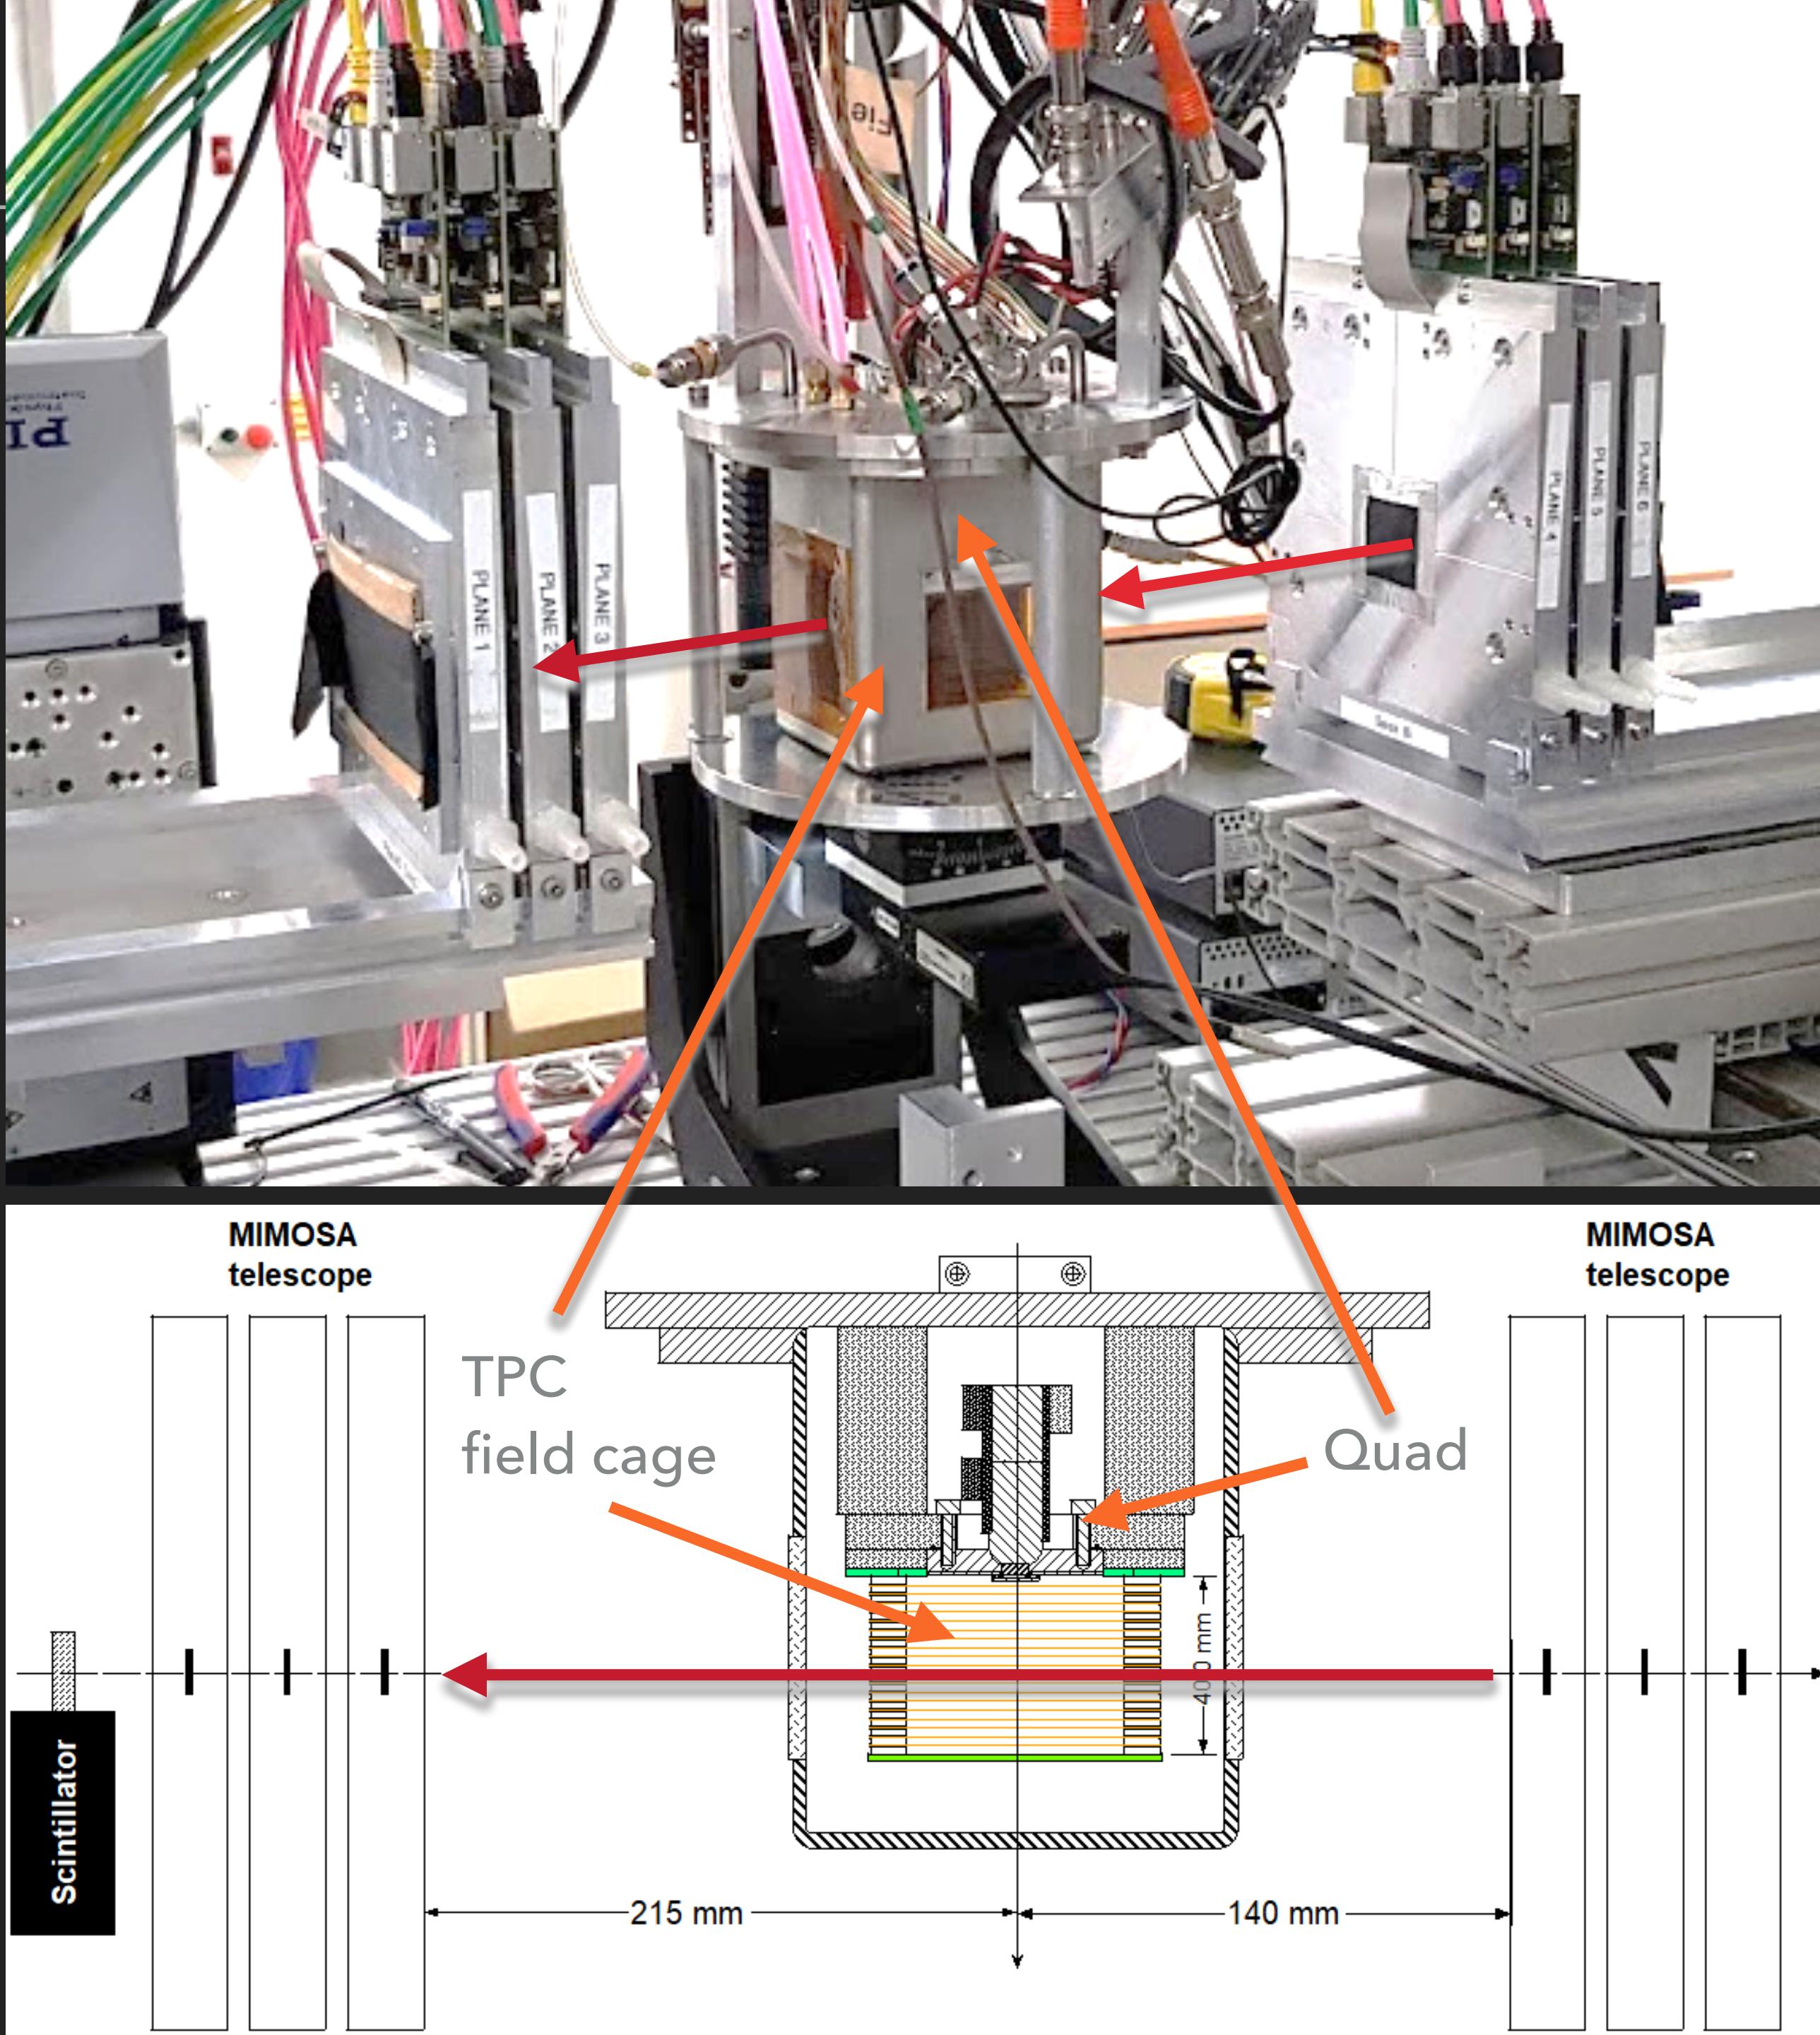

## SCALING TO LARGE AREAS: QUAD

- ▶ 4 TimePix3 chips
- ▶ Services (signal IO, LV power) located **underneath** detection surface
- ▶ SPIDR readout
- ▶ Detection surface extendable by adding QUADs on 4 sides
  - ▶ No limit on detection area

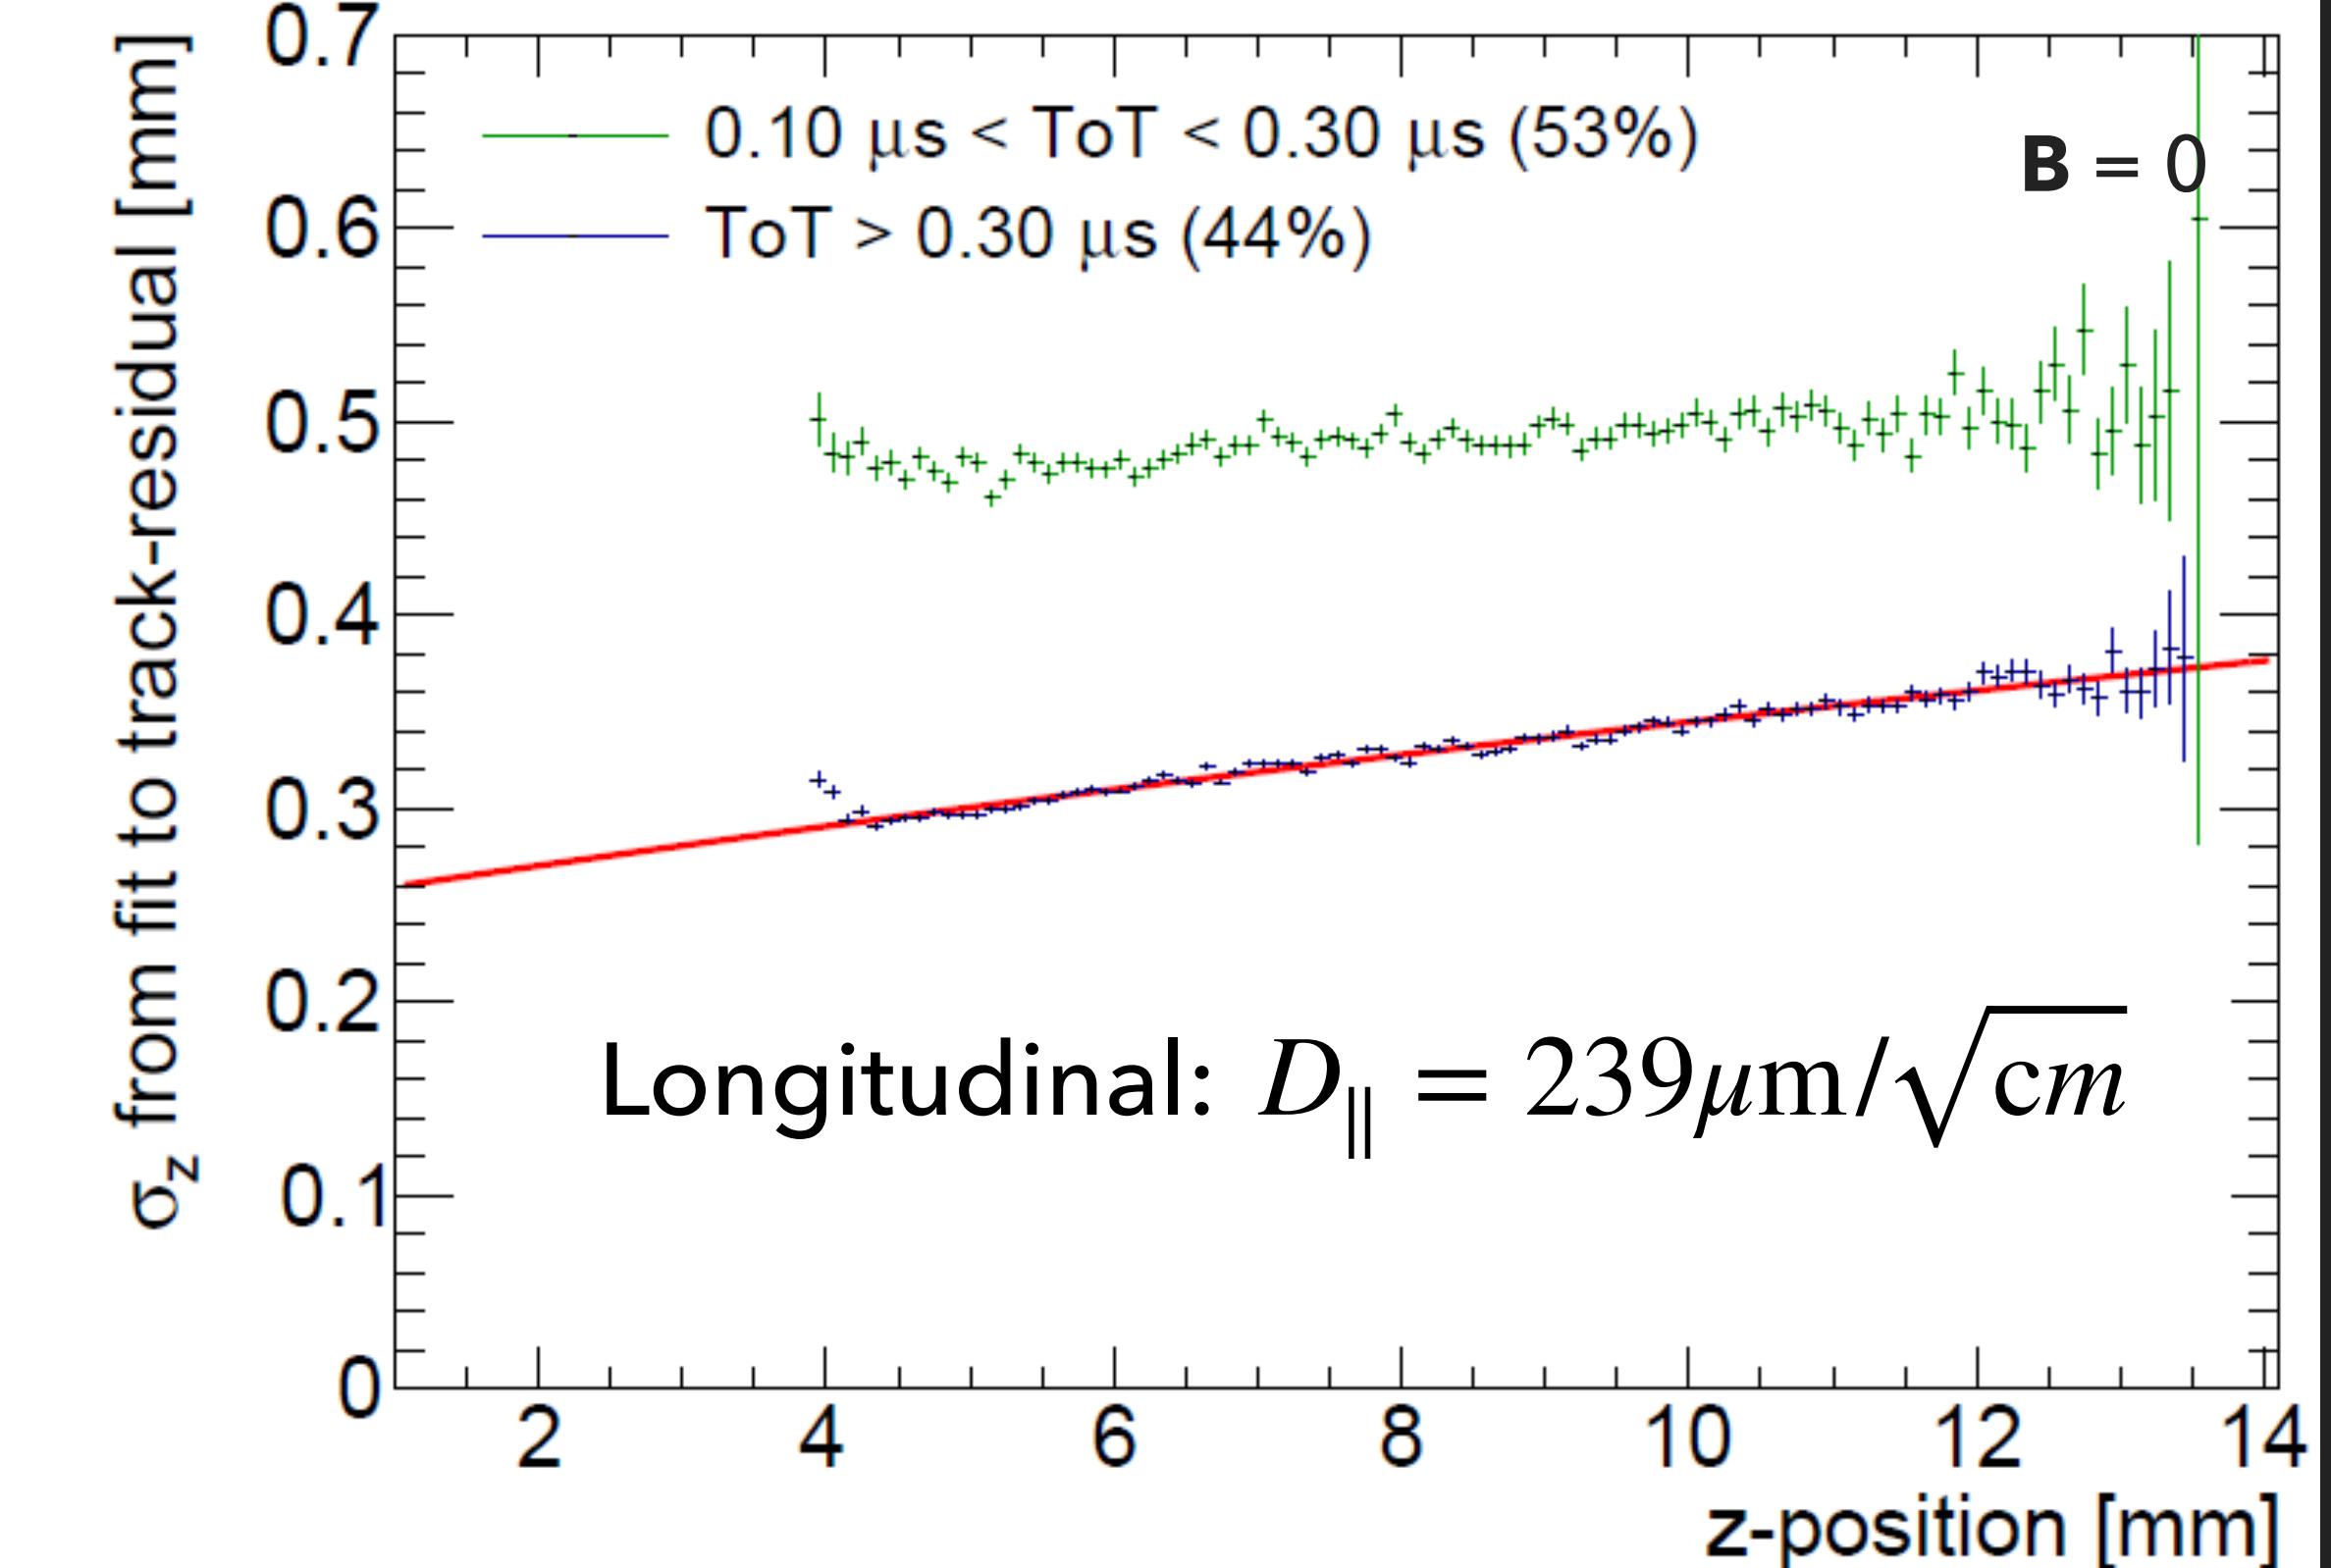

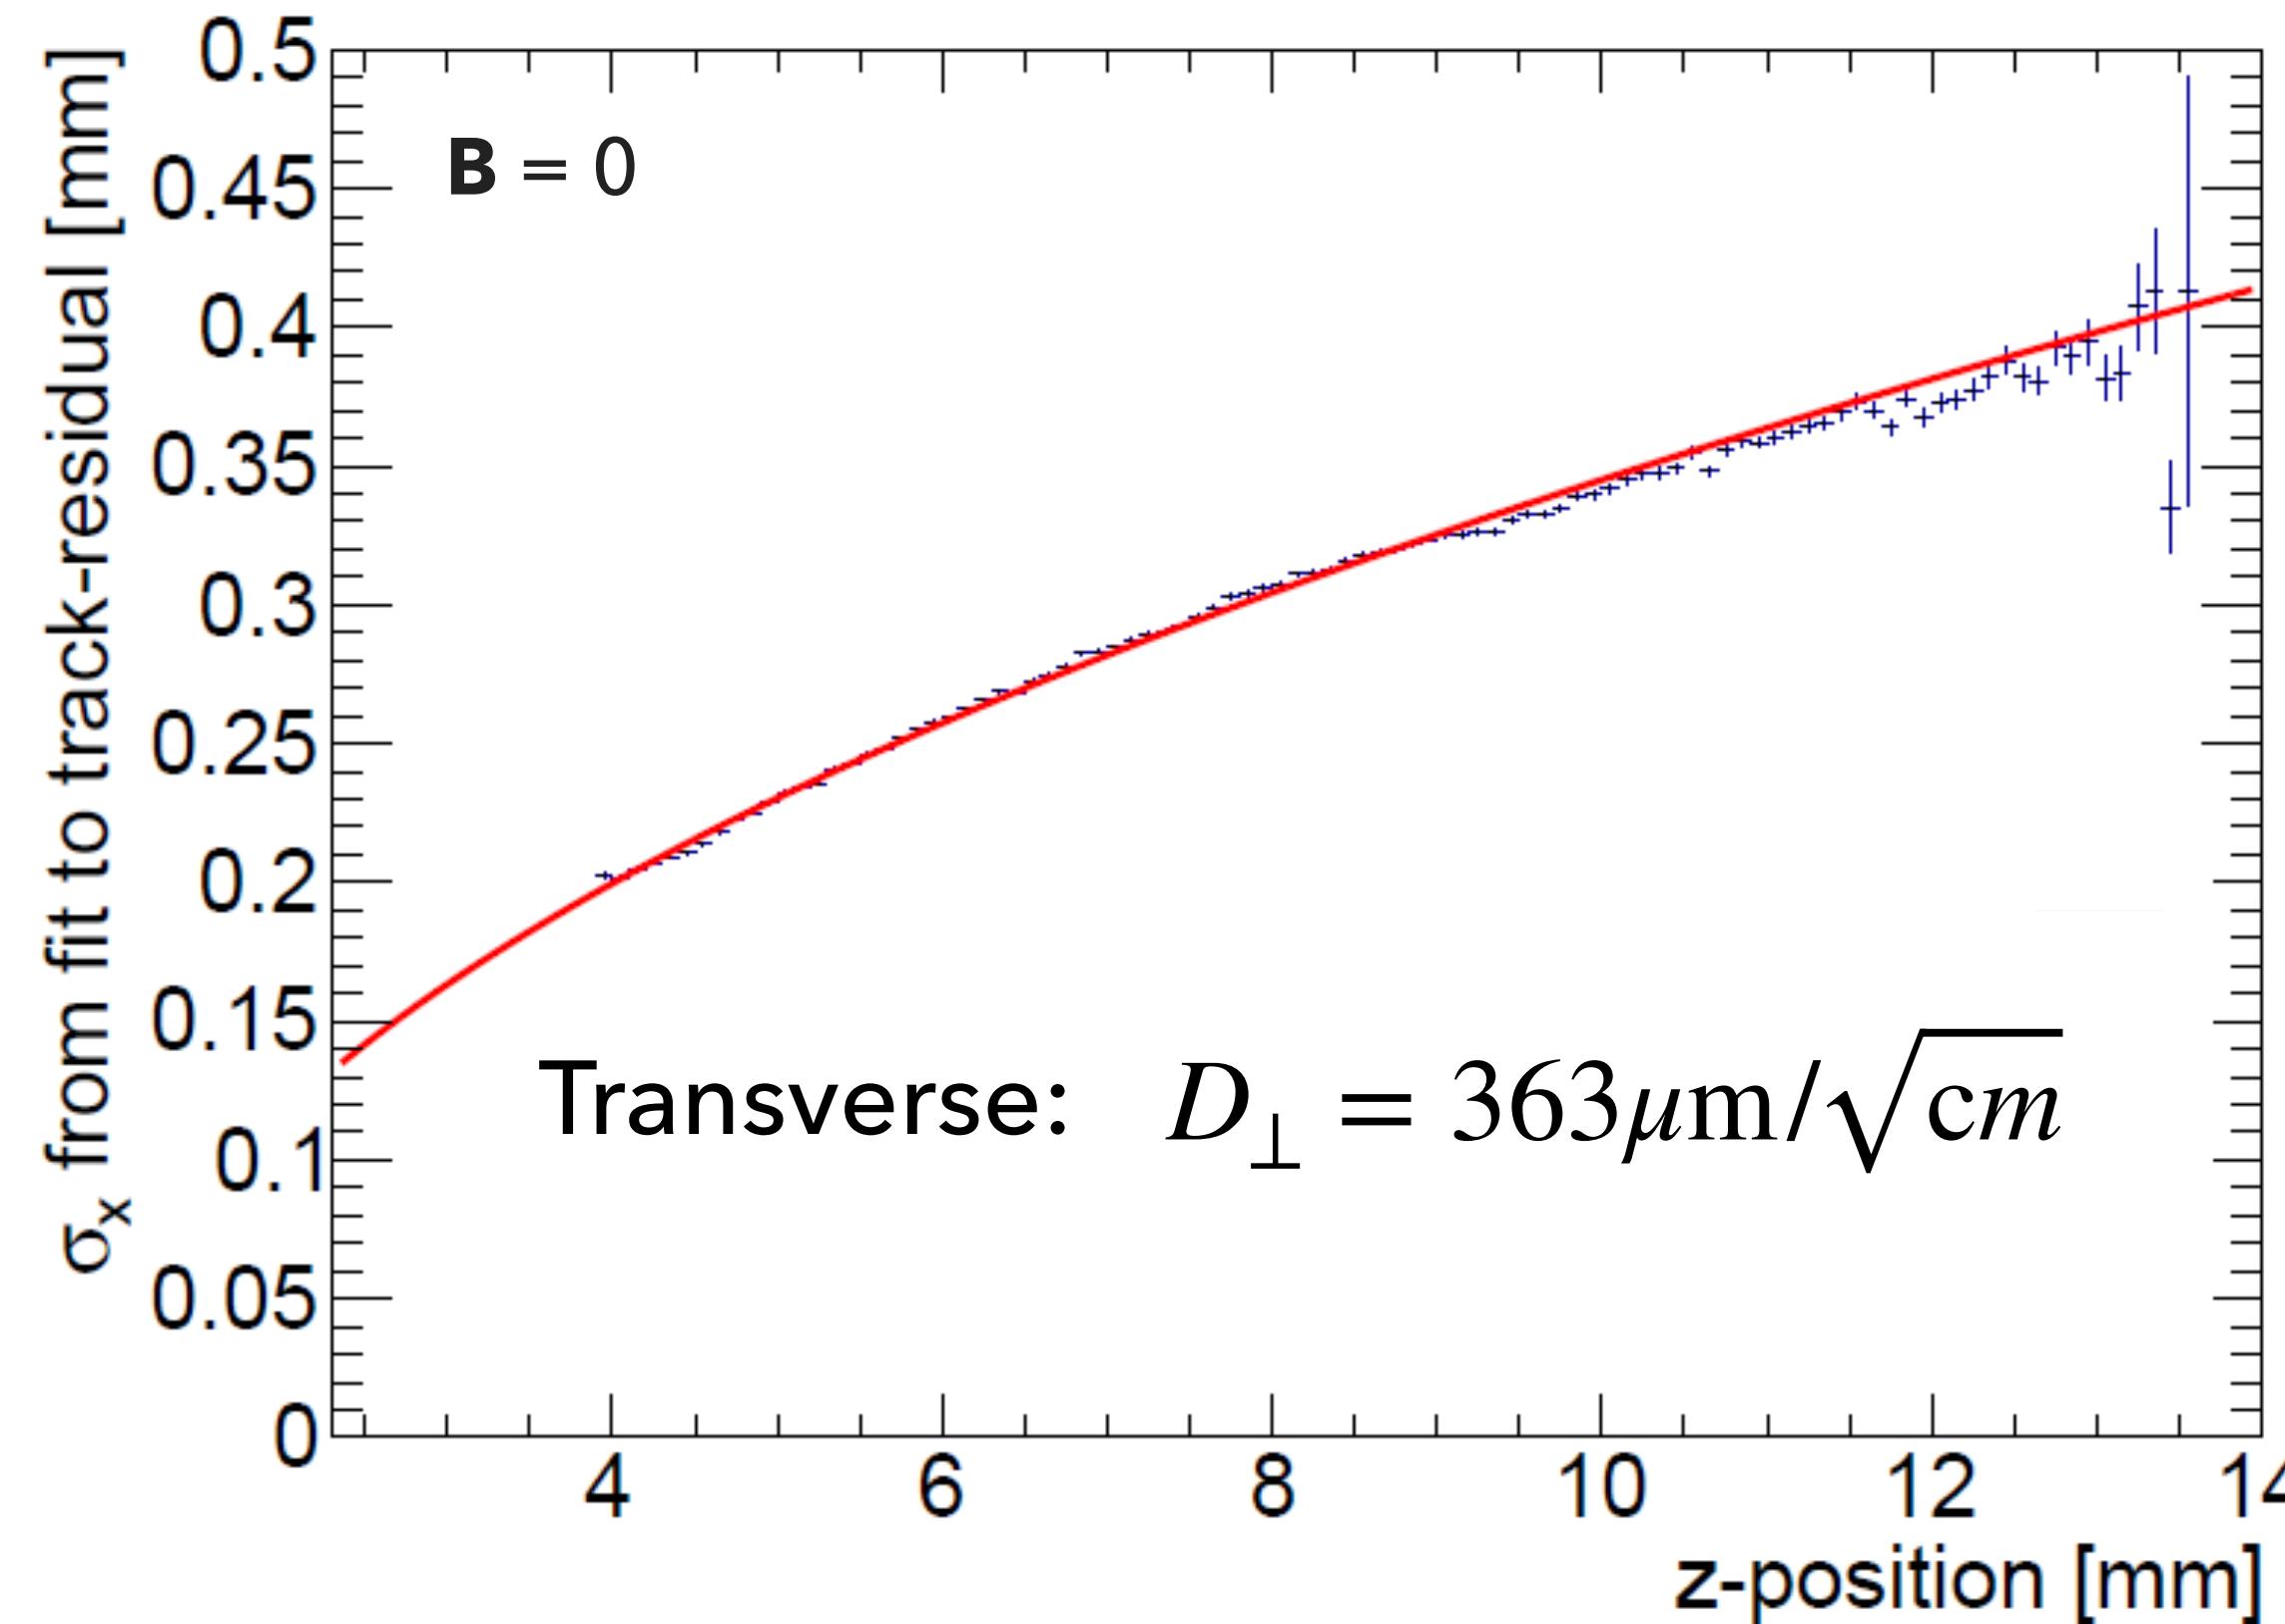

# SINGLE QUAD TESTBEAM, OCT 2018

- ▶ Bonn - ELSA: 2.5 GeV electrons
- ▶ QUAD sandwiched between Mimosa telescope halves
  - ▶ improved track definition
- ▶ Gas: Ar/CF<sub>4</sub>/iC<sub>4</sub>H<sub>10</sub> 95/3/2 (aka. "T2K" gas)
- ▶  $E_d = 280 \text{ V/cm}$ ,  $V_{\text{grid}} = -300 \text{ V}$
- ▶ Typical beam height above the chip:  
 $\sim 1 \text{ cm}$

# QUAD DIFFUSION MEASUREMENTS

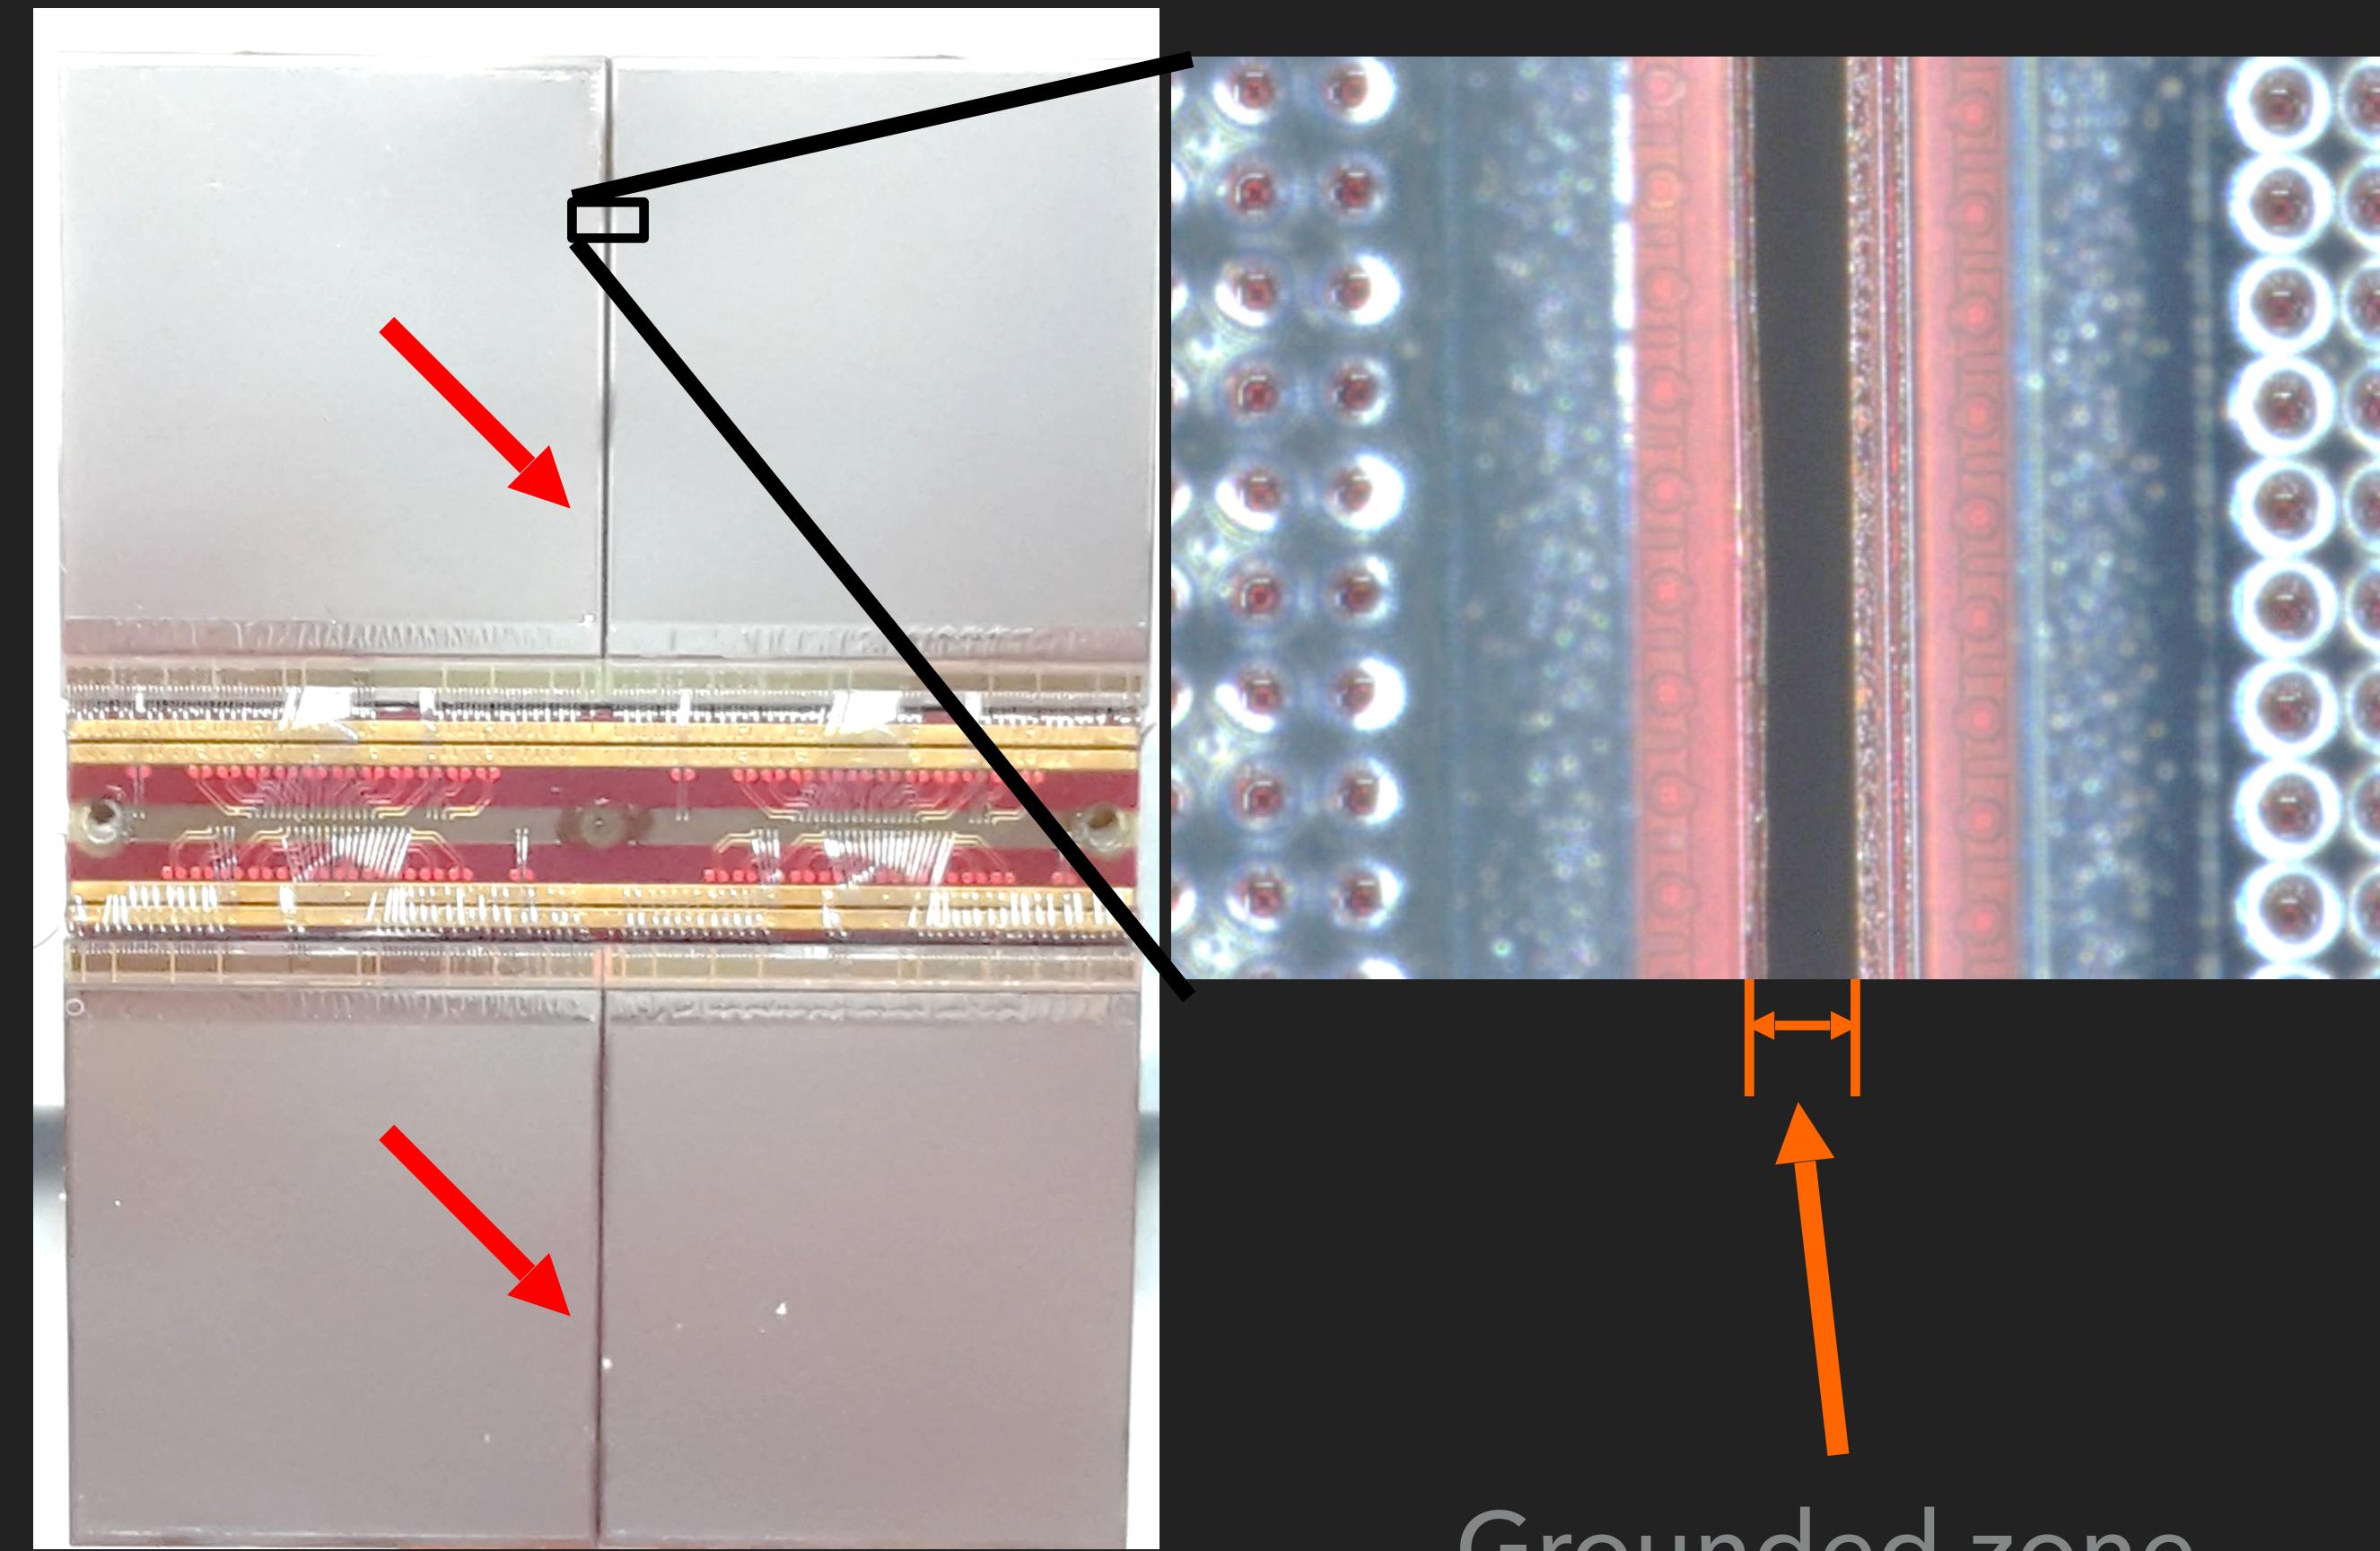

PRELIMINARY!

PRELIMINARY!

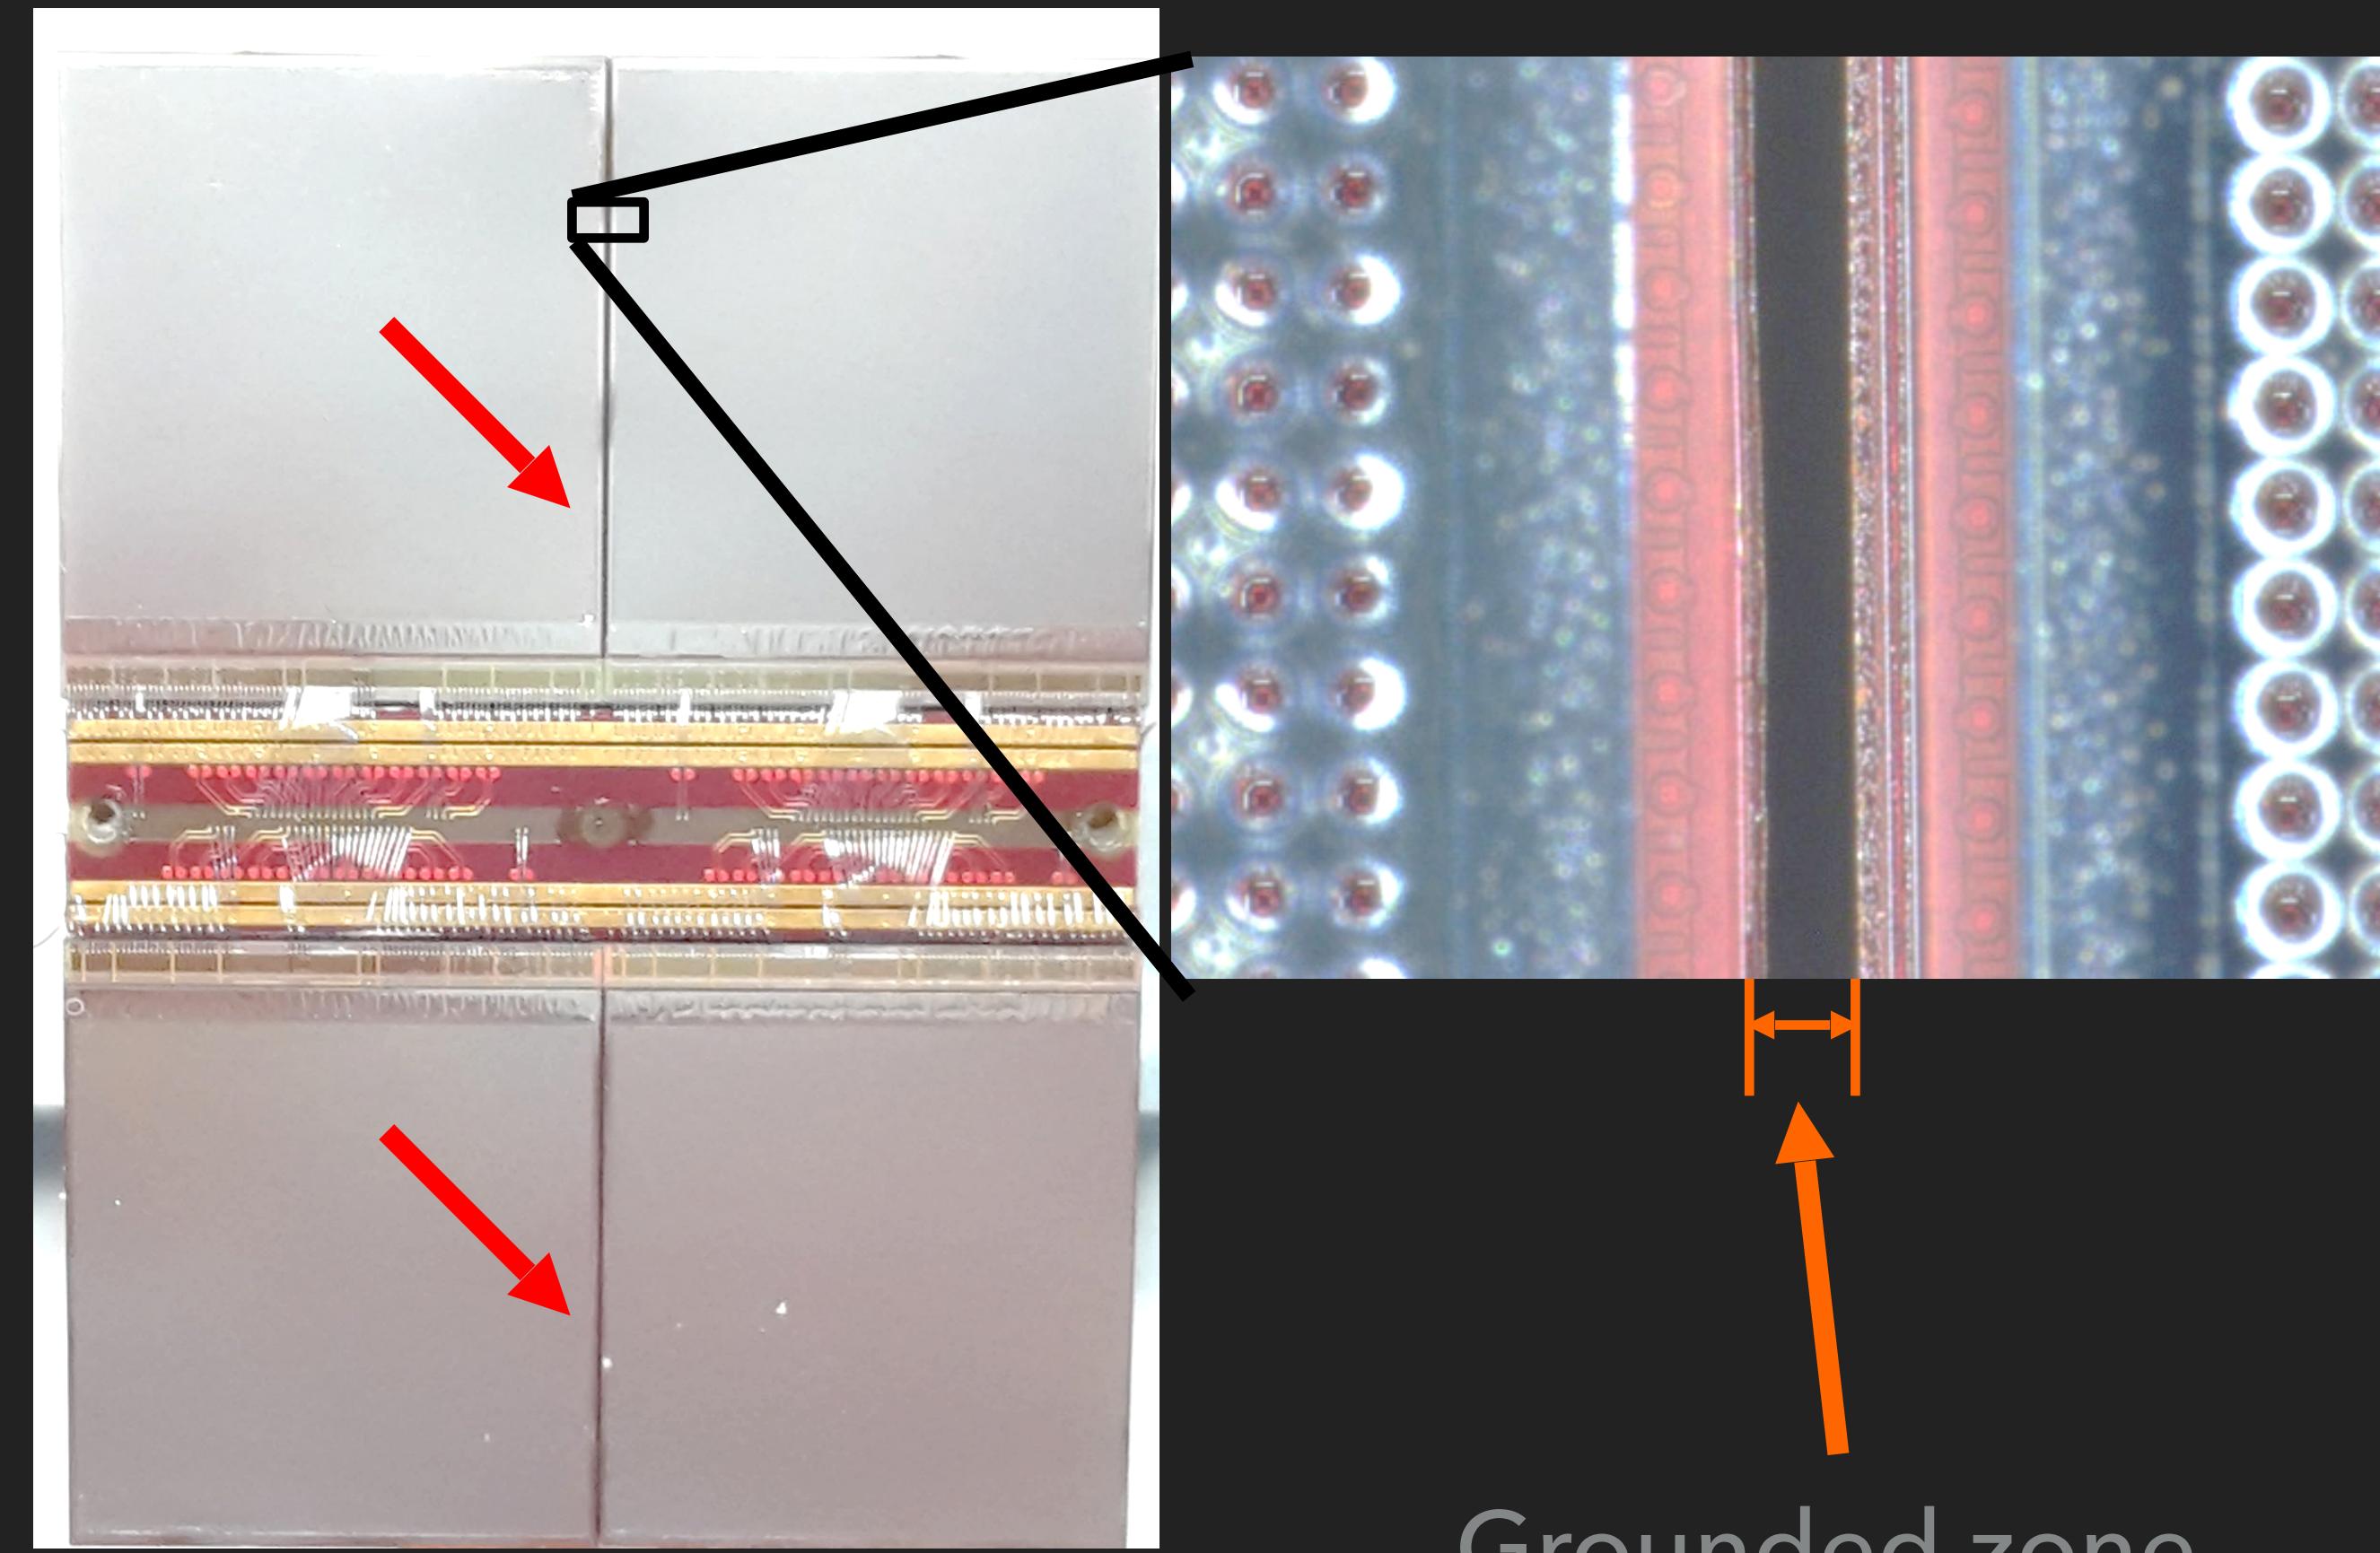

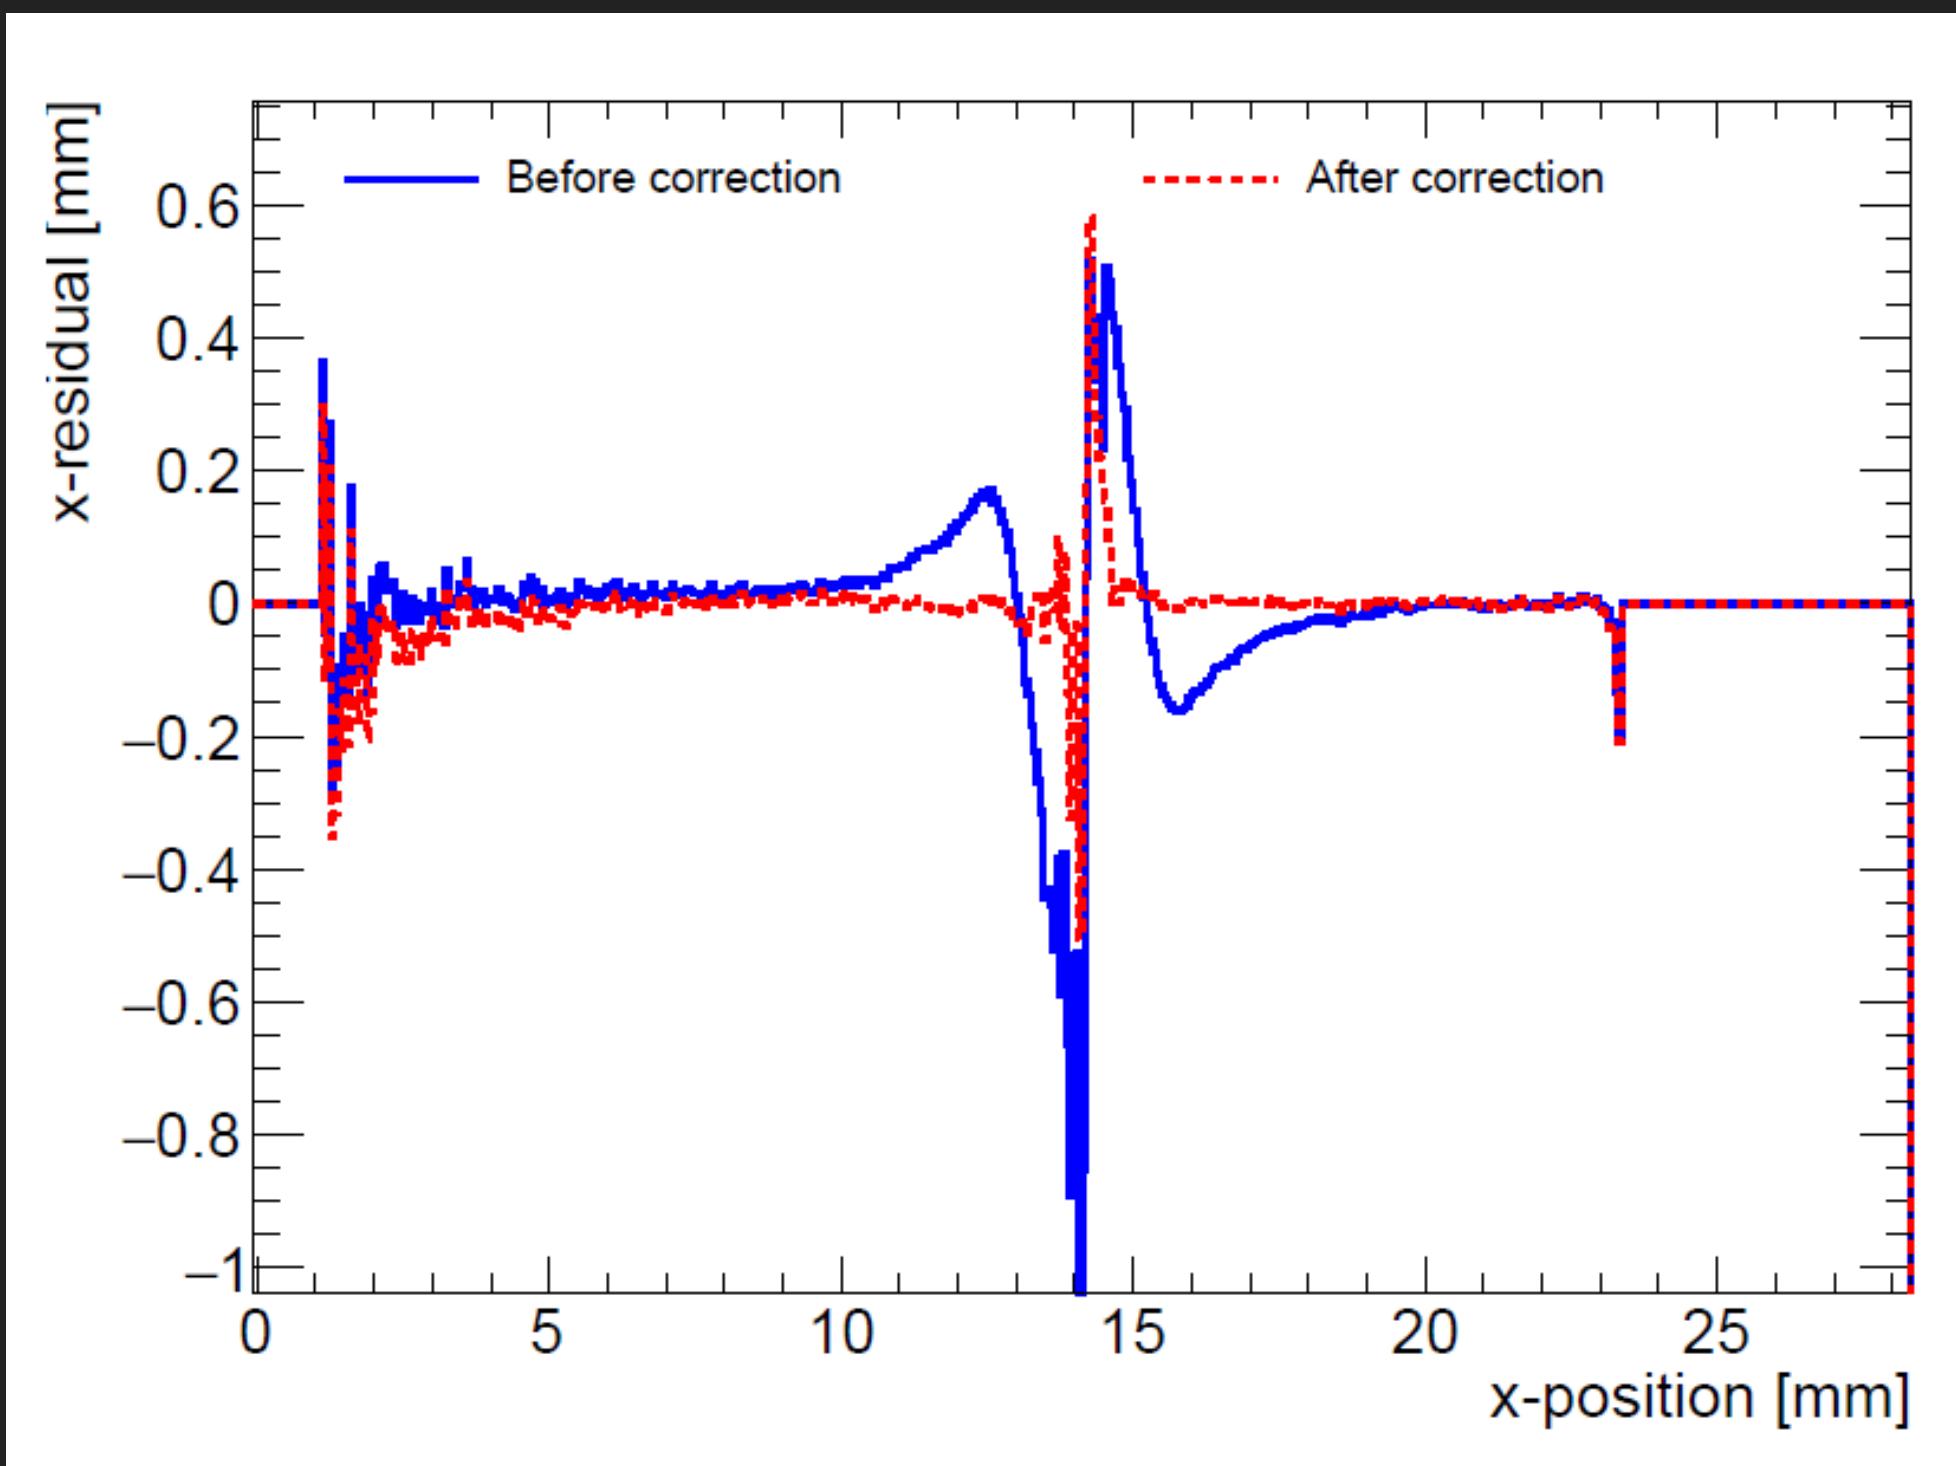

## QUAD EDGE DEFORMATIONS

- ▶ Due to inactive, grounded zone between chips

# QUAD EDGE DEFORMATIONS

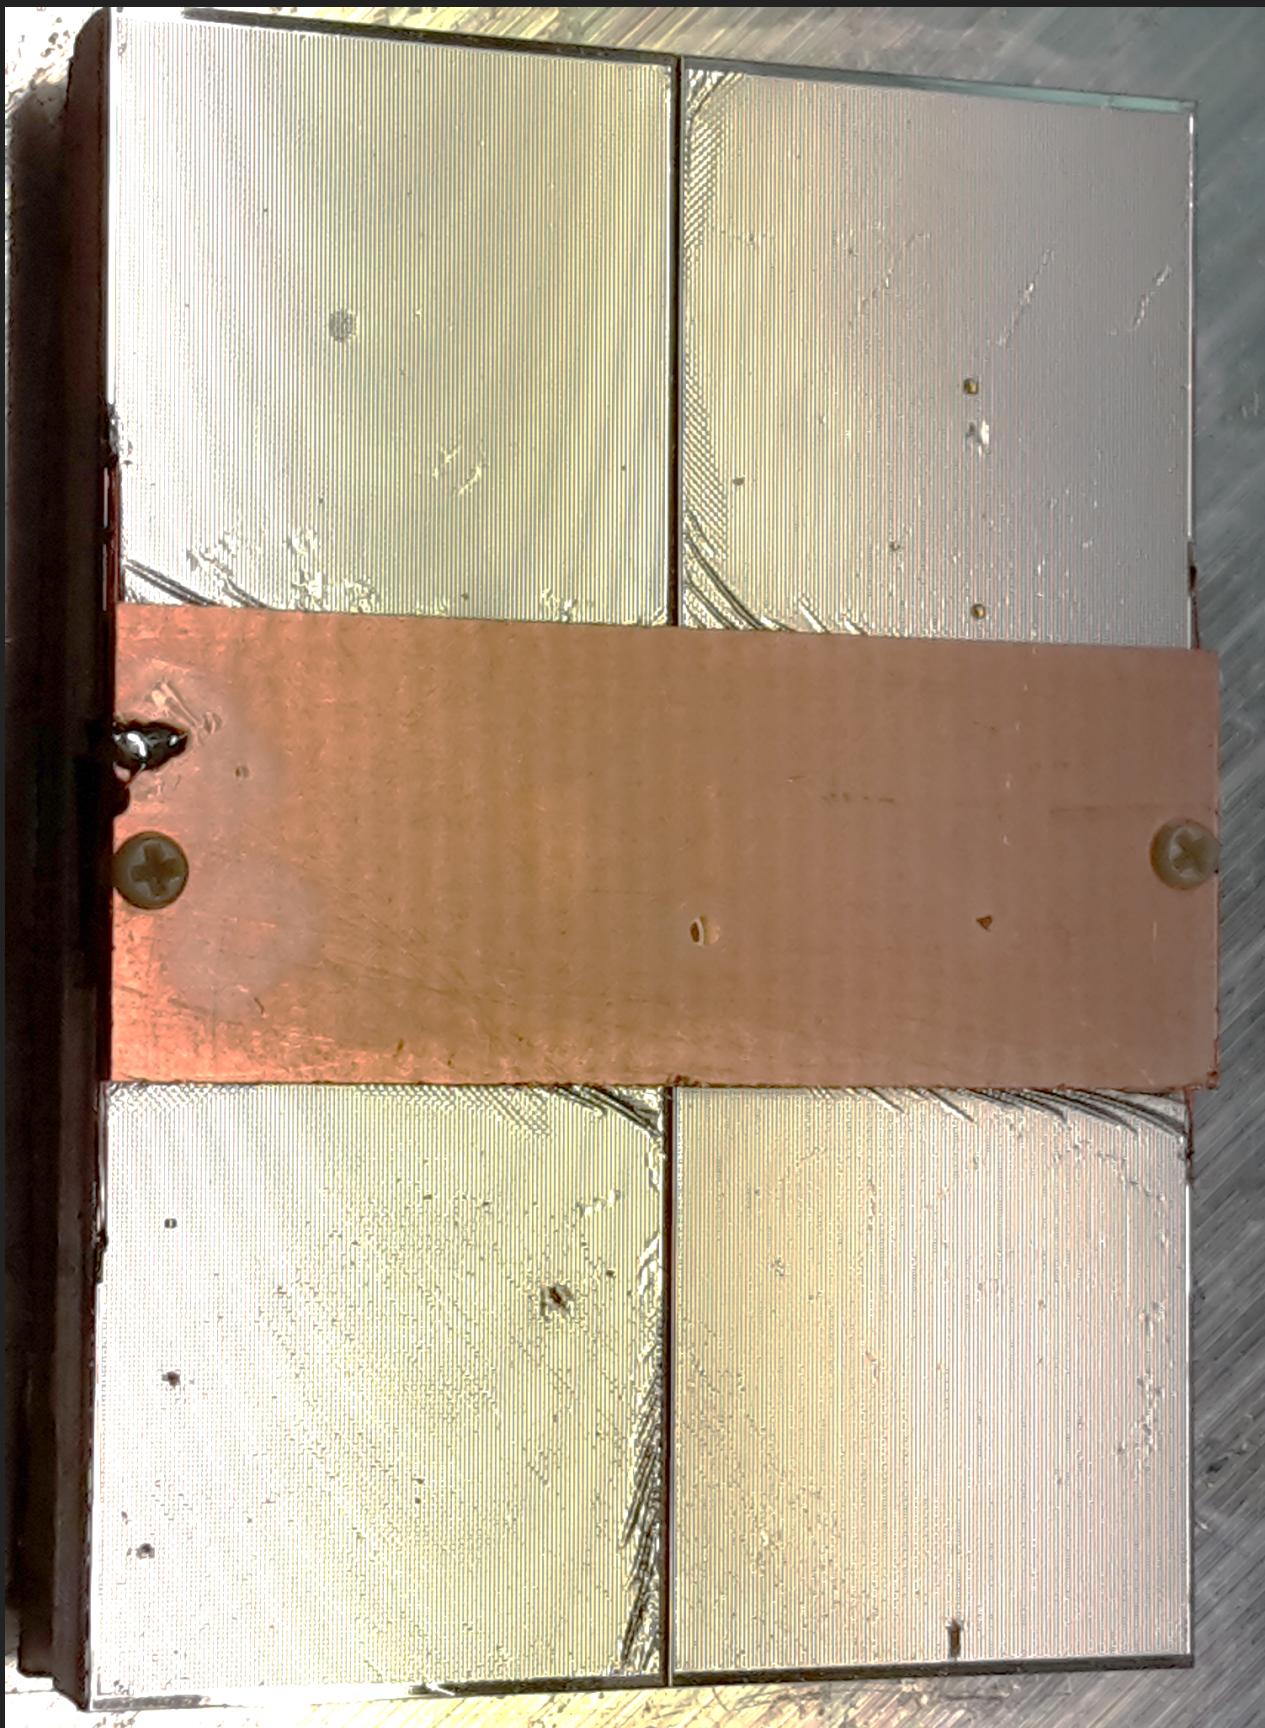

- ▶ Due to inactive, grounded zone between chips
- ▶ Correct "in software" or by addition of guard electrode

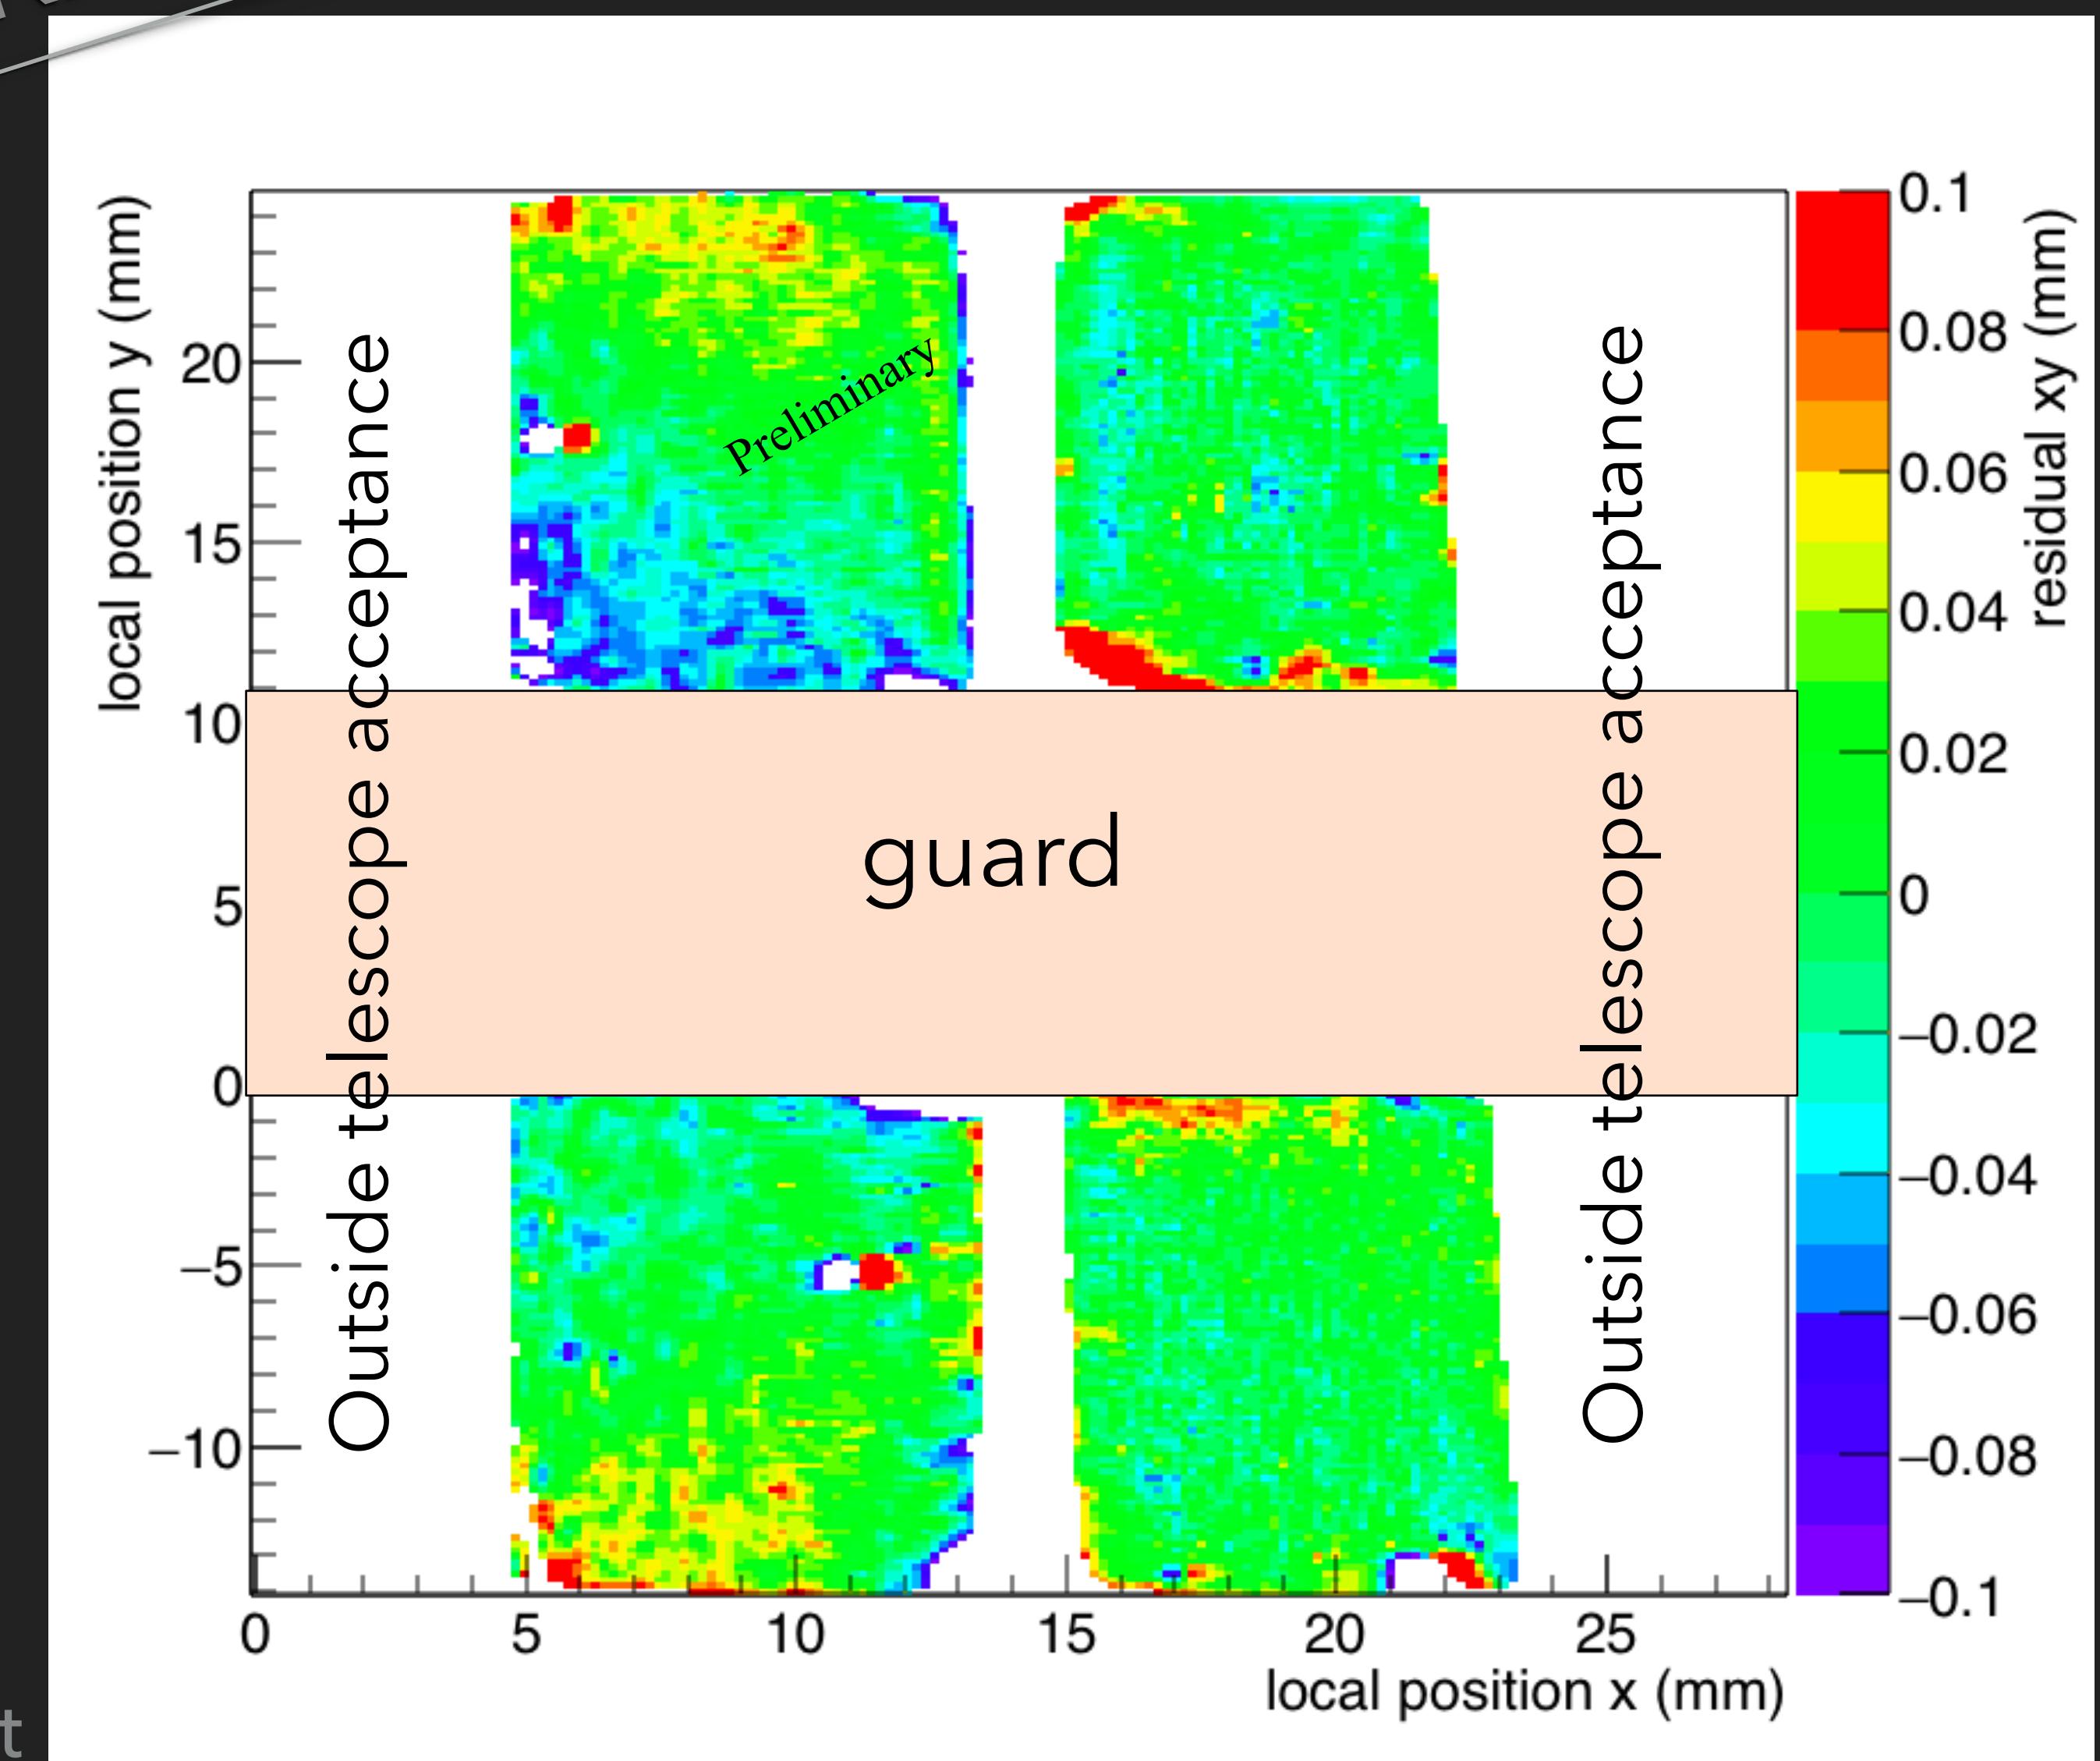

Grounded zone

PRELIMINARY!

# PIXEL PLANE DEFORMATIONS

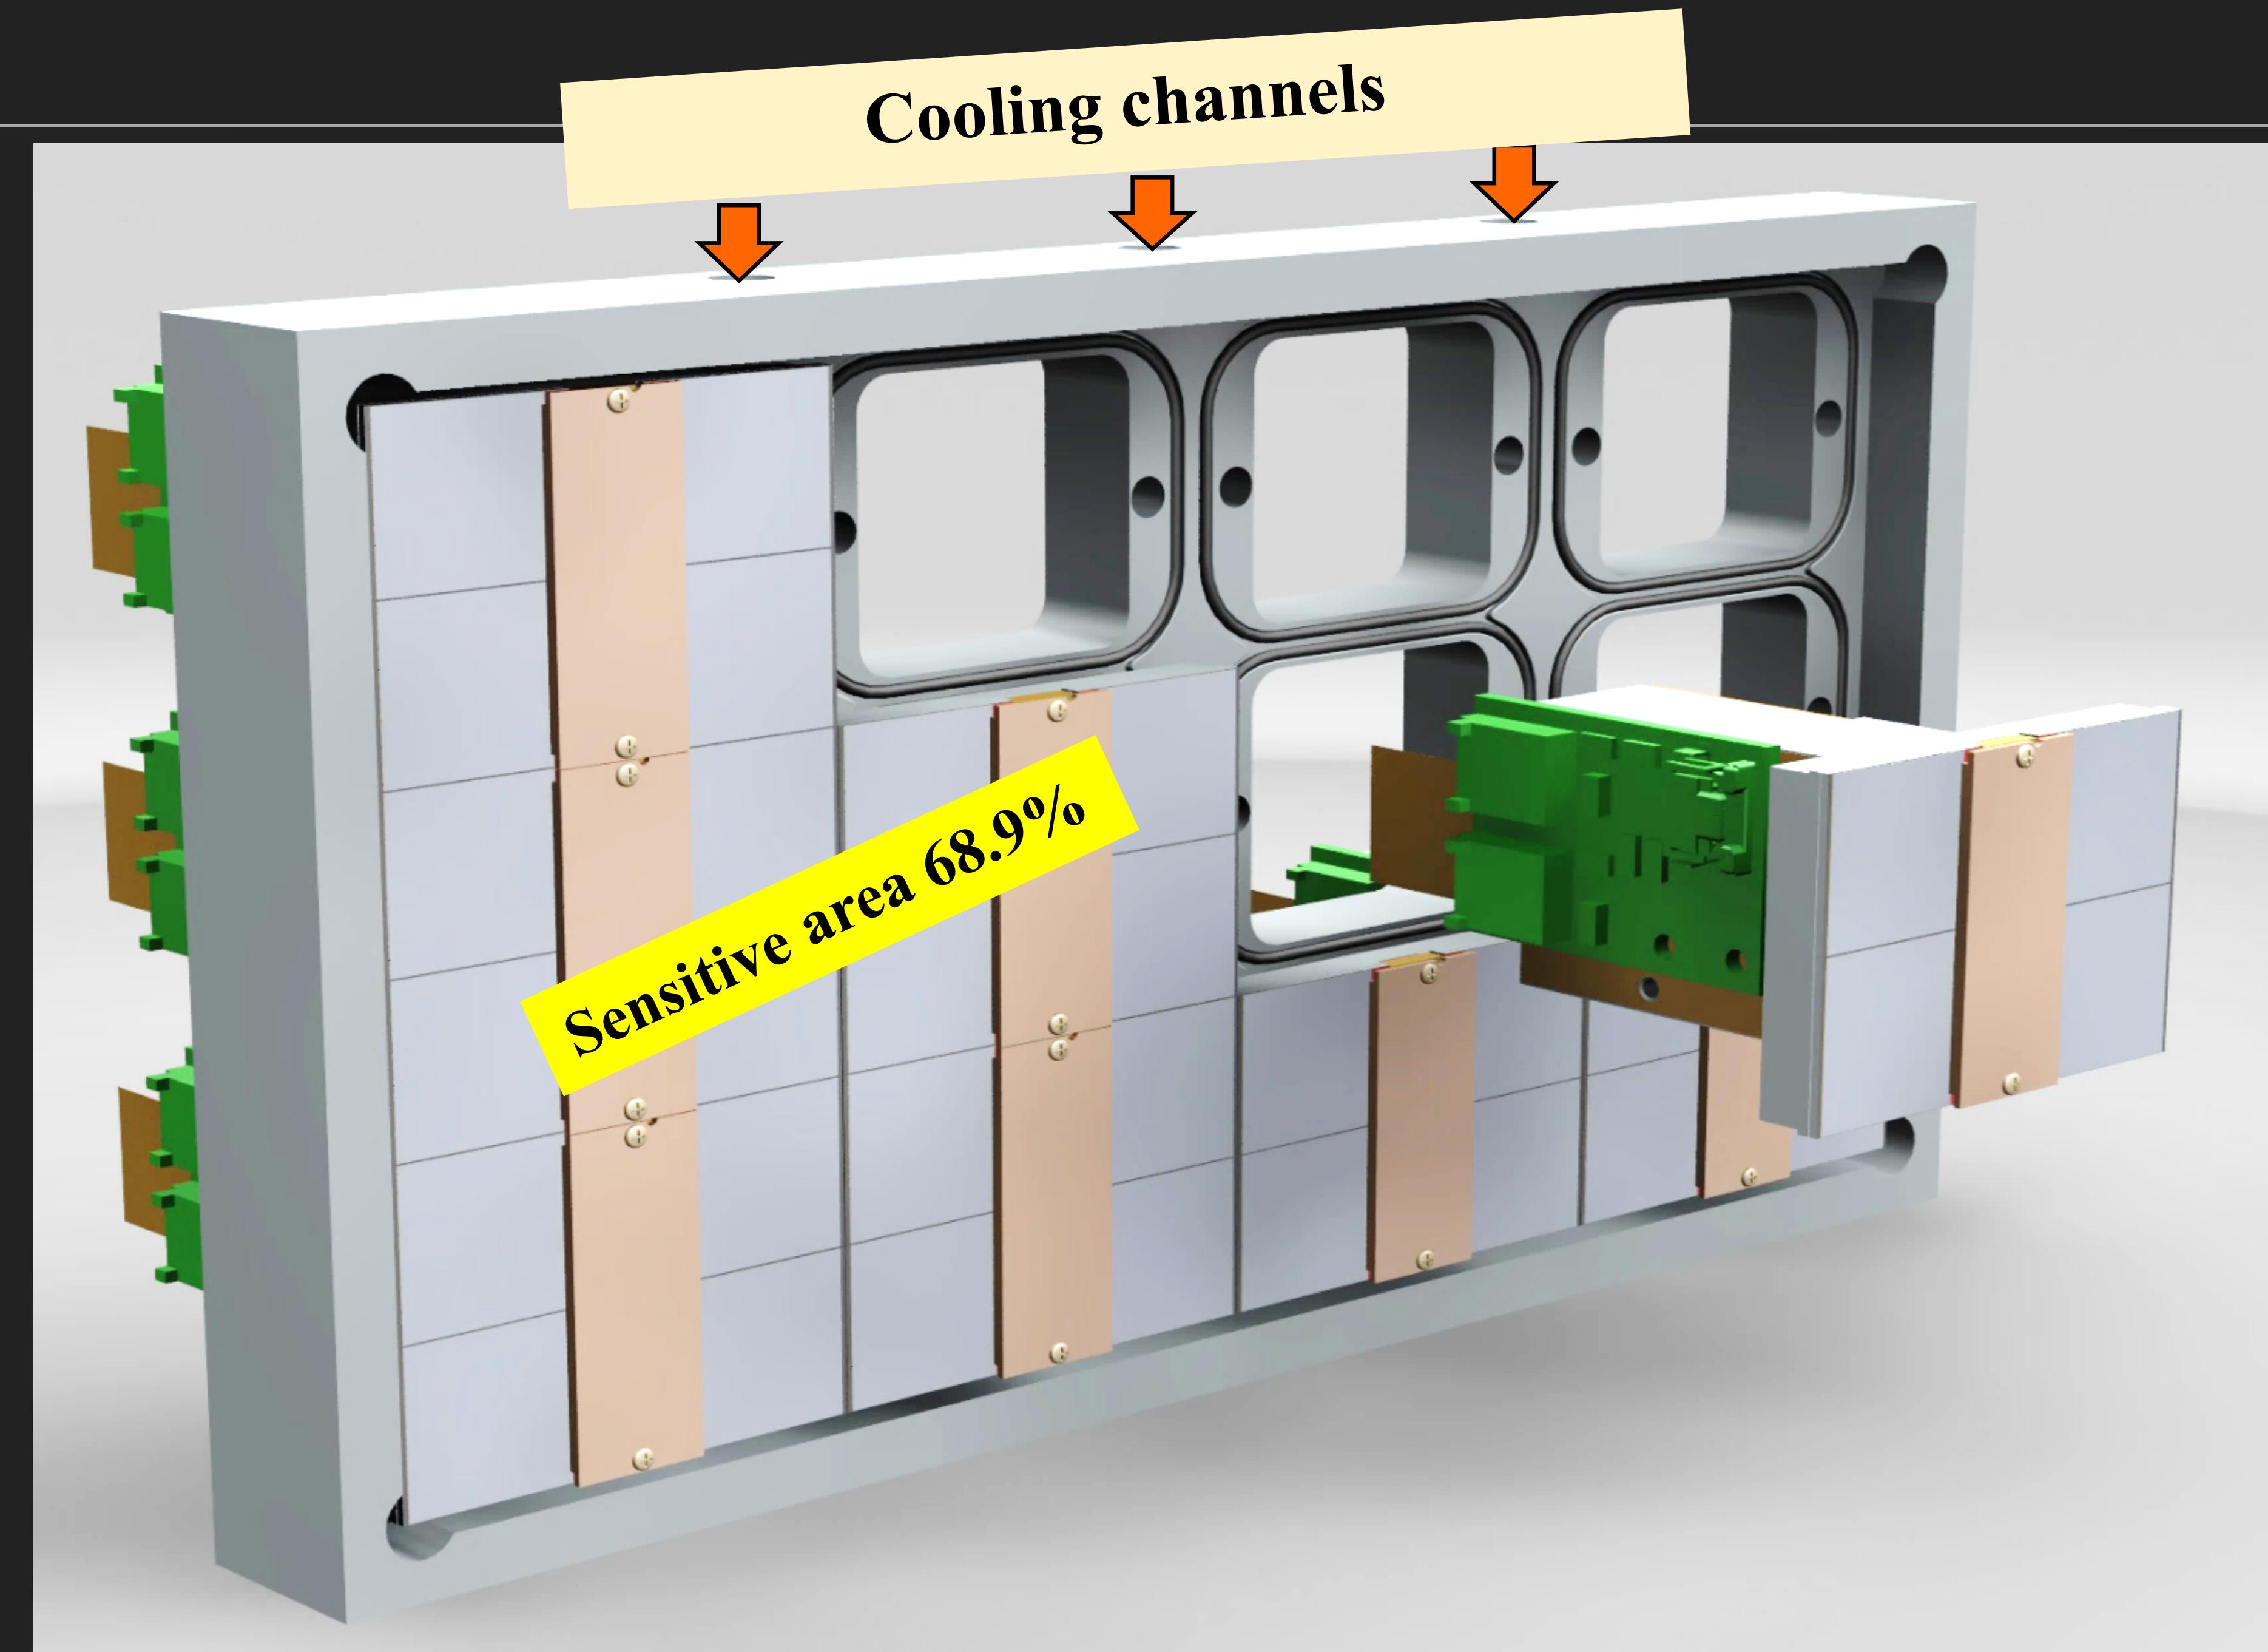

- Alignment (for now) assumes single rigid object
- After applying fitted edge corrections: residuals  $\ll 100 \mu\text{m}$

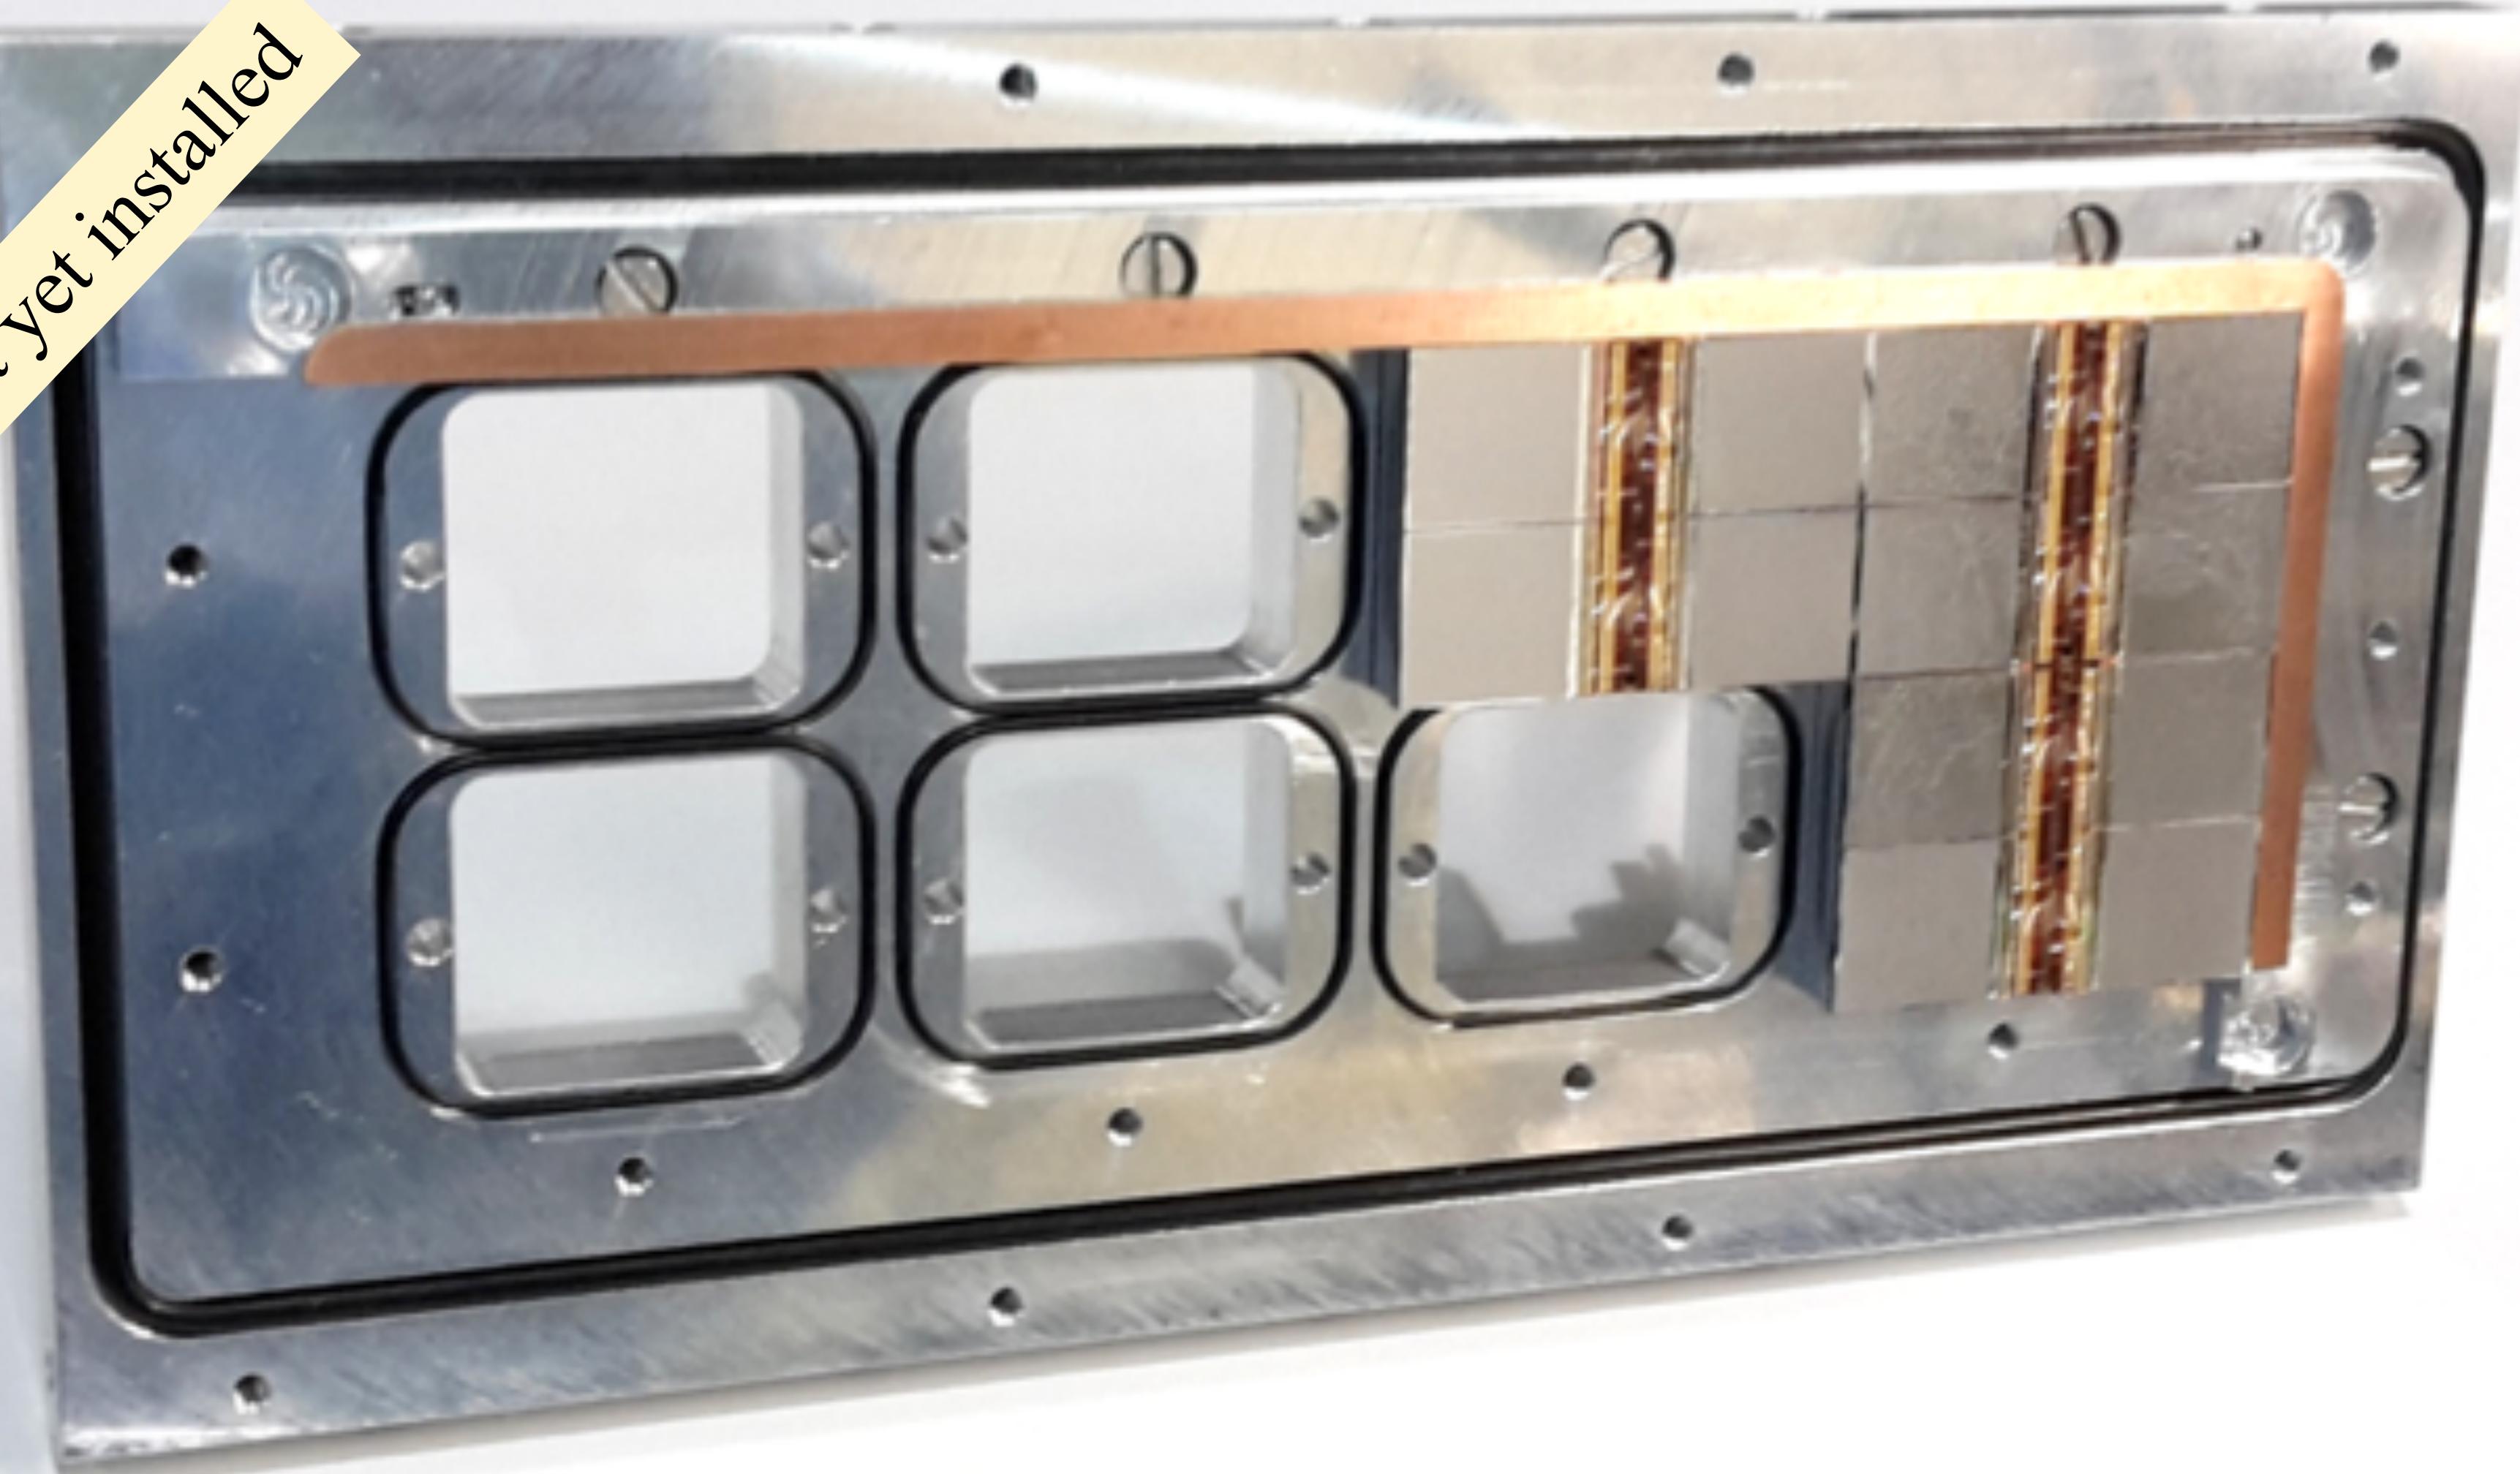

## SCALING UP...

- ▶ mounting frame with cooling channels
- ▶ 4 quads => single SPIDR readout board (in progress)

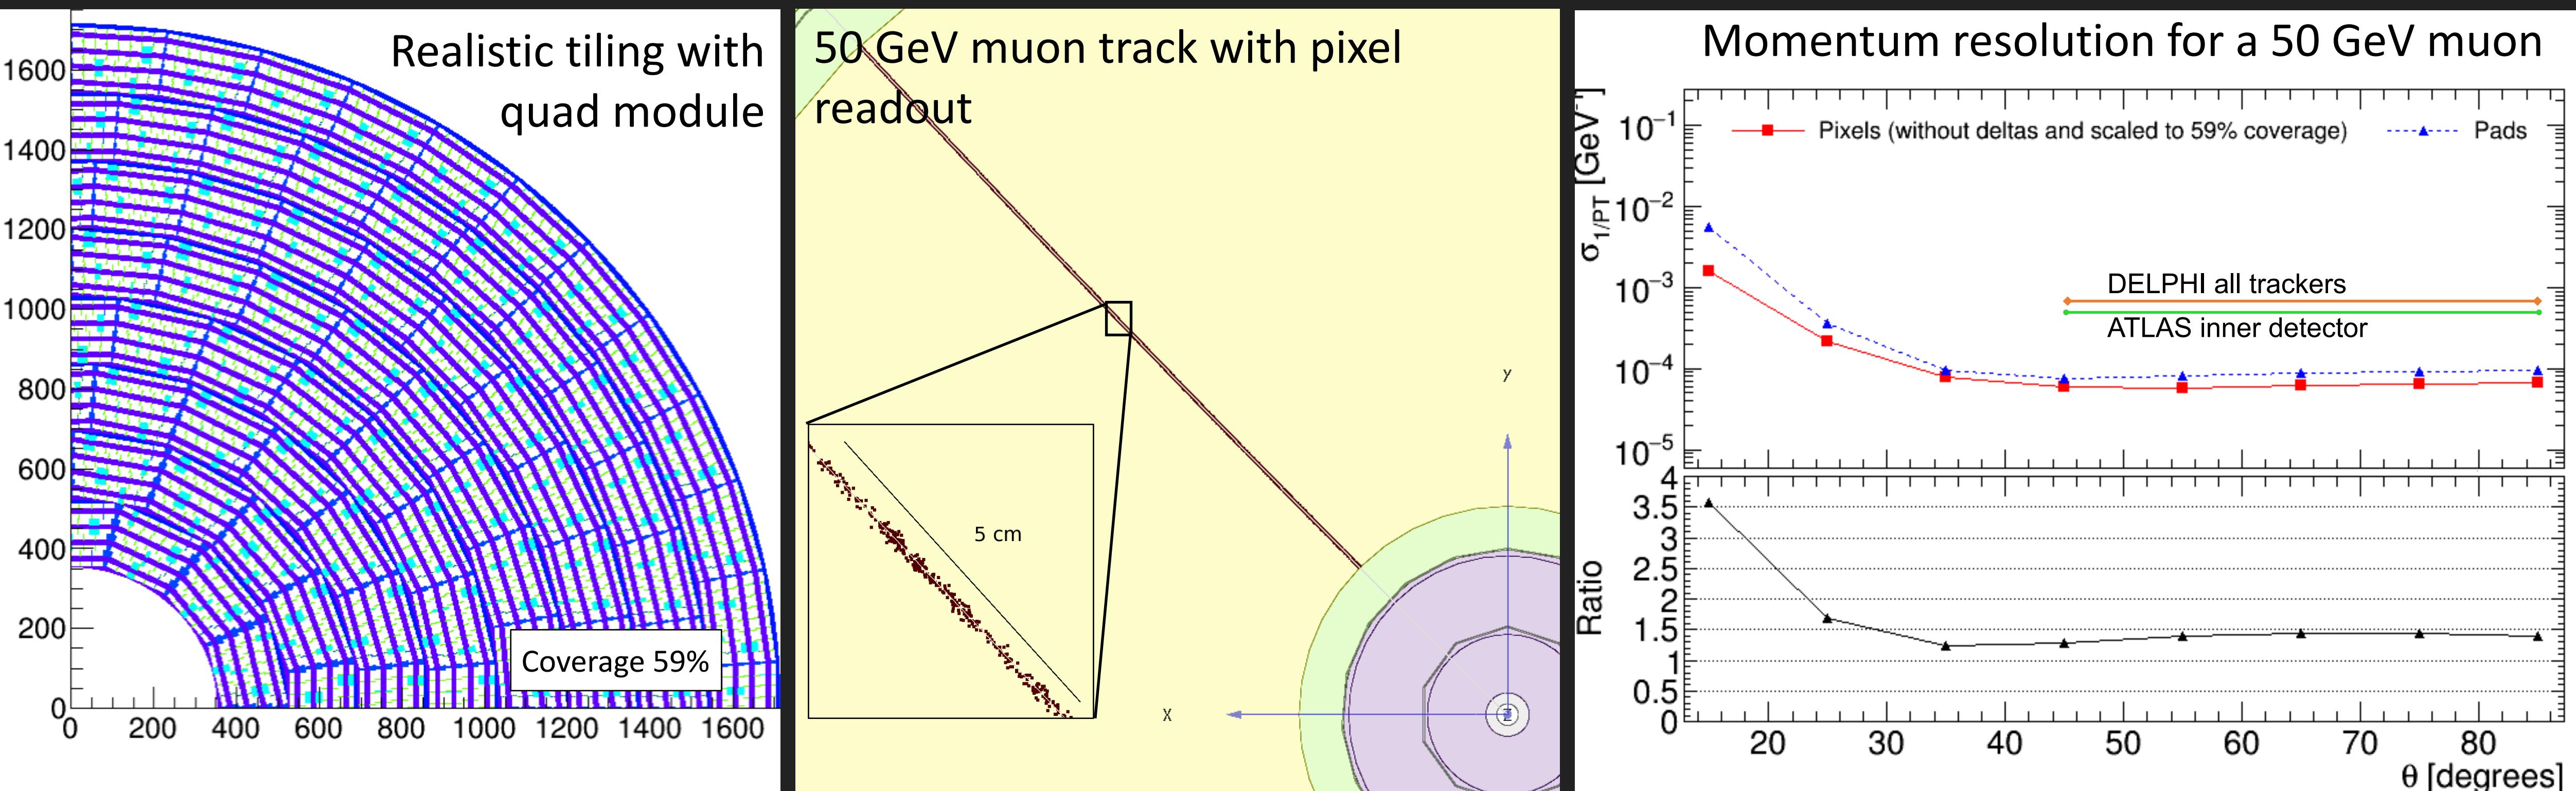

# SCALING UP!

Guard electrodes not yet installed

# PERFORMANCE OF GRIDPIX TPC @ ILC

- ▶ From DD4HEP (Geant4) simulation
- ▶ Momentum resolution: at least 1.2x improvement (assuming 59% gridpix coverage)
- ▶  $dE/dx$  resolution:  $\sim 2x$  improvement

# IN THE MEANTIME, IN JAPAN...

## TIMELINE

**December 7th** – The Science Council of Japan (SCJ) begins reviewing the draft from the ILC Committee

**December 19th** – SCJ Board of Directors meeting

-2019-

**January 31st** – SCJ Board of Directors meeting

**February 28th** – SCJ Board of Directors meeting

(Sometime within January–February, the national government will make its intentions clear?)

**March 7th** – Meeting held in Tokyo by International Committee for Future Accelerators (ICFA) and the Linear Collider Board (LCB) (→this is the final deadline)

The Federation of Diet Members for the ILC (FDMILC; chair: Hon. Takeo Kawamura of the House of Representatives, 130 members) held their general assembly within the Diet on December 7th. The international organization of scientists had called on the government to make their intentions clear by the end of 2018, but announced at this meeting that they would extend their final deadline to March 7th, 2019.

This was also a joint meeting with the Liberal Democratic Party's ILC Liaison Council, and 25 Diet members were in attendance. Lyn Evans (director of the Linear Collider Collaboration (LCC) leading the ILC project) and Hitoshi Murayama (deputy director of the LCC and professor at USC Berkeley) were also in attendance.

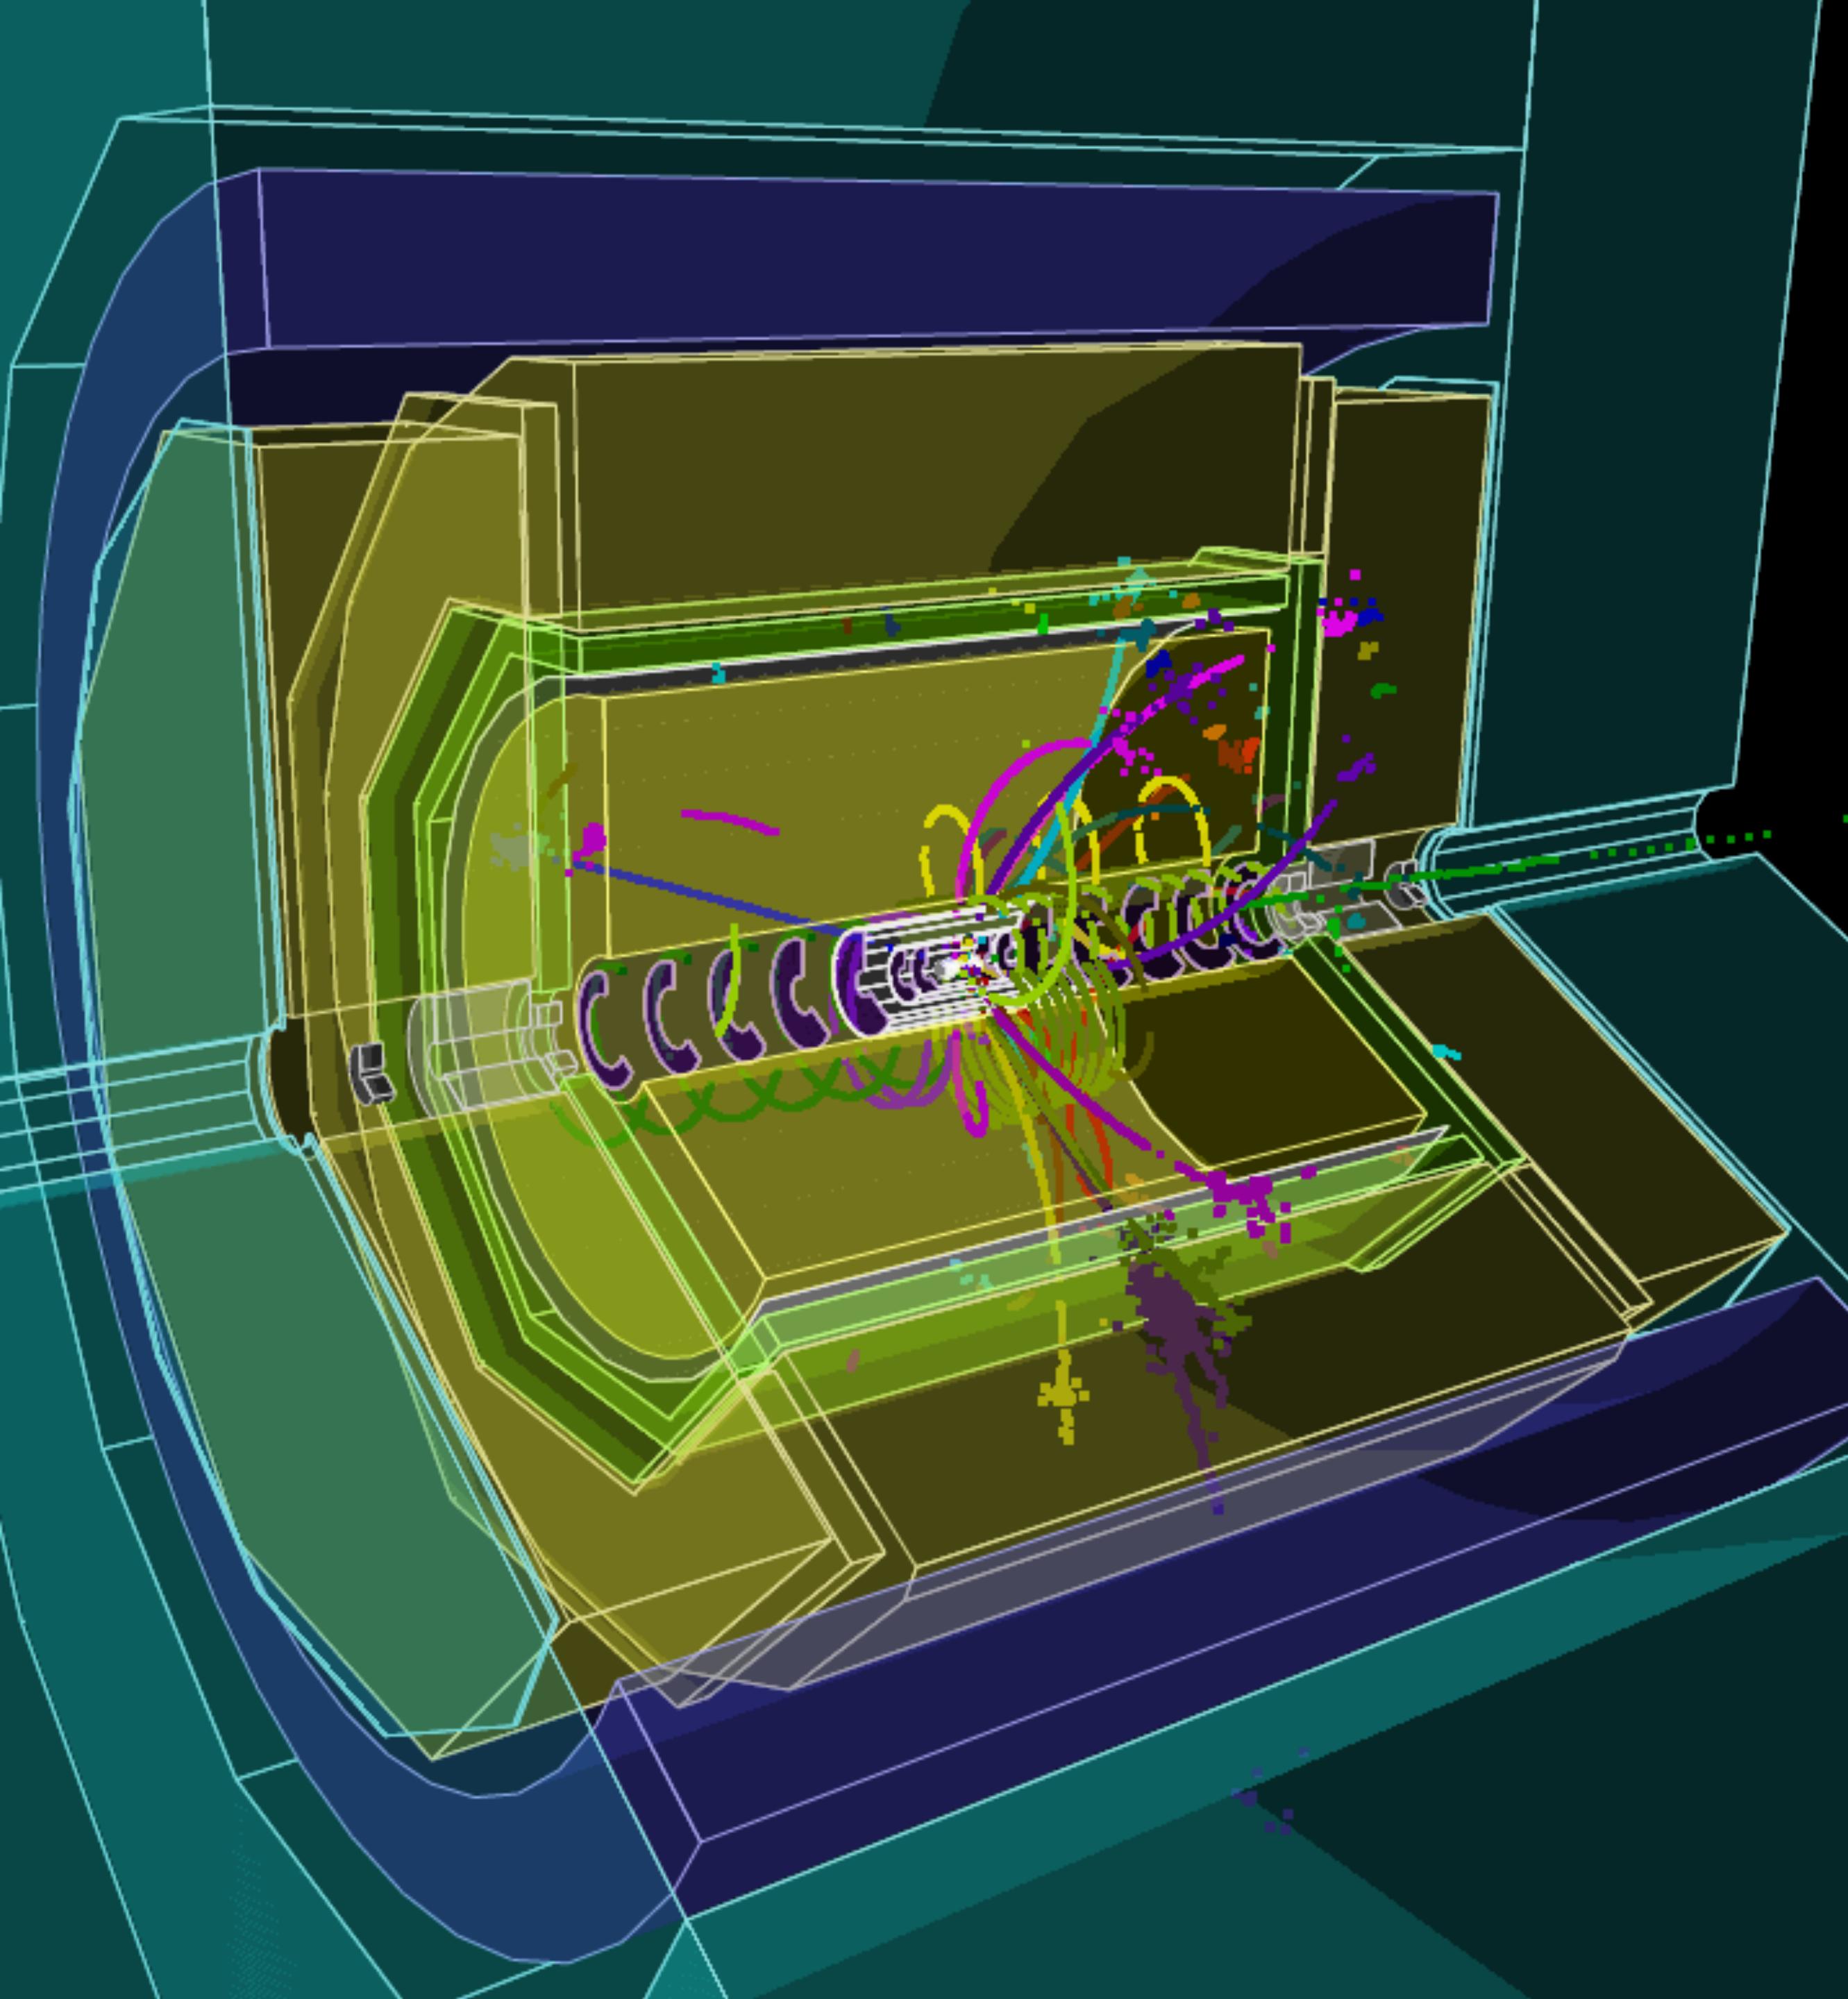

求めるのは  
前に進む意思  
リニアコライダー・コラボレーション (LCC) のリン・エバンス代表は、東京都内の会合終了後に記者団の取材に応じた。一問一答は次の通り。  
「日本学術会議の回答案では、ILC誘致に慎重な姿勢を示しているが、受け止めはしないが、議論の中でもさまた異なる見解が示されているという点と、自体は驚くことではない。さまたみな分野の委員がおり、どのようなプロセスでILC日本誘致の意思表明期限を延長したことを見明らかにしたエバンス氏」

# 誘致意思表明 国際推進組織 エバンス代表 政府判断の越年容認 来年3月まで期限延長

も示唆があることが極めて重要」という見解を示した。日本の意思表明がないと、仮に日本がILC計画は世界で進展せず、来年3月までに表明がない場合には、ILCの研究者が中国での加速器建設に参加する可能性があるとした。

【東京・北村亮】次世代の大型加速器「国際リニアコライダー（ILC）」の国際共同研究推進組織リニアコライダー（LCC）のリン・エバンス代表は7日、東京都内の会合に出席し、ILCの誘致について2019年3月までに日本政府が意思表明するよう求めた。これまで年内の意思表明が必要としてきたが、ILC誘致の可否について文部科学省から審議依頼を受けた日本学術会議がまだ回答を示していない中での表明は難しいと見込んで、期限を約3ヶ月間延長。政府判断の越年を容認した形で、エバンス氏は日本の誘致決断への強い期待感を示した。
