

Review articles on laser cooling of atoms and molecules

I have chosen the following for their accessibility; they are written for non-expert readers:

- C. J. Foot, “Laser cooling and trapping of atoms”, [Contemporary Physics 32, 369 \(1991\)](#)
- W. D. Phillips, “Nobel Lecture: Laser cooling and trapping of neutral atoms”, [Rev. Mod. Phys. 70, 721 \(1998\)](#)
- M. R. Tarbutt, “Laser cooling of molecules”, [Contemporary Physics 59, 356 \(2019\)](#)
