

Introduction to Parallel Sessions

Jeff Templon

<2019-12-16 Mon>

Lunch

- PhD council lunch in expo room - please let PhDs ahead
- dear PhDs, please don't eat all the “good” stuff
- don't forget the vragenmuur
- whiteboards in lobby: please use. **n.b.** two kinds of markers

Non-programme-specific Sessions

- Already had one : the two lightning talks
- Just after lunch : parallel discussion sessions
- Late afternoon : “The Elephant in the Room”
(organized by PhDs)
- Tomorrow morning : lightning reports from Monday parallel sessions
- Tomorrow afternoon : plenary “vragenmuur” session

Just After Lunch

Parallel Sessions

- Let's combat gender bias together
- Testing the Standard Model with low, medium, and high energy physics
- Sustainability in Subatomic Physics
- Links between Gravitational Waves and Particle Physics

Time	Expo Room	Grote Zaal	Workspace
13:40 – 14:25	gender	low to high	sustainability
14:25 – 15:10	gender	<i>open</i>	GW and PP

For your consideration

- Law of two feet : if you feel you're not learning and not contributing, use your feet, move to another session
- working in the lobby (or organising your own smaller session) is also an option
- “open” slot can be used to repeat a popular session, or spontaneously organise a different one during lunch
- watch the time : keep sessions in synch
- max participation in gender session 40 persons
- above all: *discuss!*

Gender Session

Abstract: Gender bias is happening everywhere, sometimes deliberate and sometimes unconscious. This negatively impacts the career progress and work experiences of women, and blocks the way to a more diverse workforce. This workshop takes place in a relaxed knowledge-café style, allows a conversation about settings in which bias typically occurs, and provides (research-backed) tools to address the issue while it is happening.
