

STAFOVERLEG

- CERN slowly reopening
- Introduction to Strategy discussion

Apologies to Colloquium organisers for stealing their slot

26/06/2020

Patrick Koppenburg

Nik|hef

1. CERN SLOWLY REOPENING

CERN accepts 500 additional people per week until normal operations mid-September

- Now LHCb accepts all users for small fraction of time (I got 20%)
 - ➔ Unbureaucratic procedure involving CERN LHCb team leader
- ATLAS don't do that yet
- ALICE only lets people on white-list enter, for hardware activities
- It's very quiet; everybody wears masks.
- Library and kiosk are closed; Restaurant requires pre-orders . . .

2. EUROPEAN STRATEGY

Today we should have discussed the outcome of VistaUpdate (planned 3–4 June)

Instead

- European strategy released last week
- We assume that most (all?) of you have followed it or listened to Eric's talk on Wednesday.
- ➔ Only short recap of most important points (Eric)
 - First quick discussion on what it implies for Nikhef
 - Planning for a face-to-face meeting in Autumn
