Update of the Nikhef strategy

Current strategy has been written in 2017. This is a mid-term internal review.

Is the strategy still adequate and do we need modifications?

The European Strategy for Particle Physics has become public in May 2020.

Review the consequences for Nikhef – and positioning as National Lab. In this discussion the APPEC roadmap/strategy and CAN roadmap serve as input as well.

The Einstein Telescope attracts a lot of momentum.

What is the balance of ET activities at Nikhef and what are future scenarios?

Diversity

Improvement of inclusiveness with the aim to install effective actions to improve the diversity and notably the gender balance.

Attraction of (scientific) talent to Nikhef

How are we doing in attraction of talent, and does it need modernization?

Sustainability at Nikhef
