

# Track start point/end point

Valentin Pestel, Brían Ó Fearraigh

## Aanet :

- Initially thought track length was not stored
  - Trk::len is always 0
  - But in fact available in Trk::fitinf[10] (JSTART\_LENGTH\_METRES)
  - Should we open a git issue for that ?

## JPP :

- Would it be (already) possible to get the start and stop time of the track ?
  - Opening an issue ?
