

- Looking at .csv files in /data/velo/raw\_scope\_data
- Plotting differences between voltages in 2st-3nd (clock?) and 4rd-5th (signal?) columns vs. time in 1st column
- Started by overlaying data in n018-vp1-1(**2**)-opbv2.csv files, corresponding to good (**bad**) chip for some different time ranges

# n018-vp1-{1,2}-opbv2

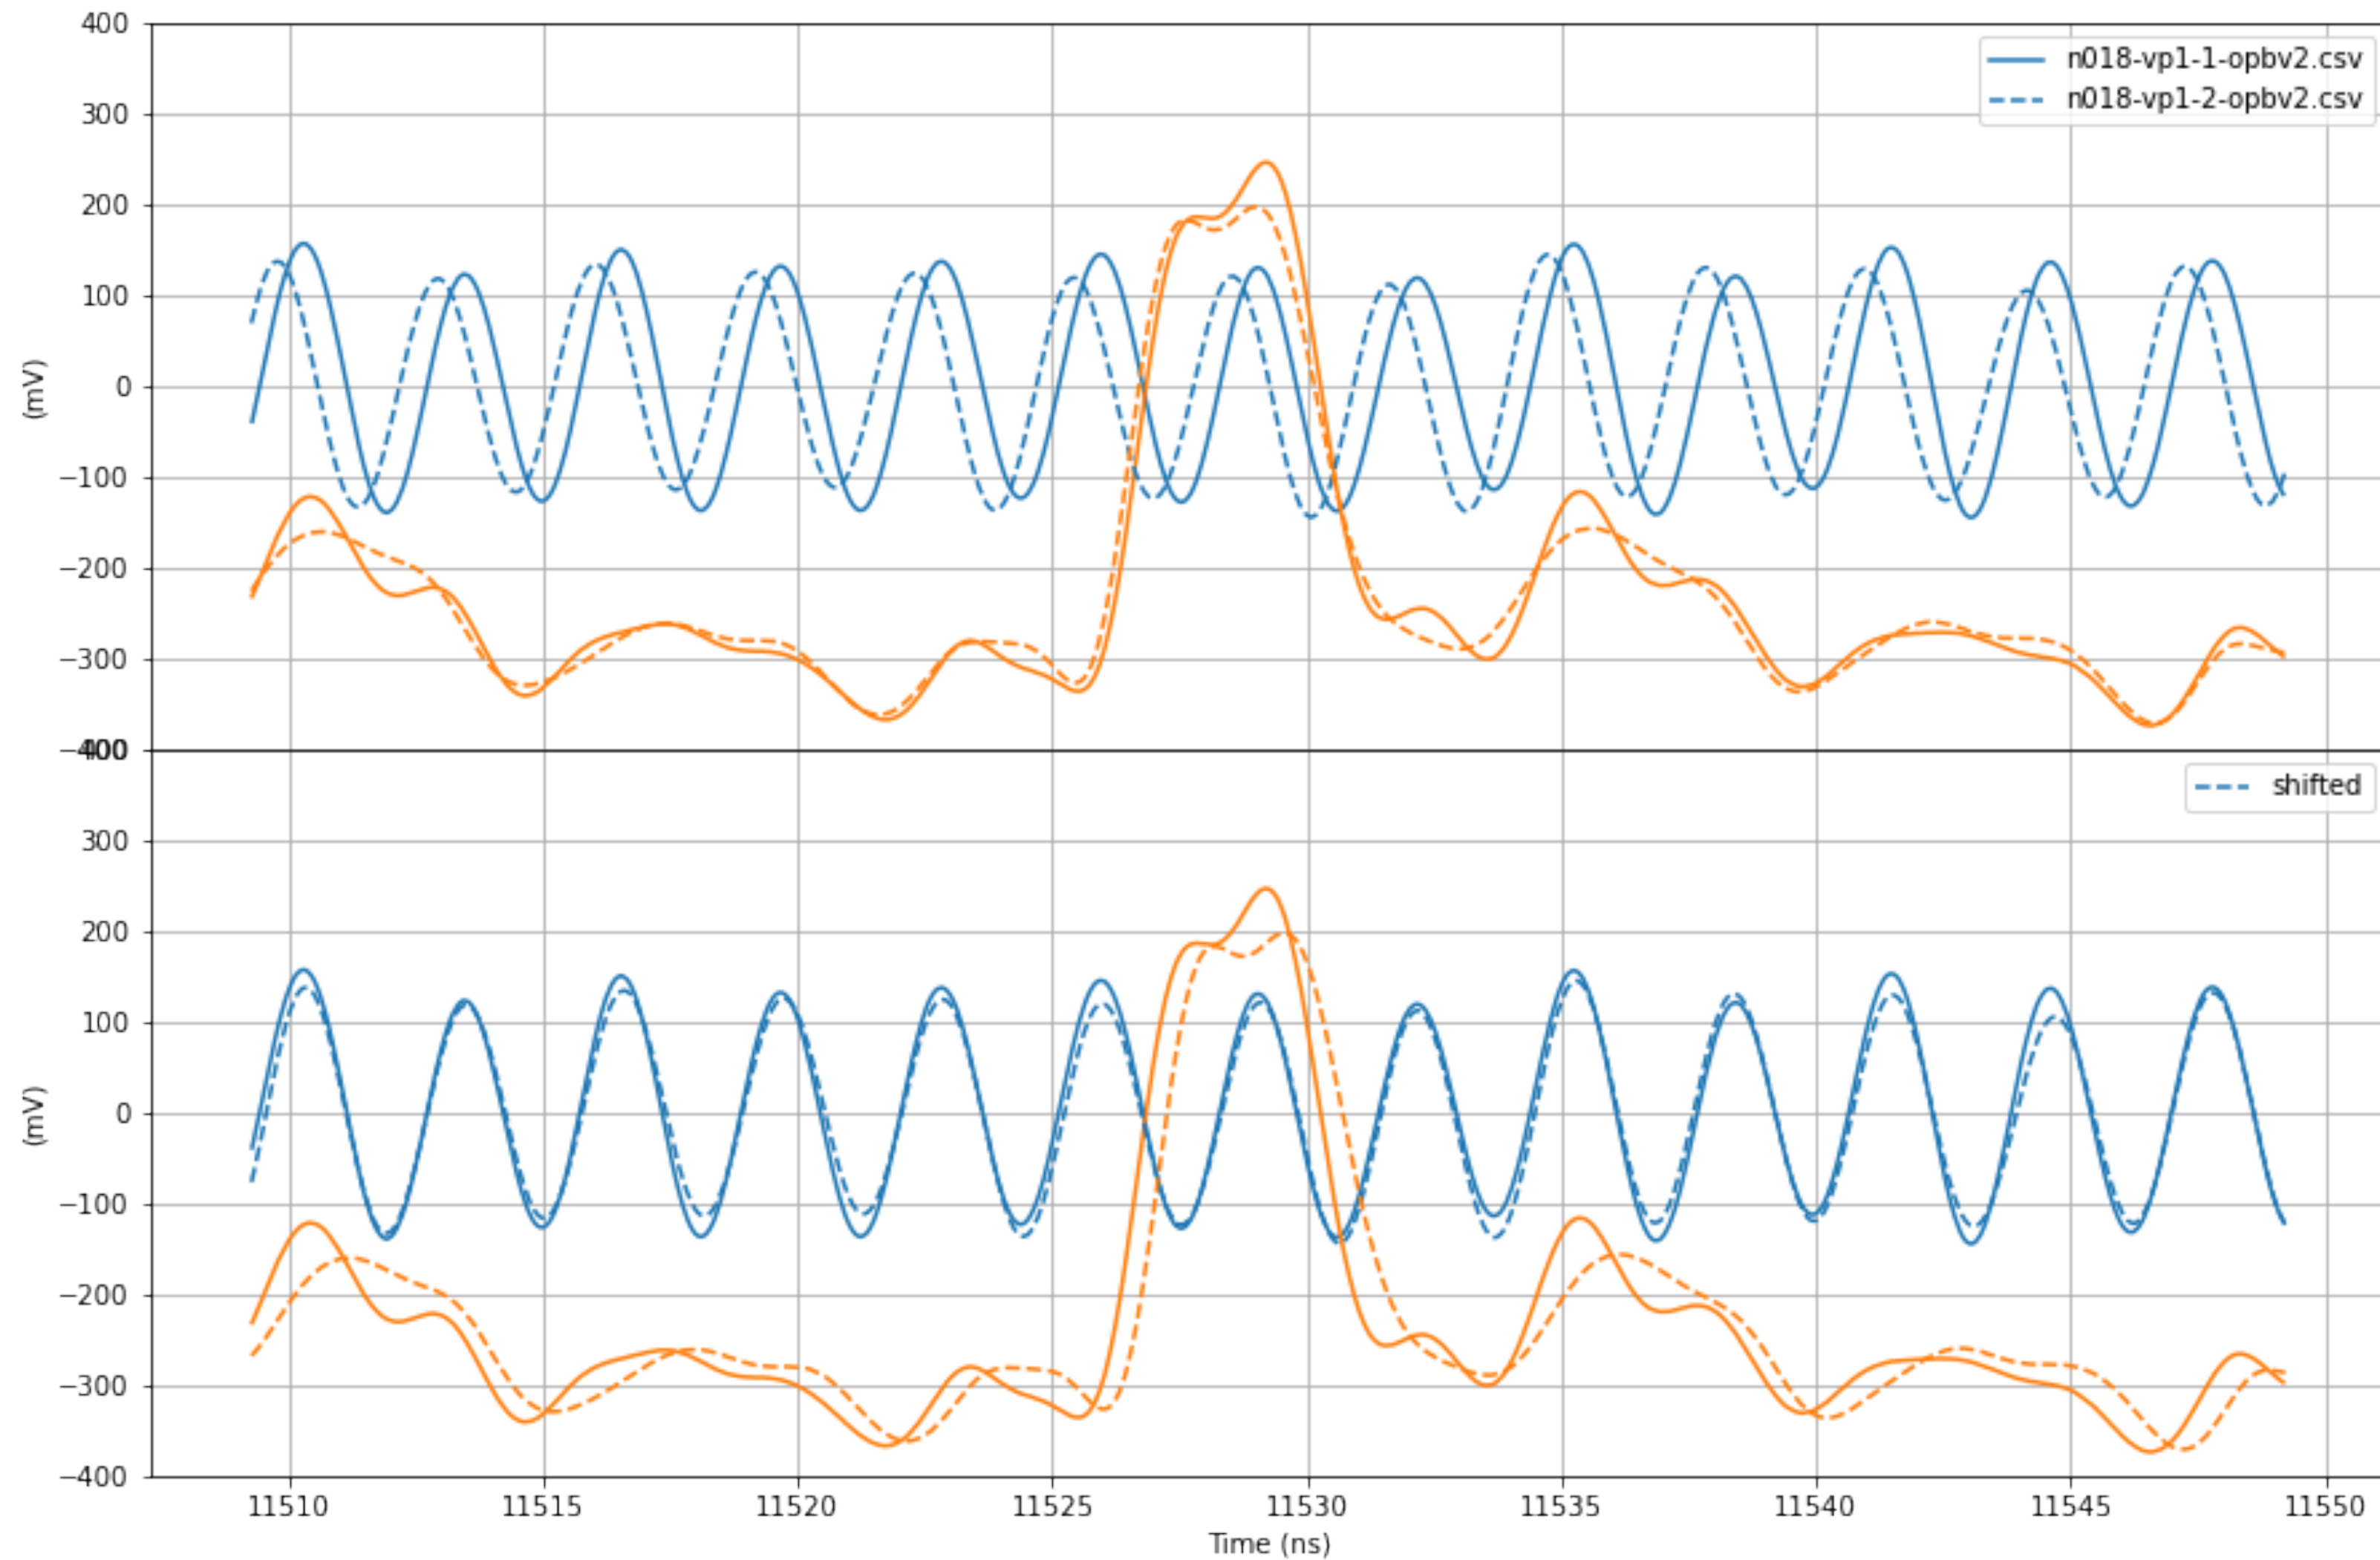

\* Dashed lines shifted by the average distance between the peaks of the blue lines

# n018-vp1-{1,2}-opbv2

\* Dashed lines shifted by the average distance between the peaks of the blue lines

# n018-vp1-{1,2}-opbv2

\* Dashed lines shifted by the average distance between the peaks of the blue lines
