

ALICE in Run 3: Jets and data taking

Jamboree 2023

Gijs van Weelden, 16.05.2023

Jets

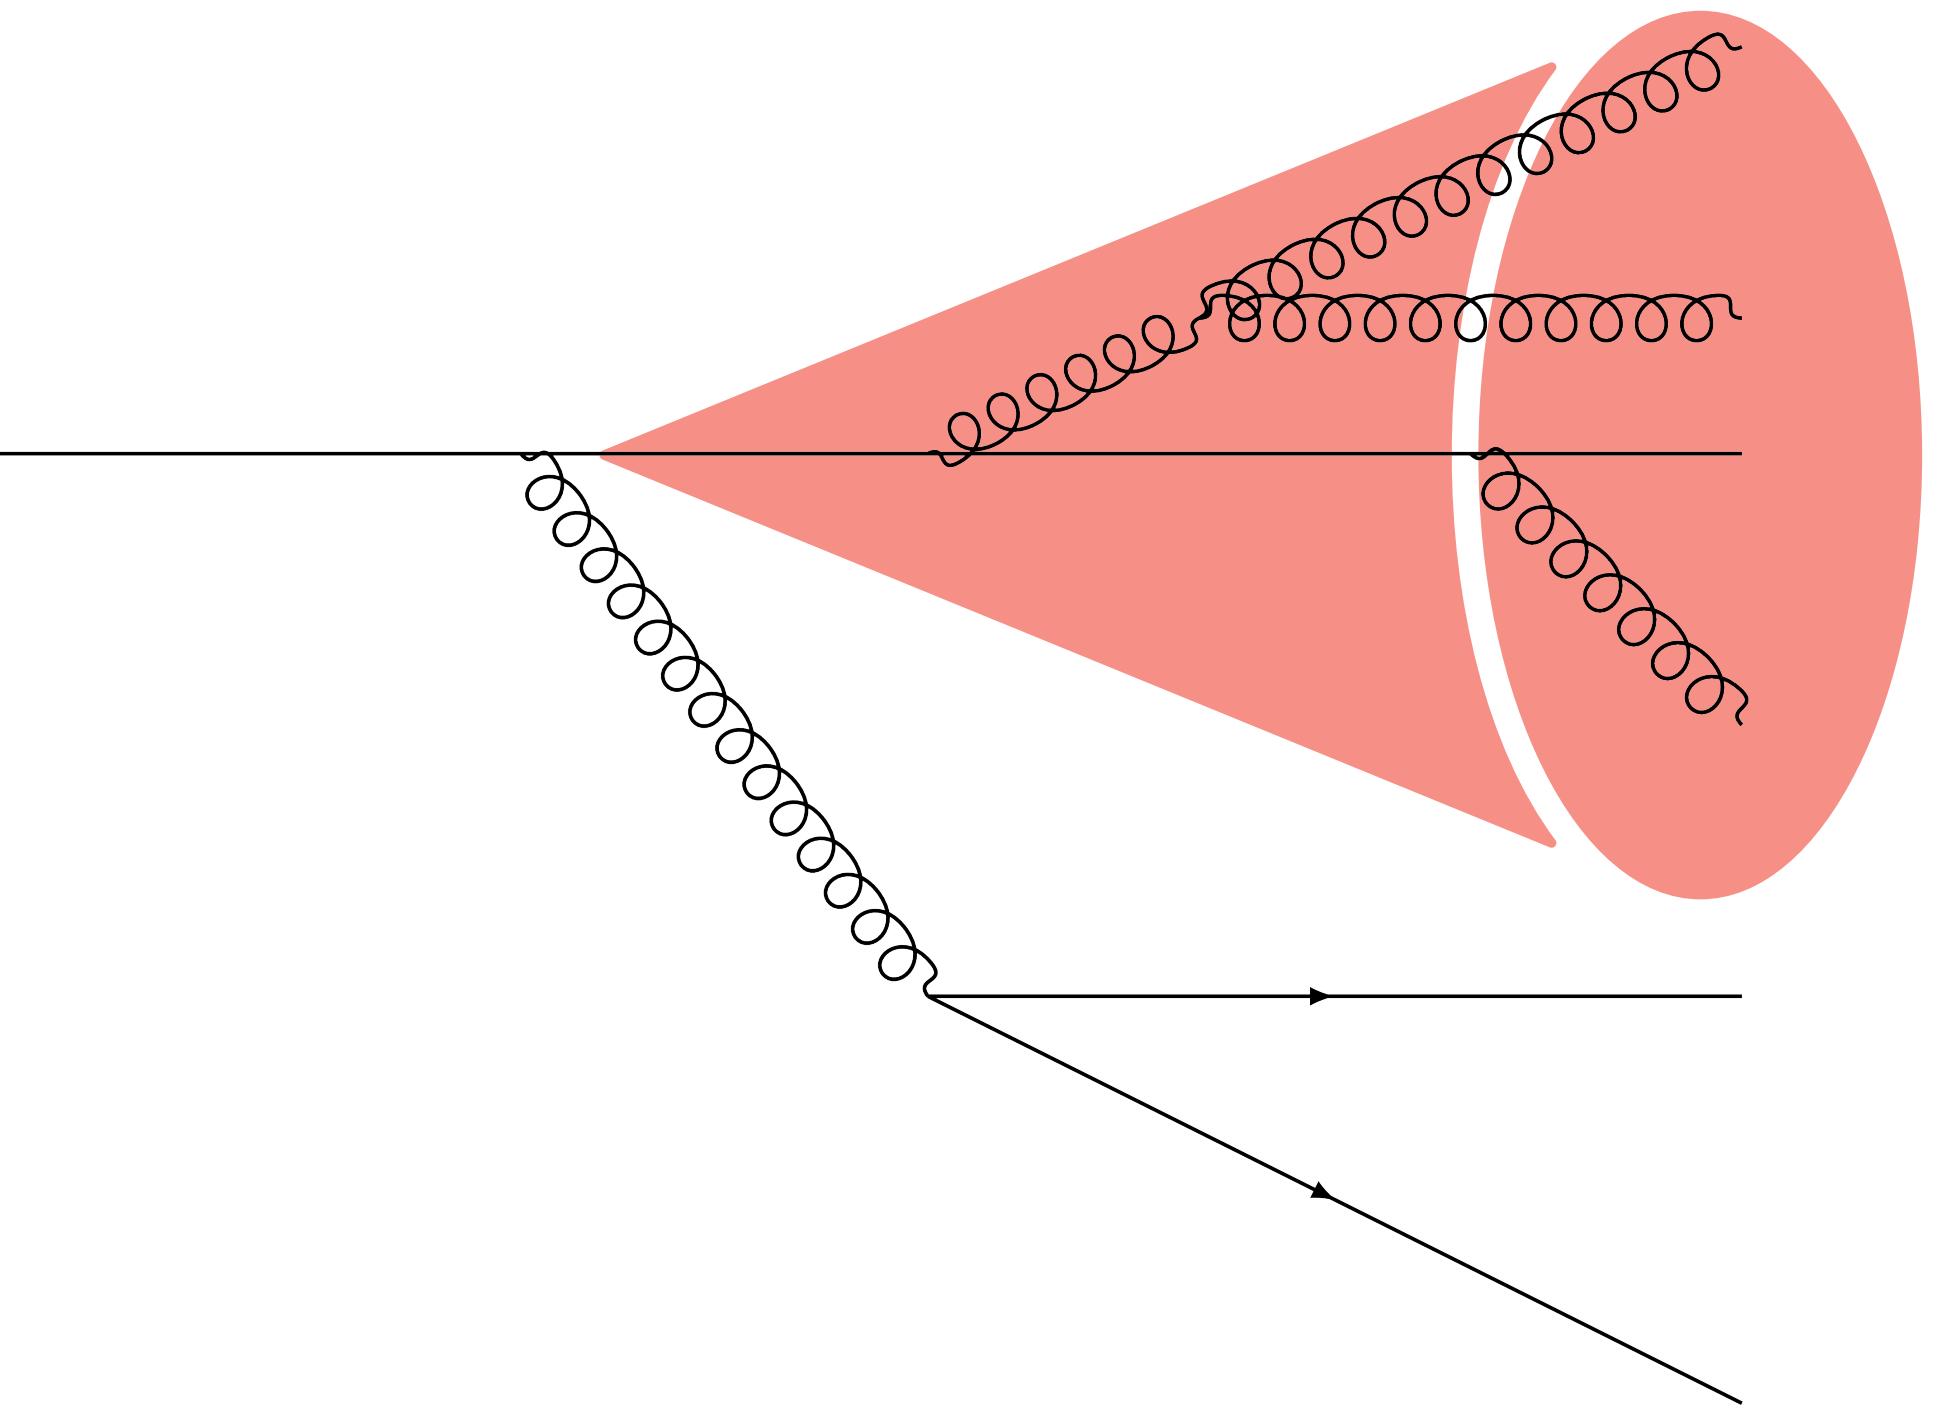

- Energetic spray of particles

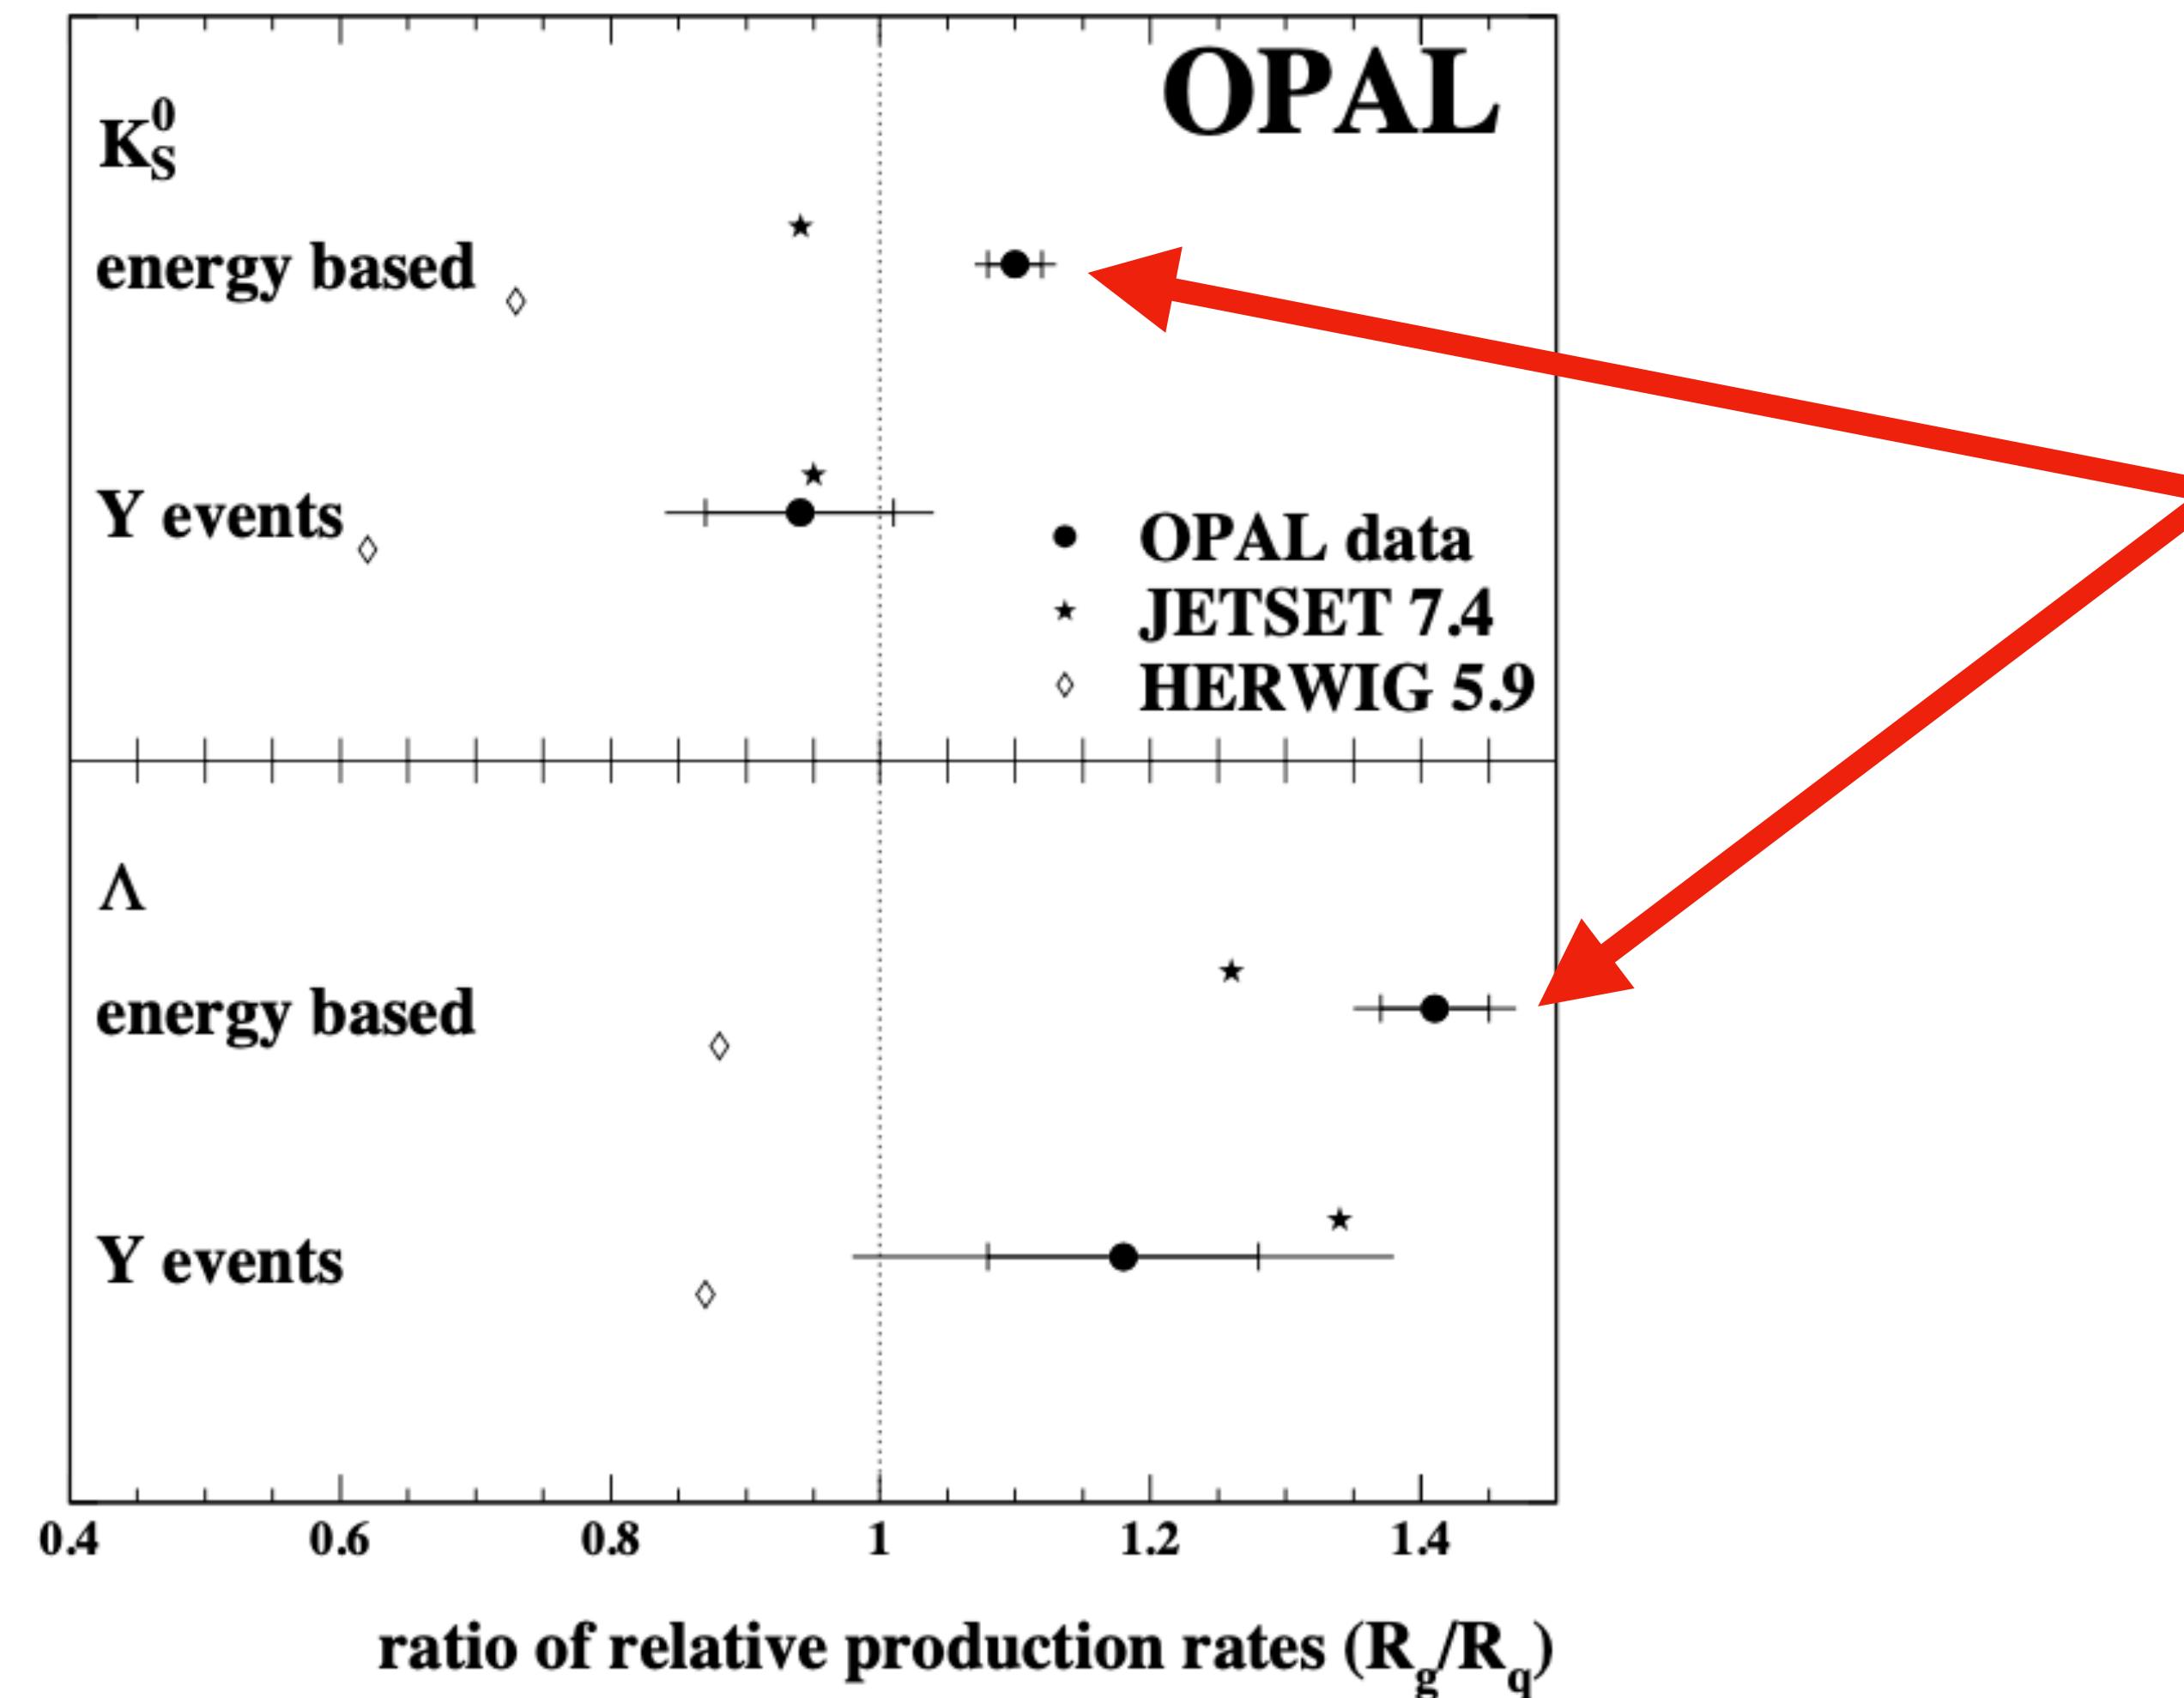

Jets

- Energetic spray of particles
- Longitudinal momentum fraction

$$z = \frac{\mathbf{p}_i \cdot \mathbf{p}_{\text{jet}}}{p_{\text{jet}}^2}$$

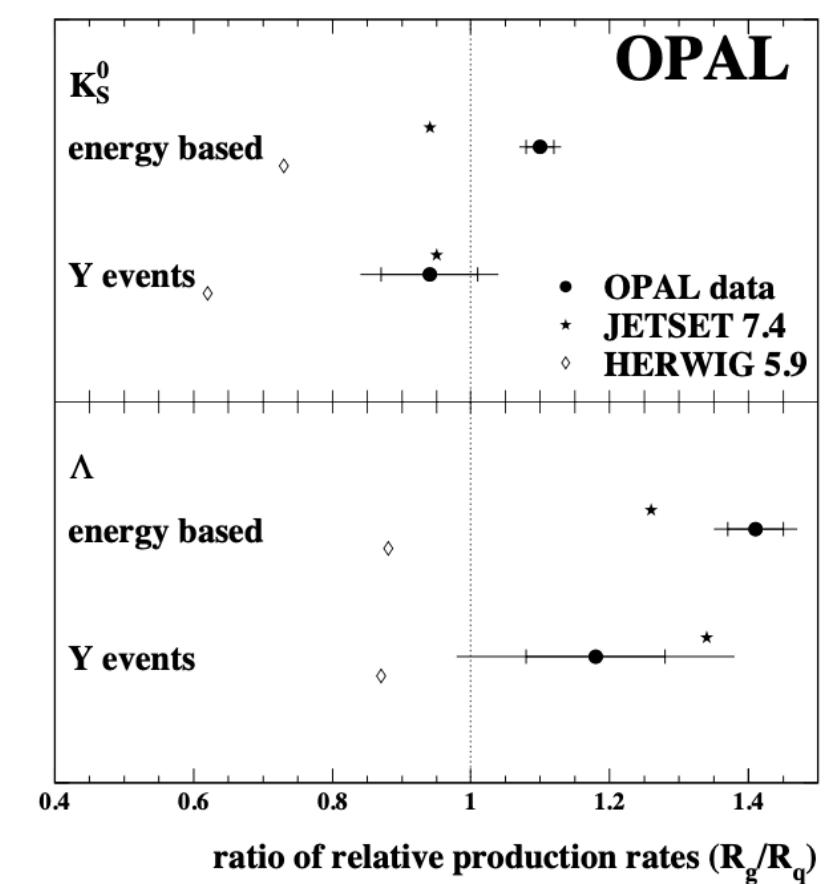

Motivation: gluon fragmentation

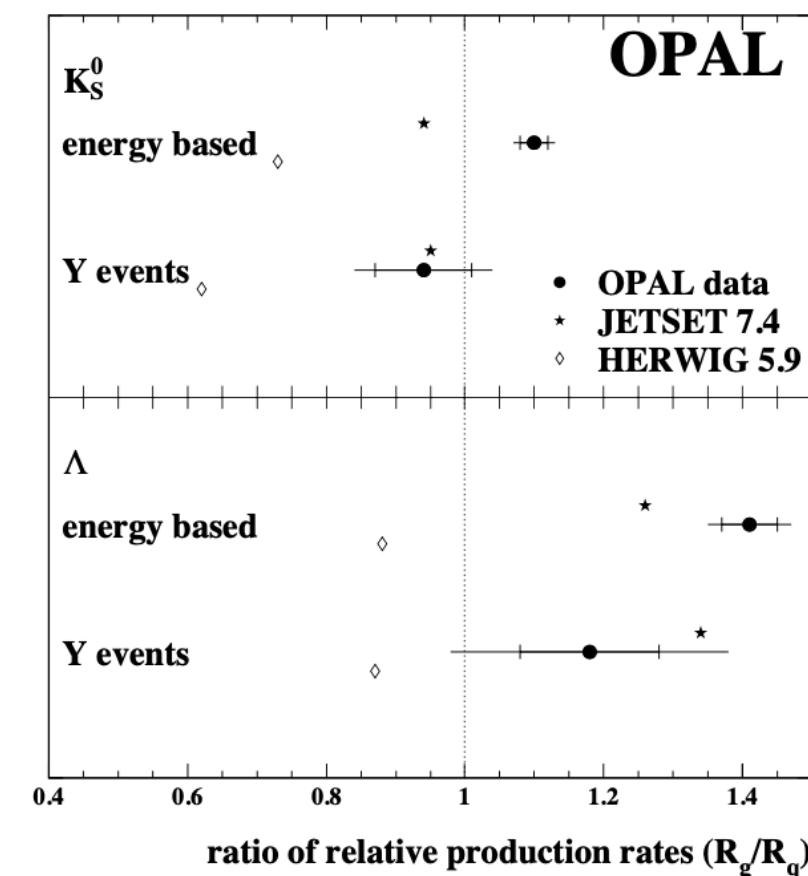

Enhanced baryon production in gluon jets

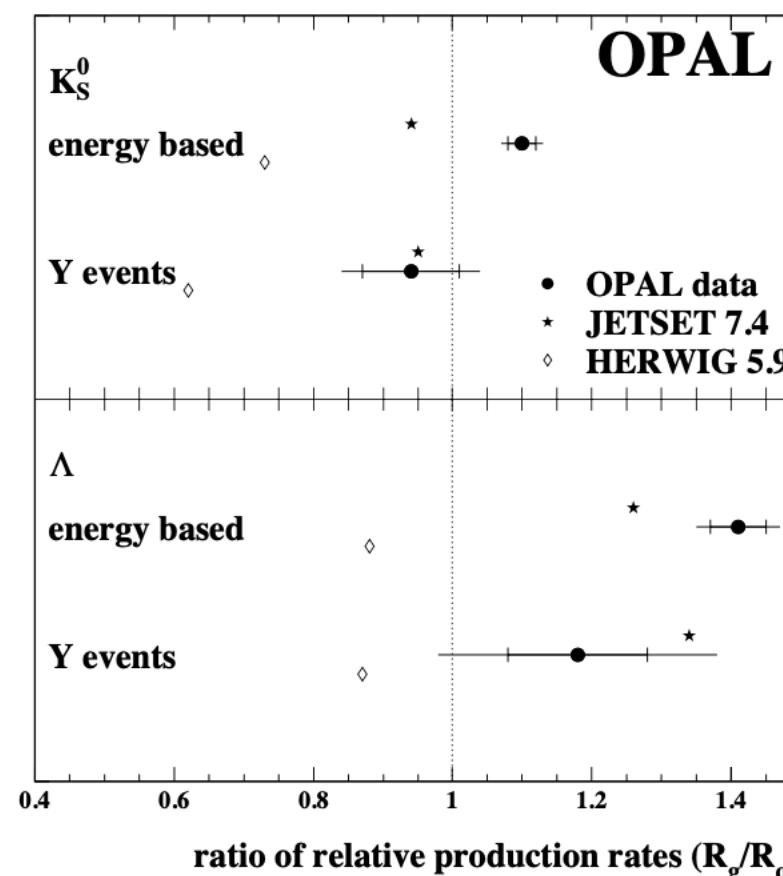

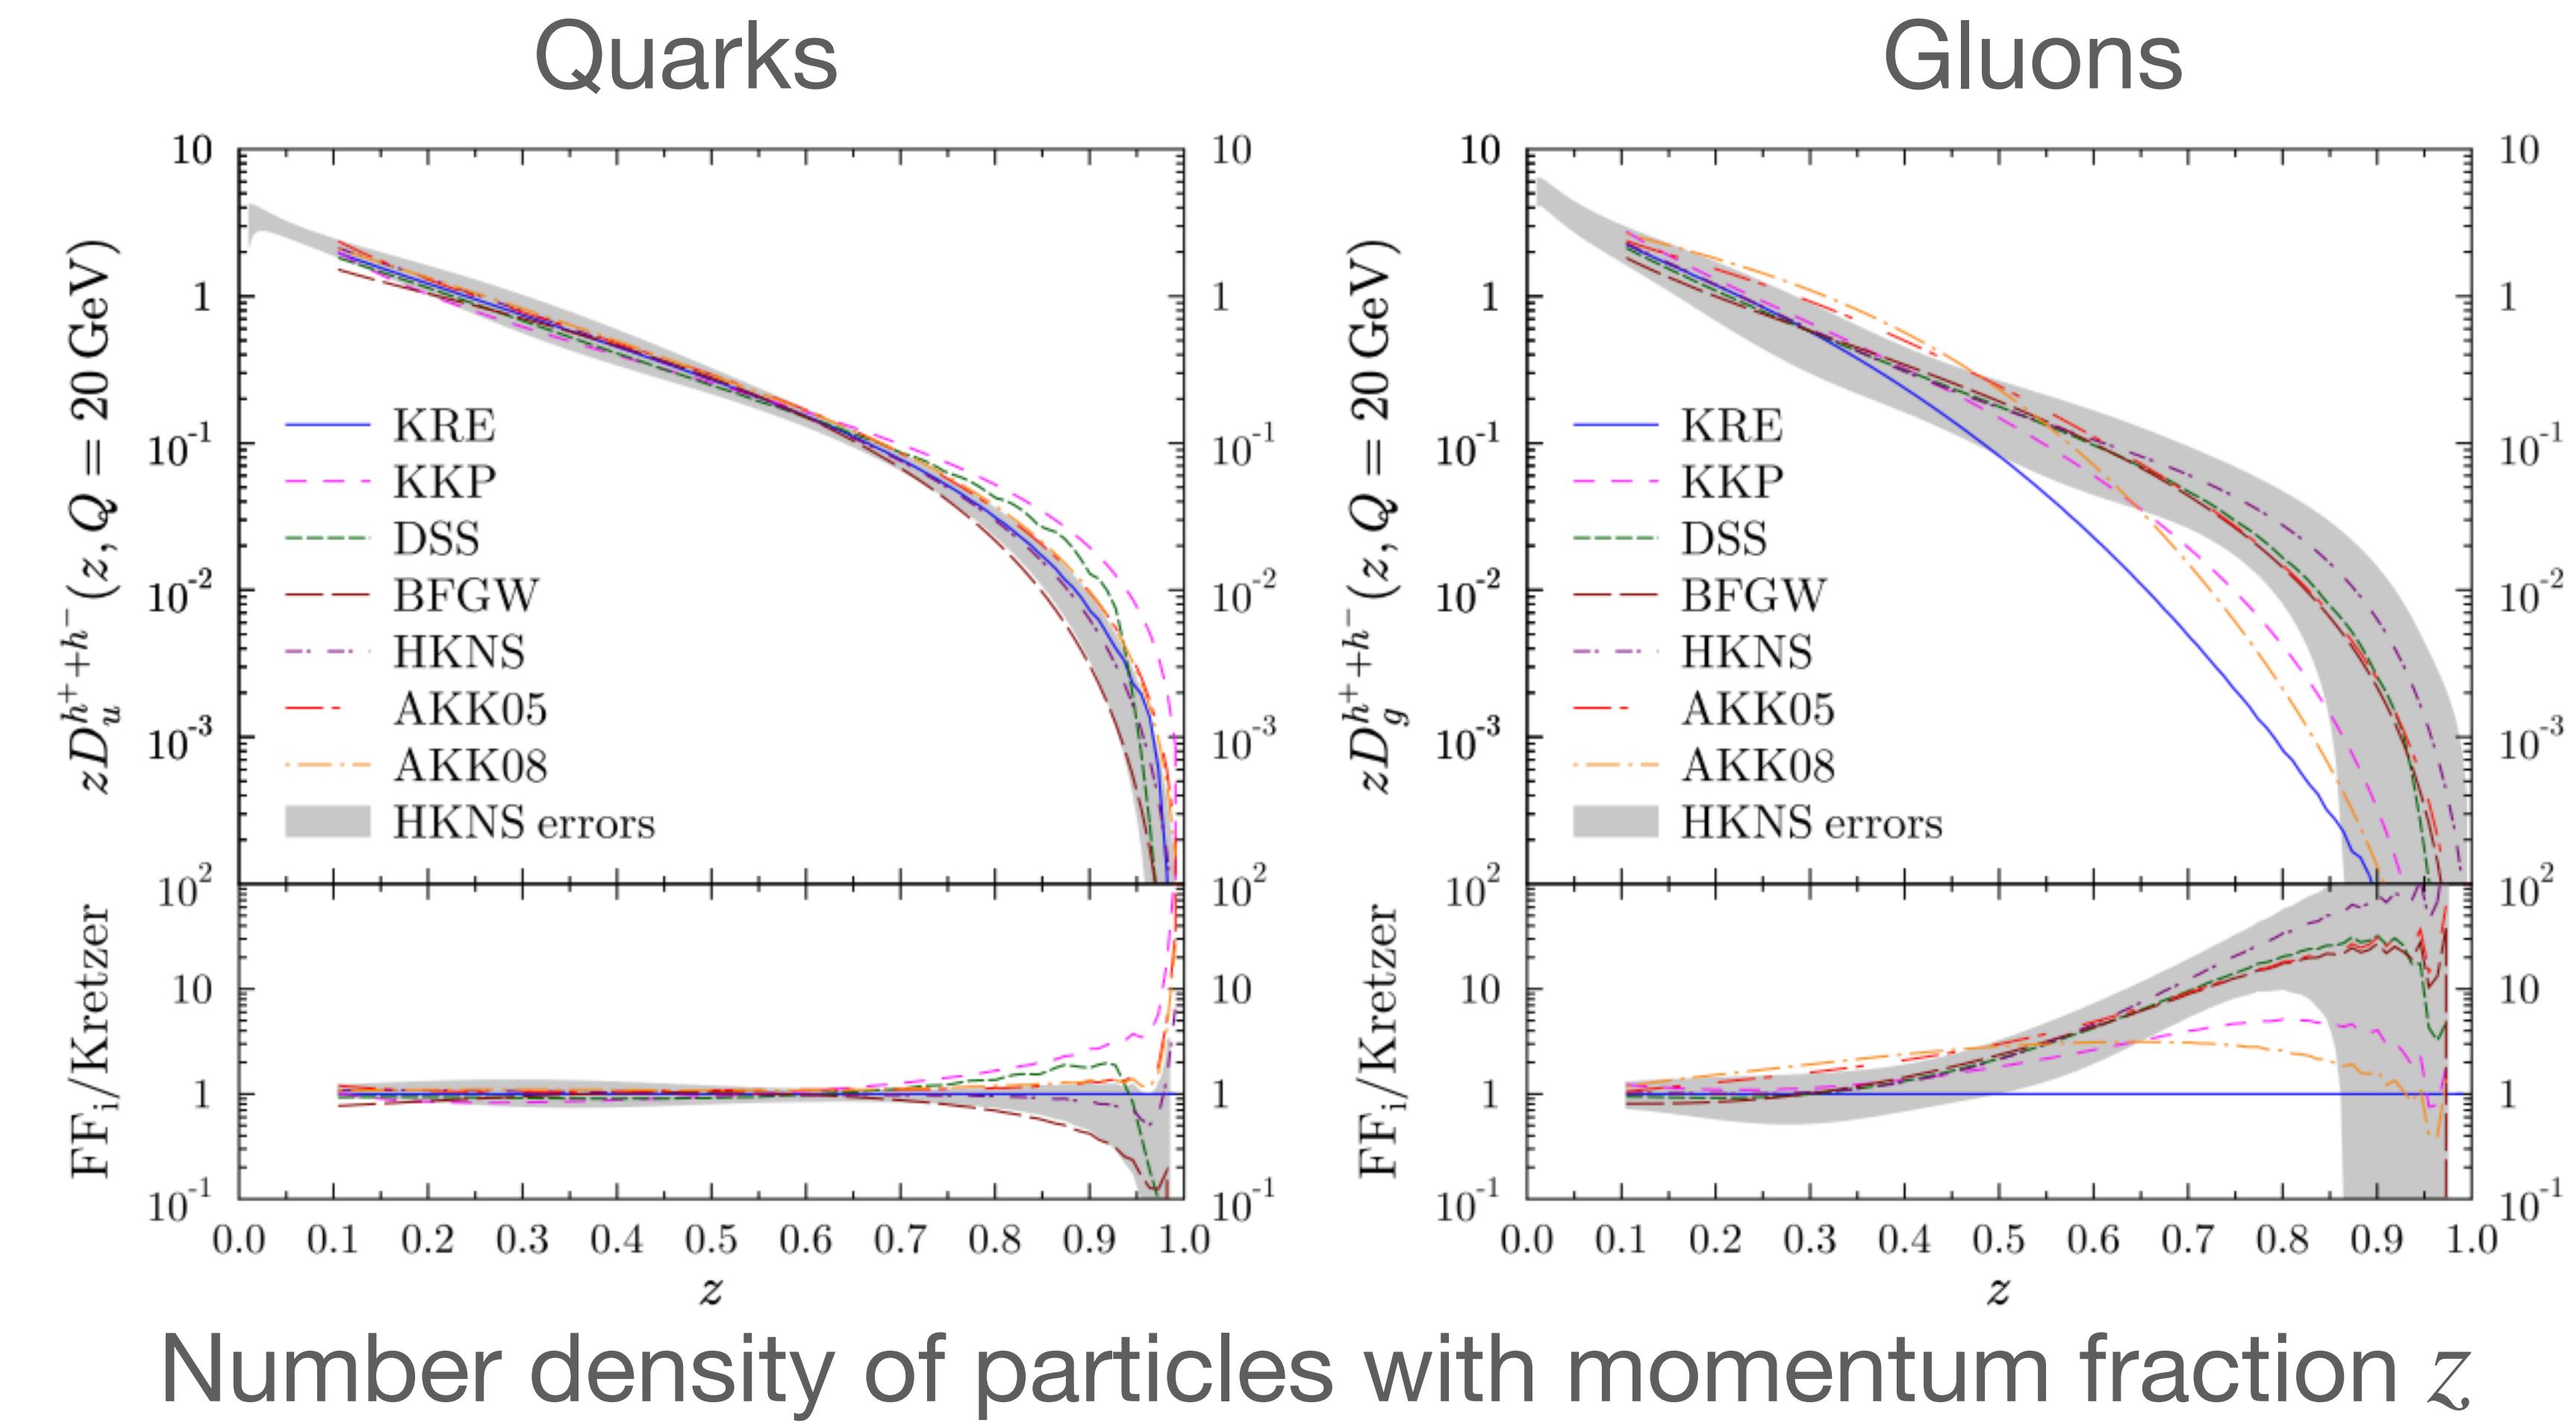

Motivation: gluon fragmentation

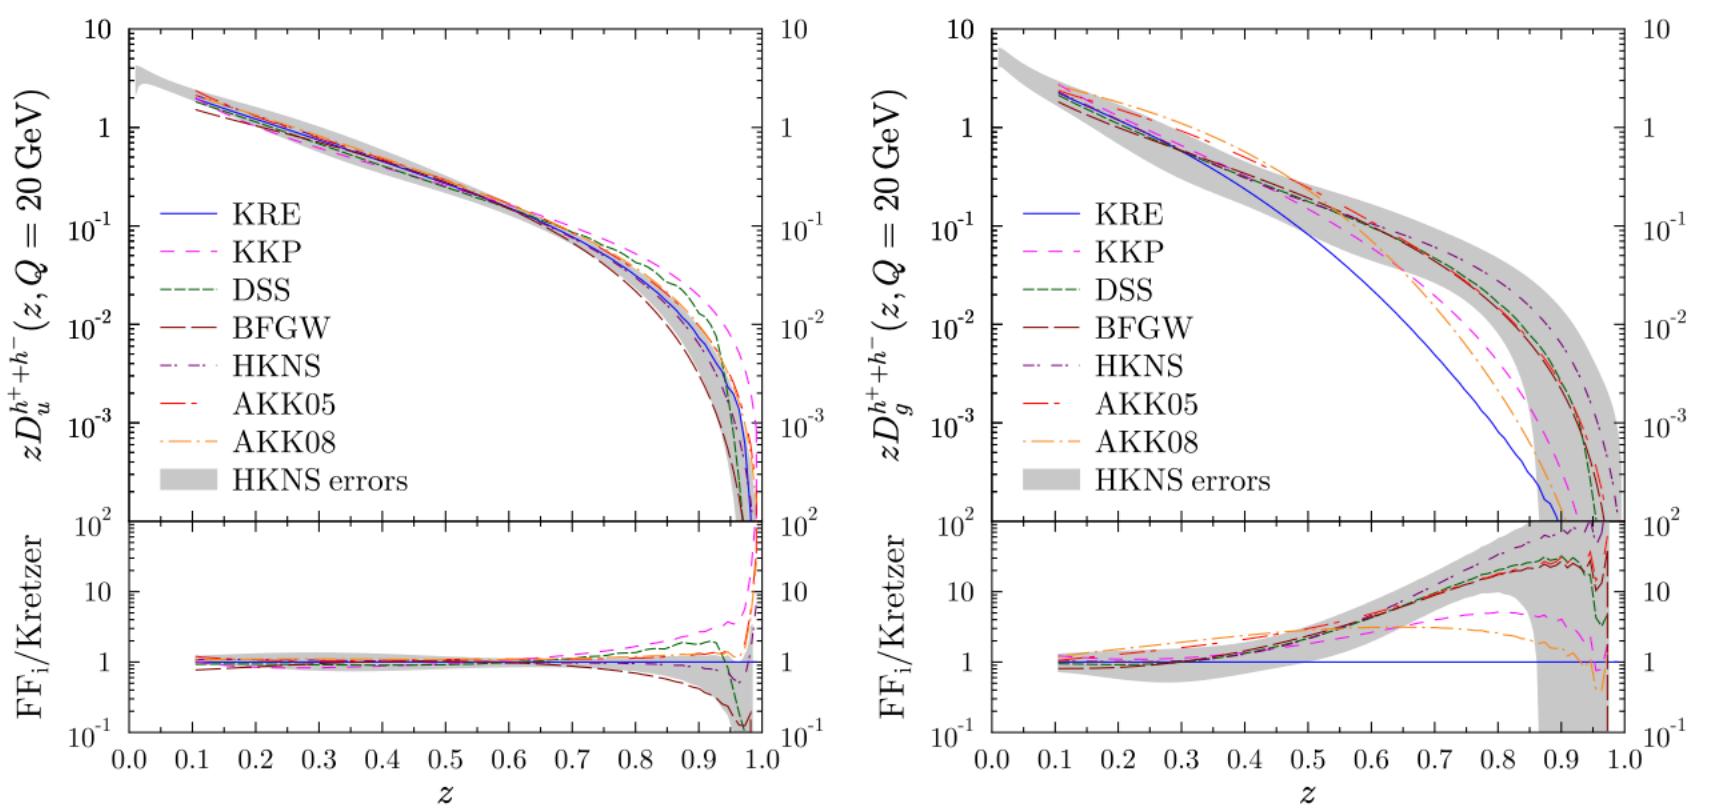

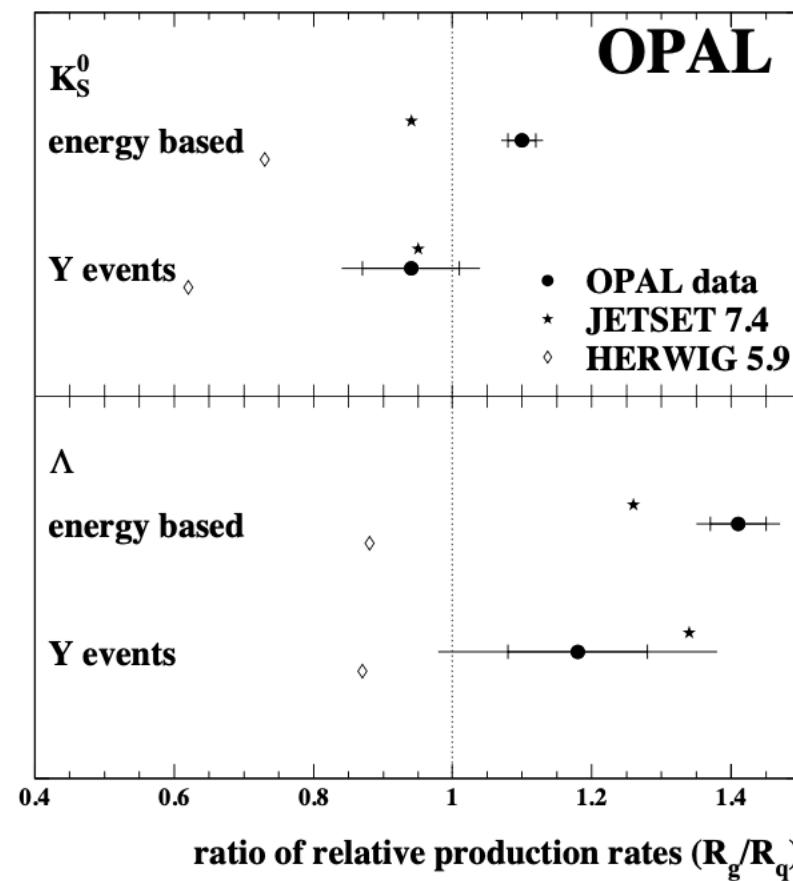

Motivation: gluon fragmentation

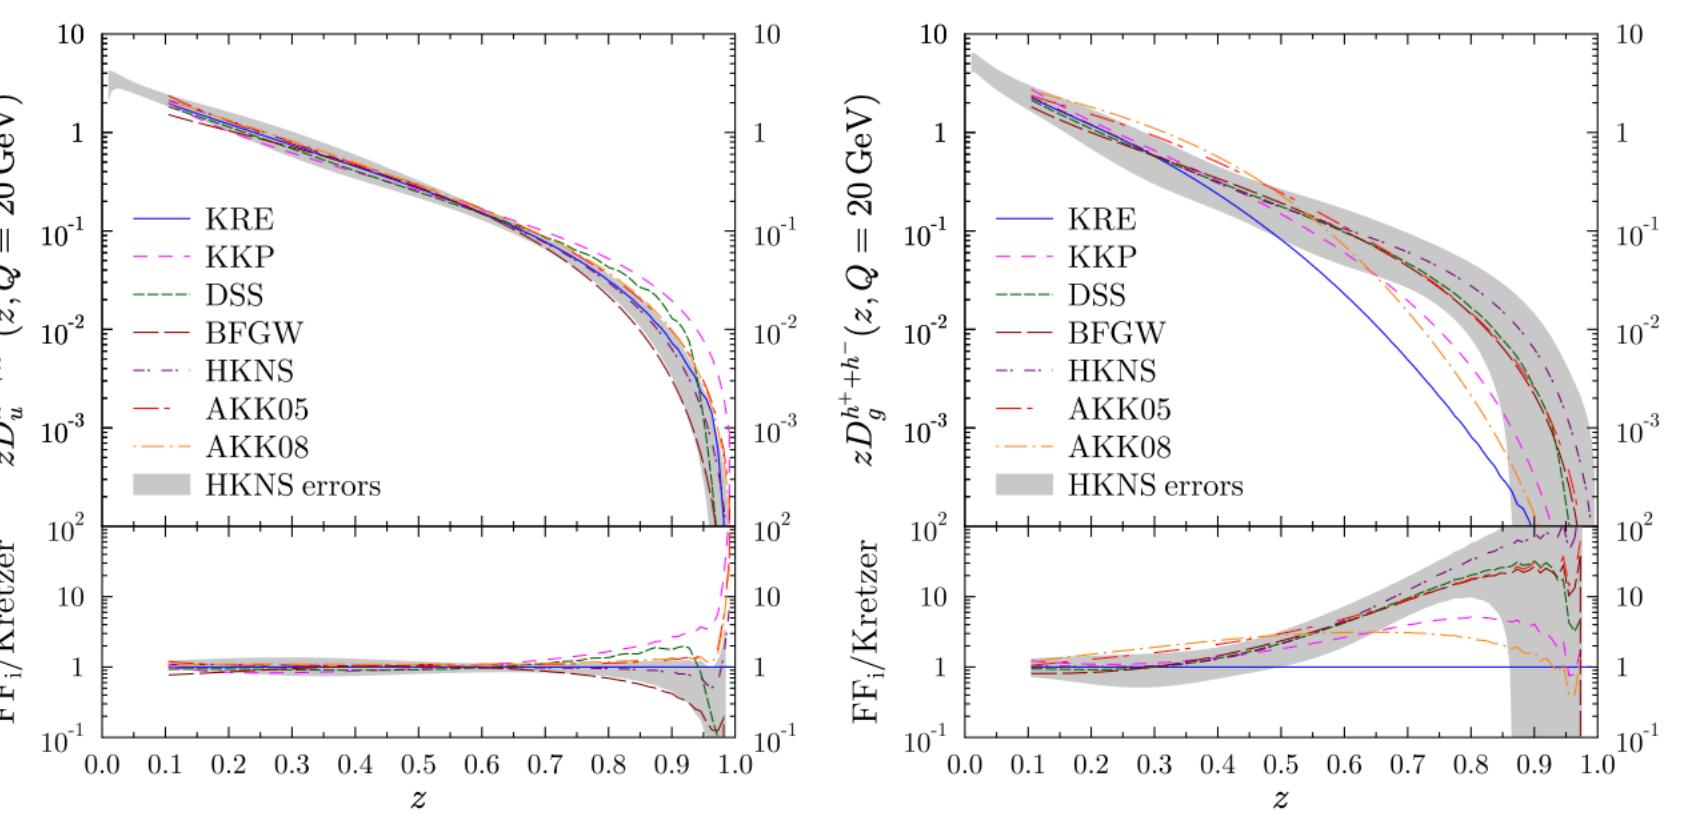

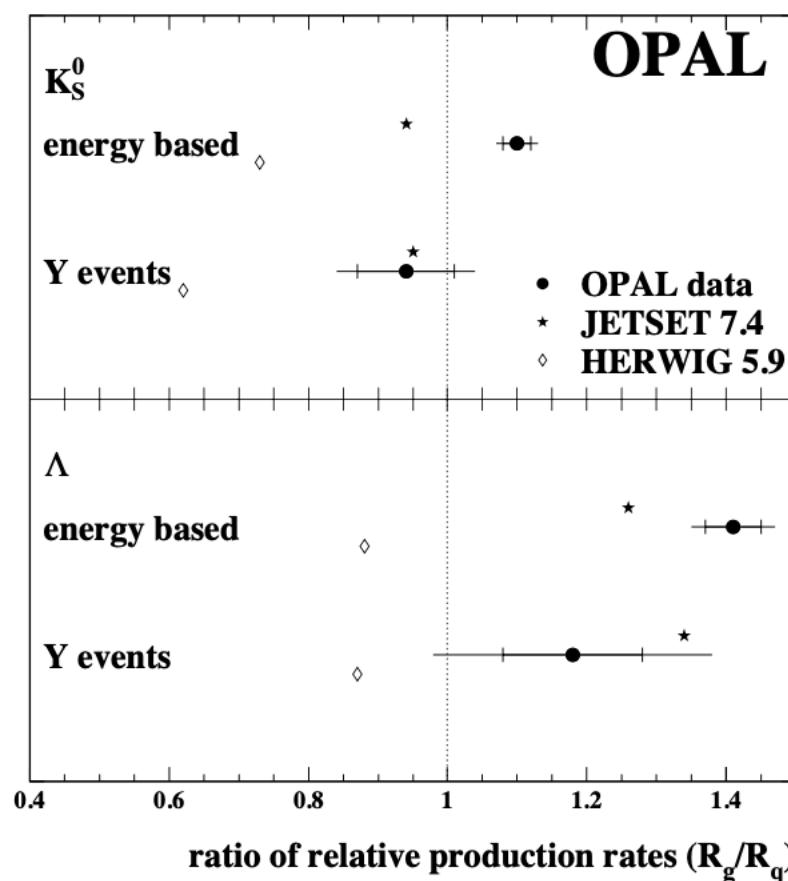

Motivation: gluon fragmentation

Motivation: gluon fragmentation

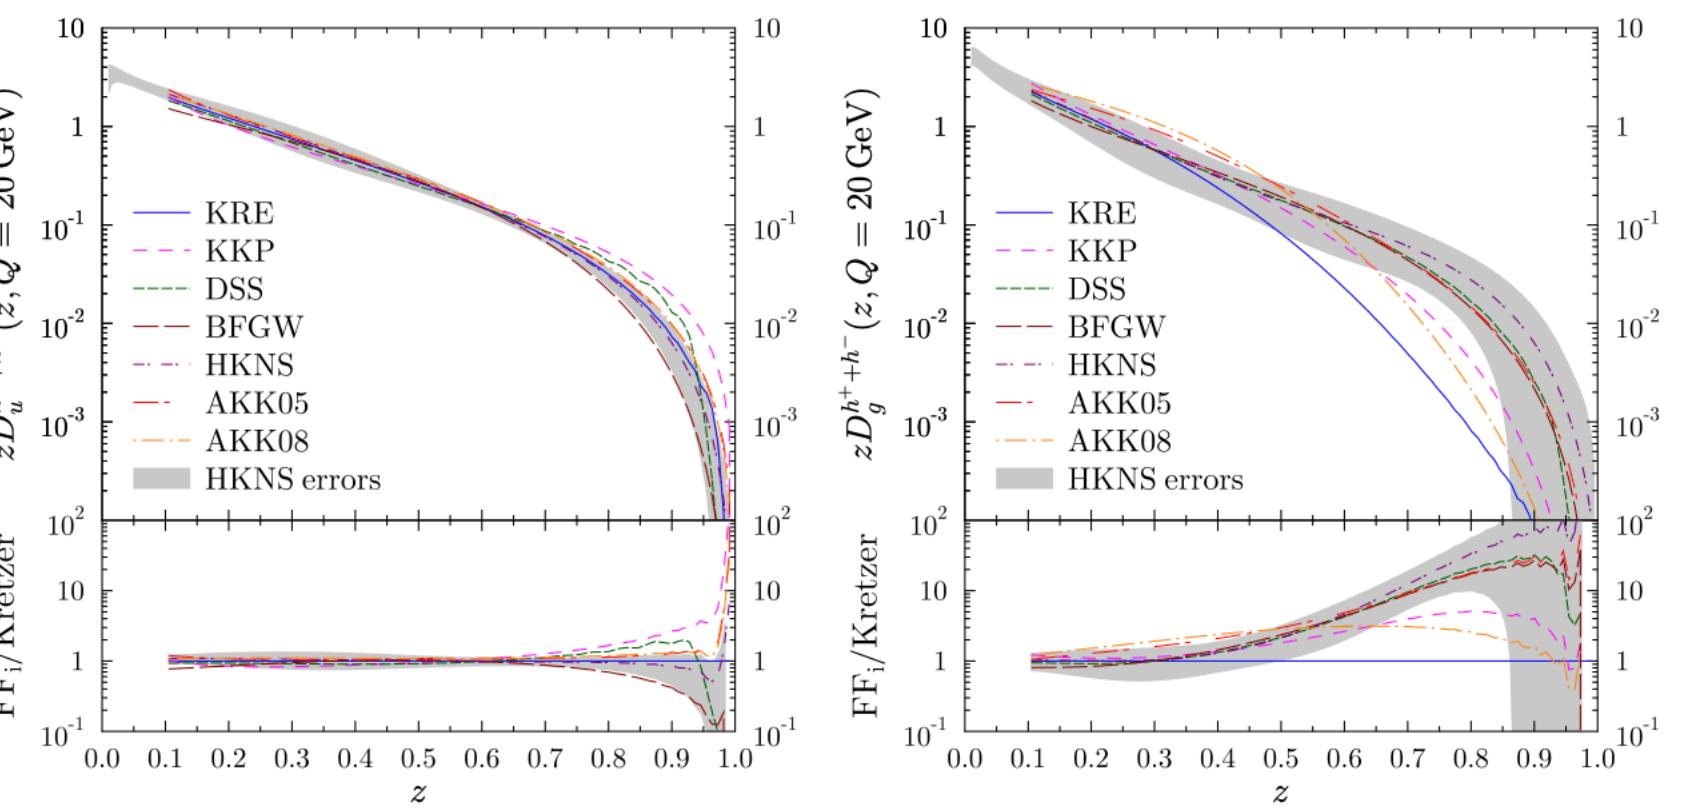

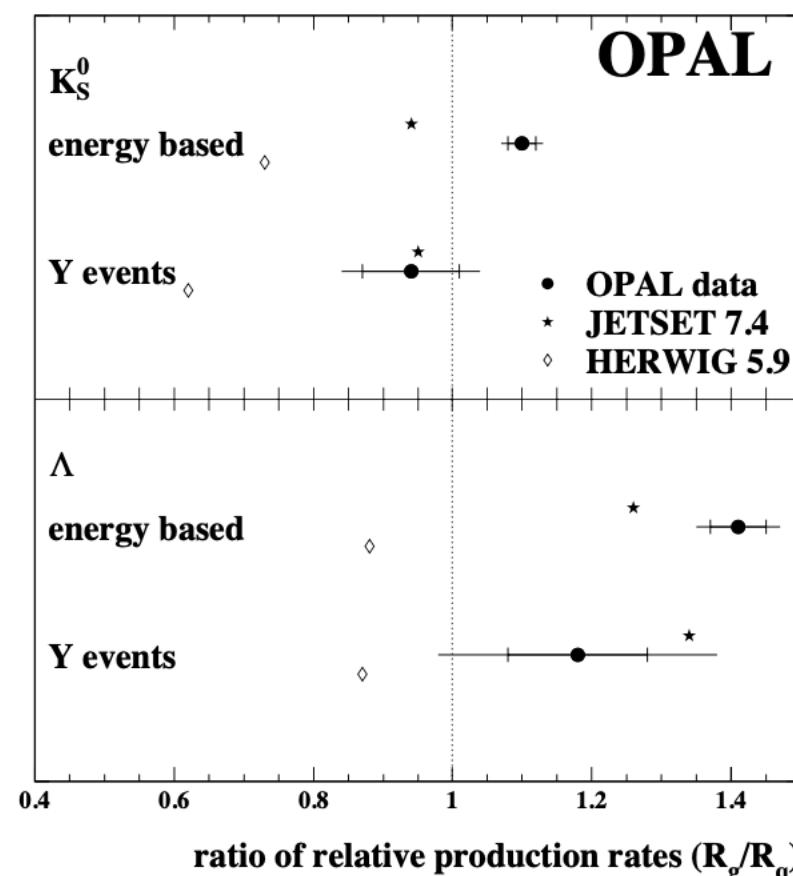

Motivation: gluon fragmentation

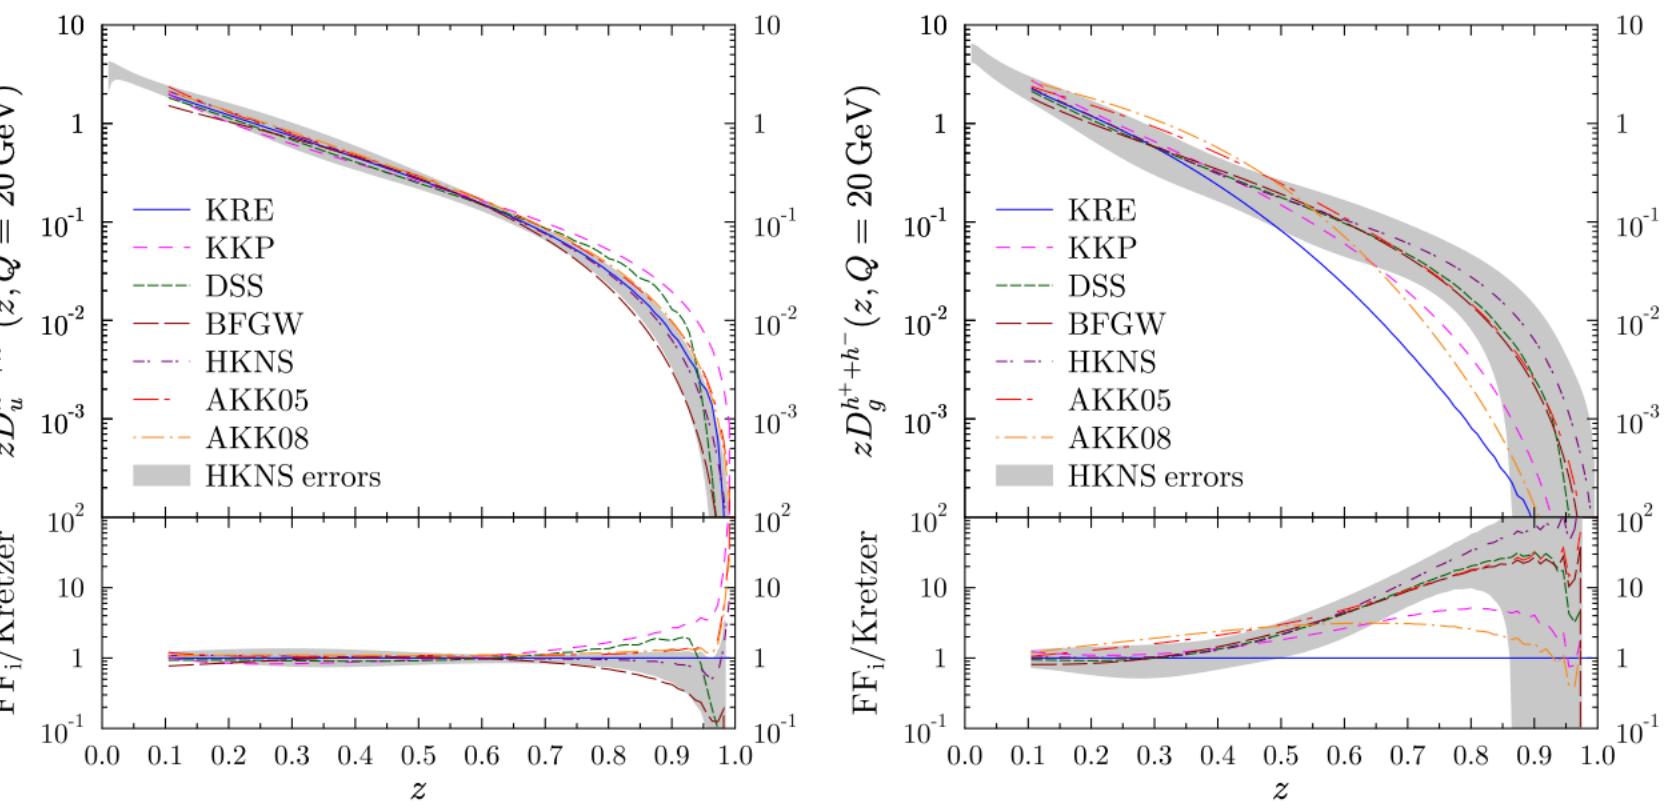

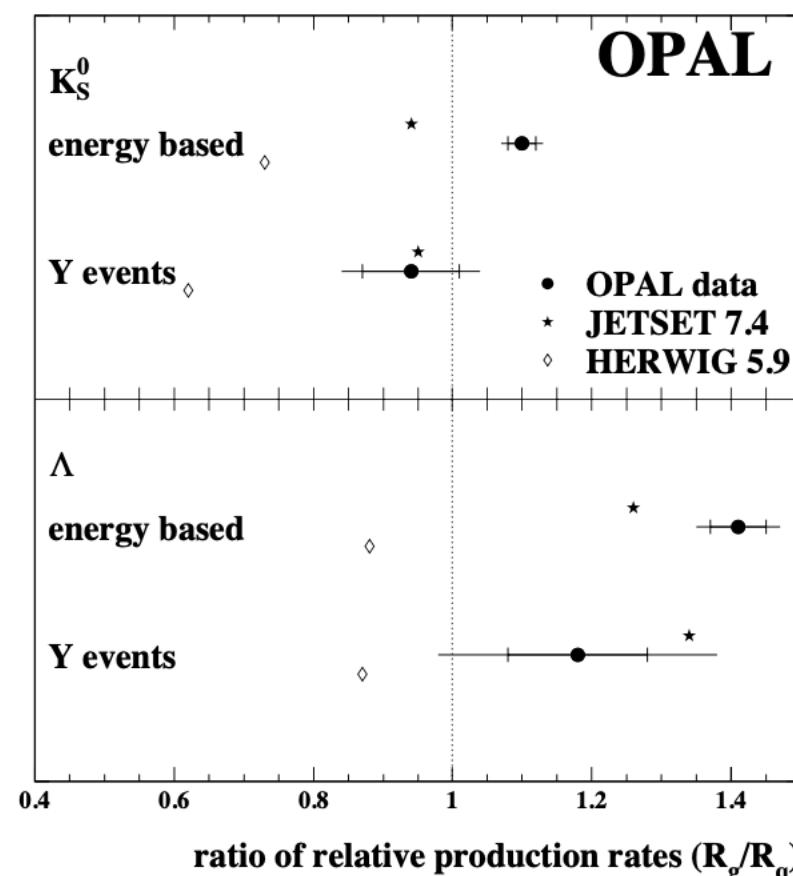

Motivation: gluon fragmentation

- Fits made to e^+e^- data

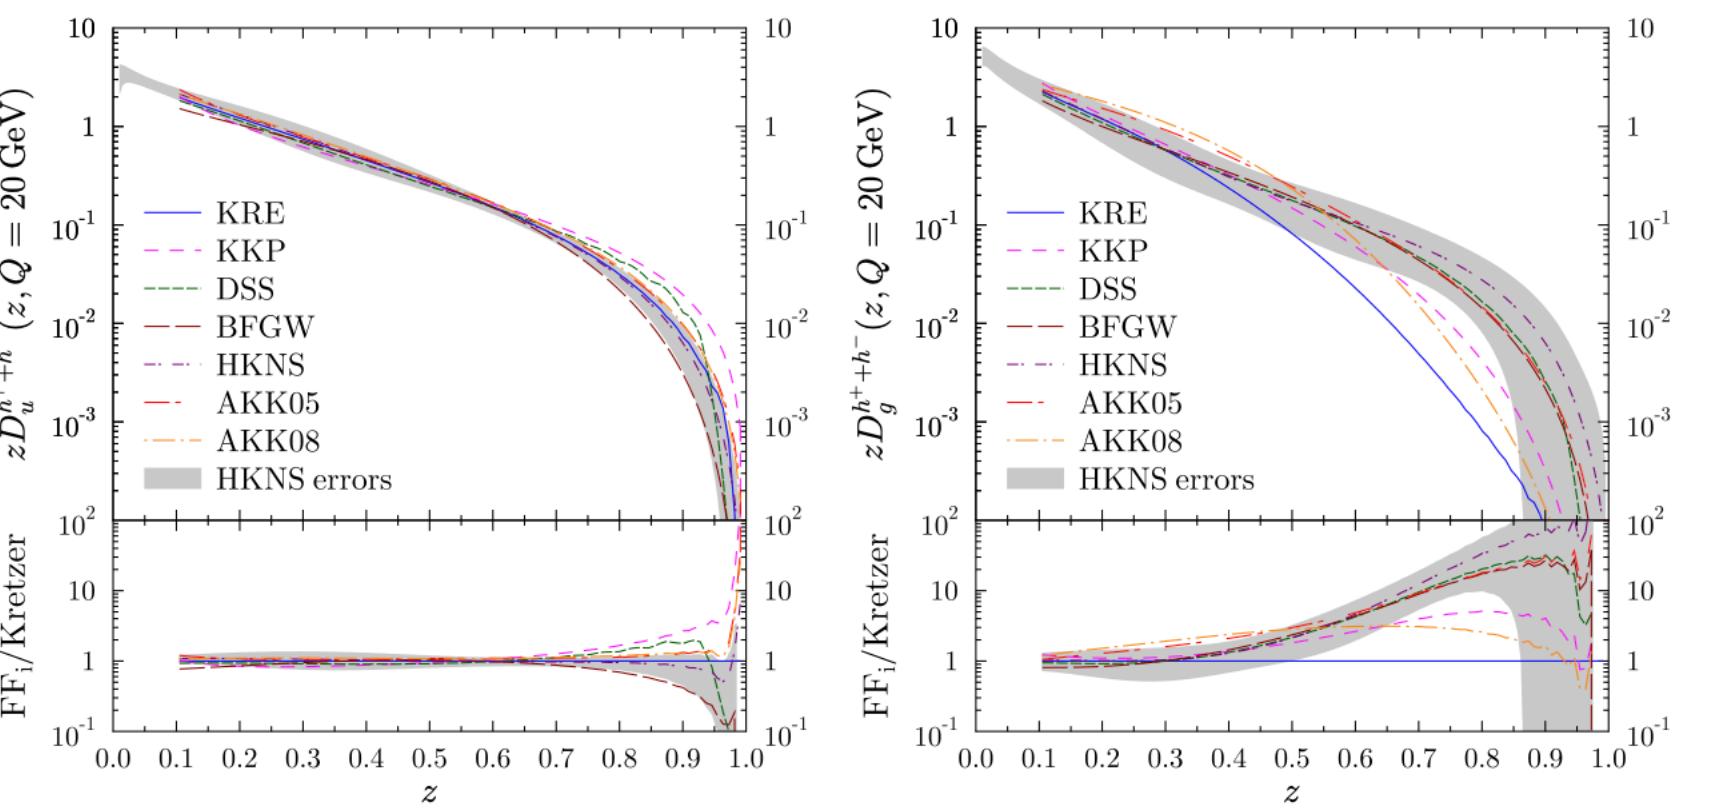

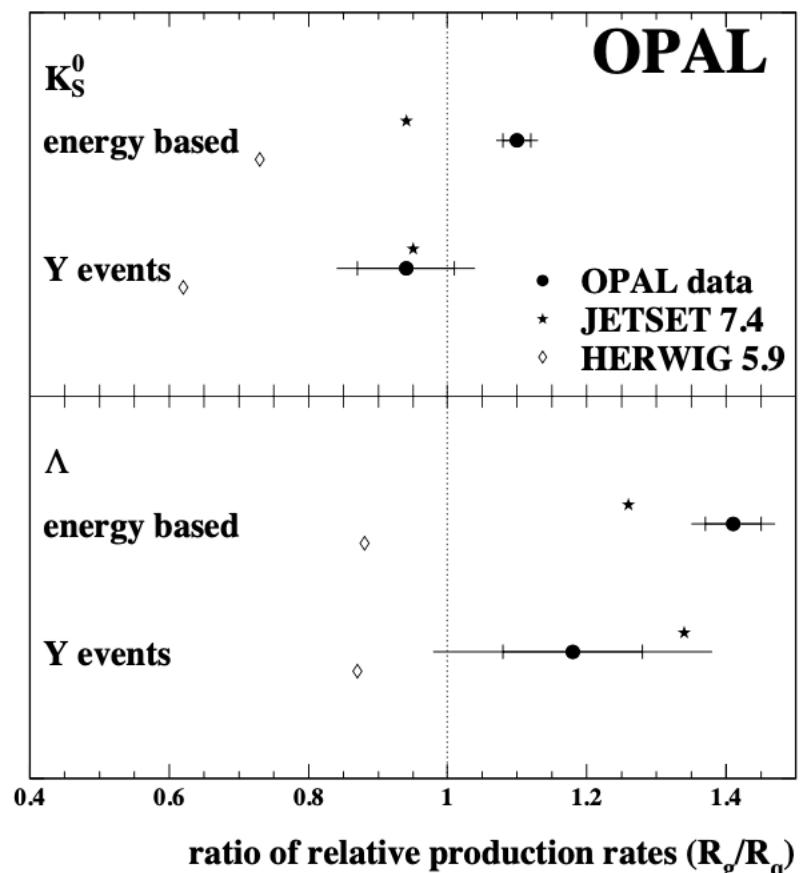

Motivation: gluon fragmentation

- Fits made to e^+e^- data
- LHC Run 3 pp data allows us to probe the gluons

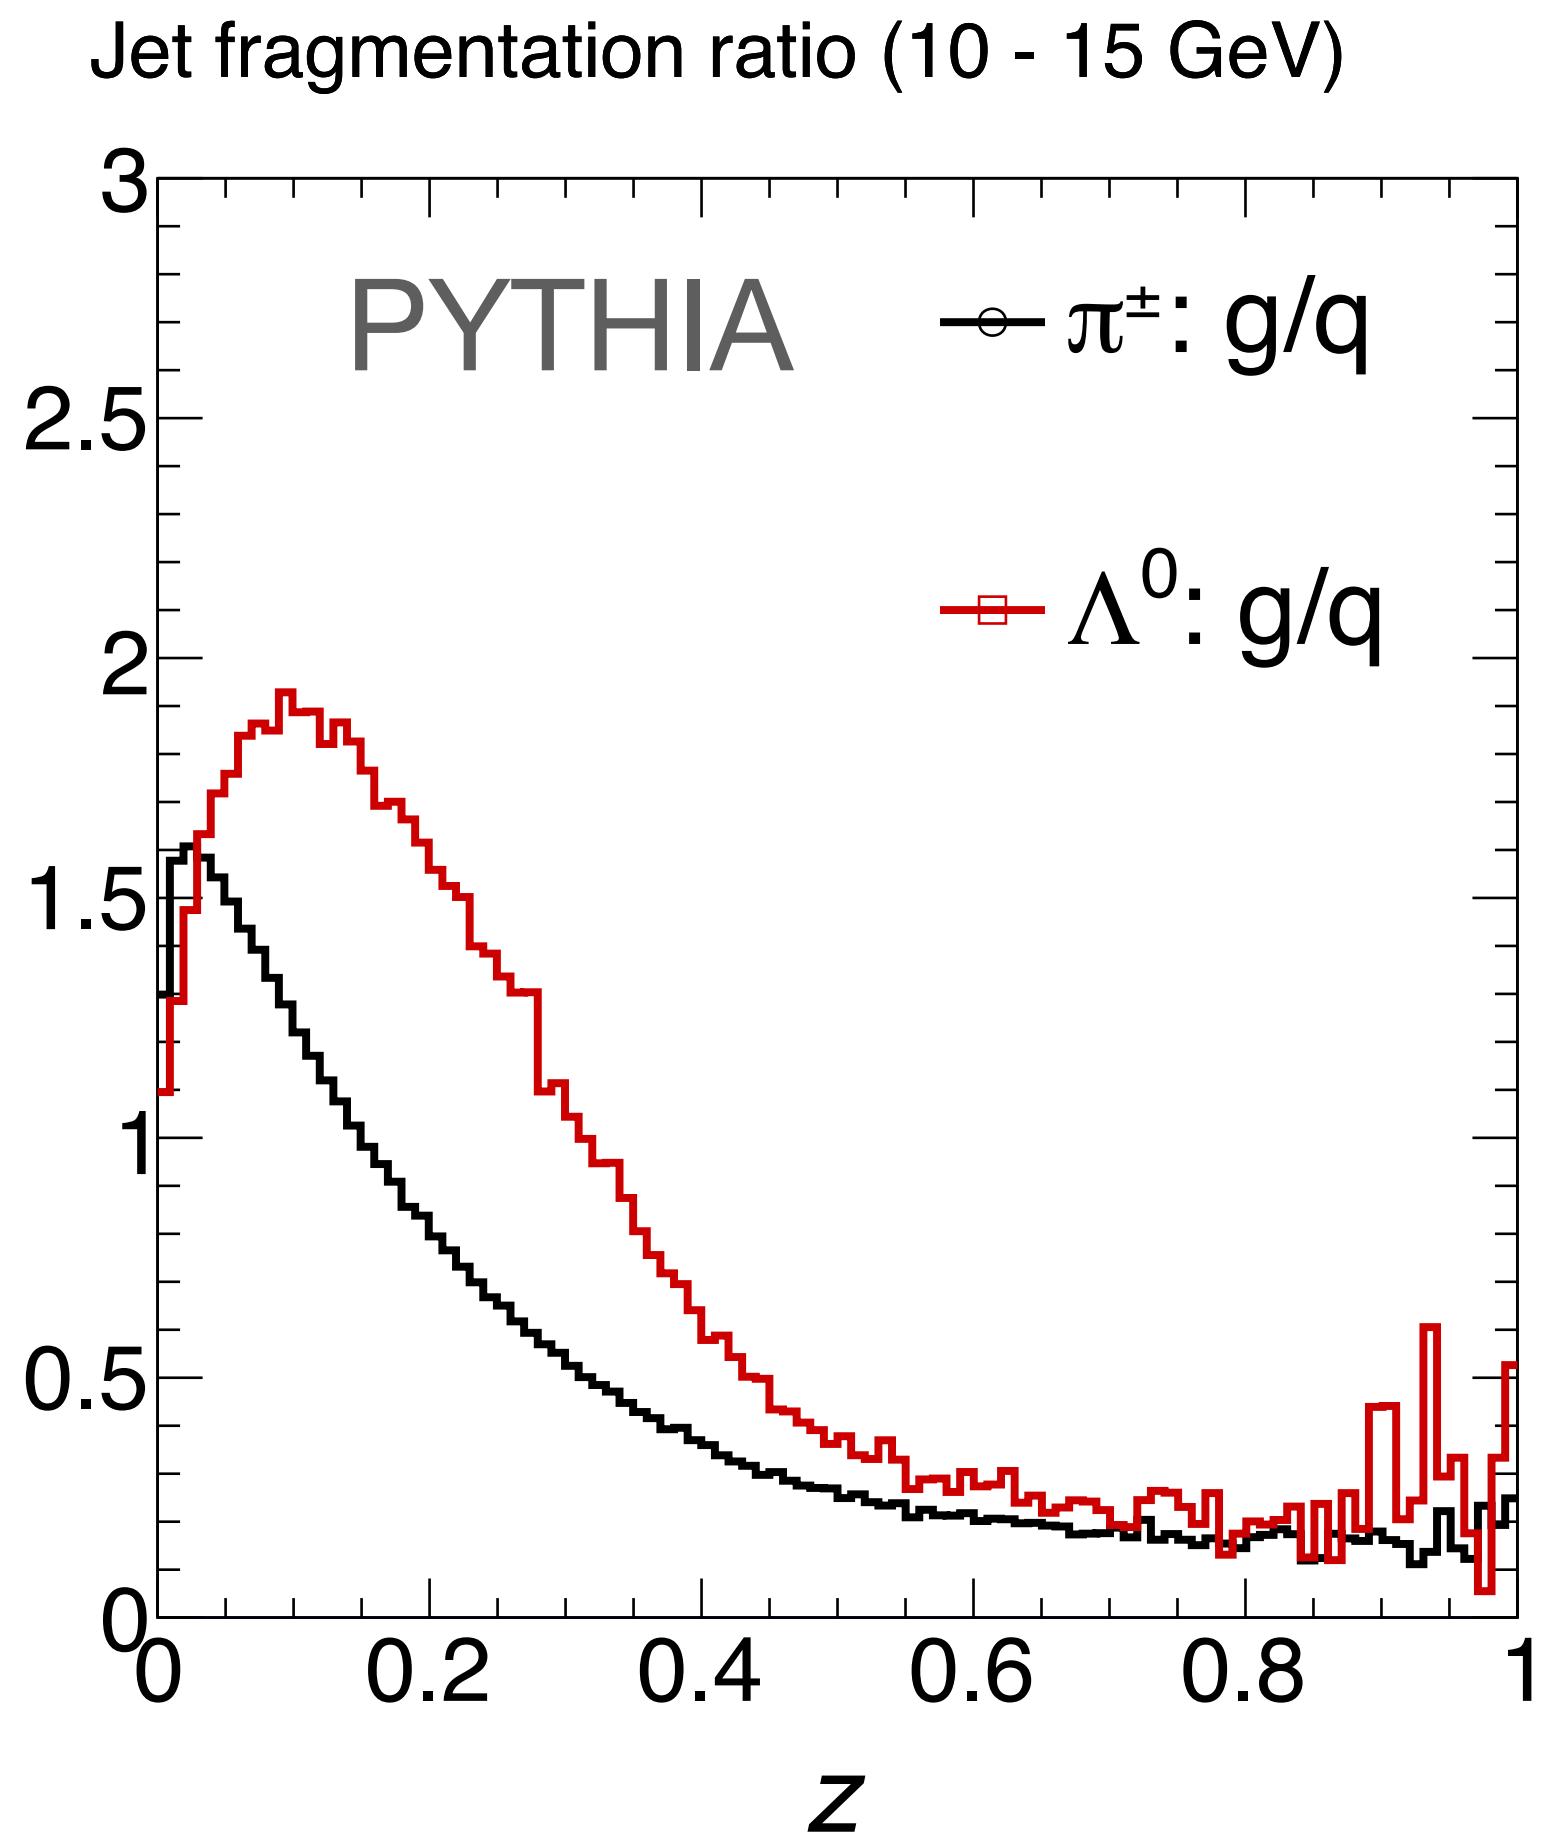

Motivation: gluon fragmentation

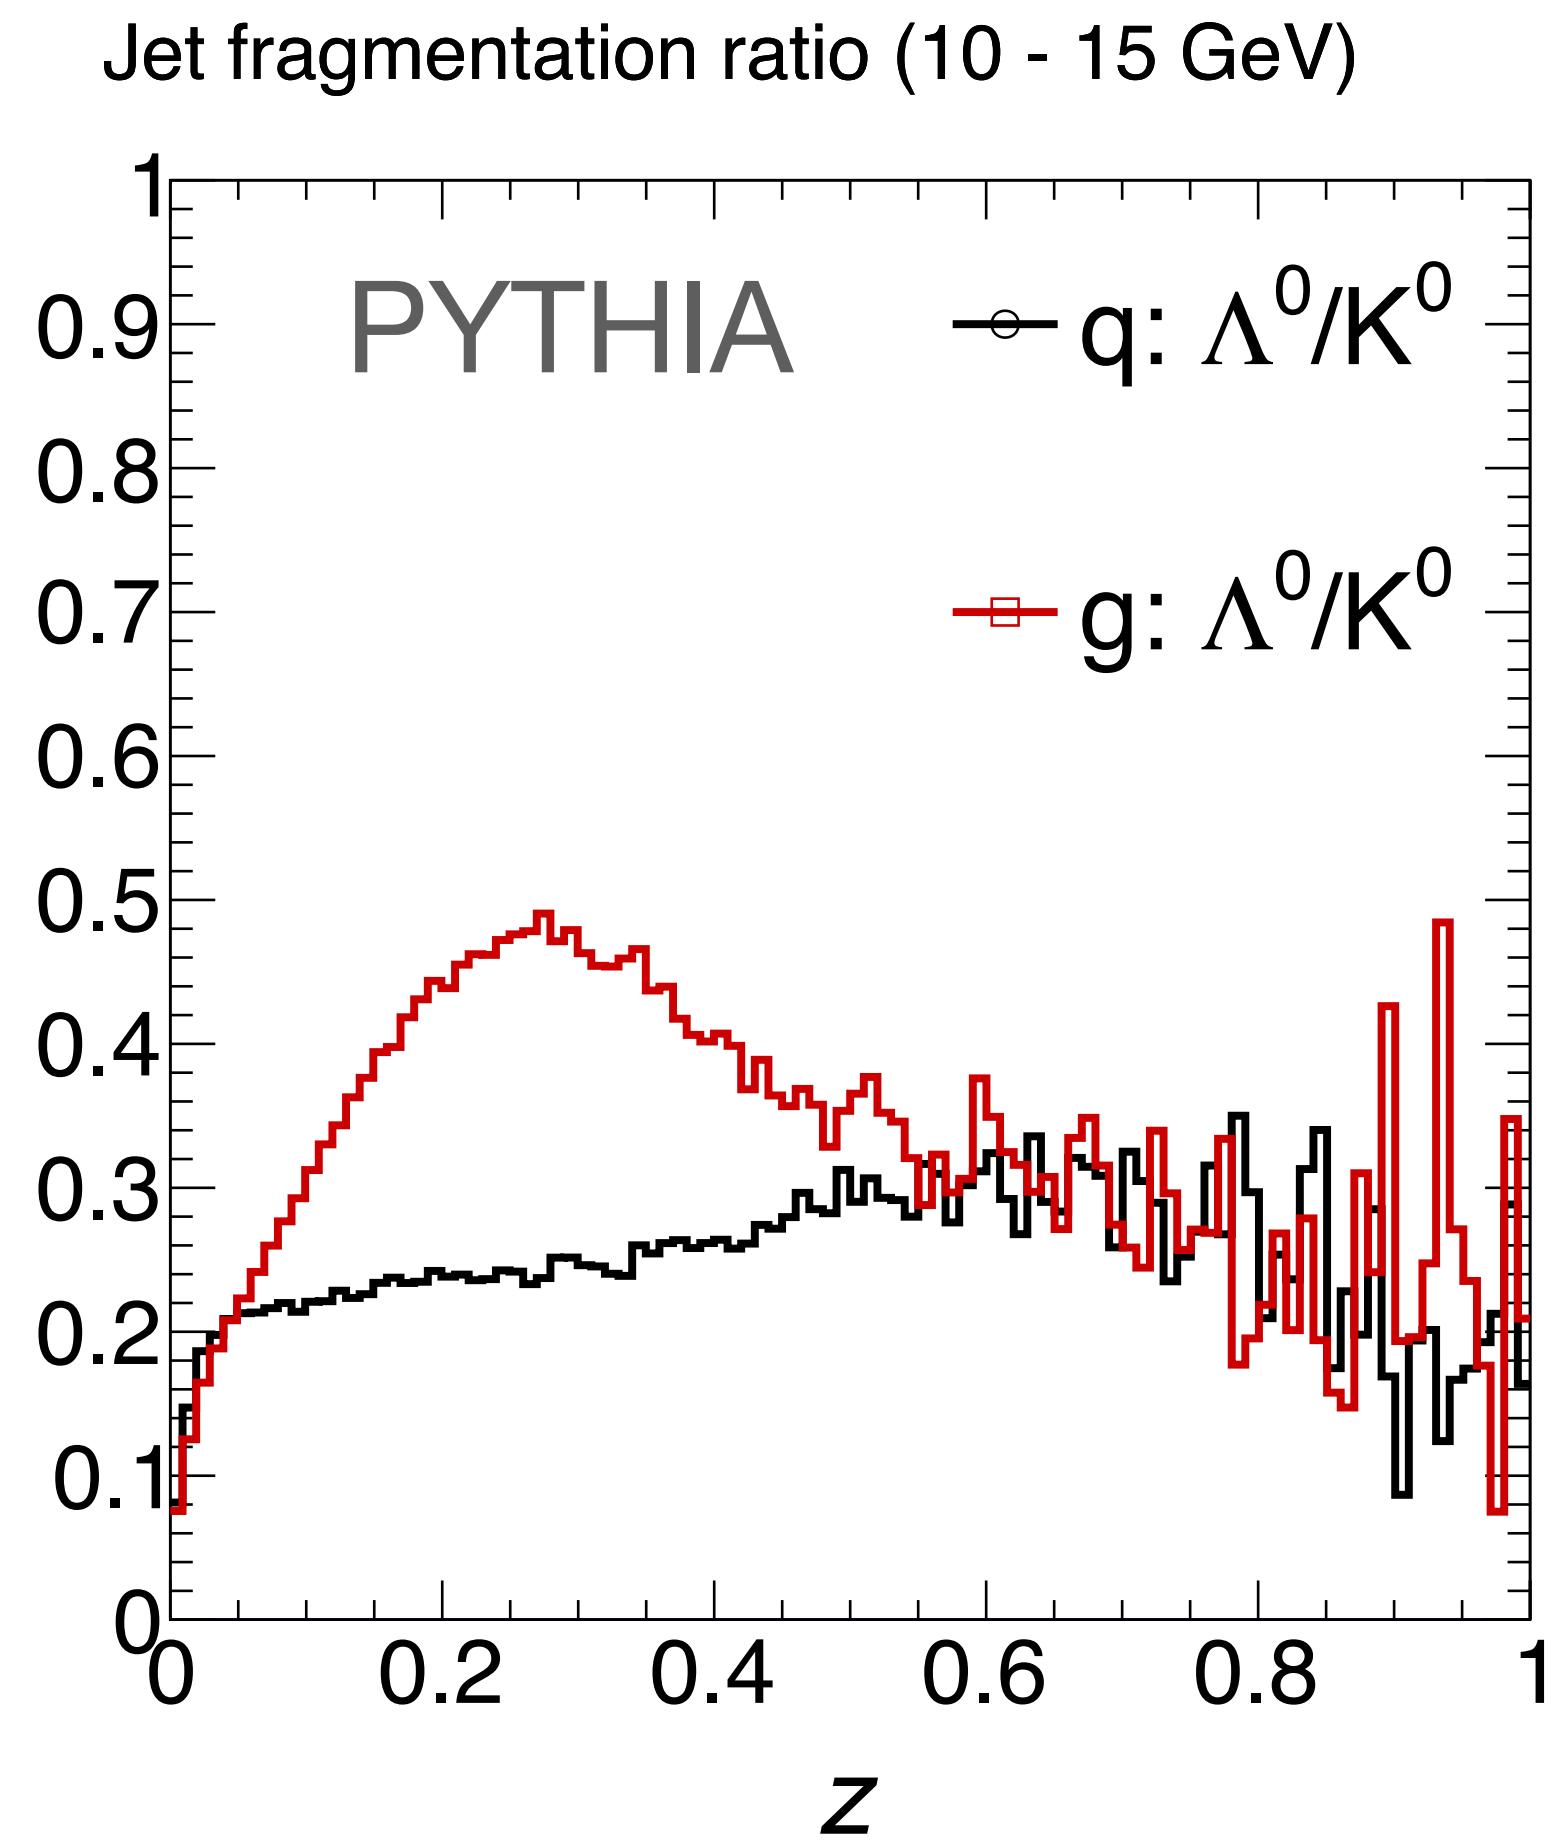

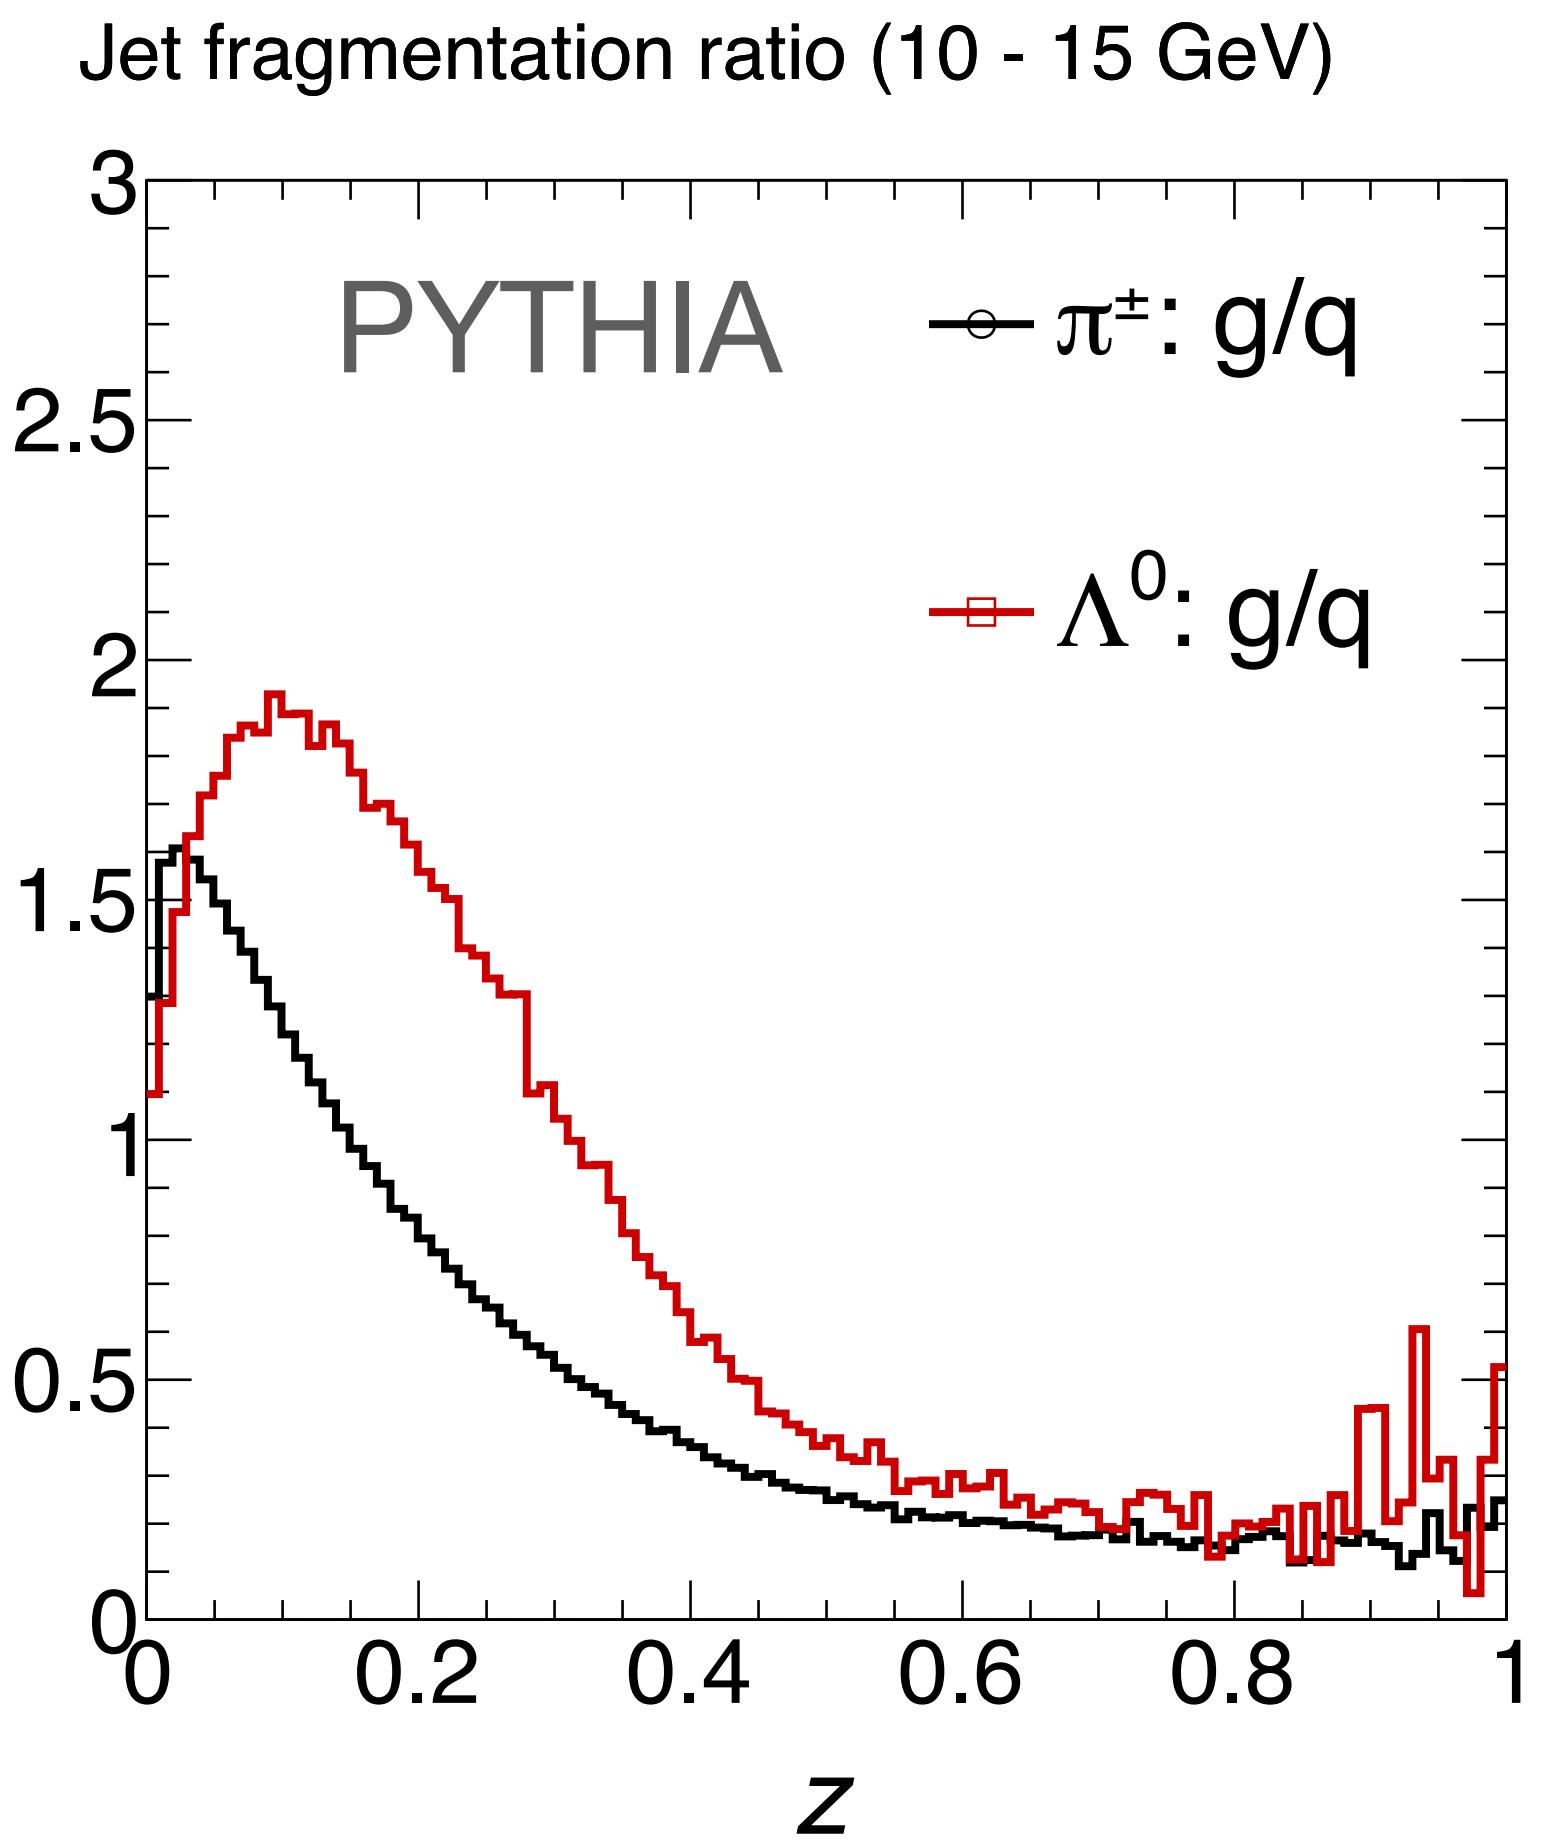

- Fits made to e^+e^- data
- LHC Run 3 pp data allows us to probe the gluons
- Baryon/meson ratios

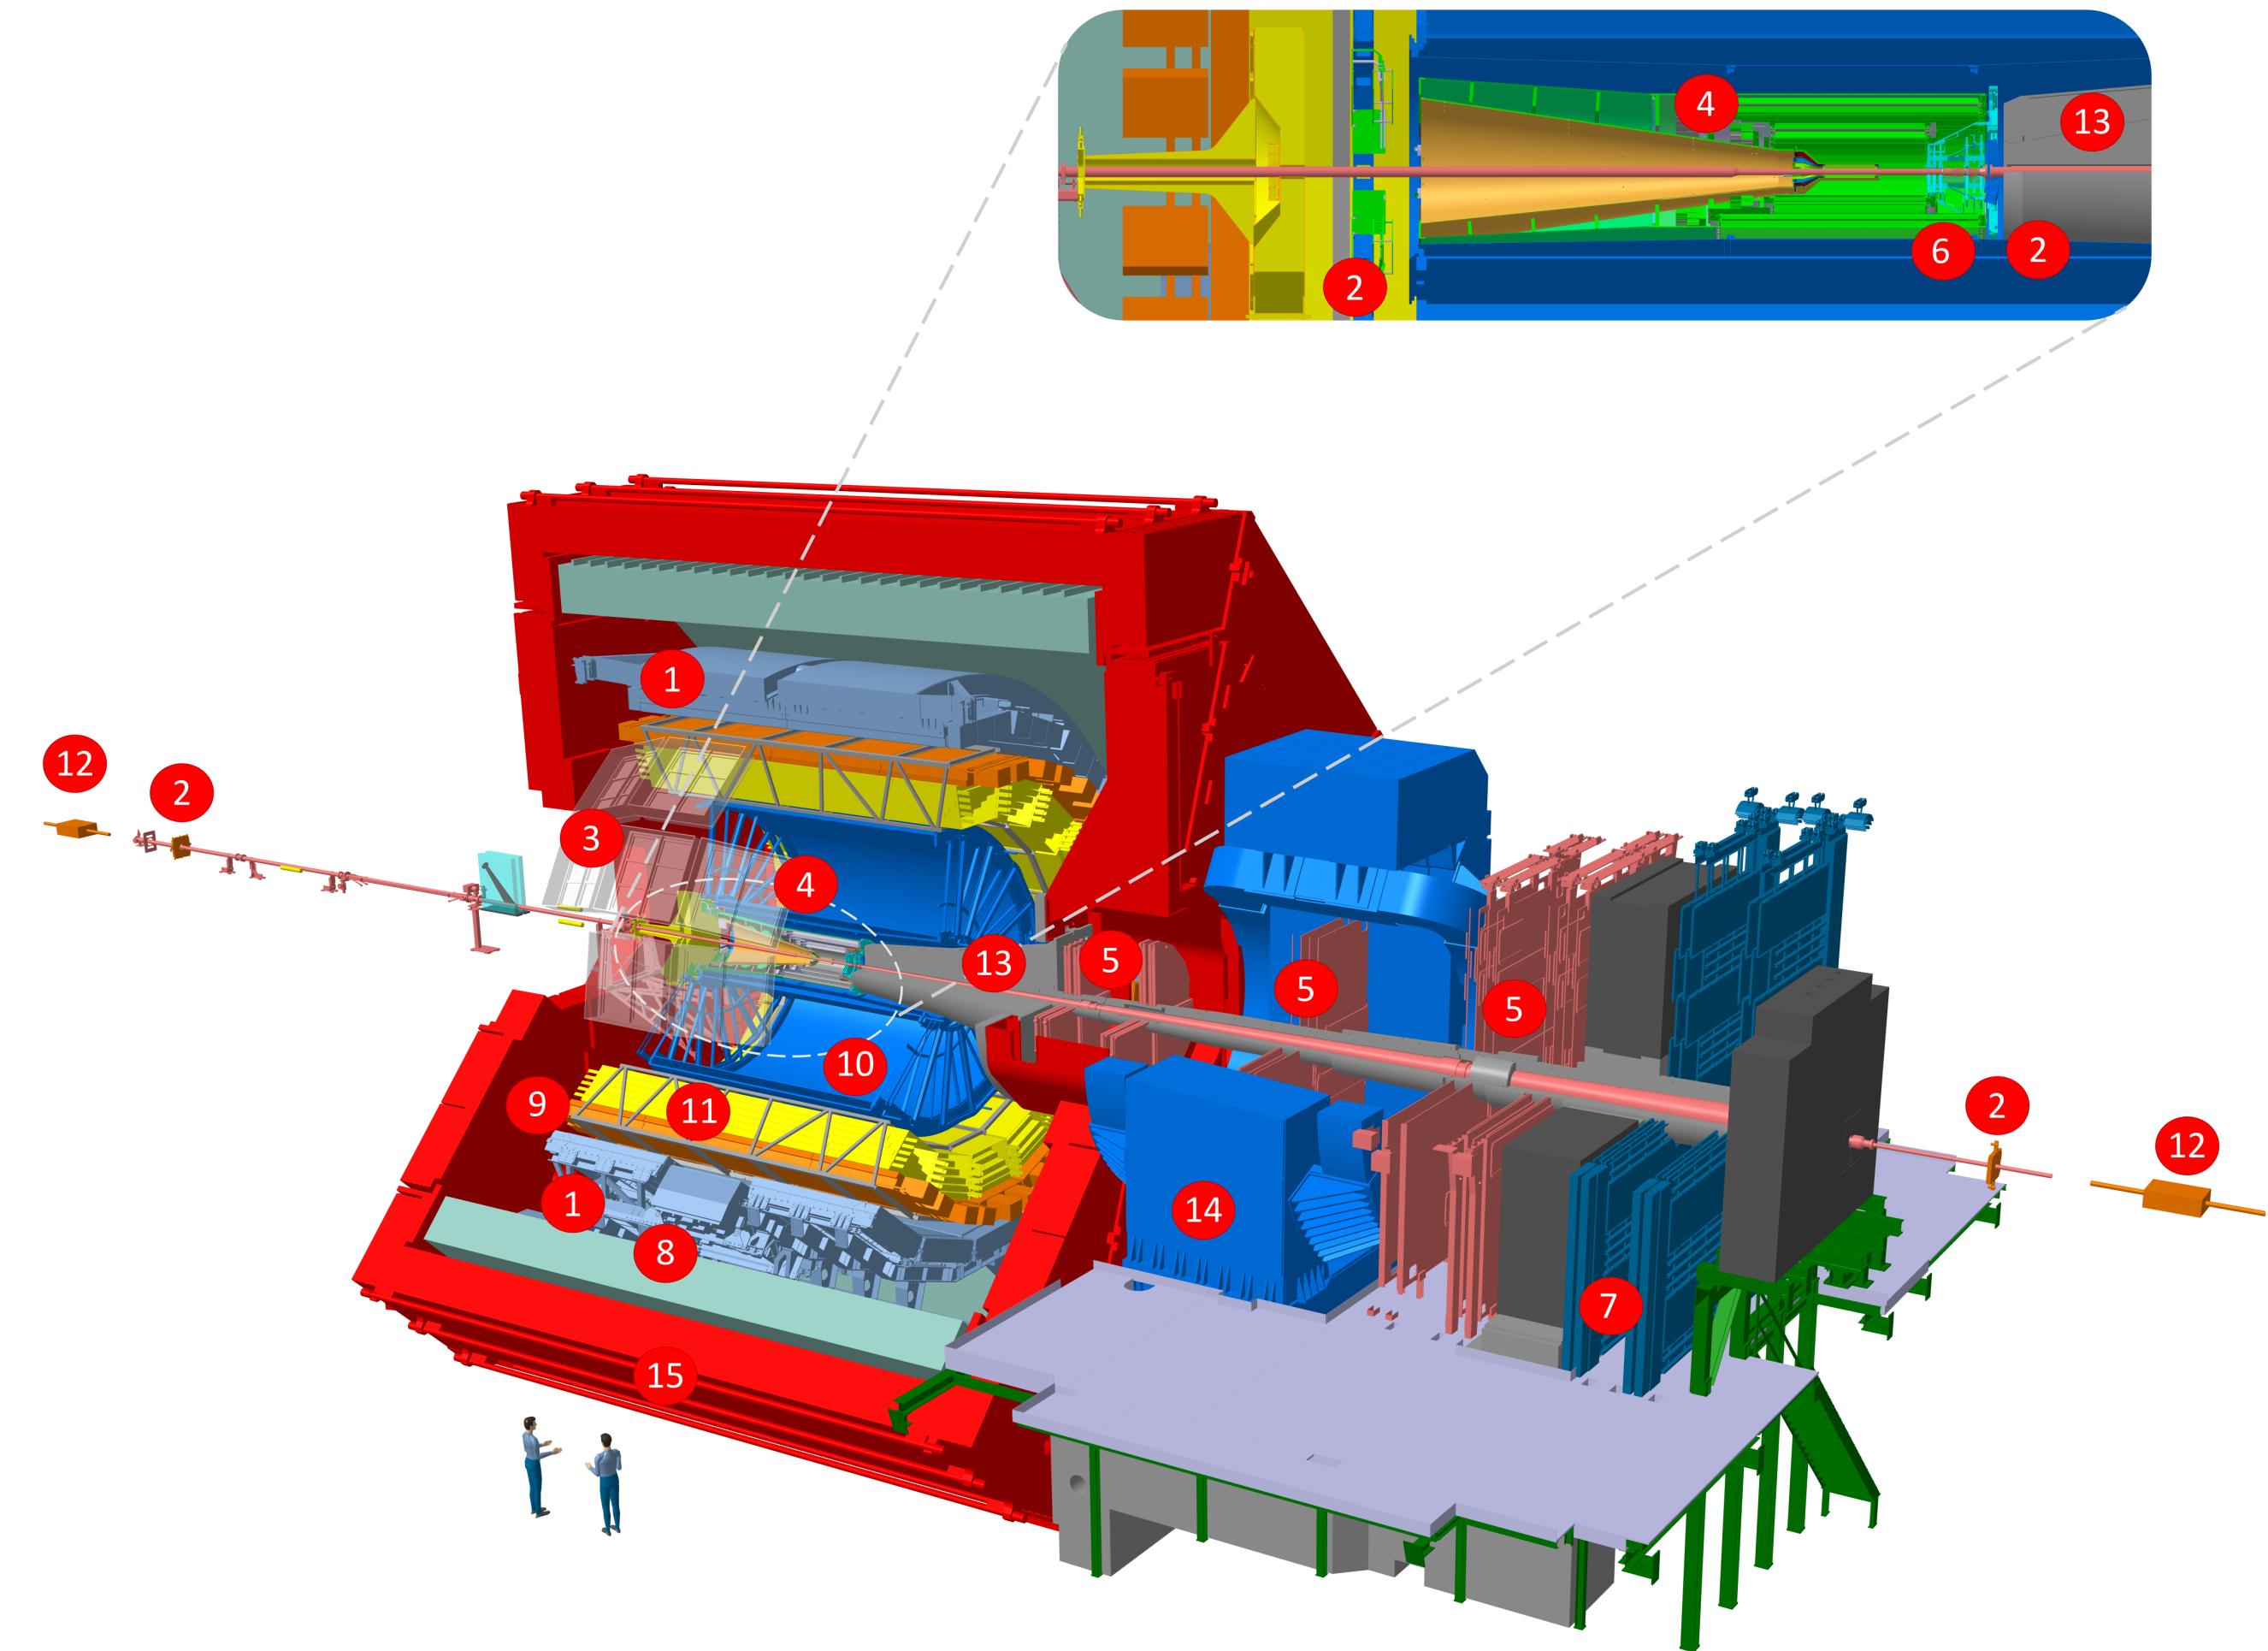

Jet fragmentation

Jet fragmentation

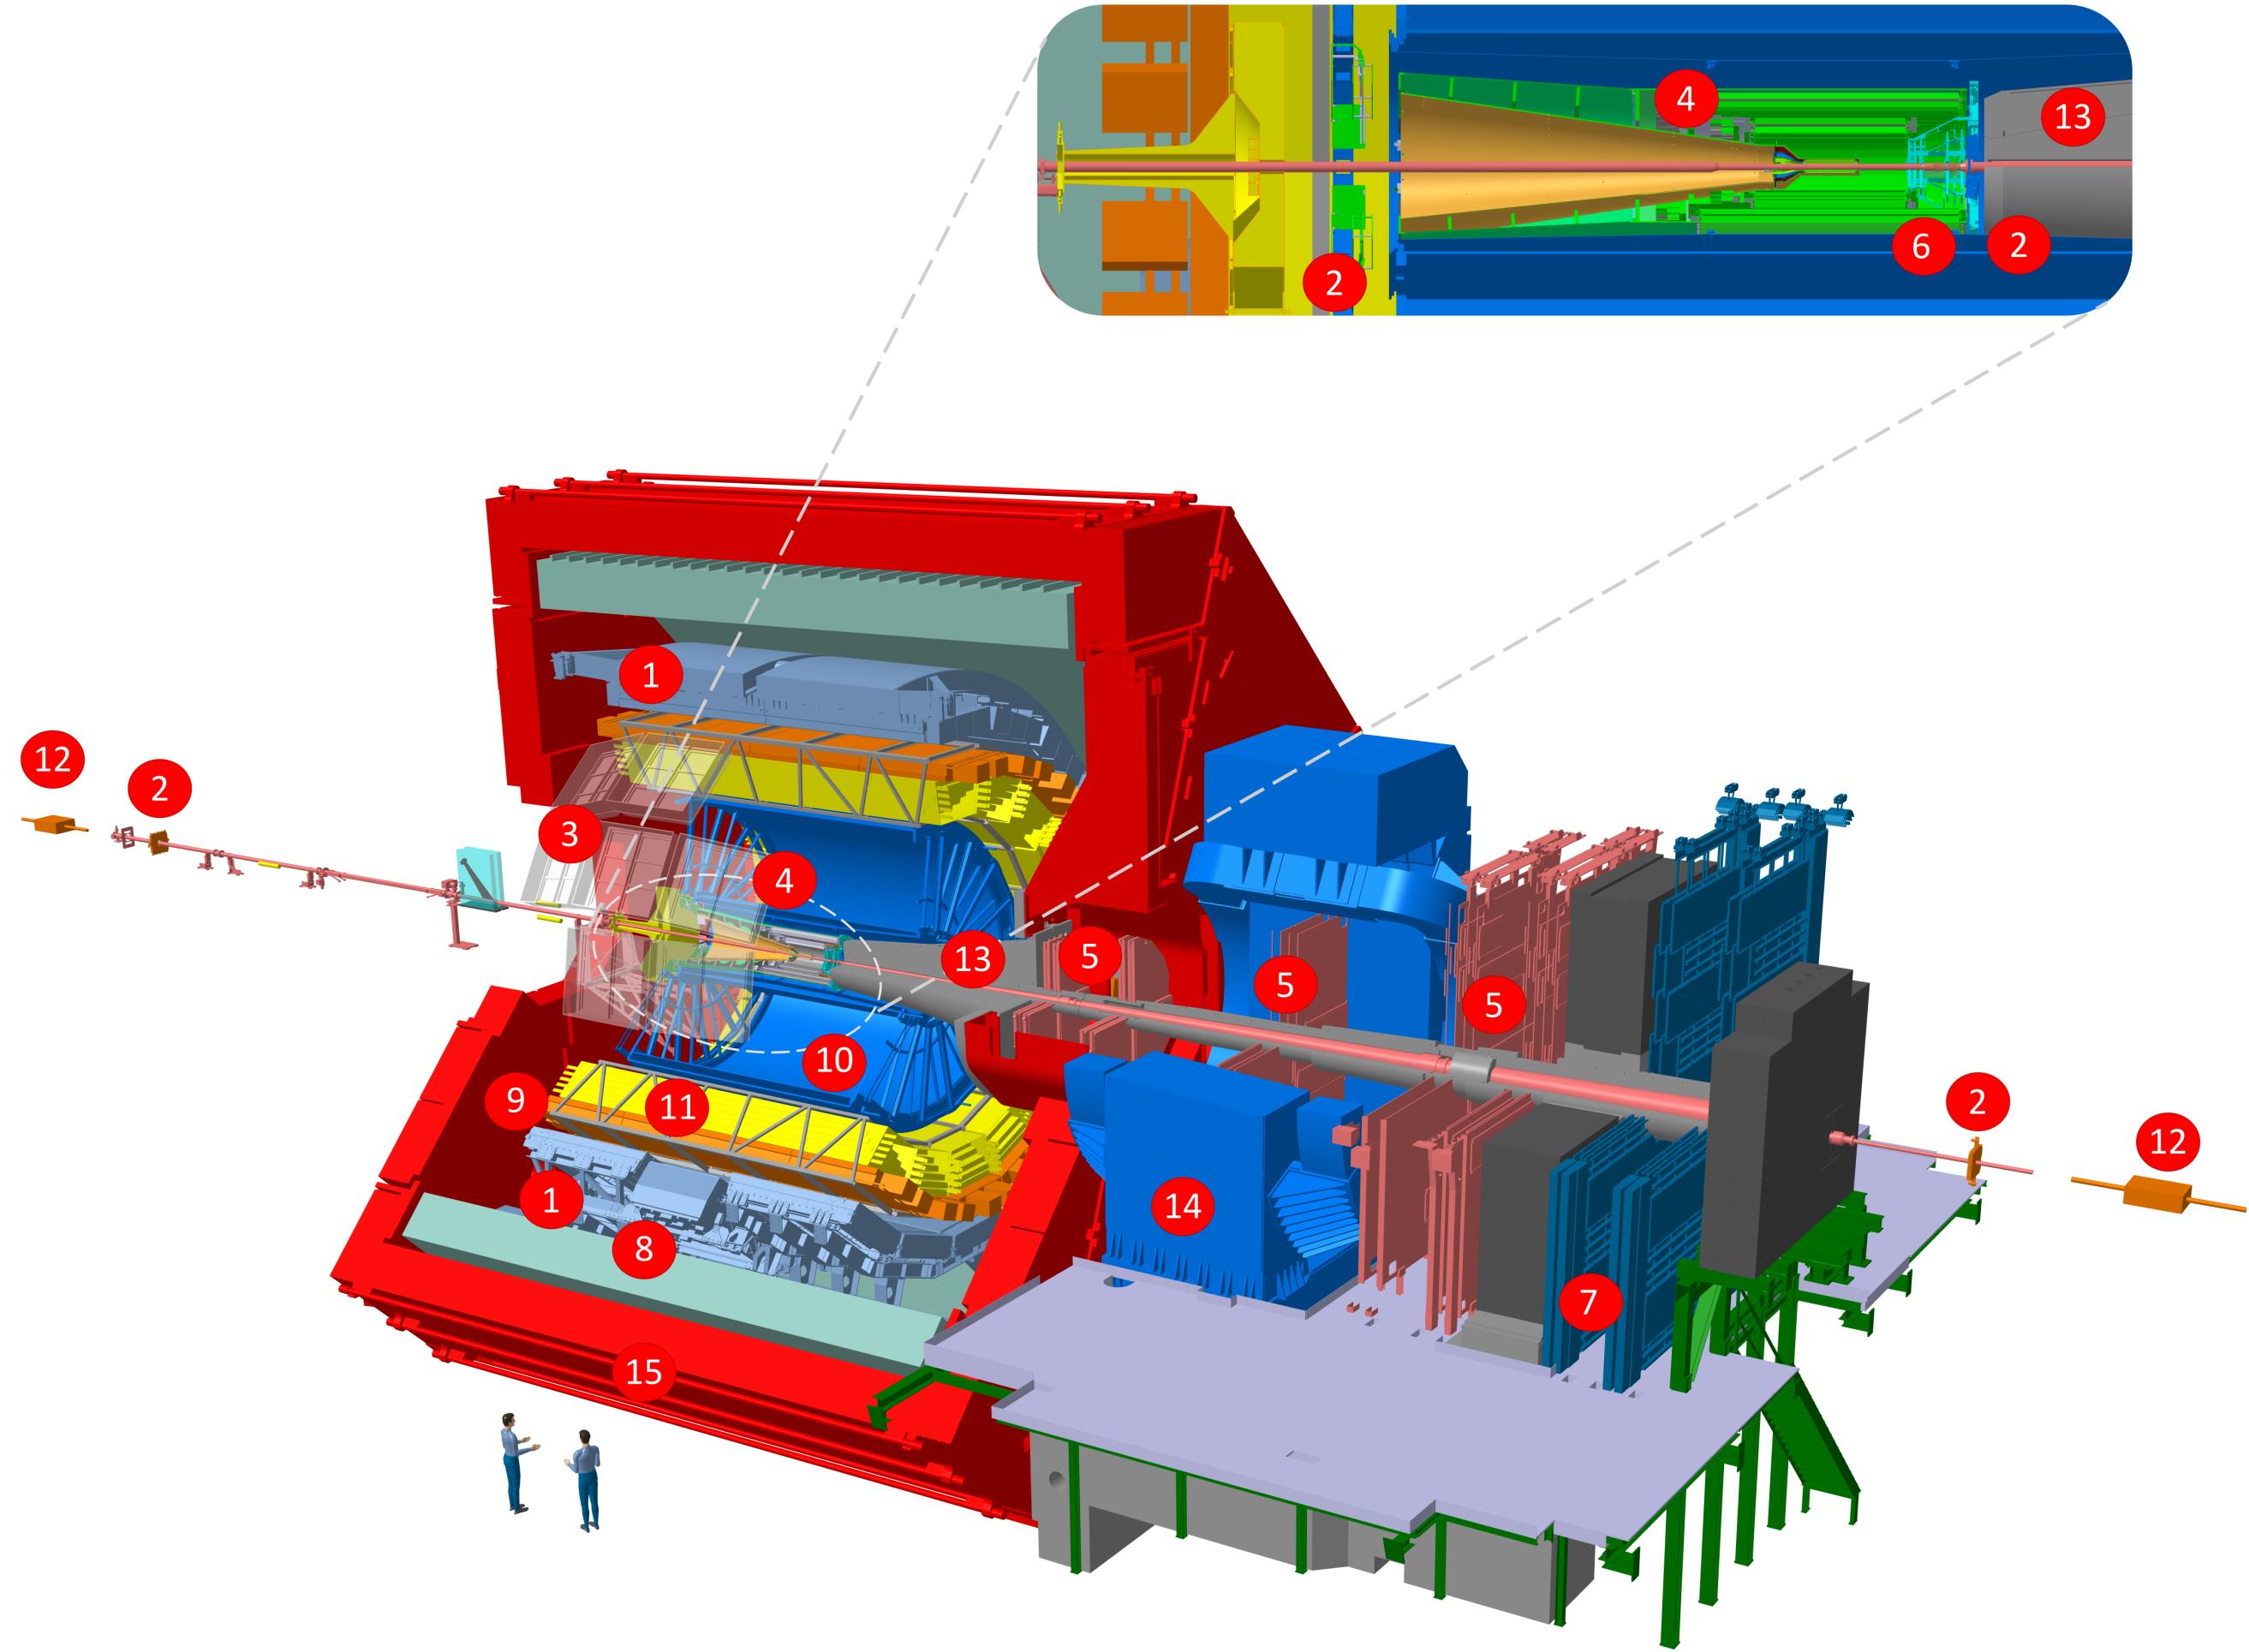

Moving to Run 3

ALICE

Moving to Run 3

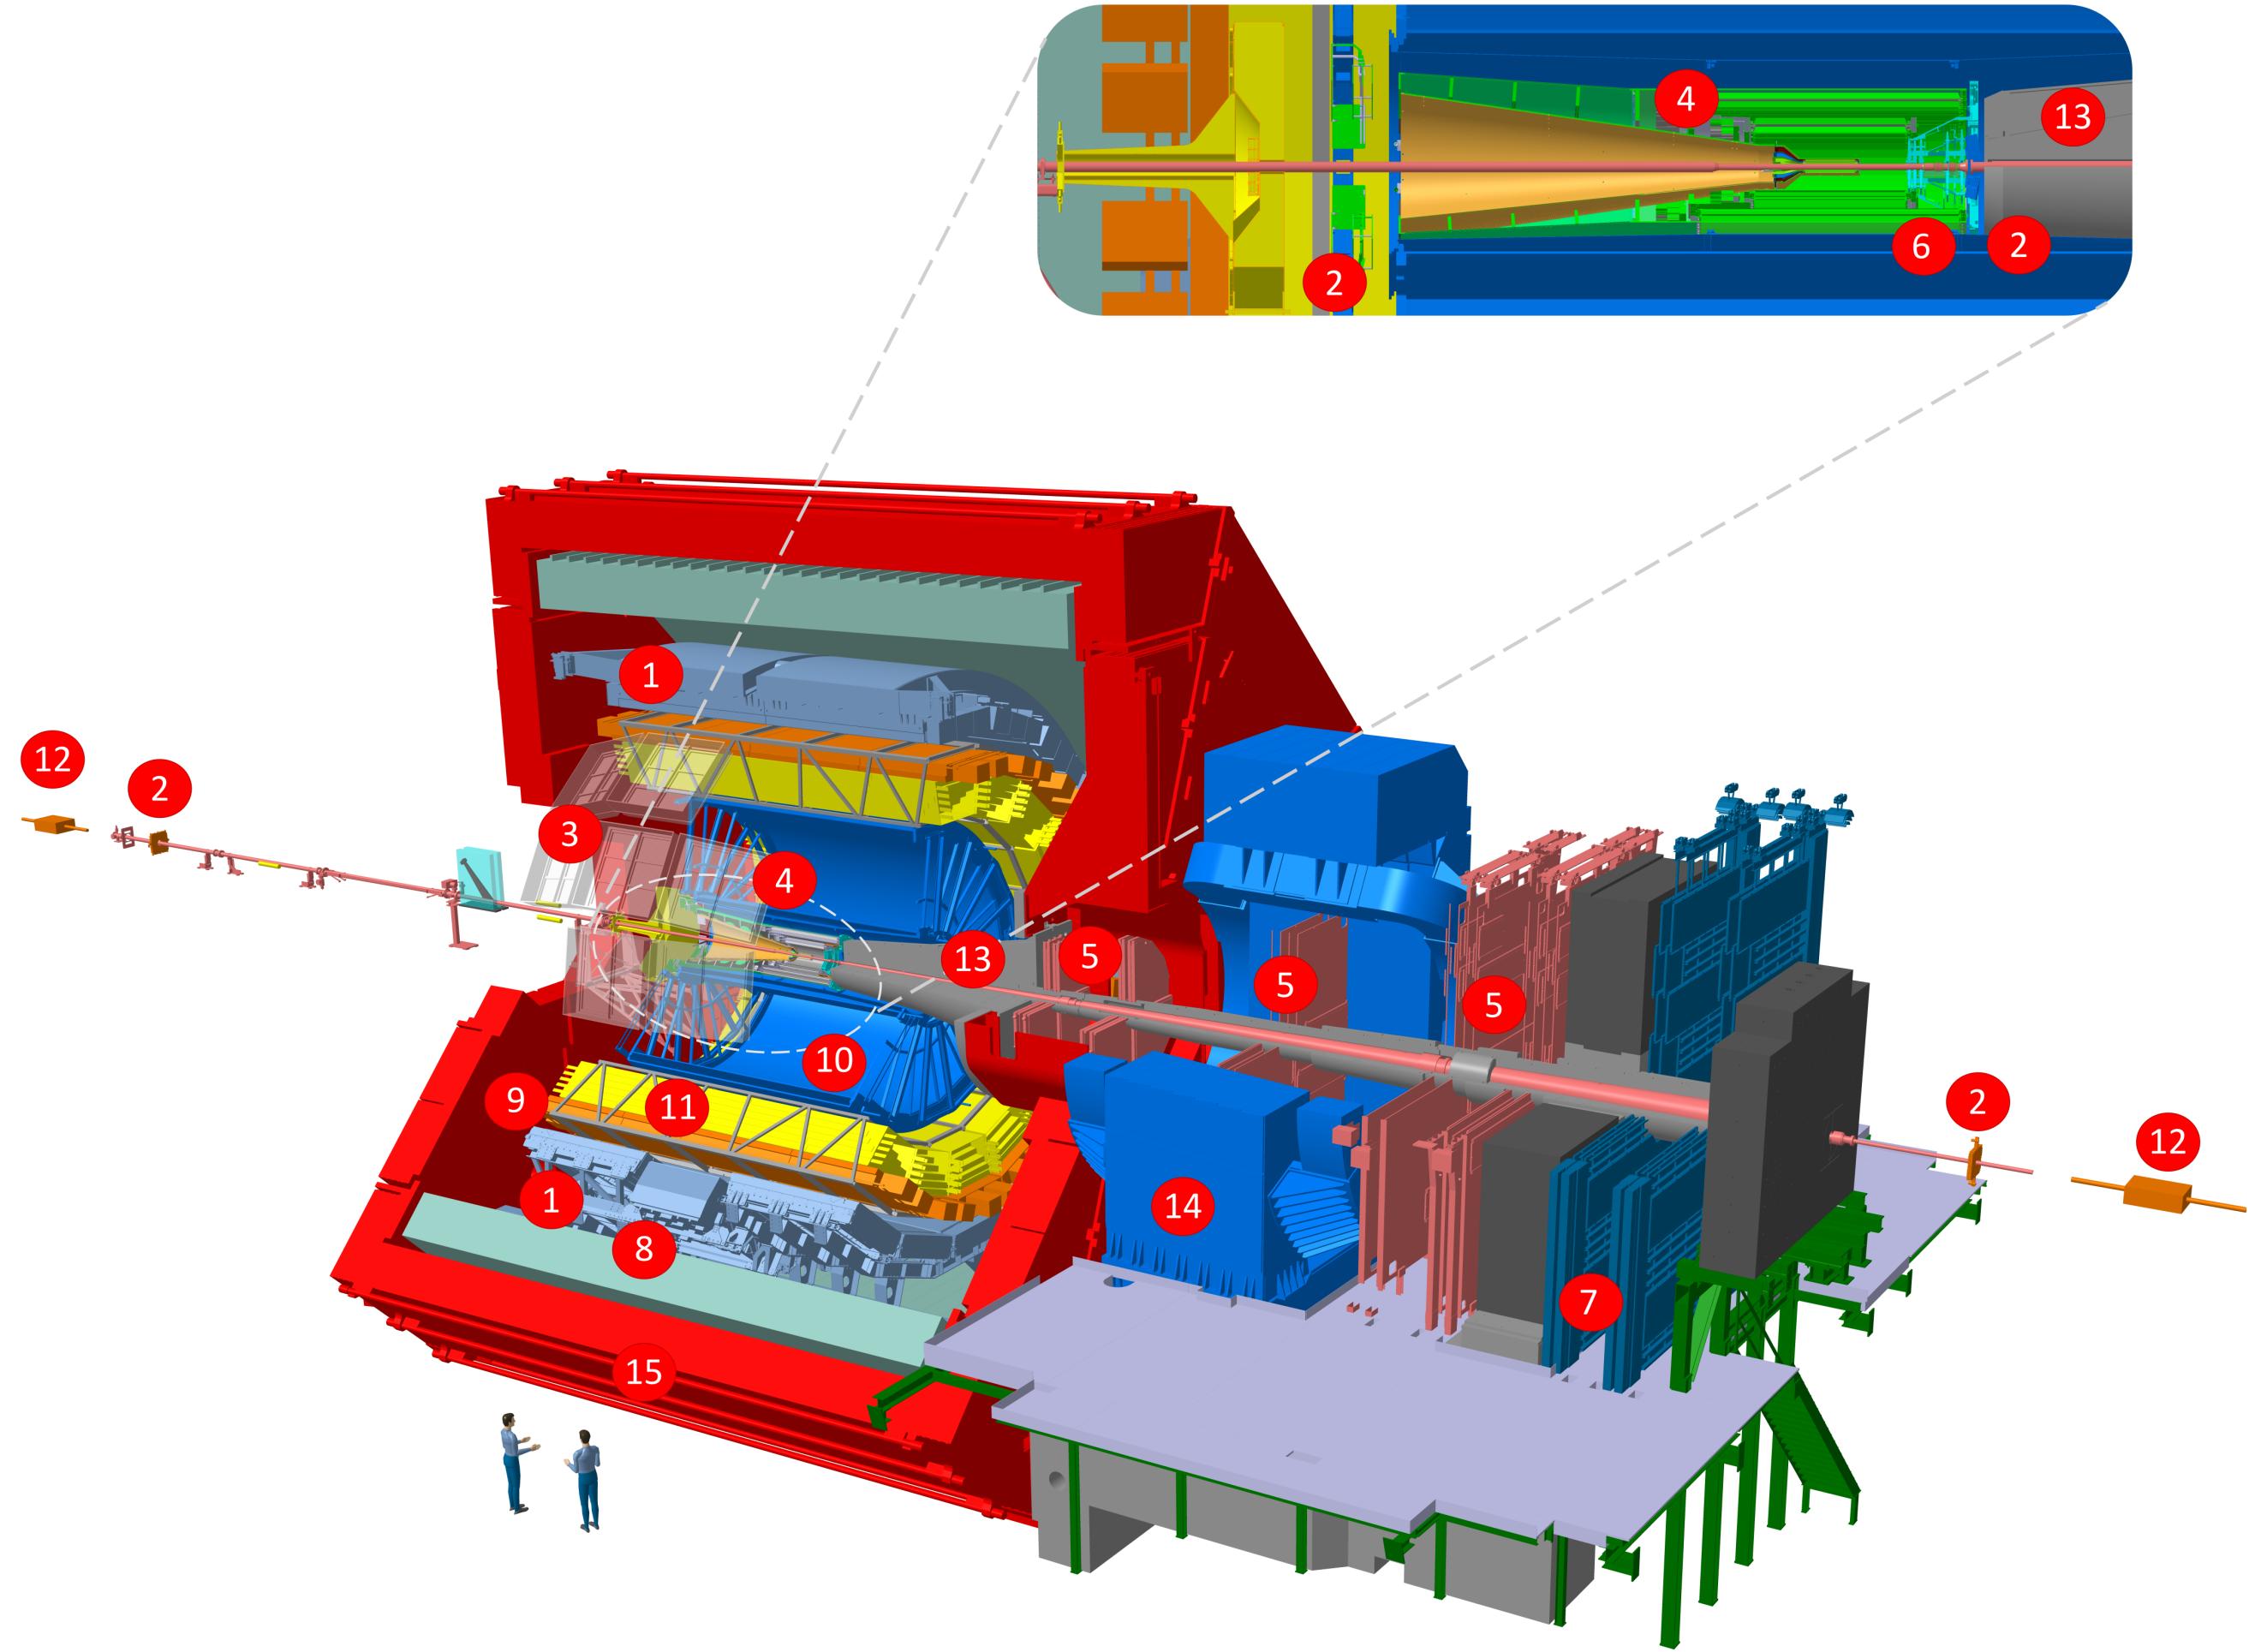

- Continuous readout for tracker

ALICE

Moving to Run 3

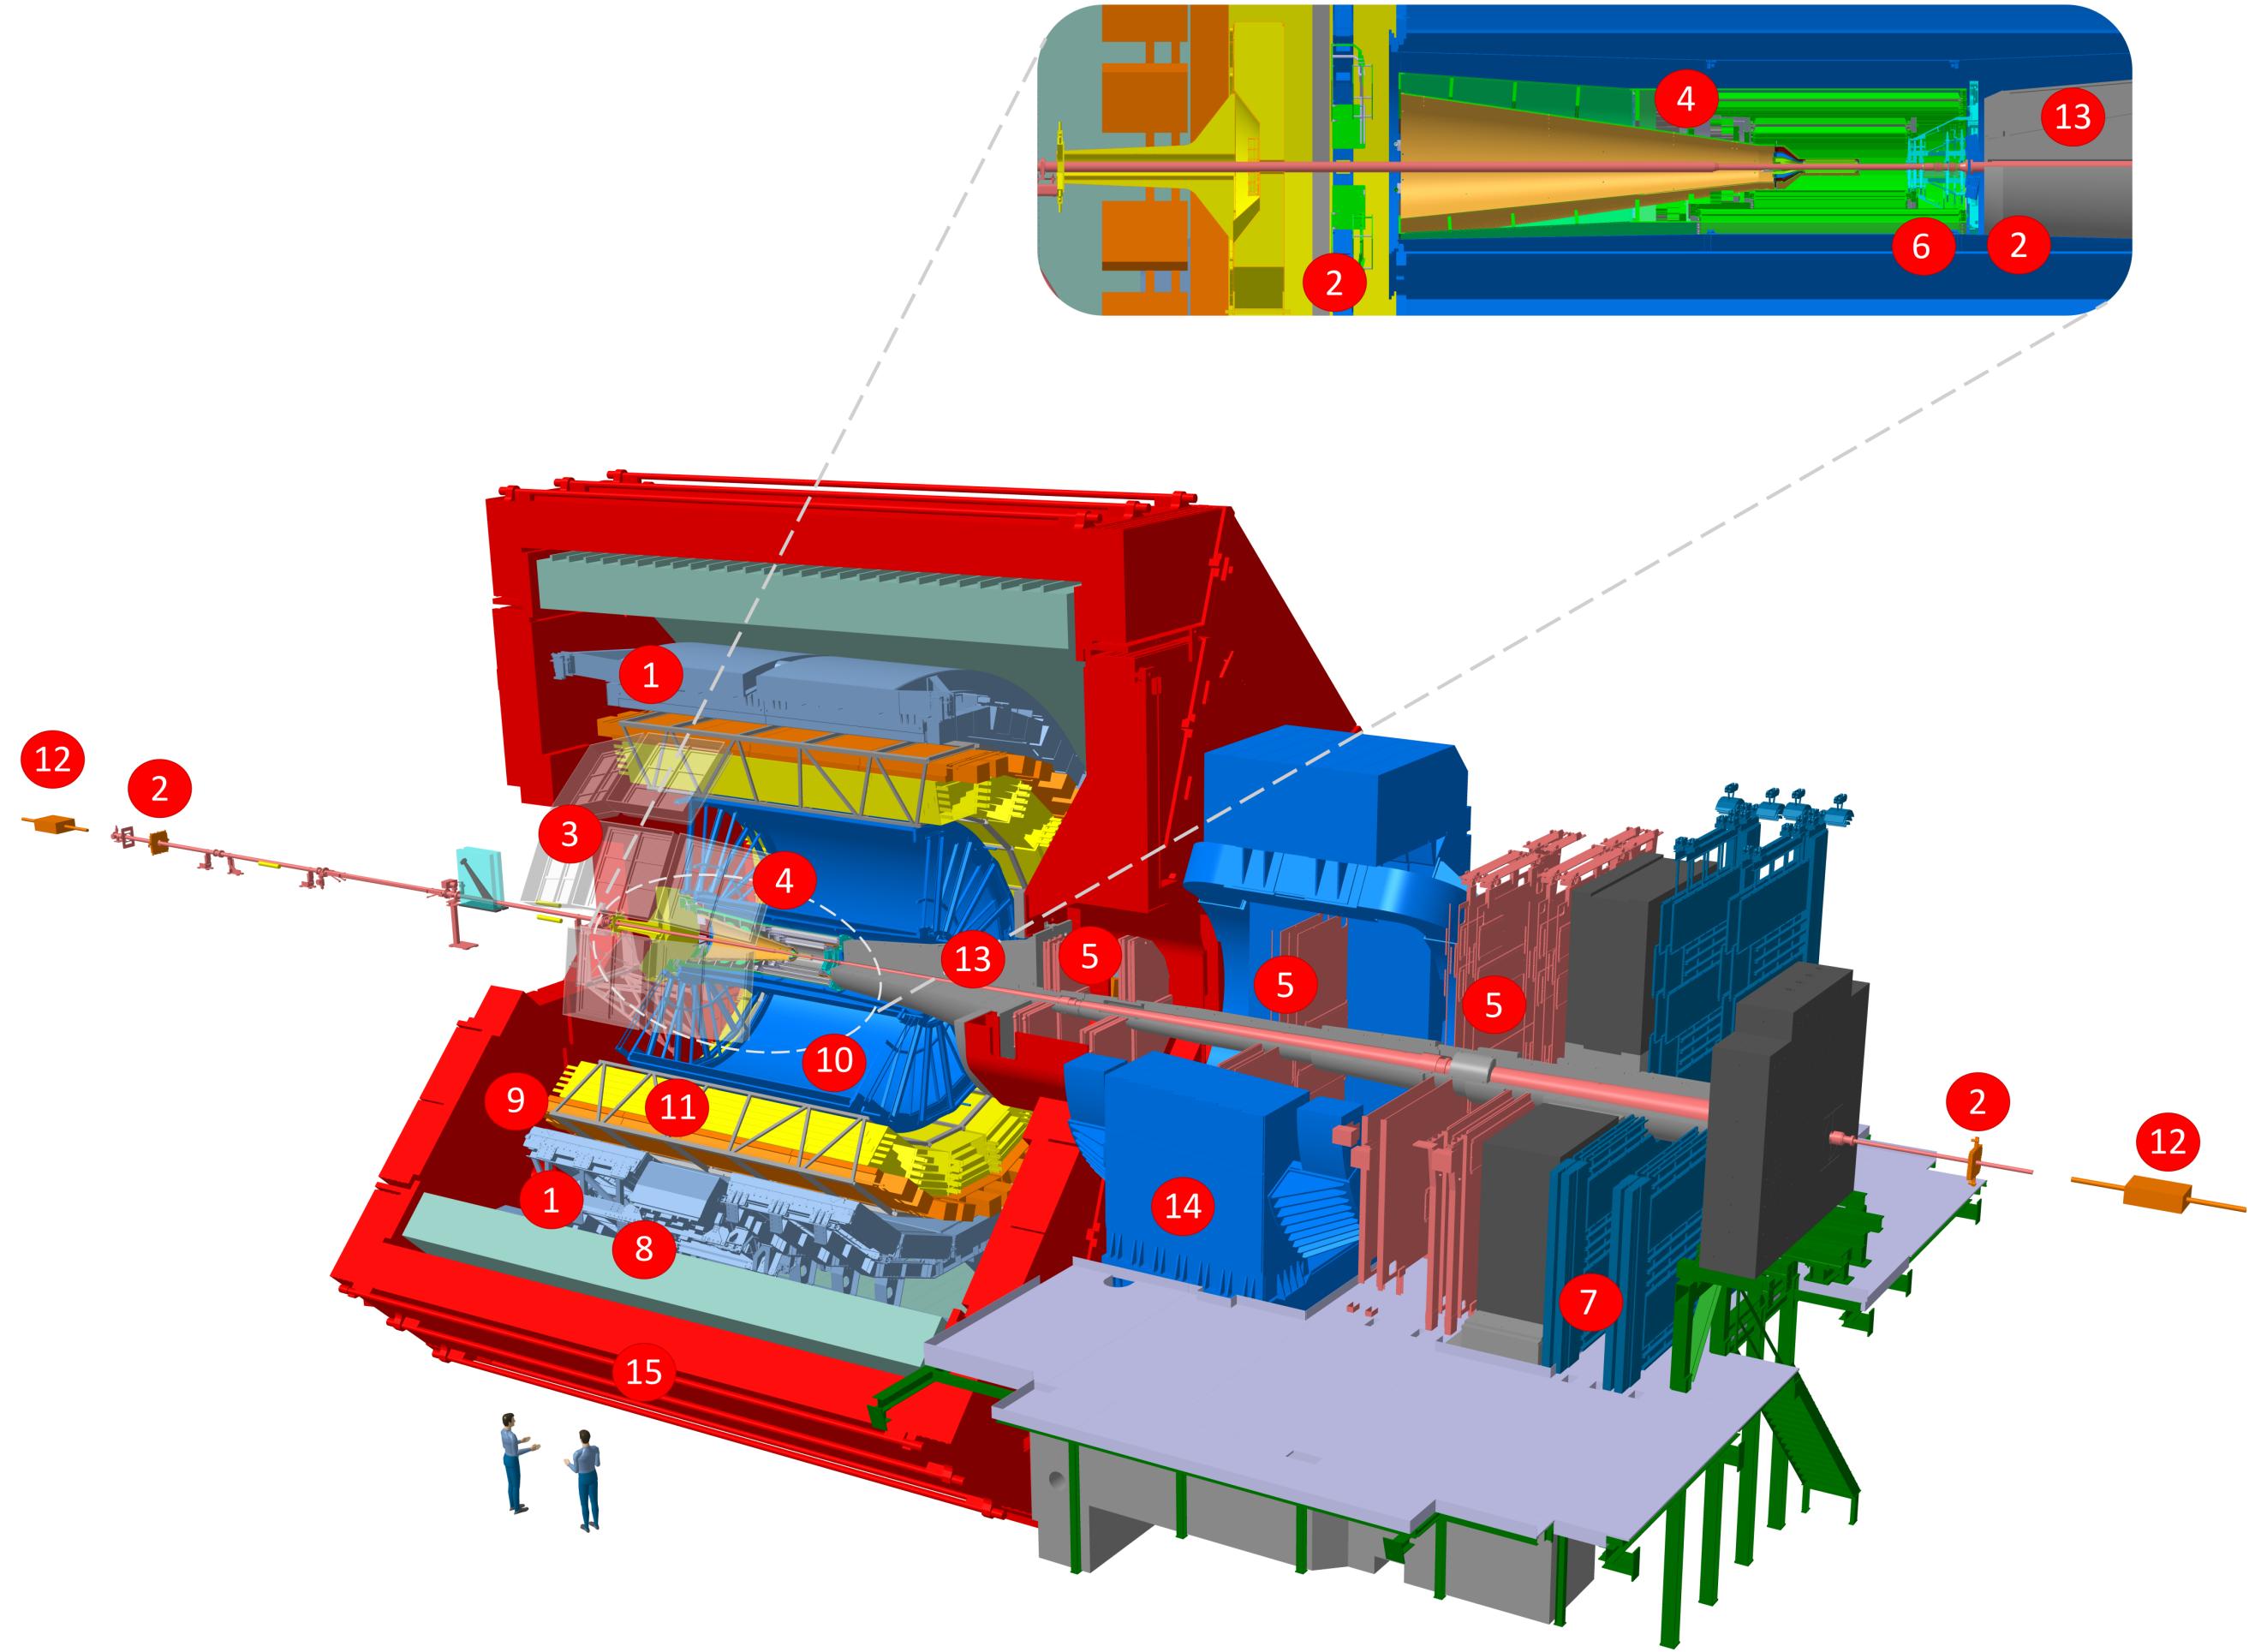

- Continuous readout for tracker
 - Allows for much higher rates

ALICE

Moving to Run 3

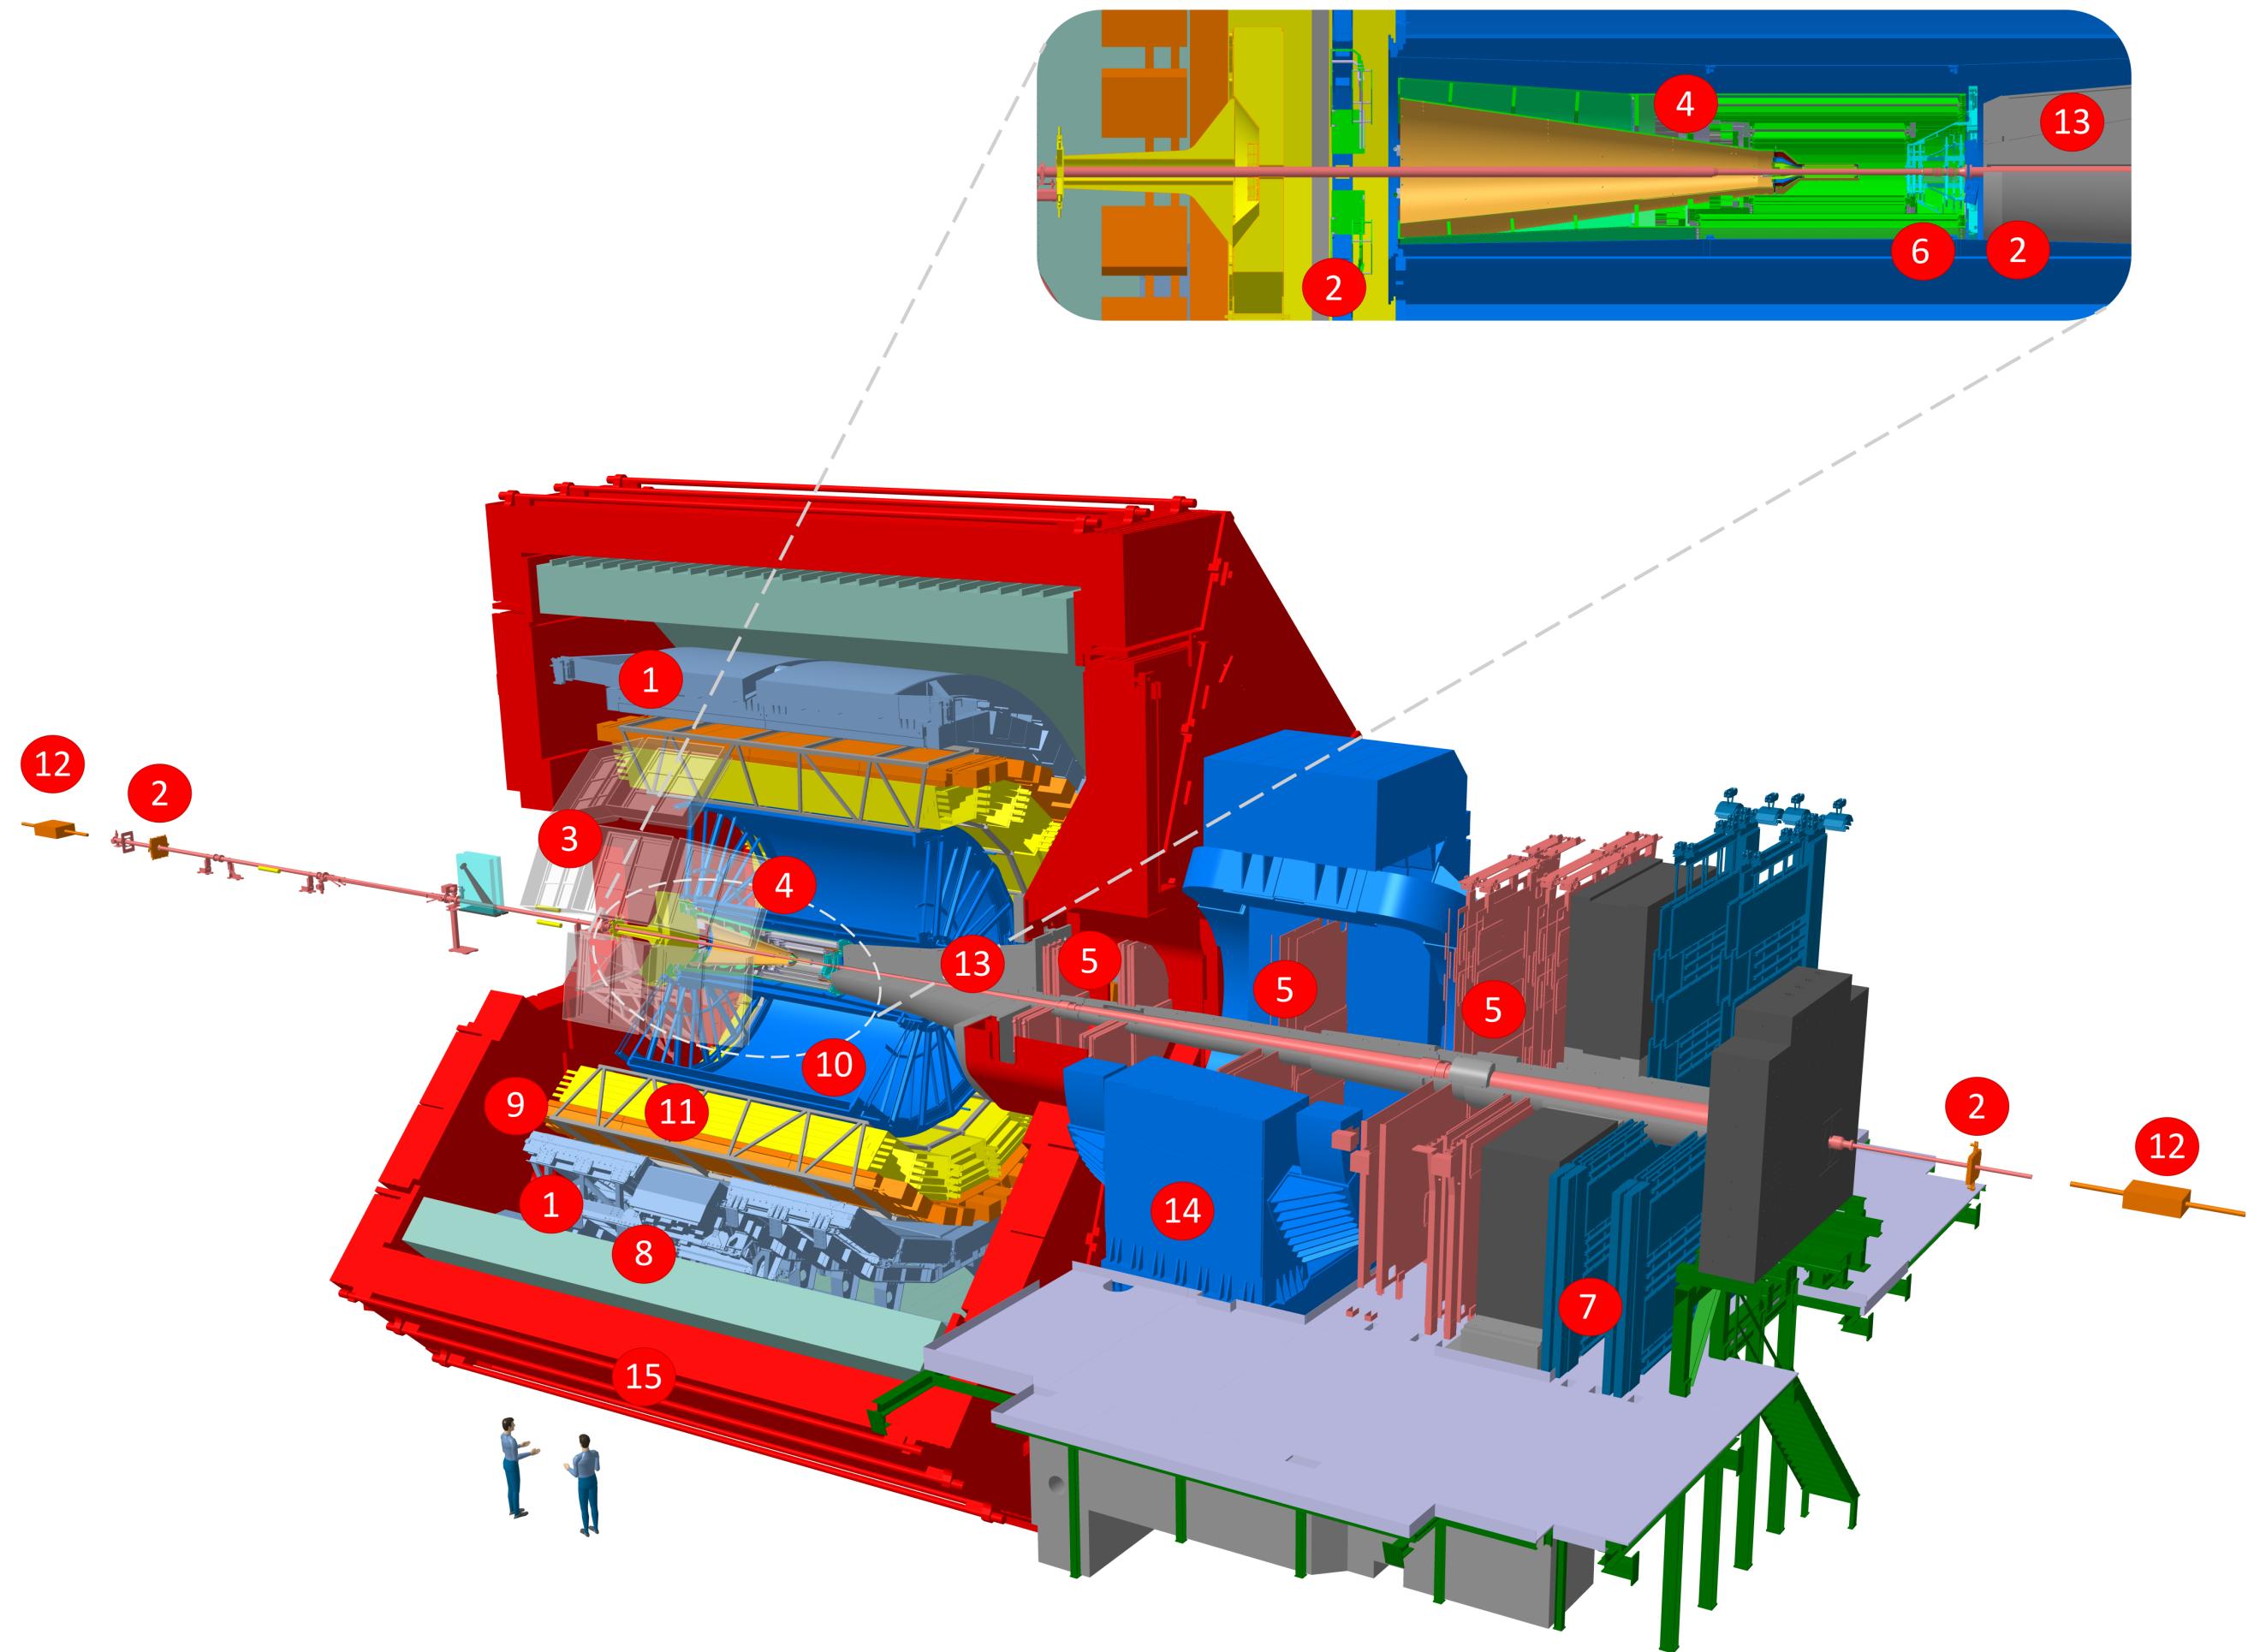

- Continuous readout for tracker
 - Allows for much higher rates
 - New software framework

ALICE

Moving to Run 3

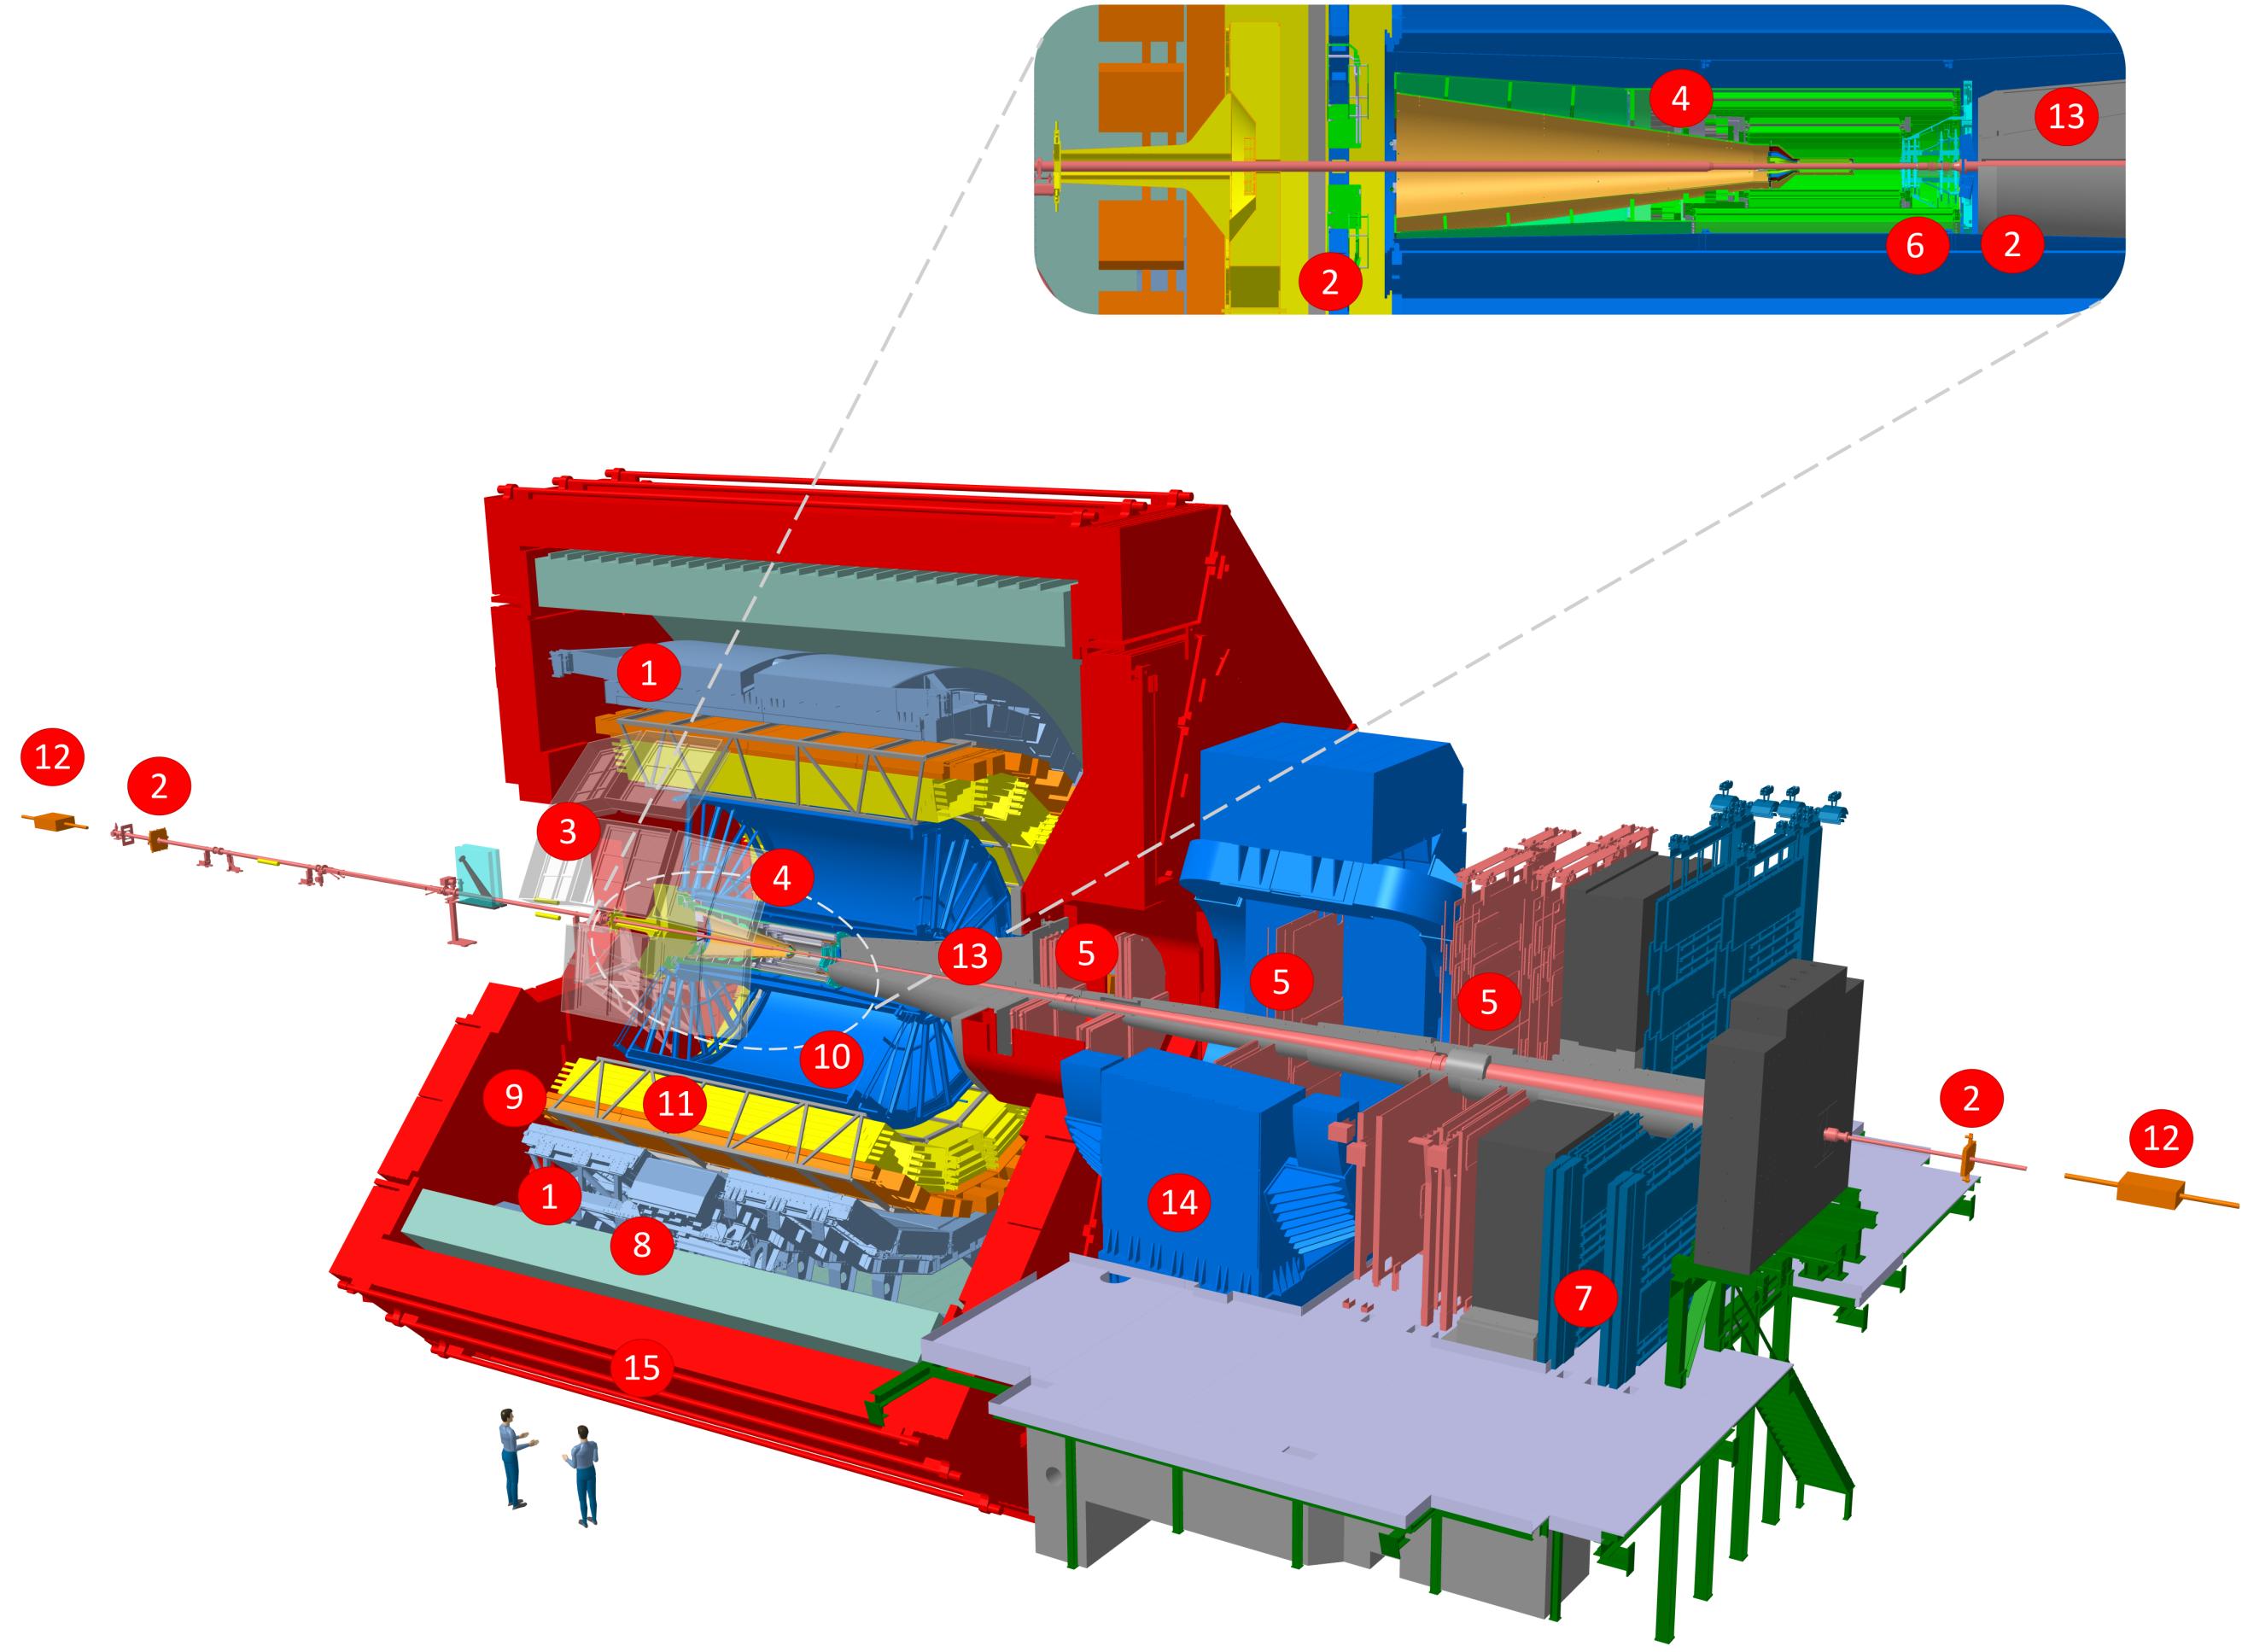

- Continuous readout for tracker
 - Allows for much higher rates
- New software framework
 - O2Physics

ALICE

Moving to Run 3

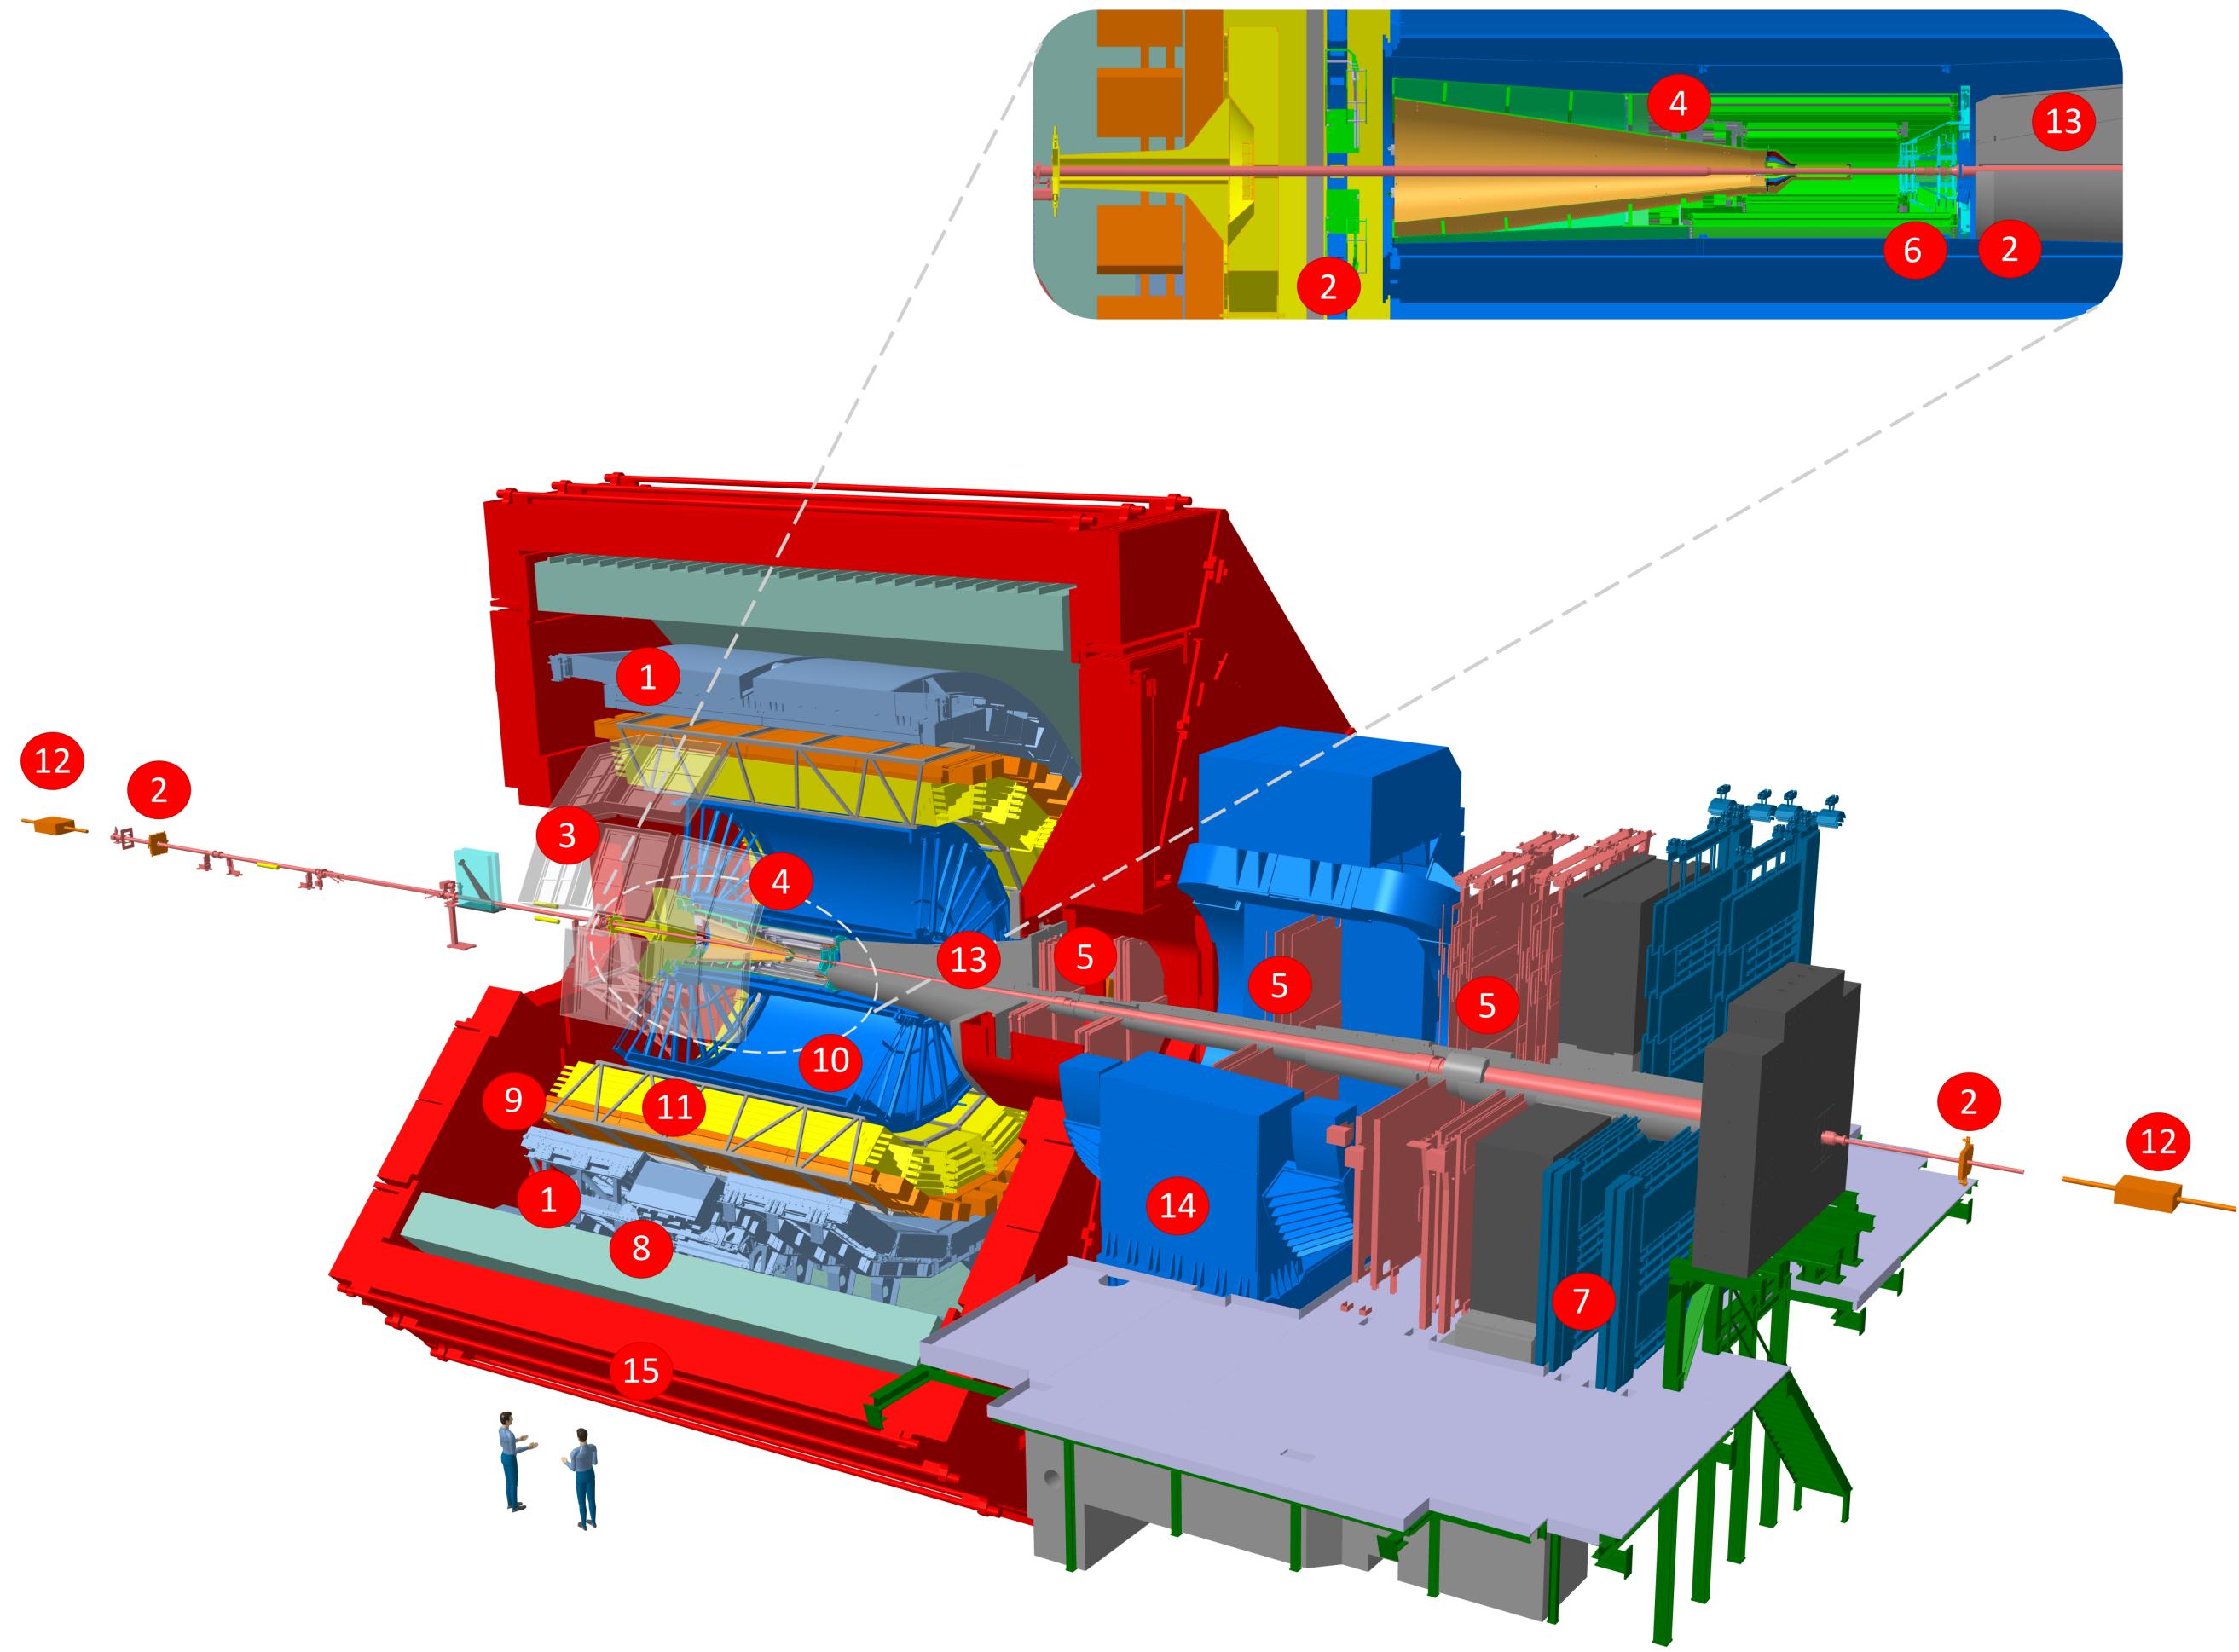

- Continuous readout for tracker
 - Allows for much higher rates
- New software framework
 - O2Physics
- EMCAL

ALICE

Moving to Run 3

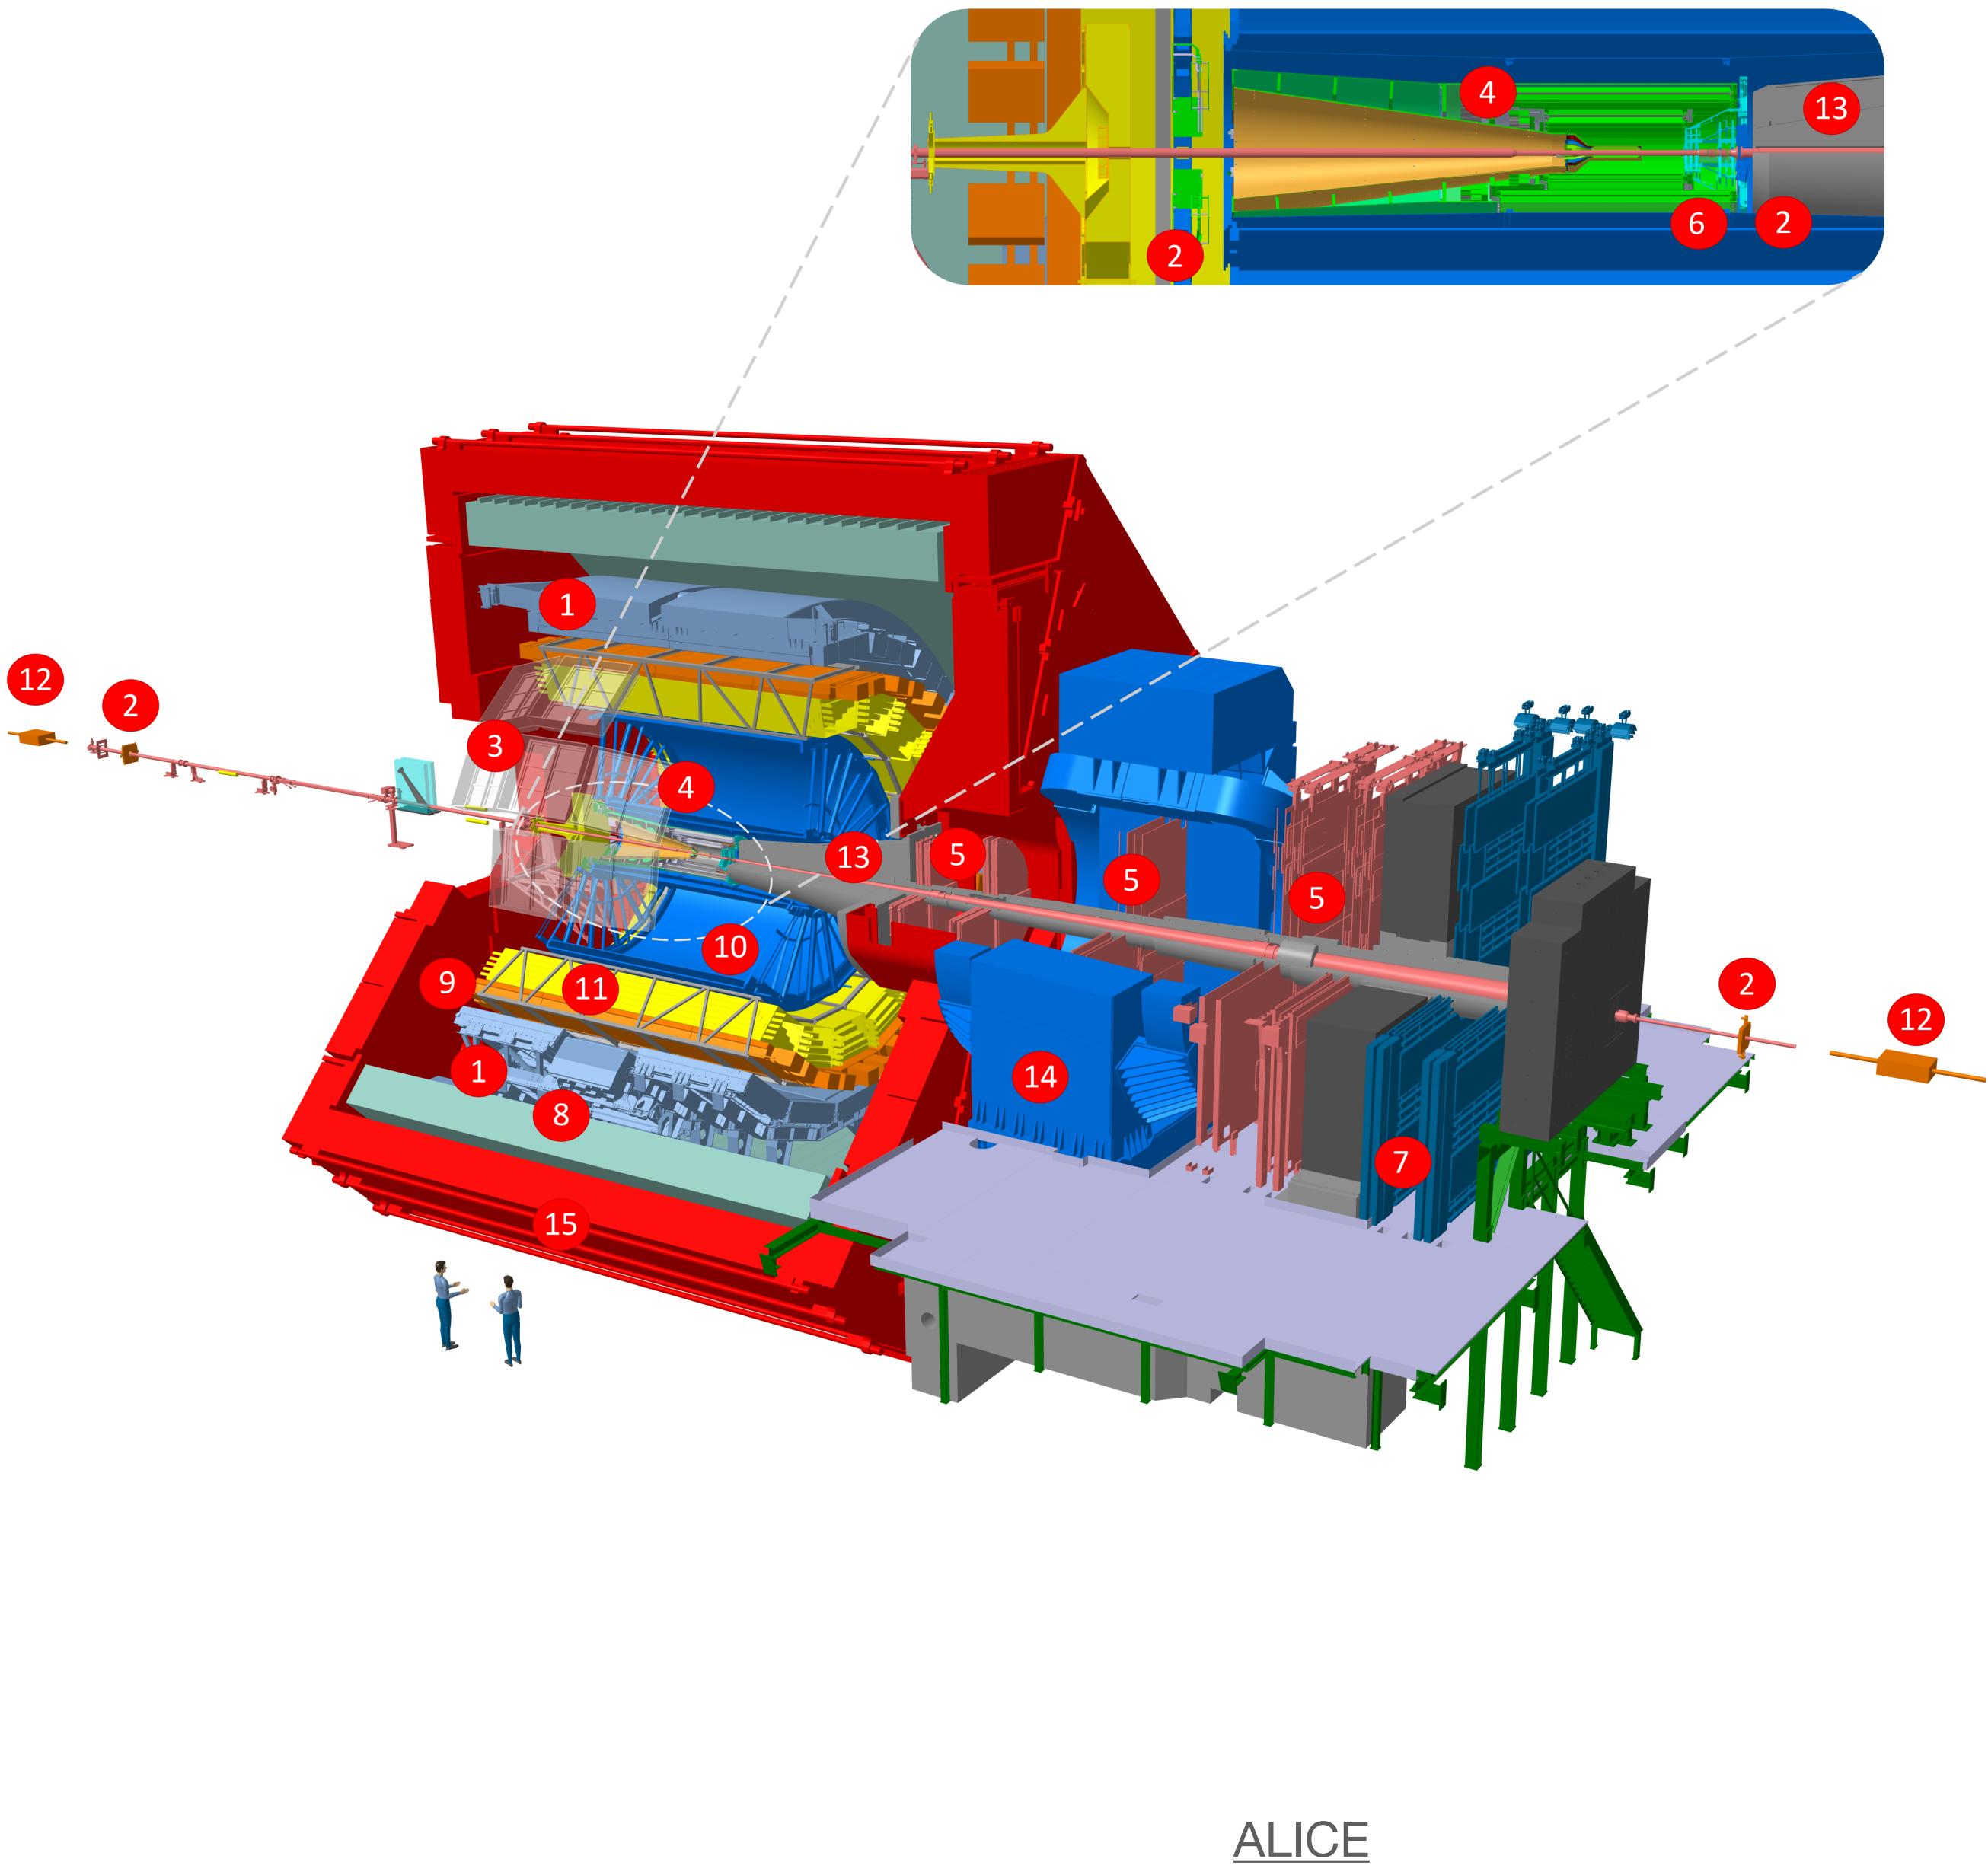

- Continuous readout for tracker
 - Allows for much higher rates
- New software framework
 - O2Physics
- EMCAL
 - Neutral energy deposits

ALICE

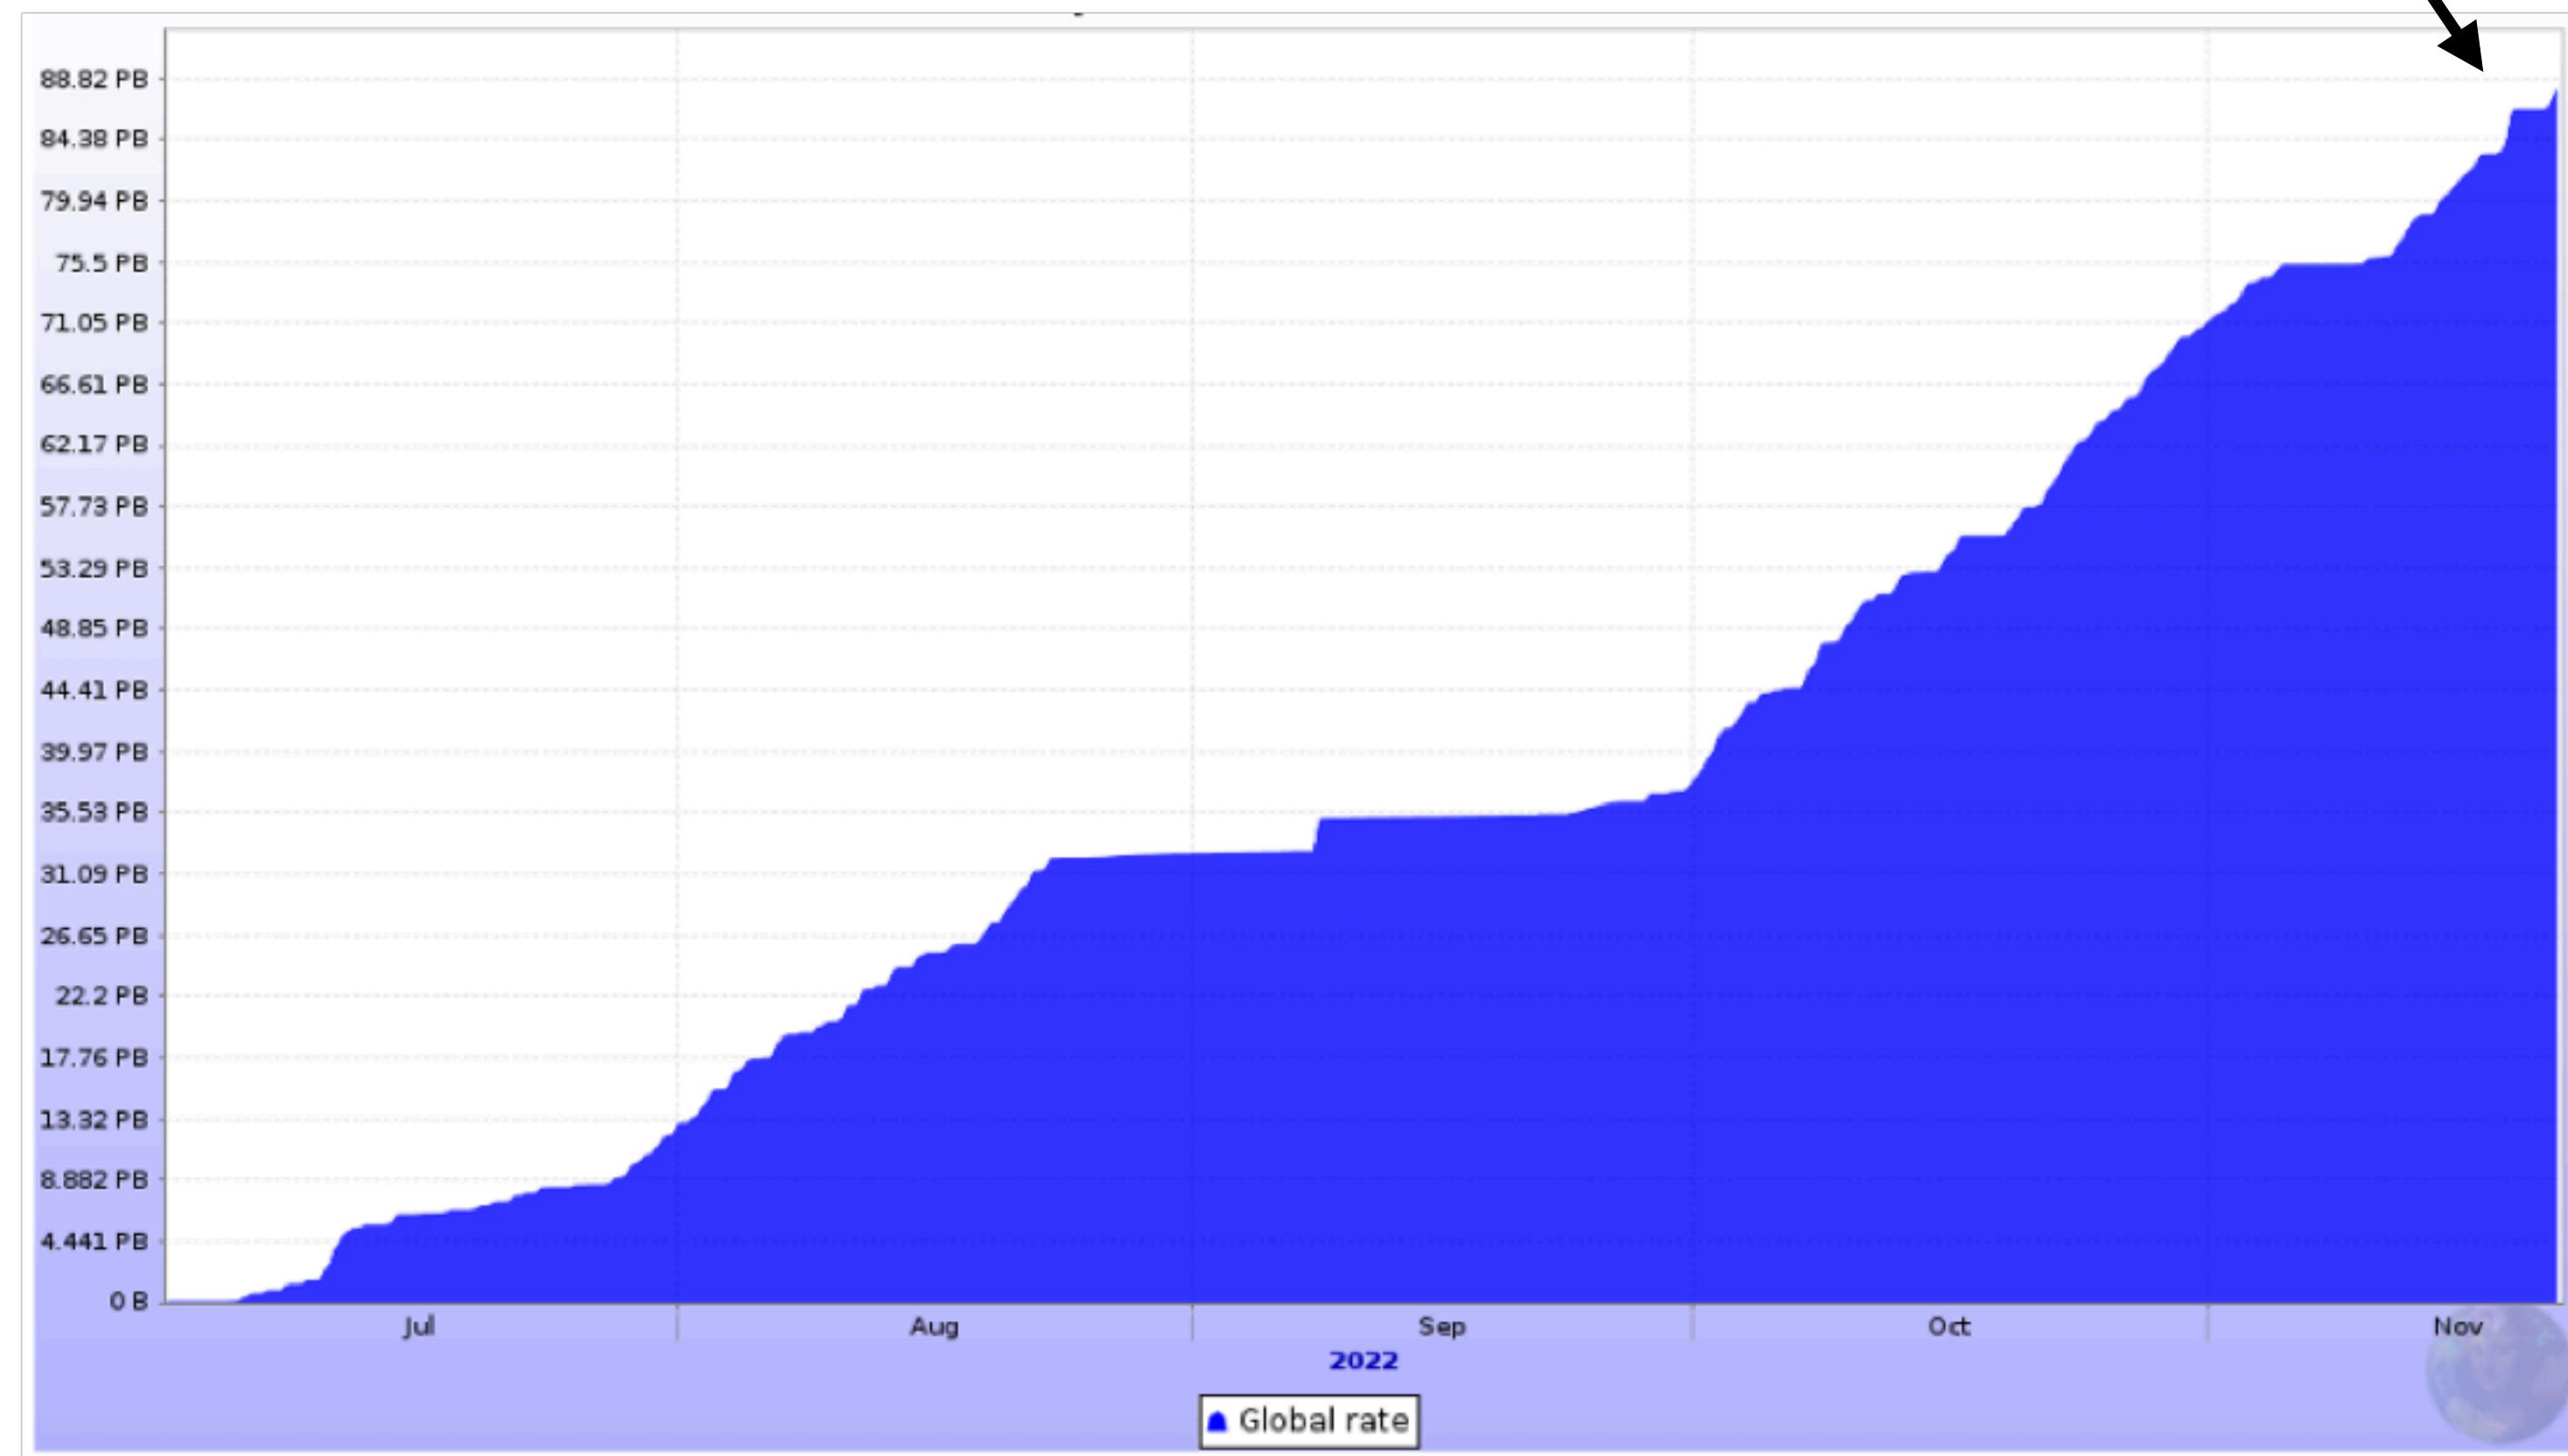

Moving to Run 3

- Continuous readout for tracker
 - Allows for much higher rates
- New software framework
 - O2Physics
- EMCAL
 - Neutral energy deposits
 - Triggered detector

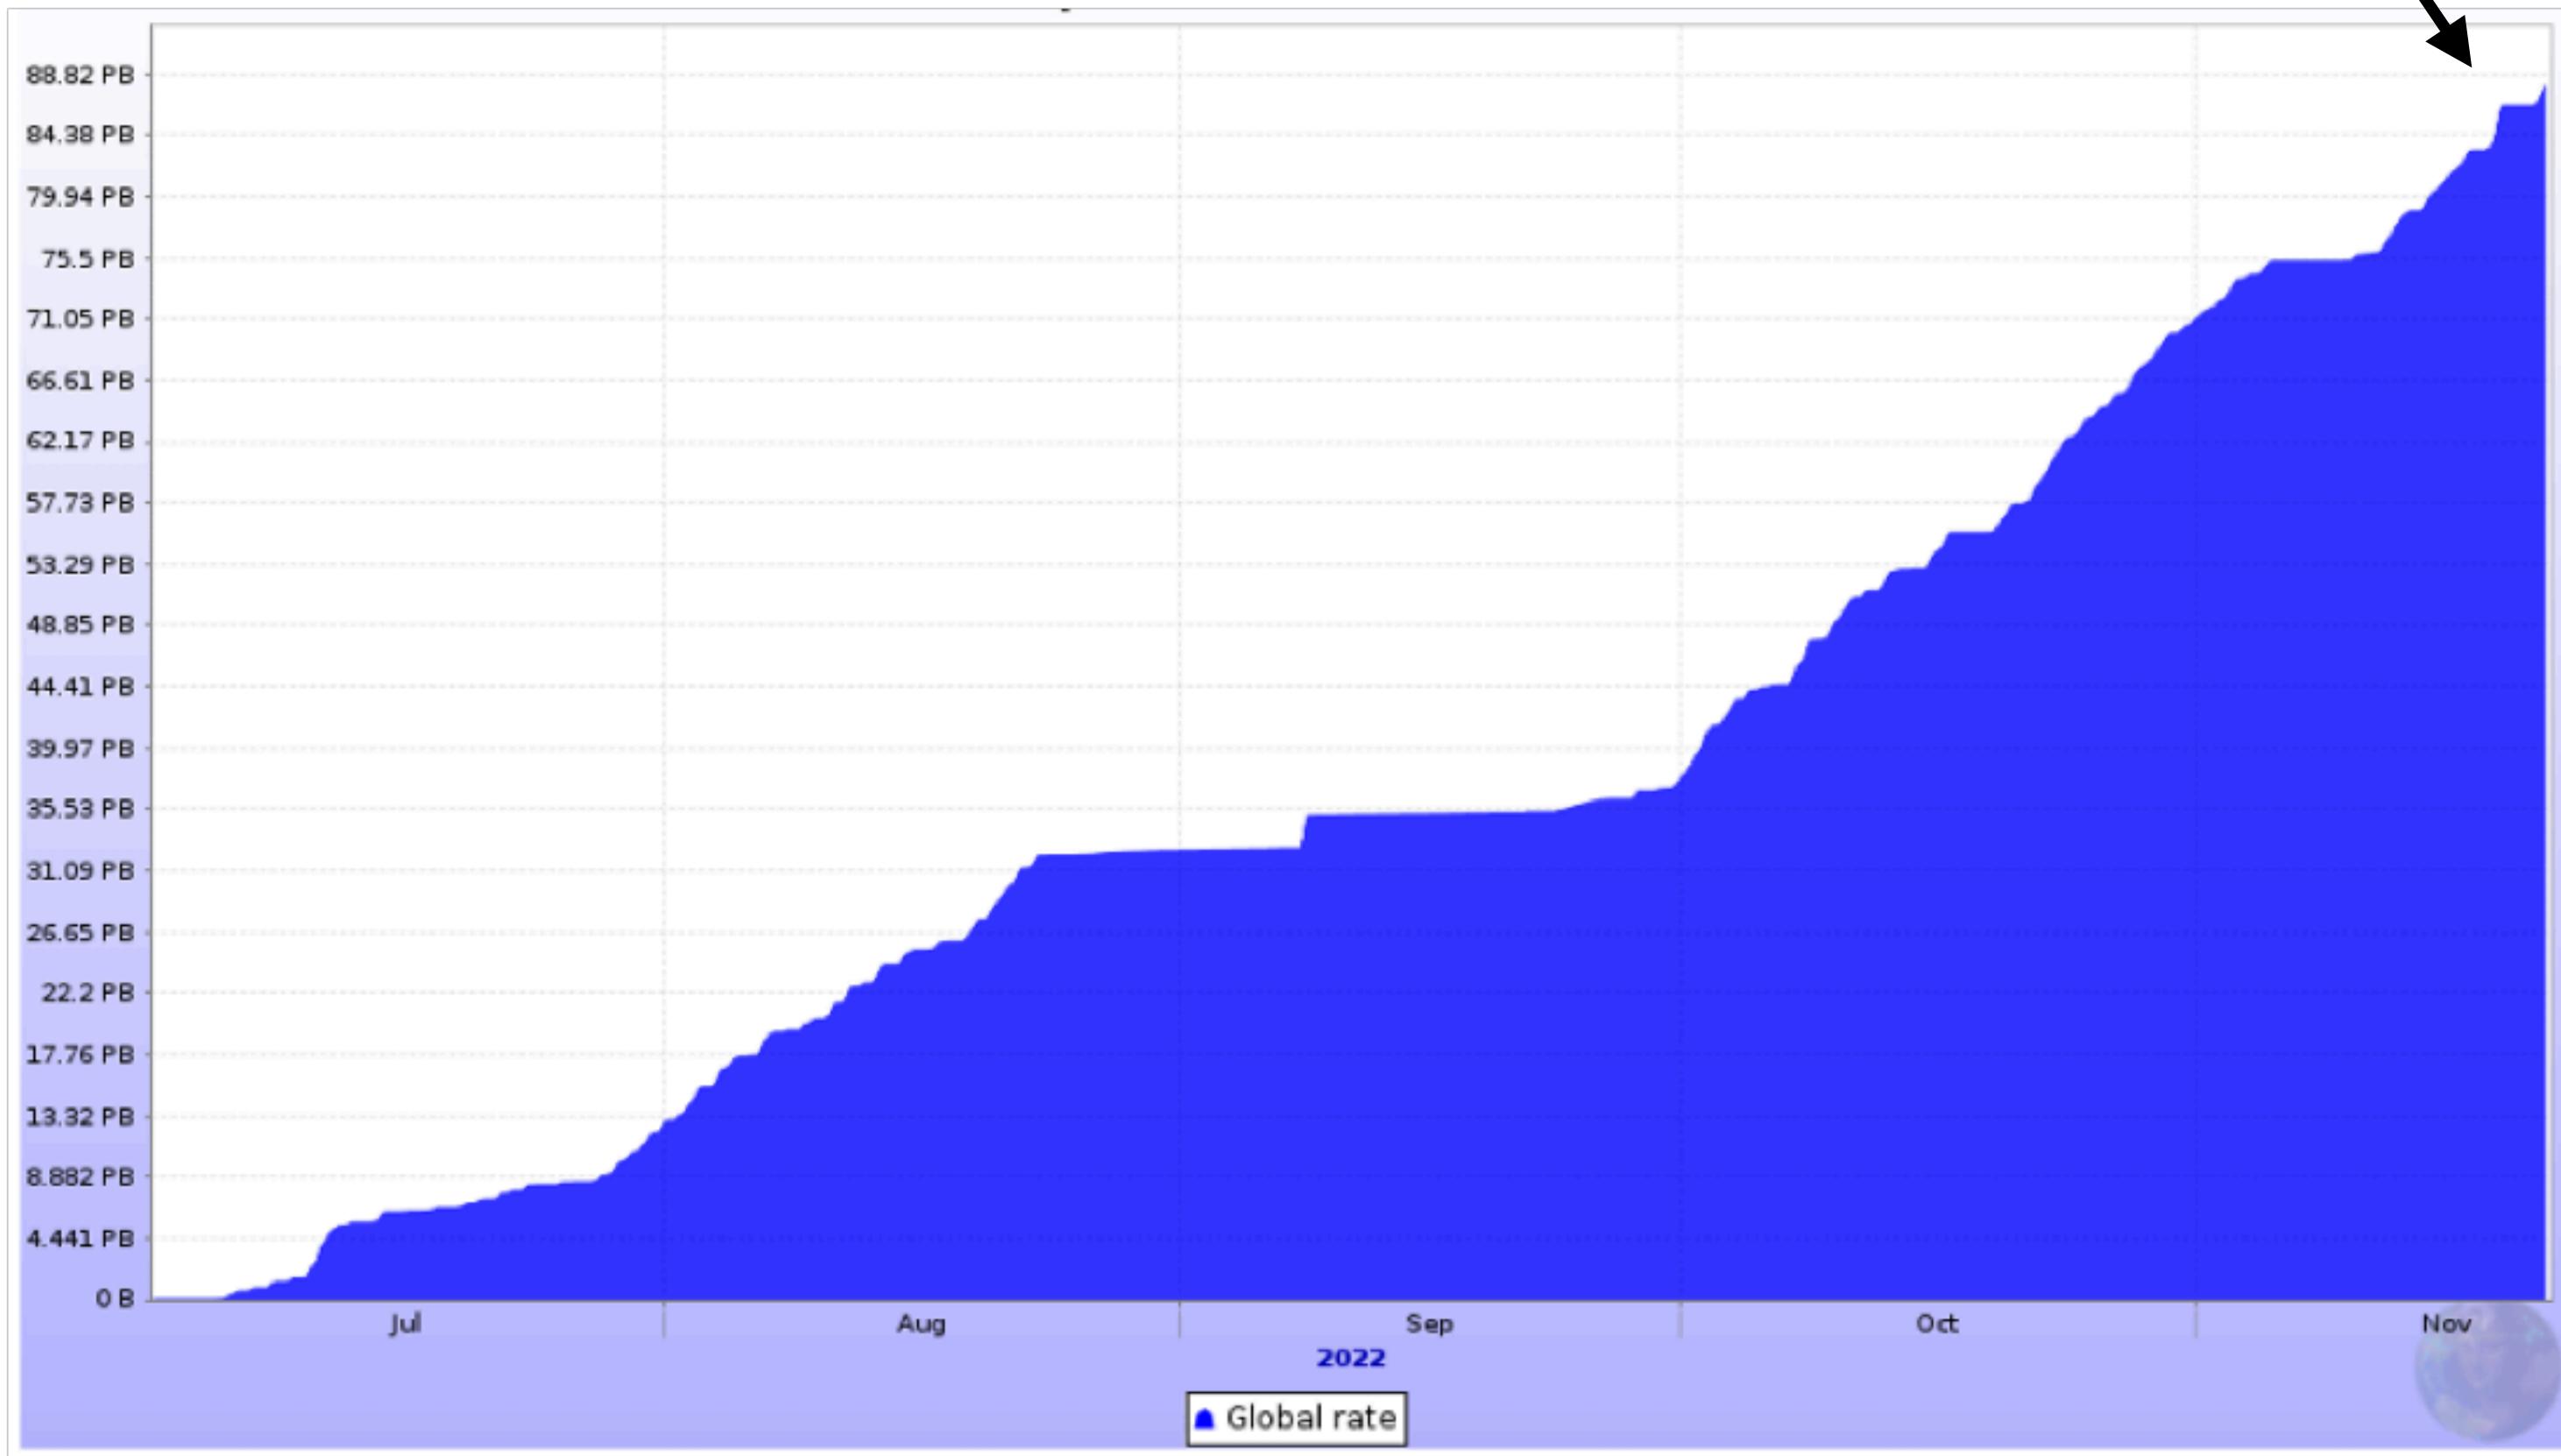

ALICE data taking

90 PB

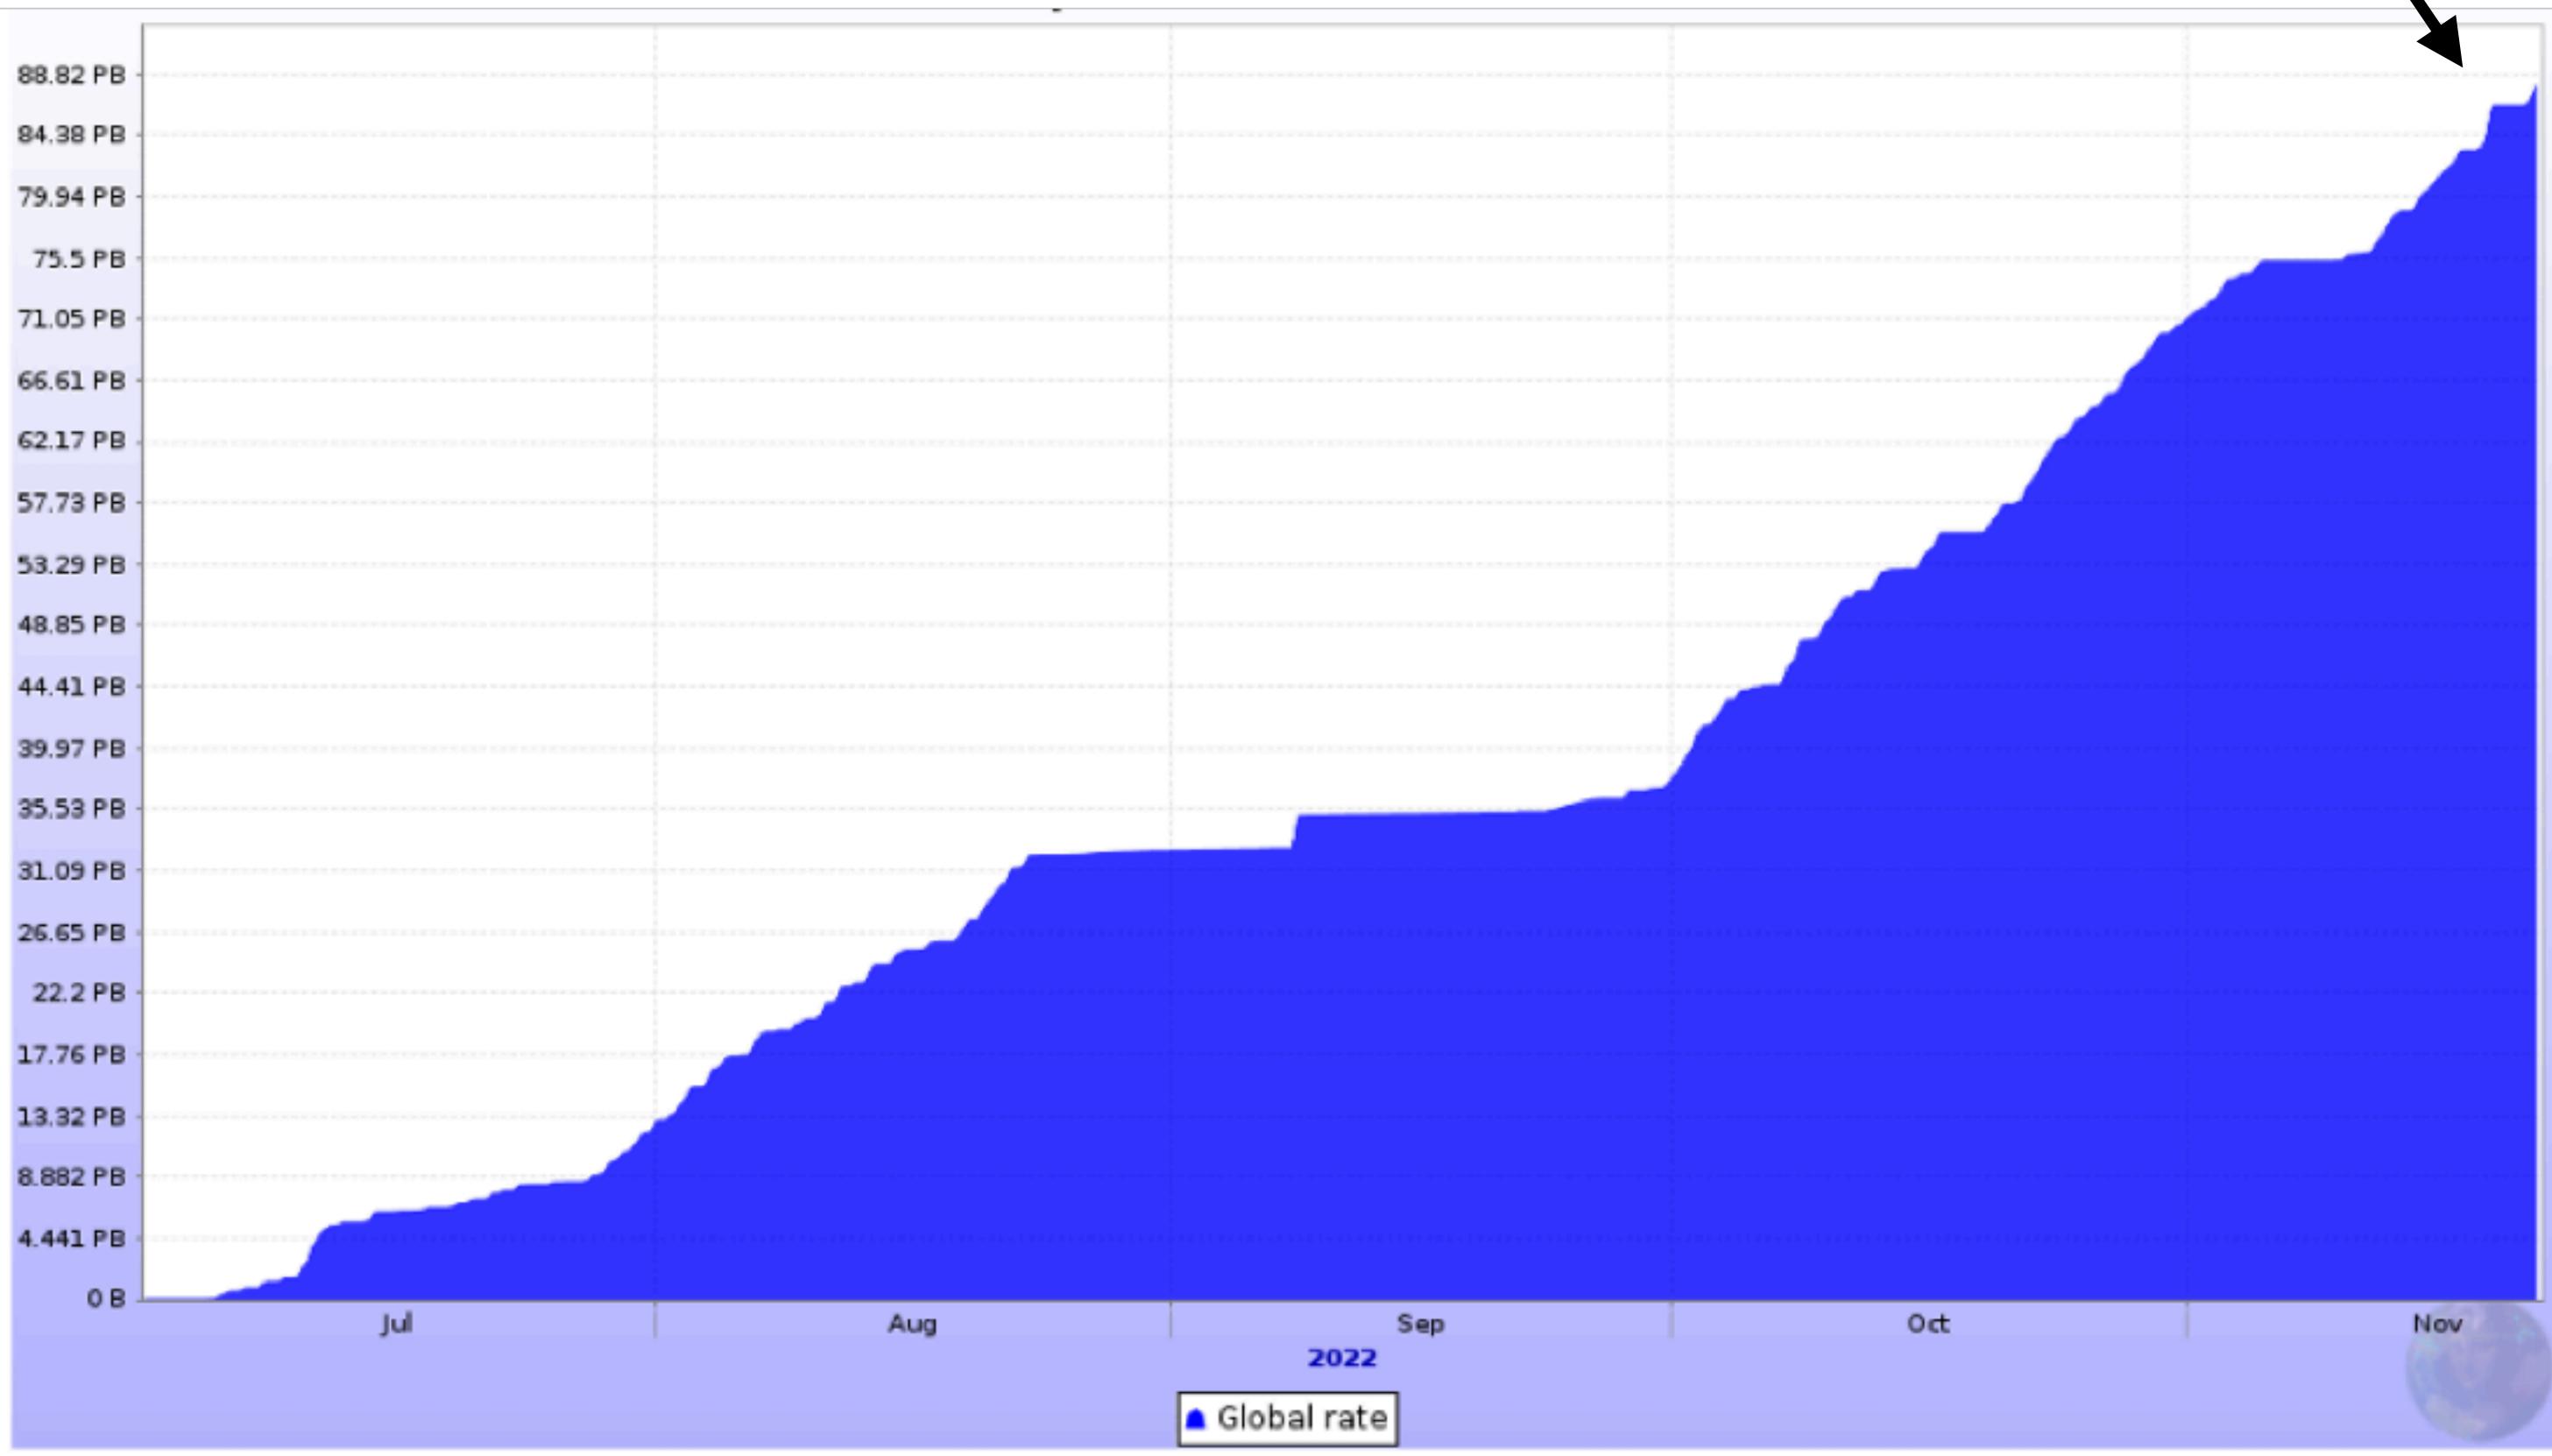

ALICE data taking

- ≥ 500 kHz interaction rate

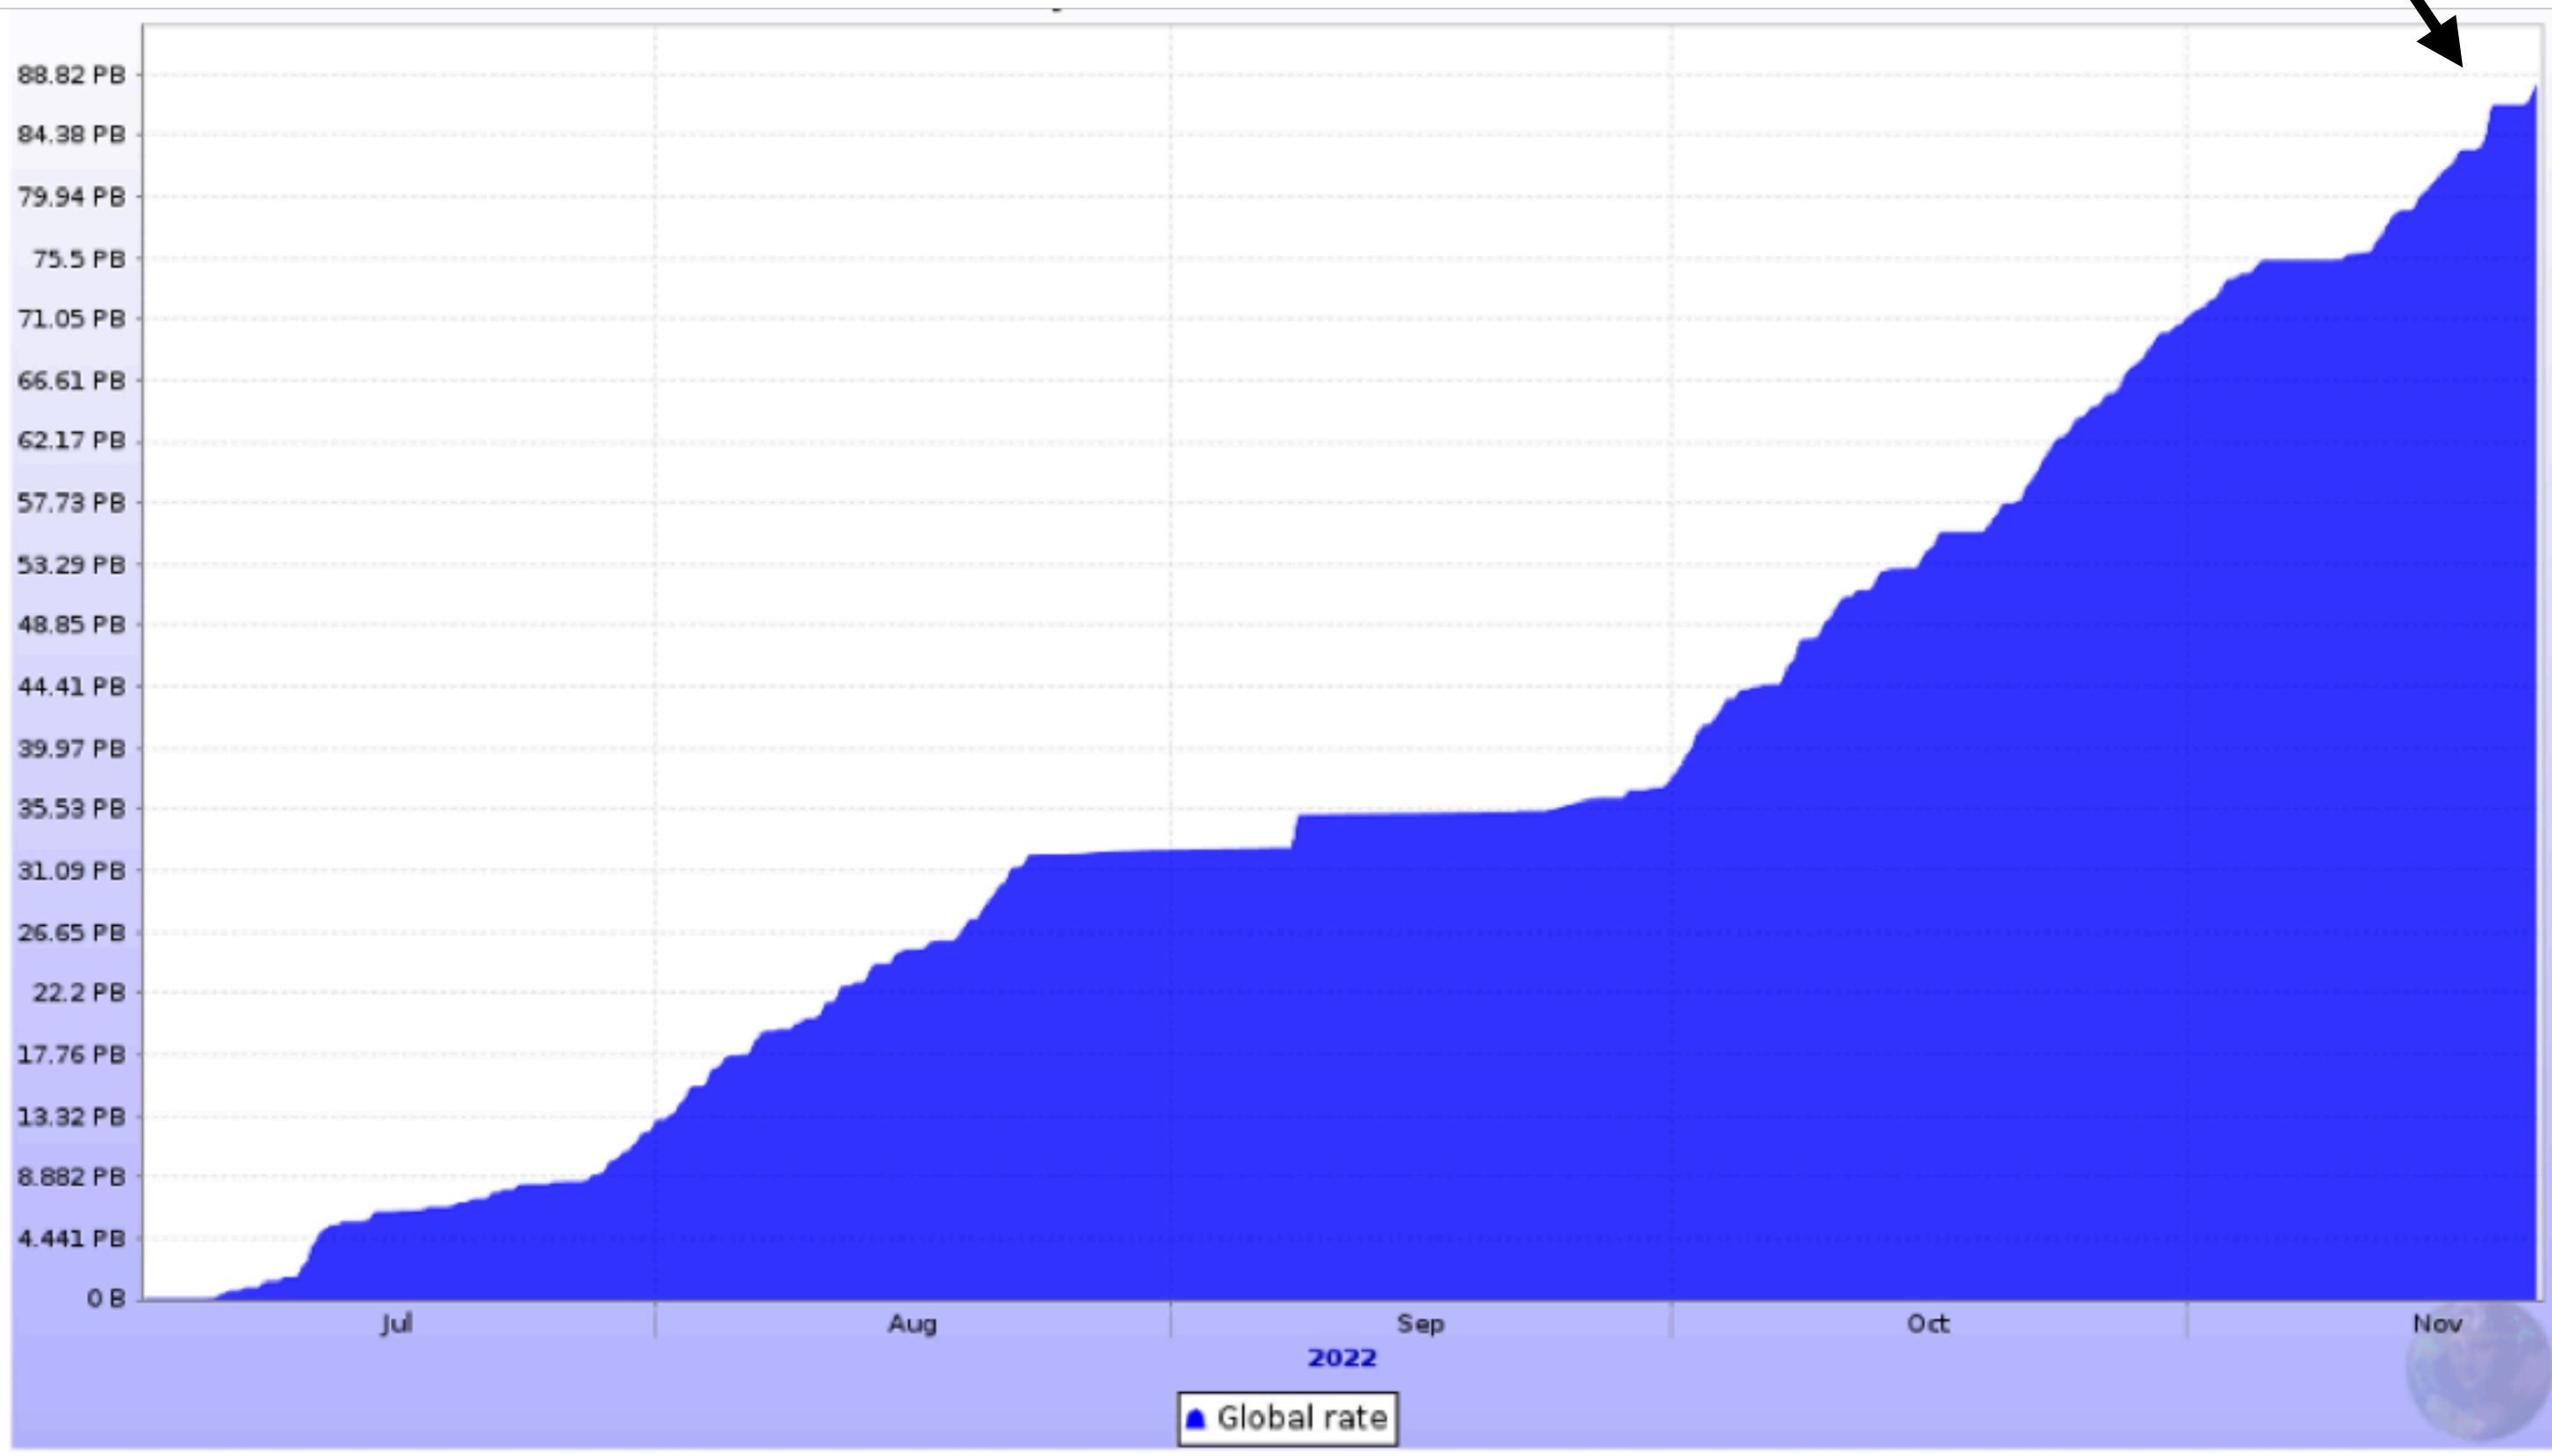

ALICE data taking

- ≥ 500 kHz interaction rate
- 10^{12} events ~ 90 PB

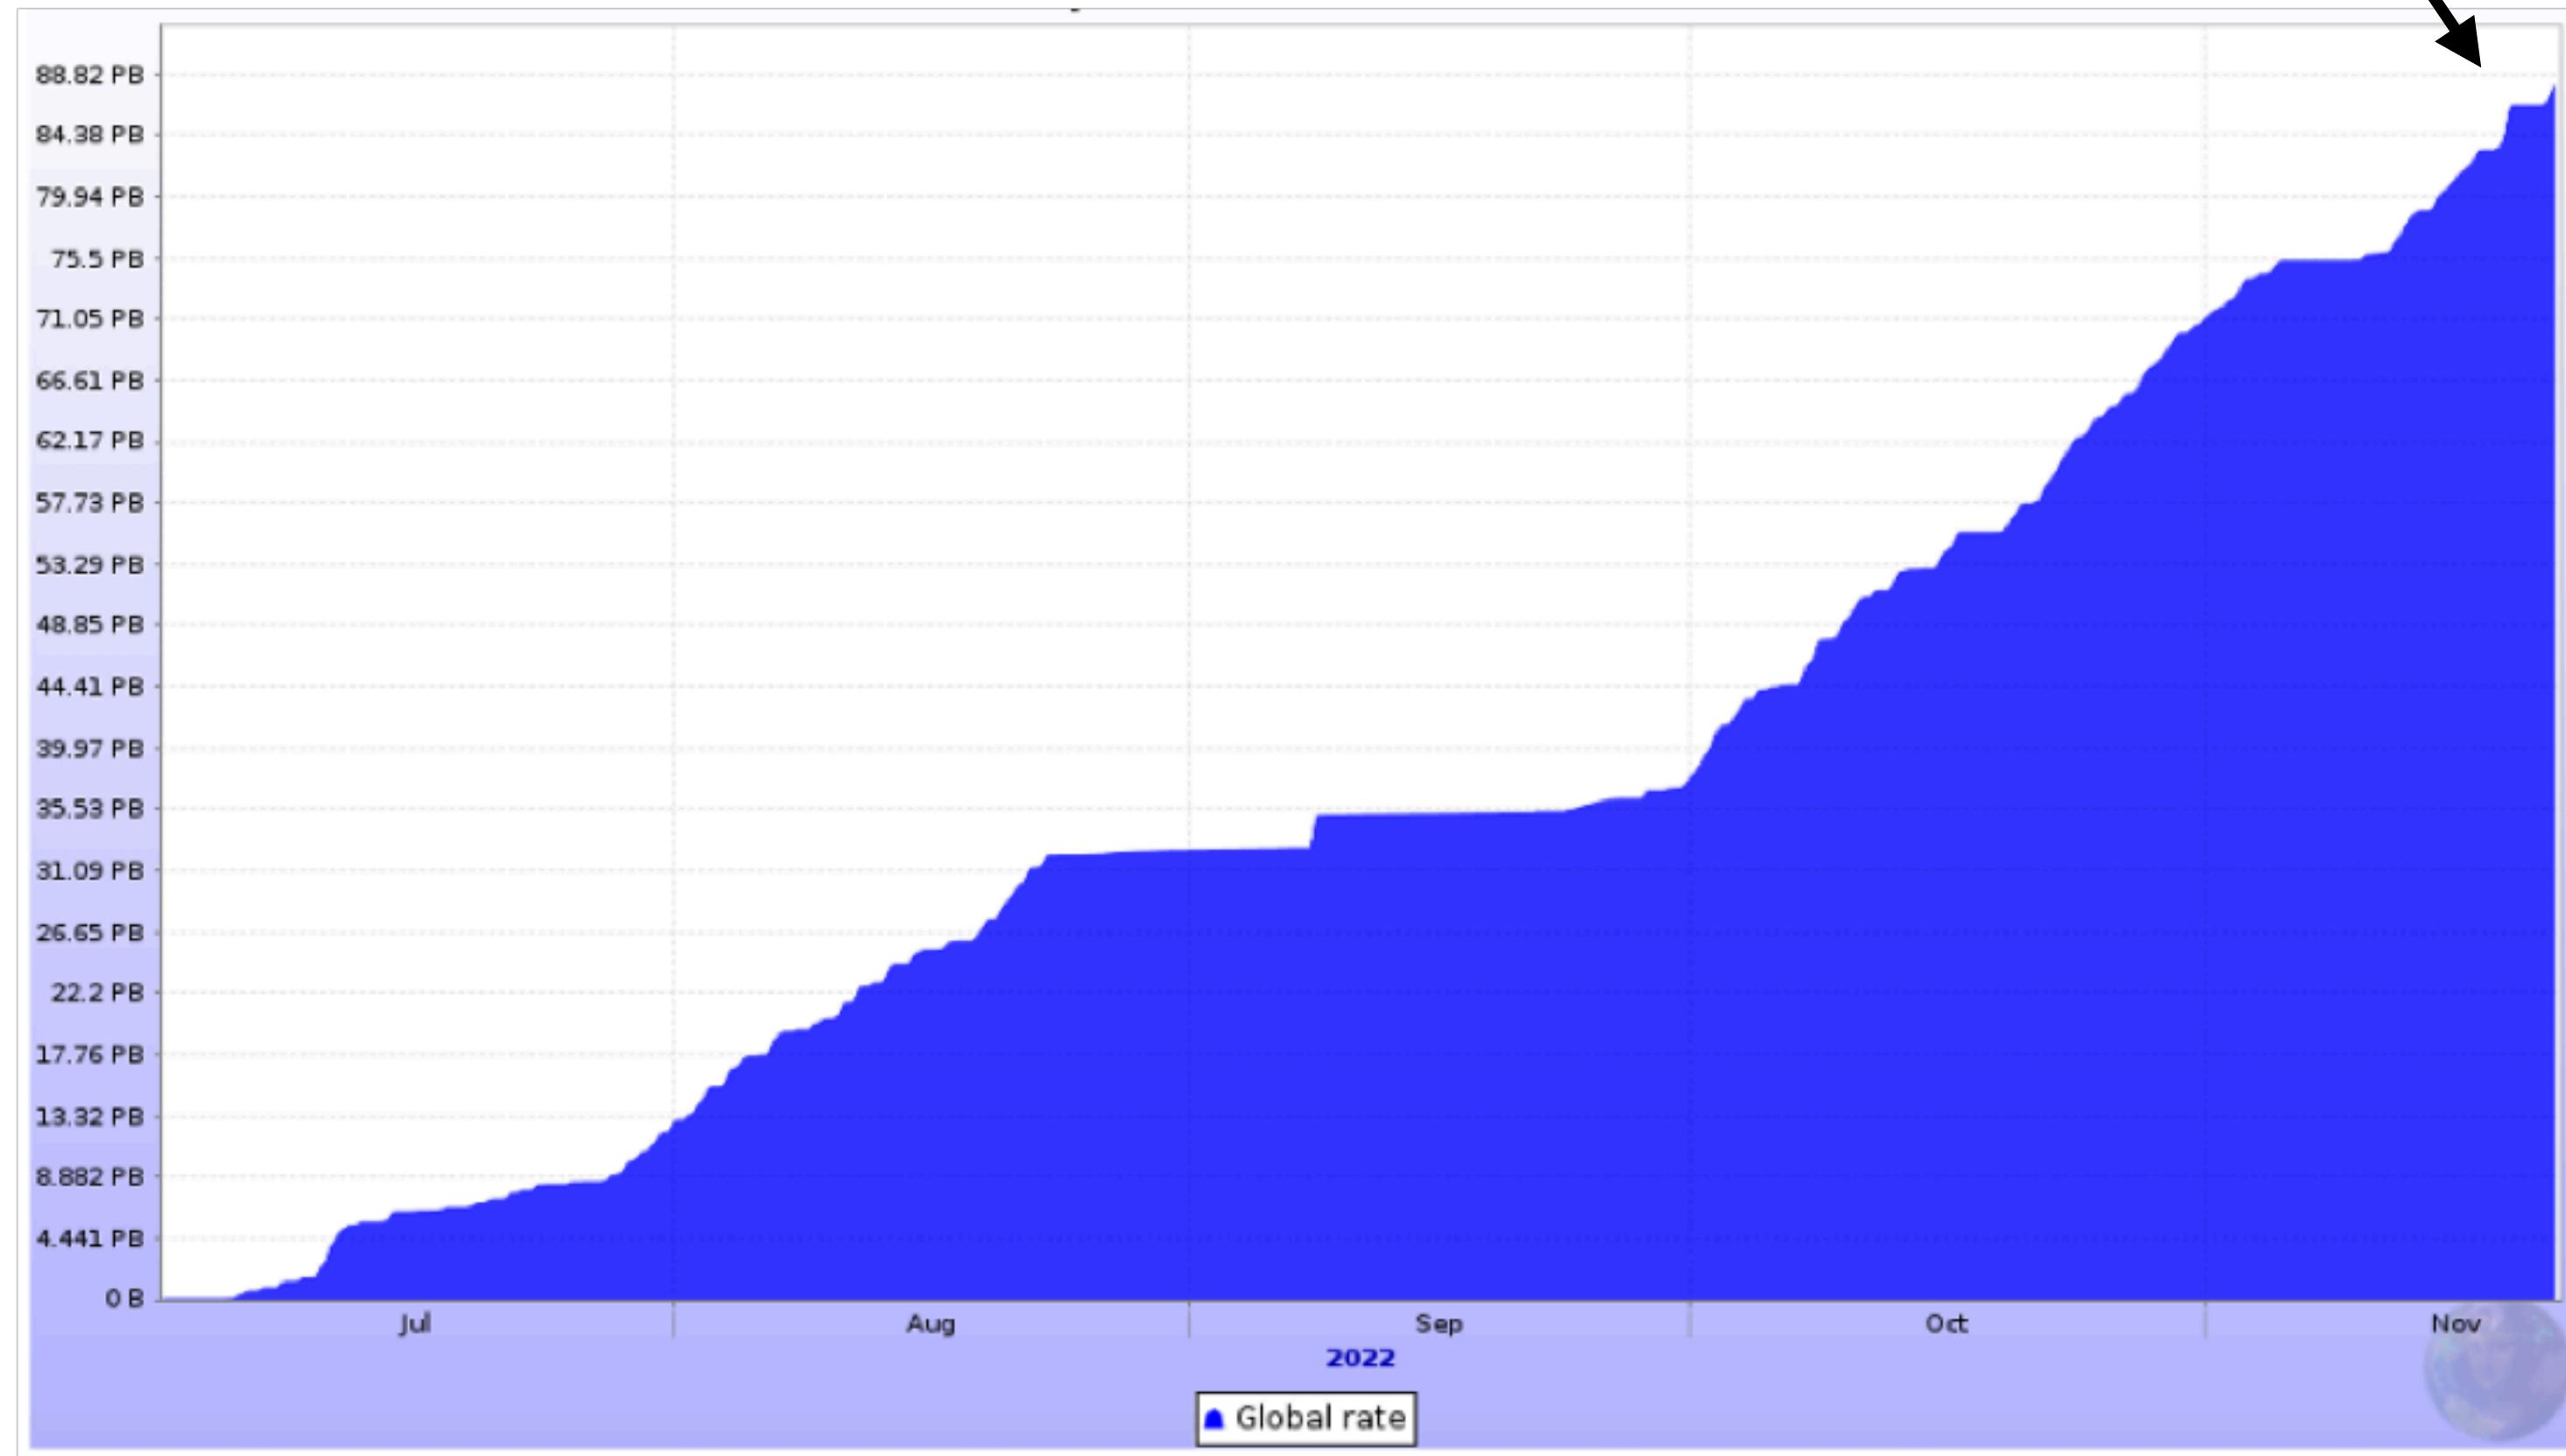

ALICE data taking

- ≥ 500 kHz interaction rate
- 10^{12} events ~ 90 PB
- ~ 500 Hz to tape

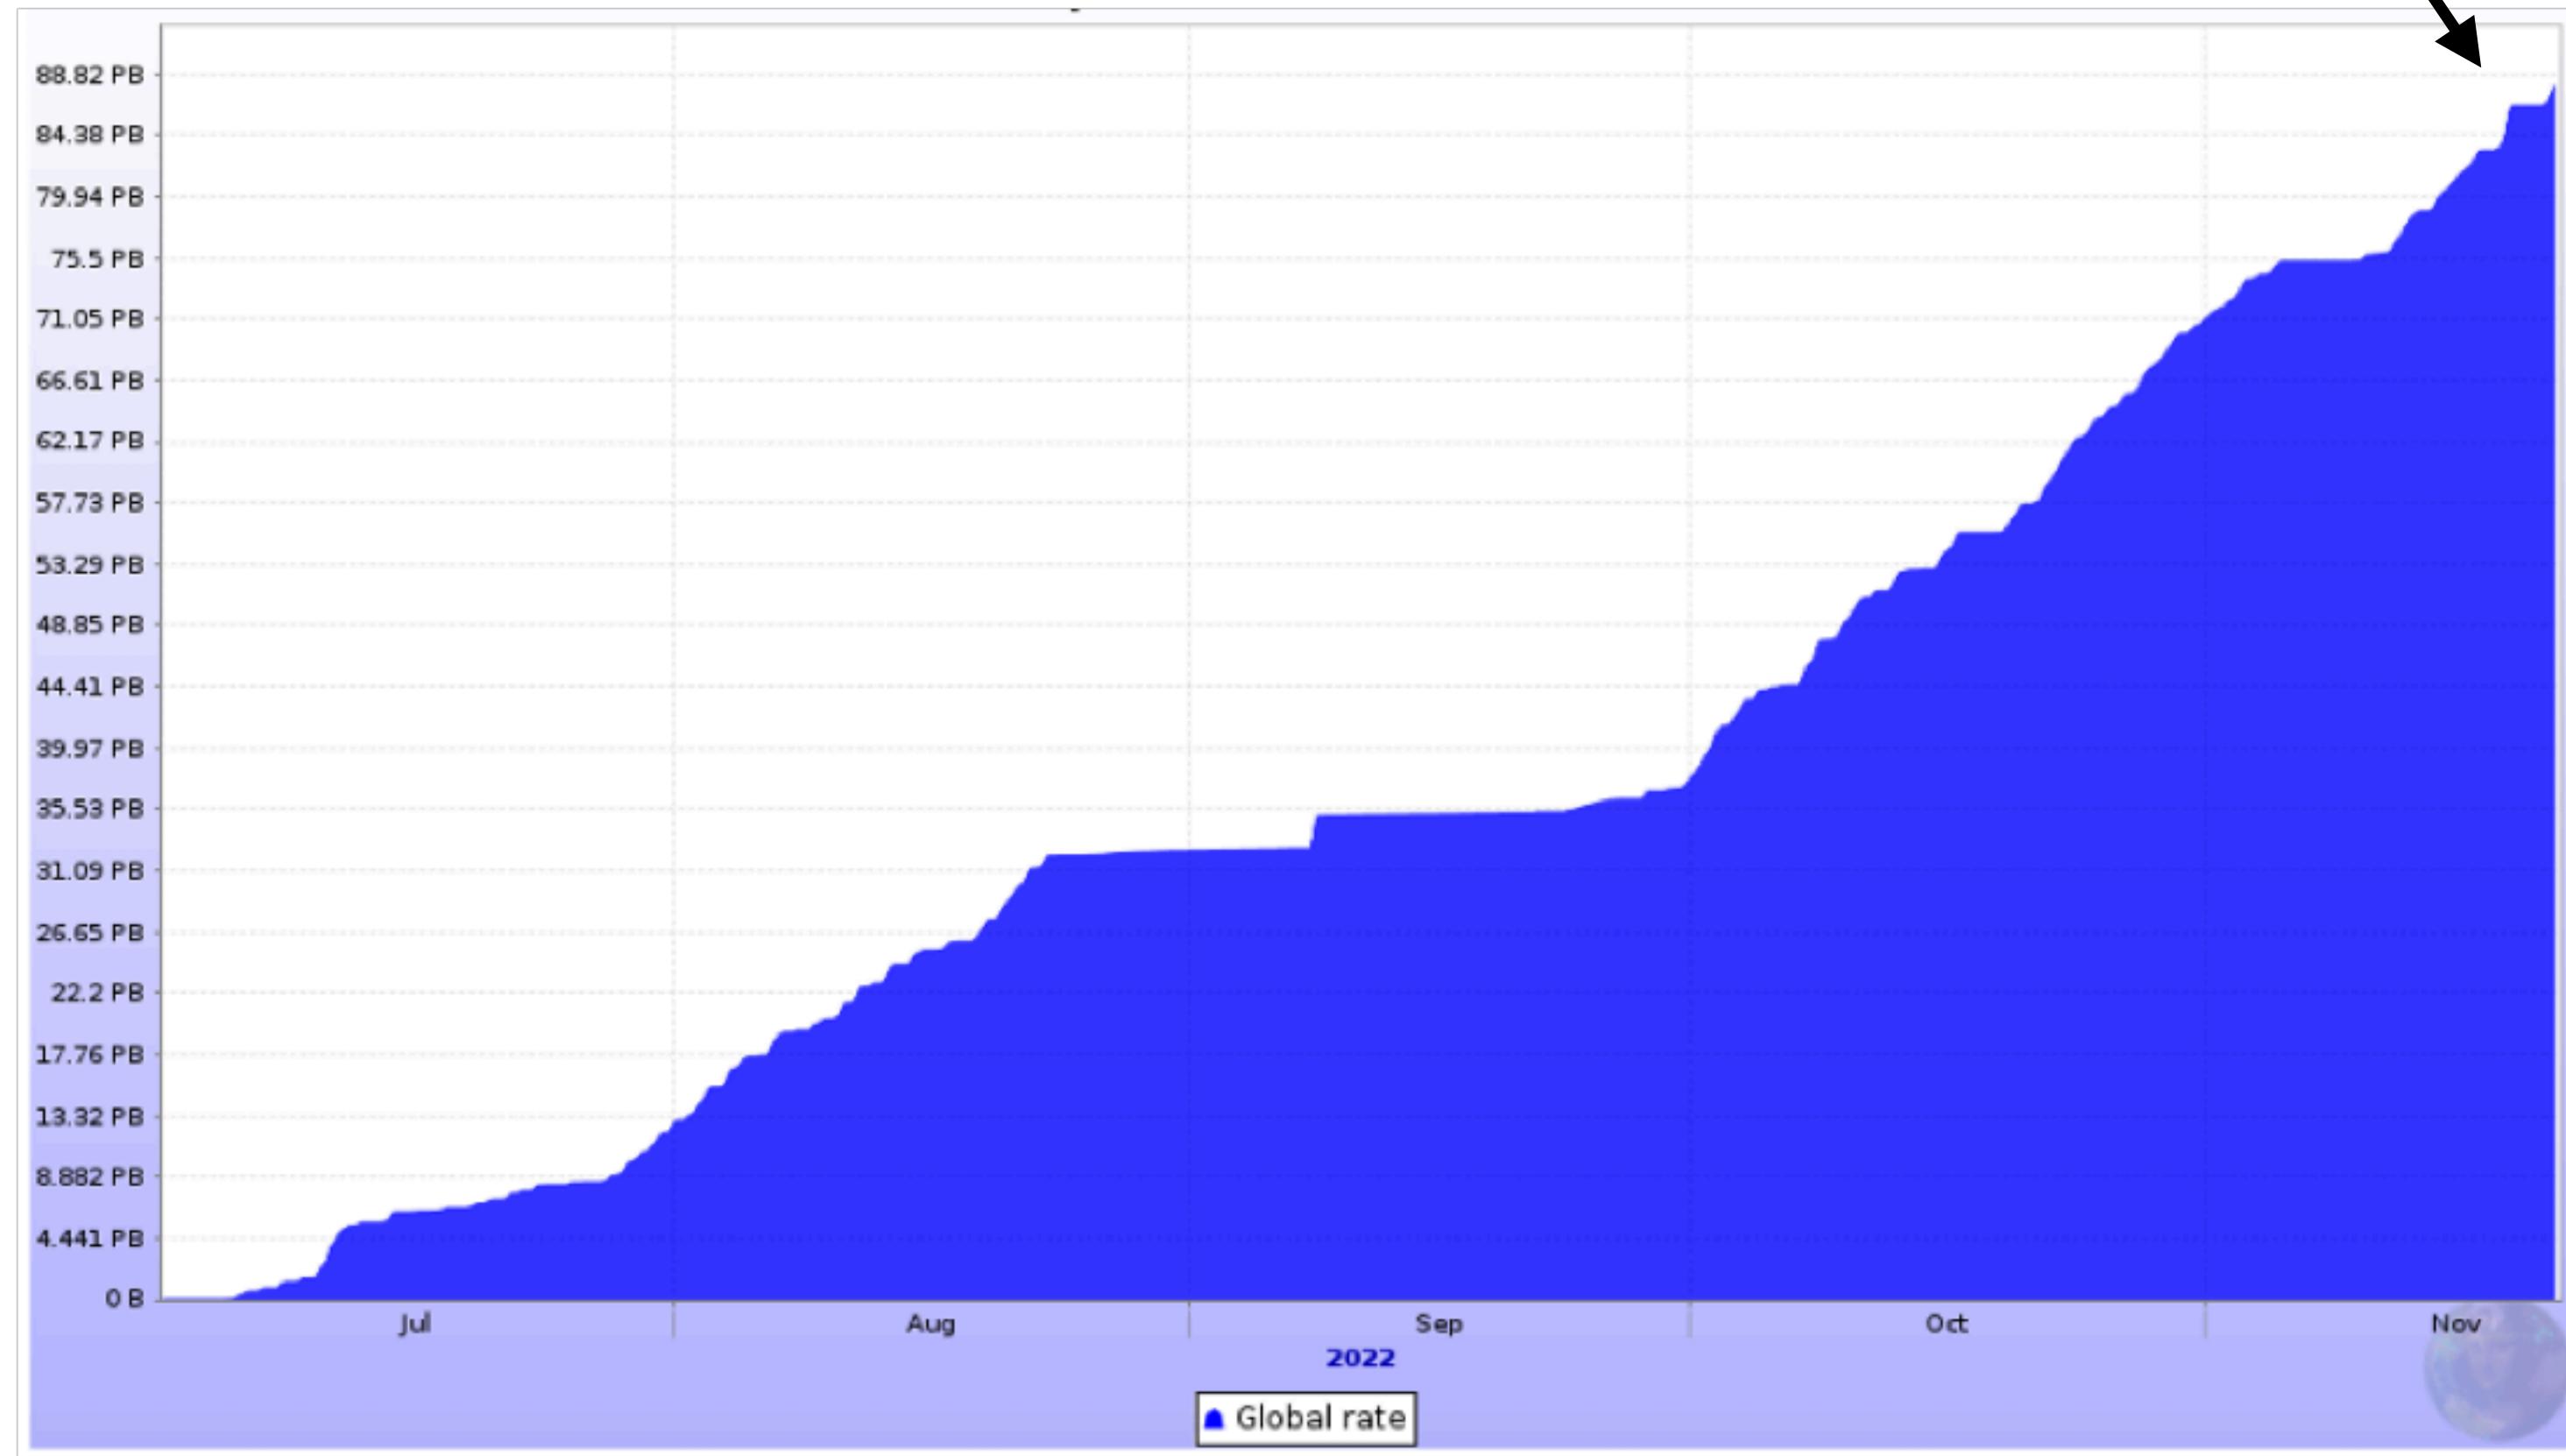

ALICE data taking

- ≥ 500 kHz interaction rate
- 10^{12} events ~ 90 PB
- ~ 500 Hz to tape
- Select data in a smart way to keep the interesting physics

ALICE data taking

- ≥ 500 kHz interaction rate
- 10^{12} events ~ 90 PB
- ~ 500 Hz to tape
- Select data in a smart way to keep the interesting physics
 - ▶ Software decisions

Software triggers

- Select data in a smart way to keep the interesting physics

Software triggers

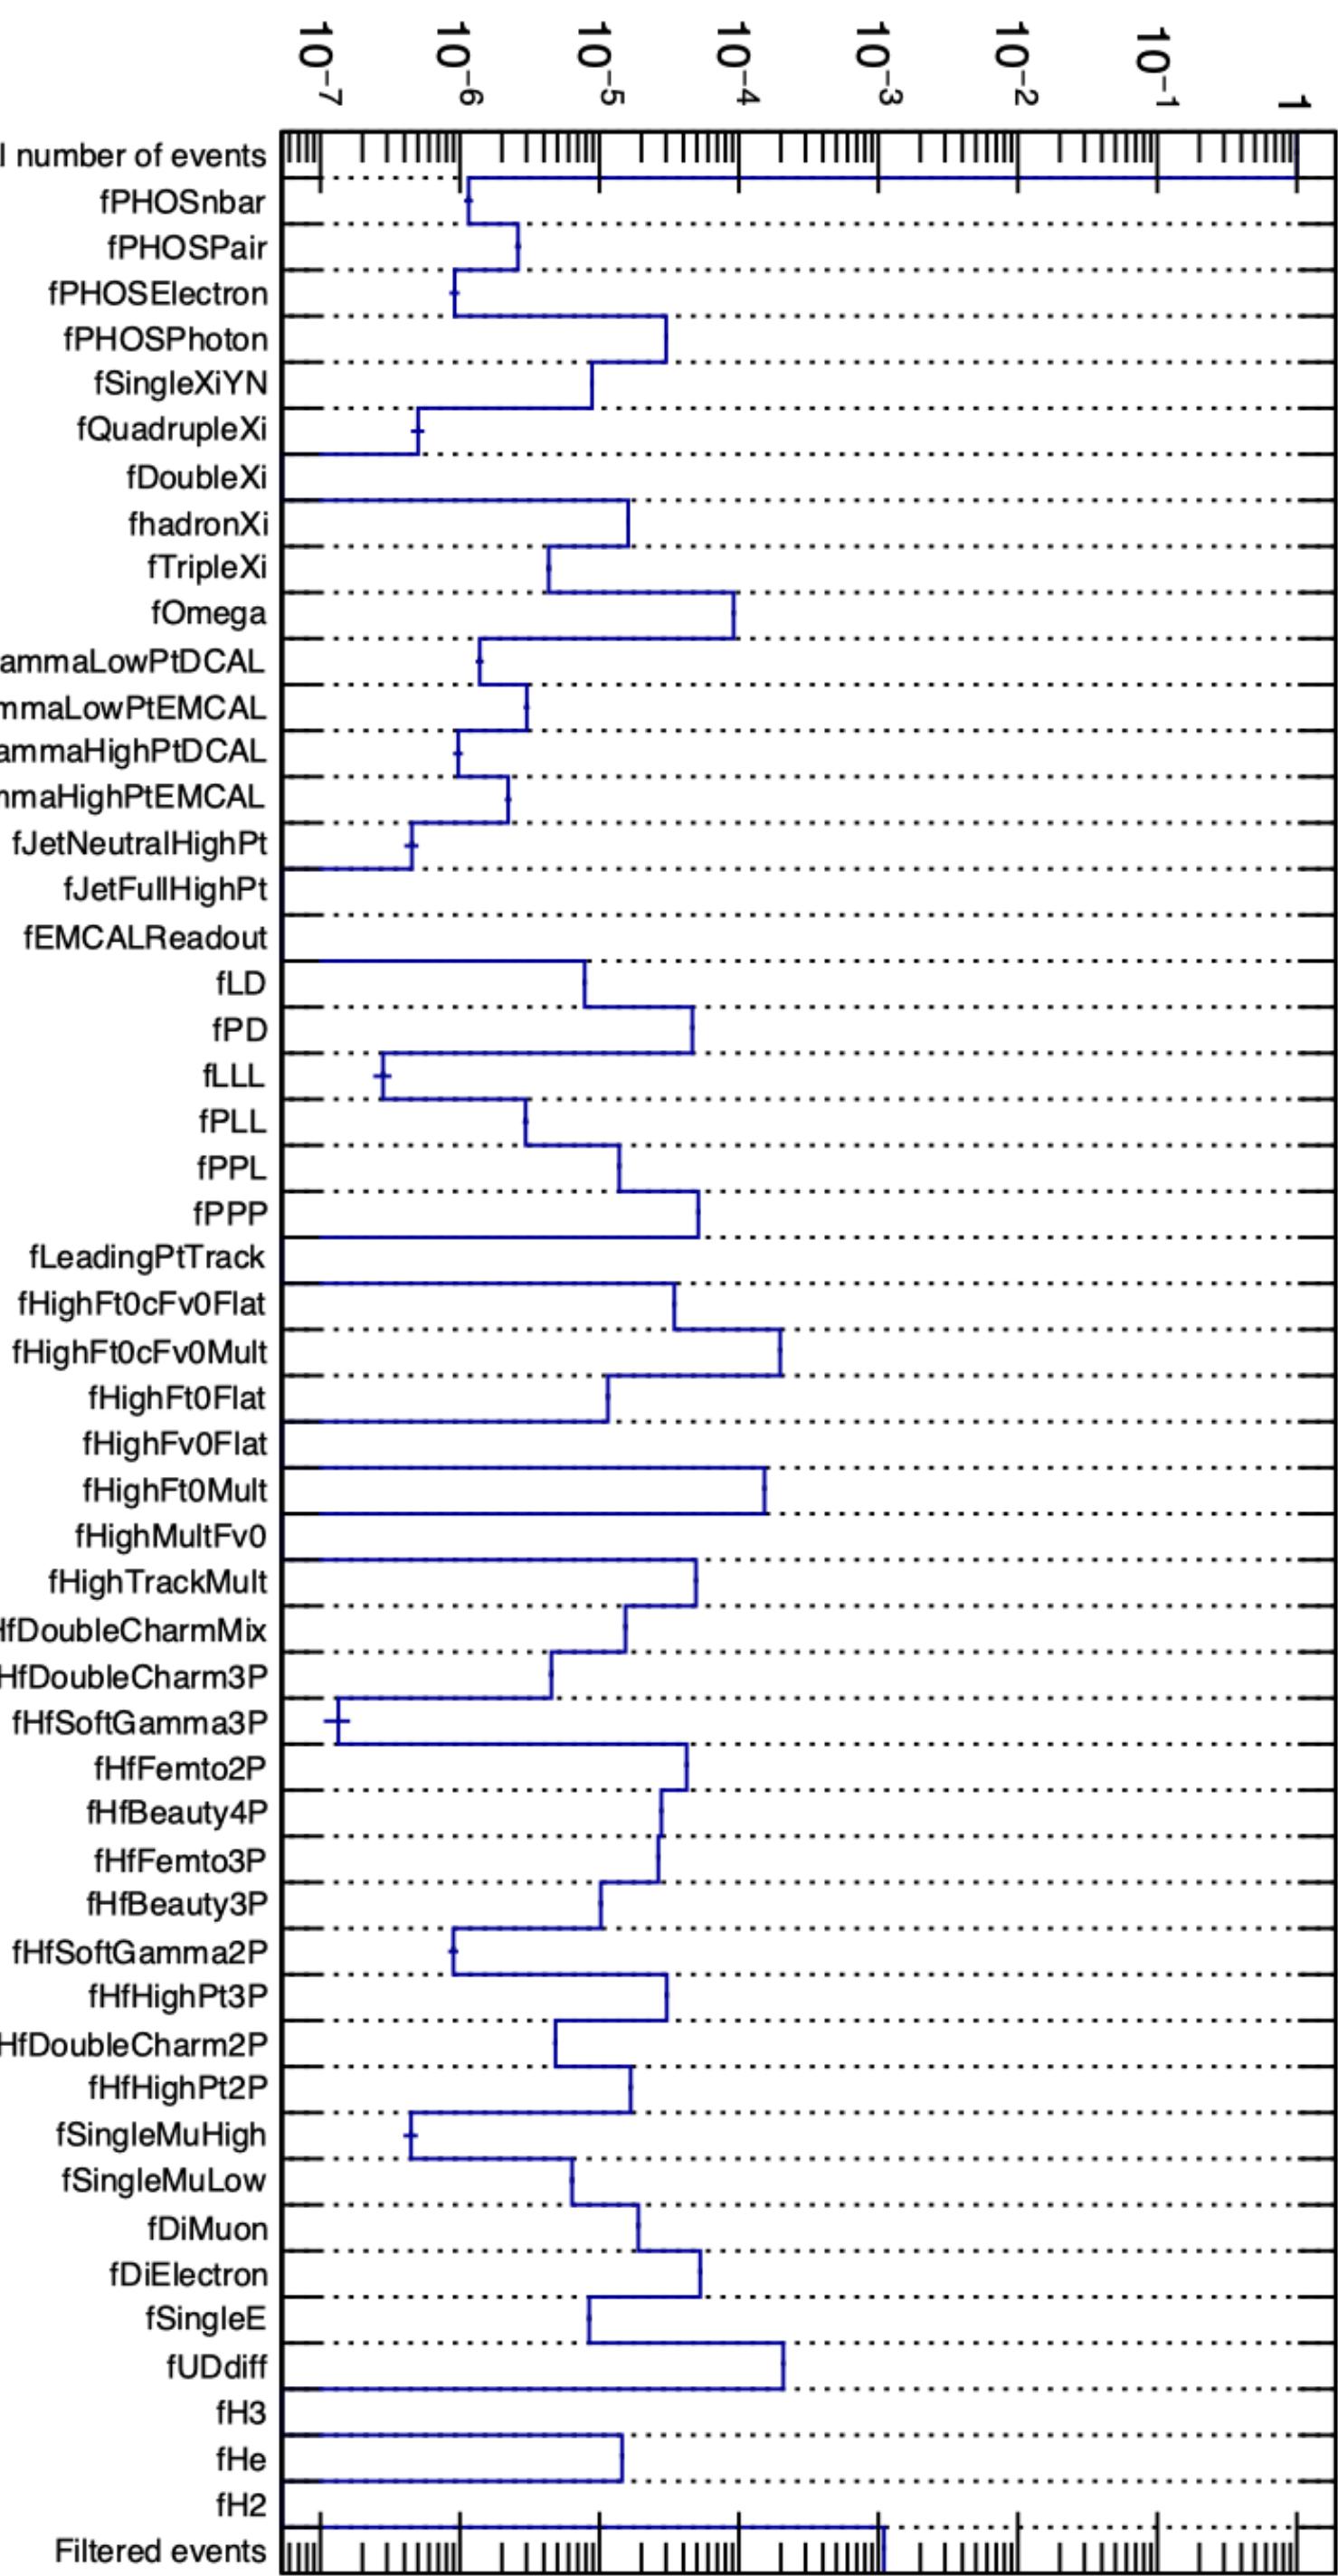

- Select data in a smart way to keep the interesting physics
- Hardware: fast

Software triggers

- Select data in a smart way to keep the interesting physics
- Hardware: fast
- Software: smart

Software triggers

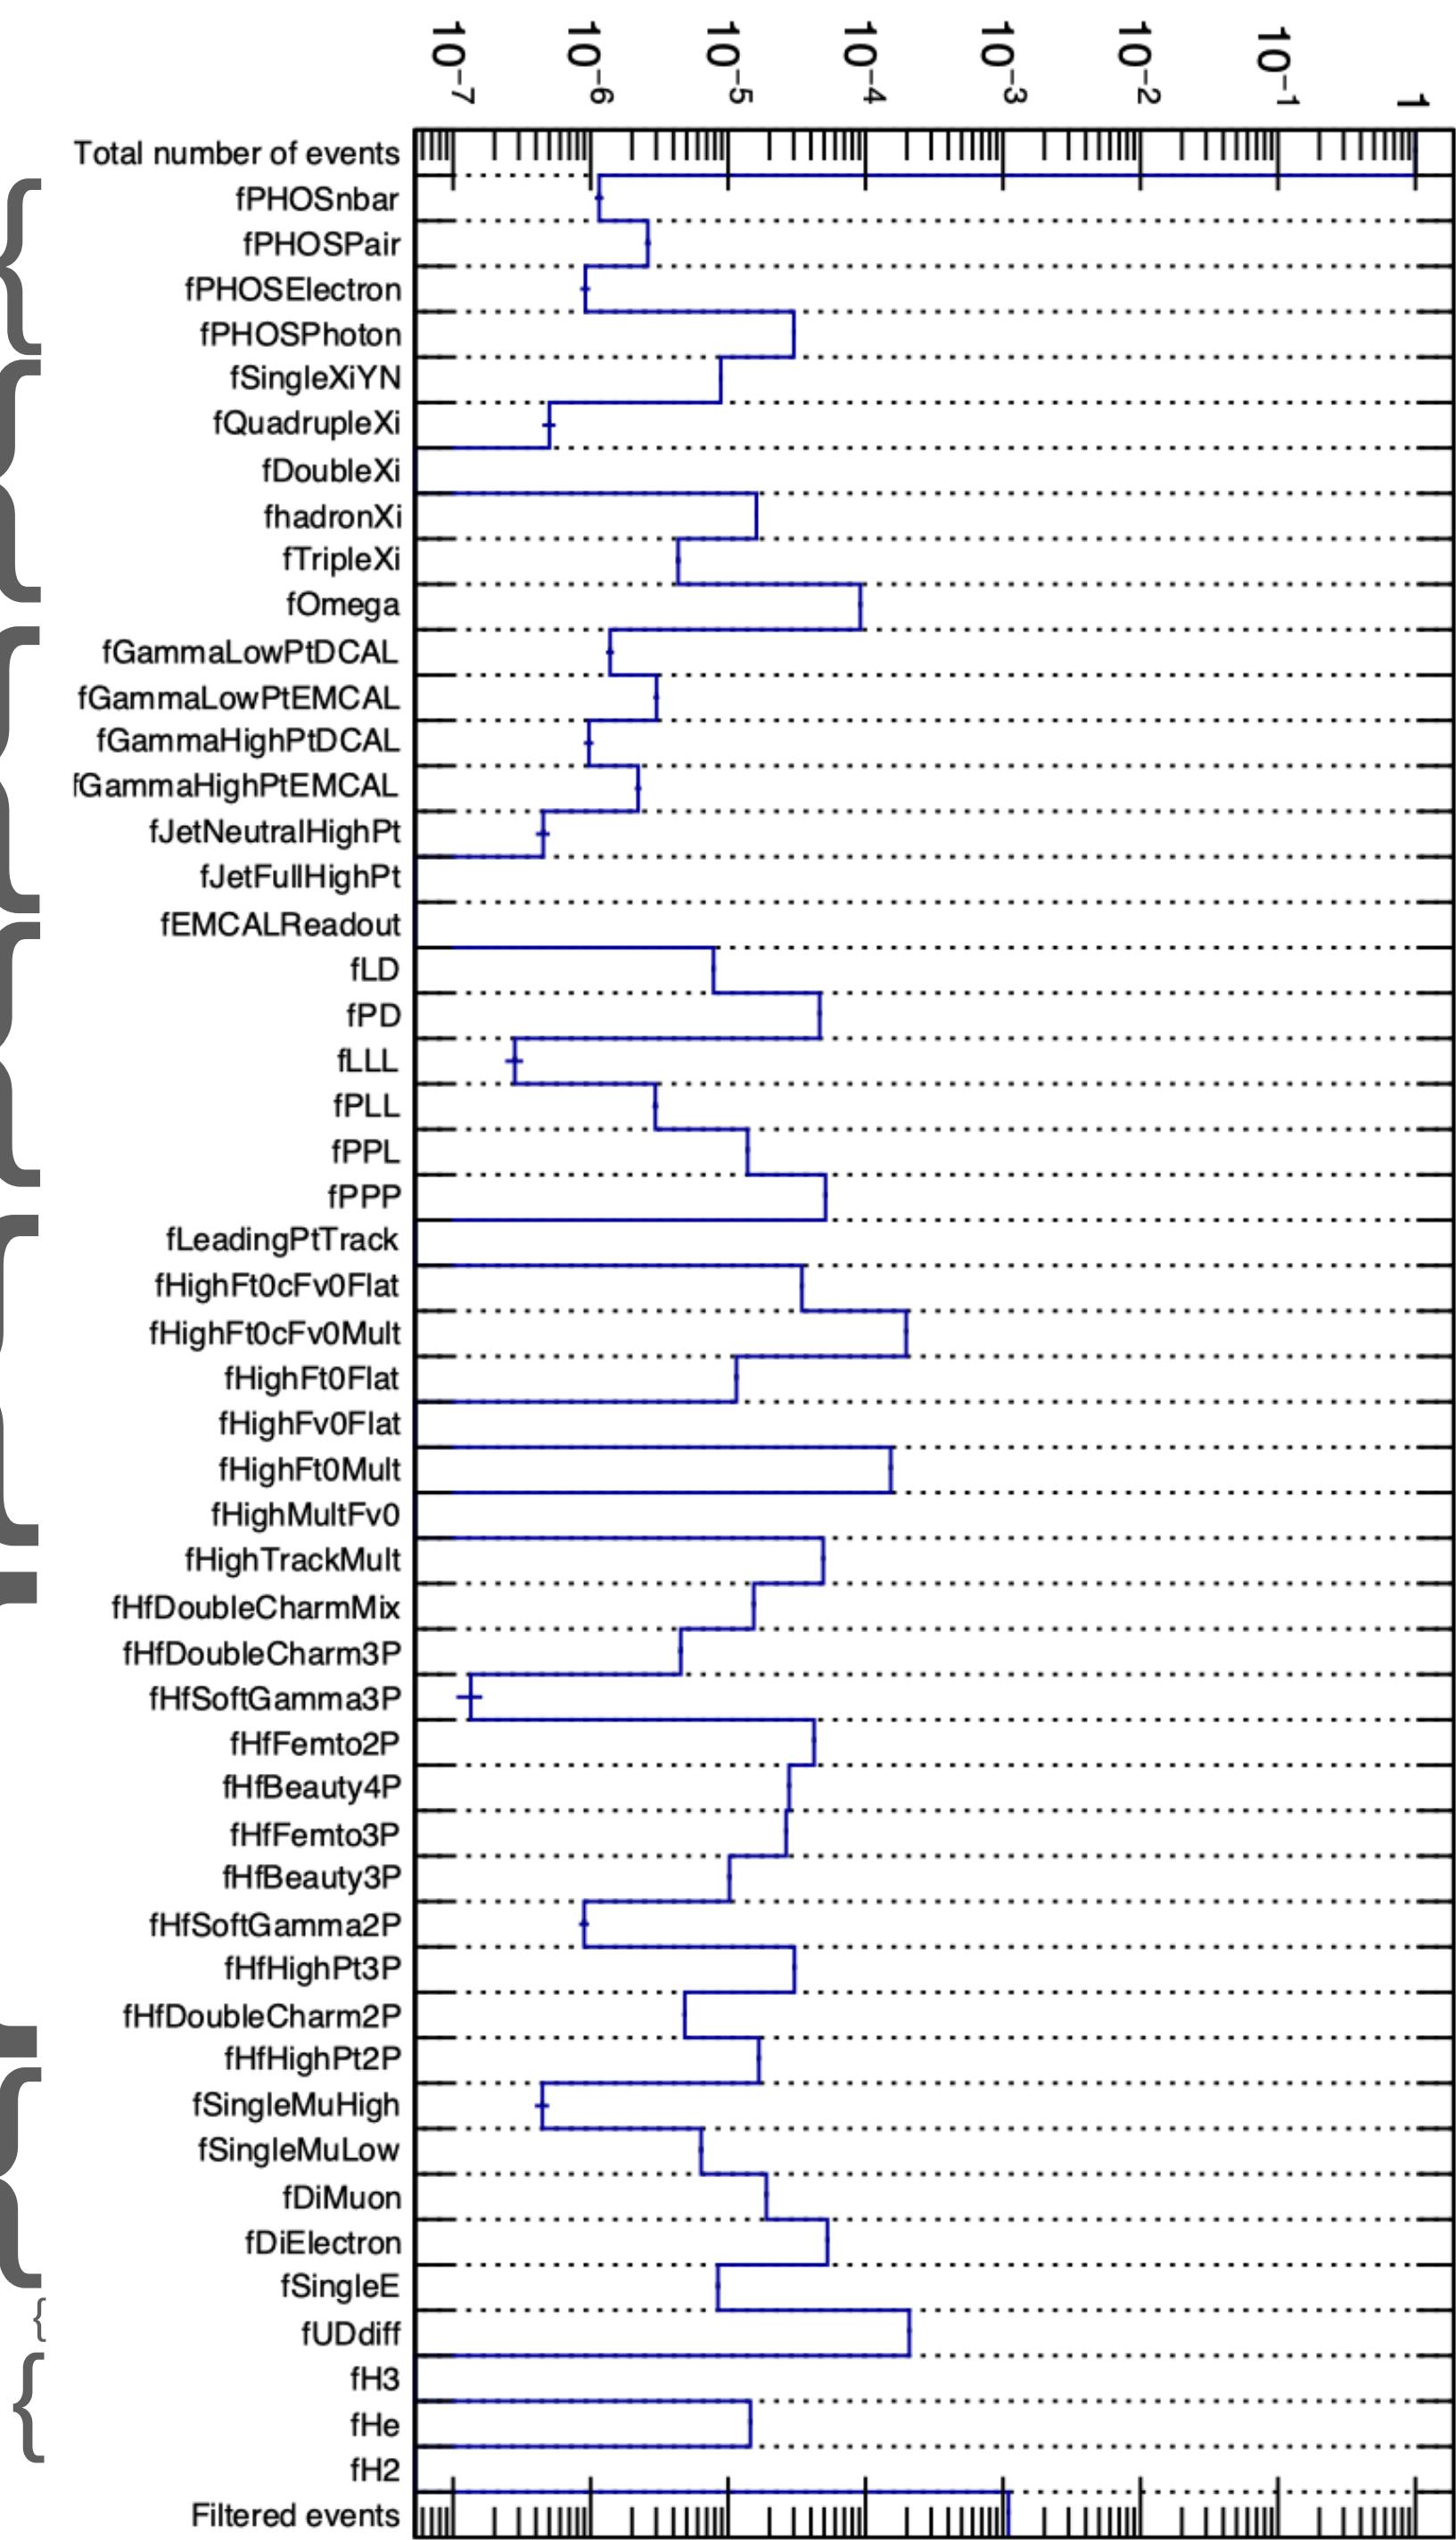

- Select data in a smart way to keep the interesting physics
- Hardware: fast
- Software: smart

Software triggers

- Select data in a smart way to keep the interesting physics
- Hardware: fast
- Software: smart

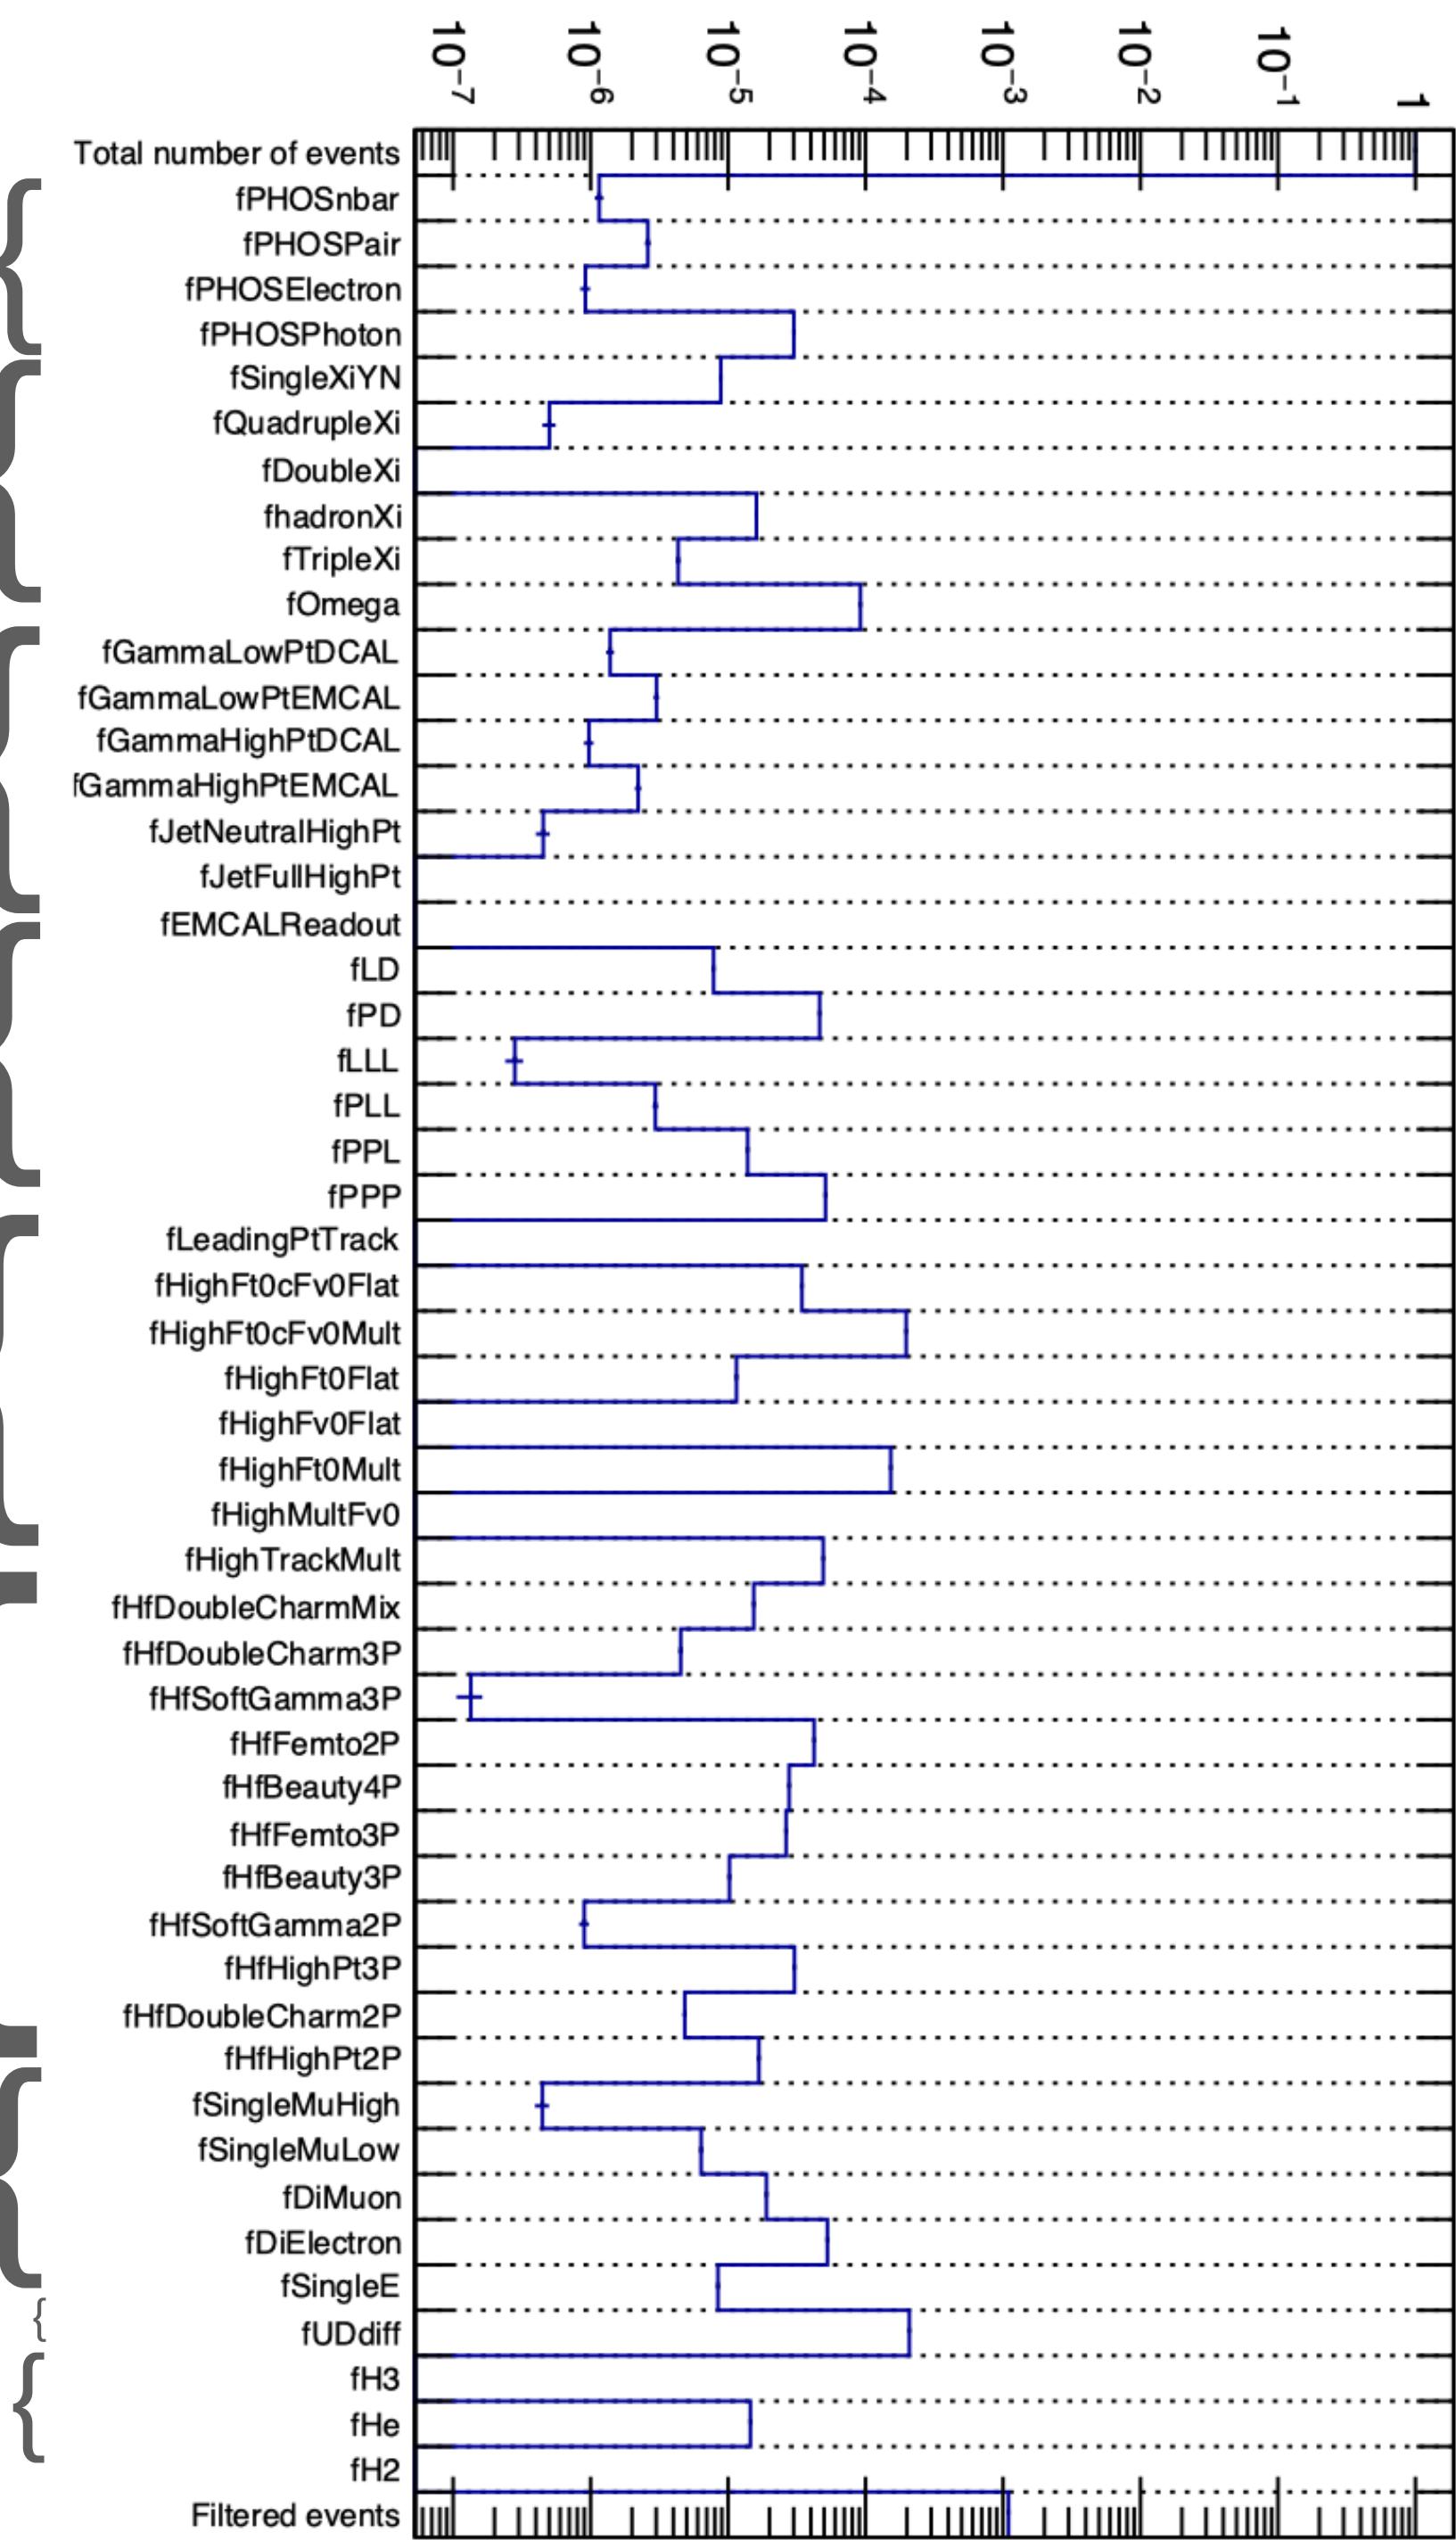

Photons Strange hadrons Photons and jets Femtoscopy High multiplicity Heavy flavour hadrons Quarkonia UD
Nuclei

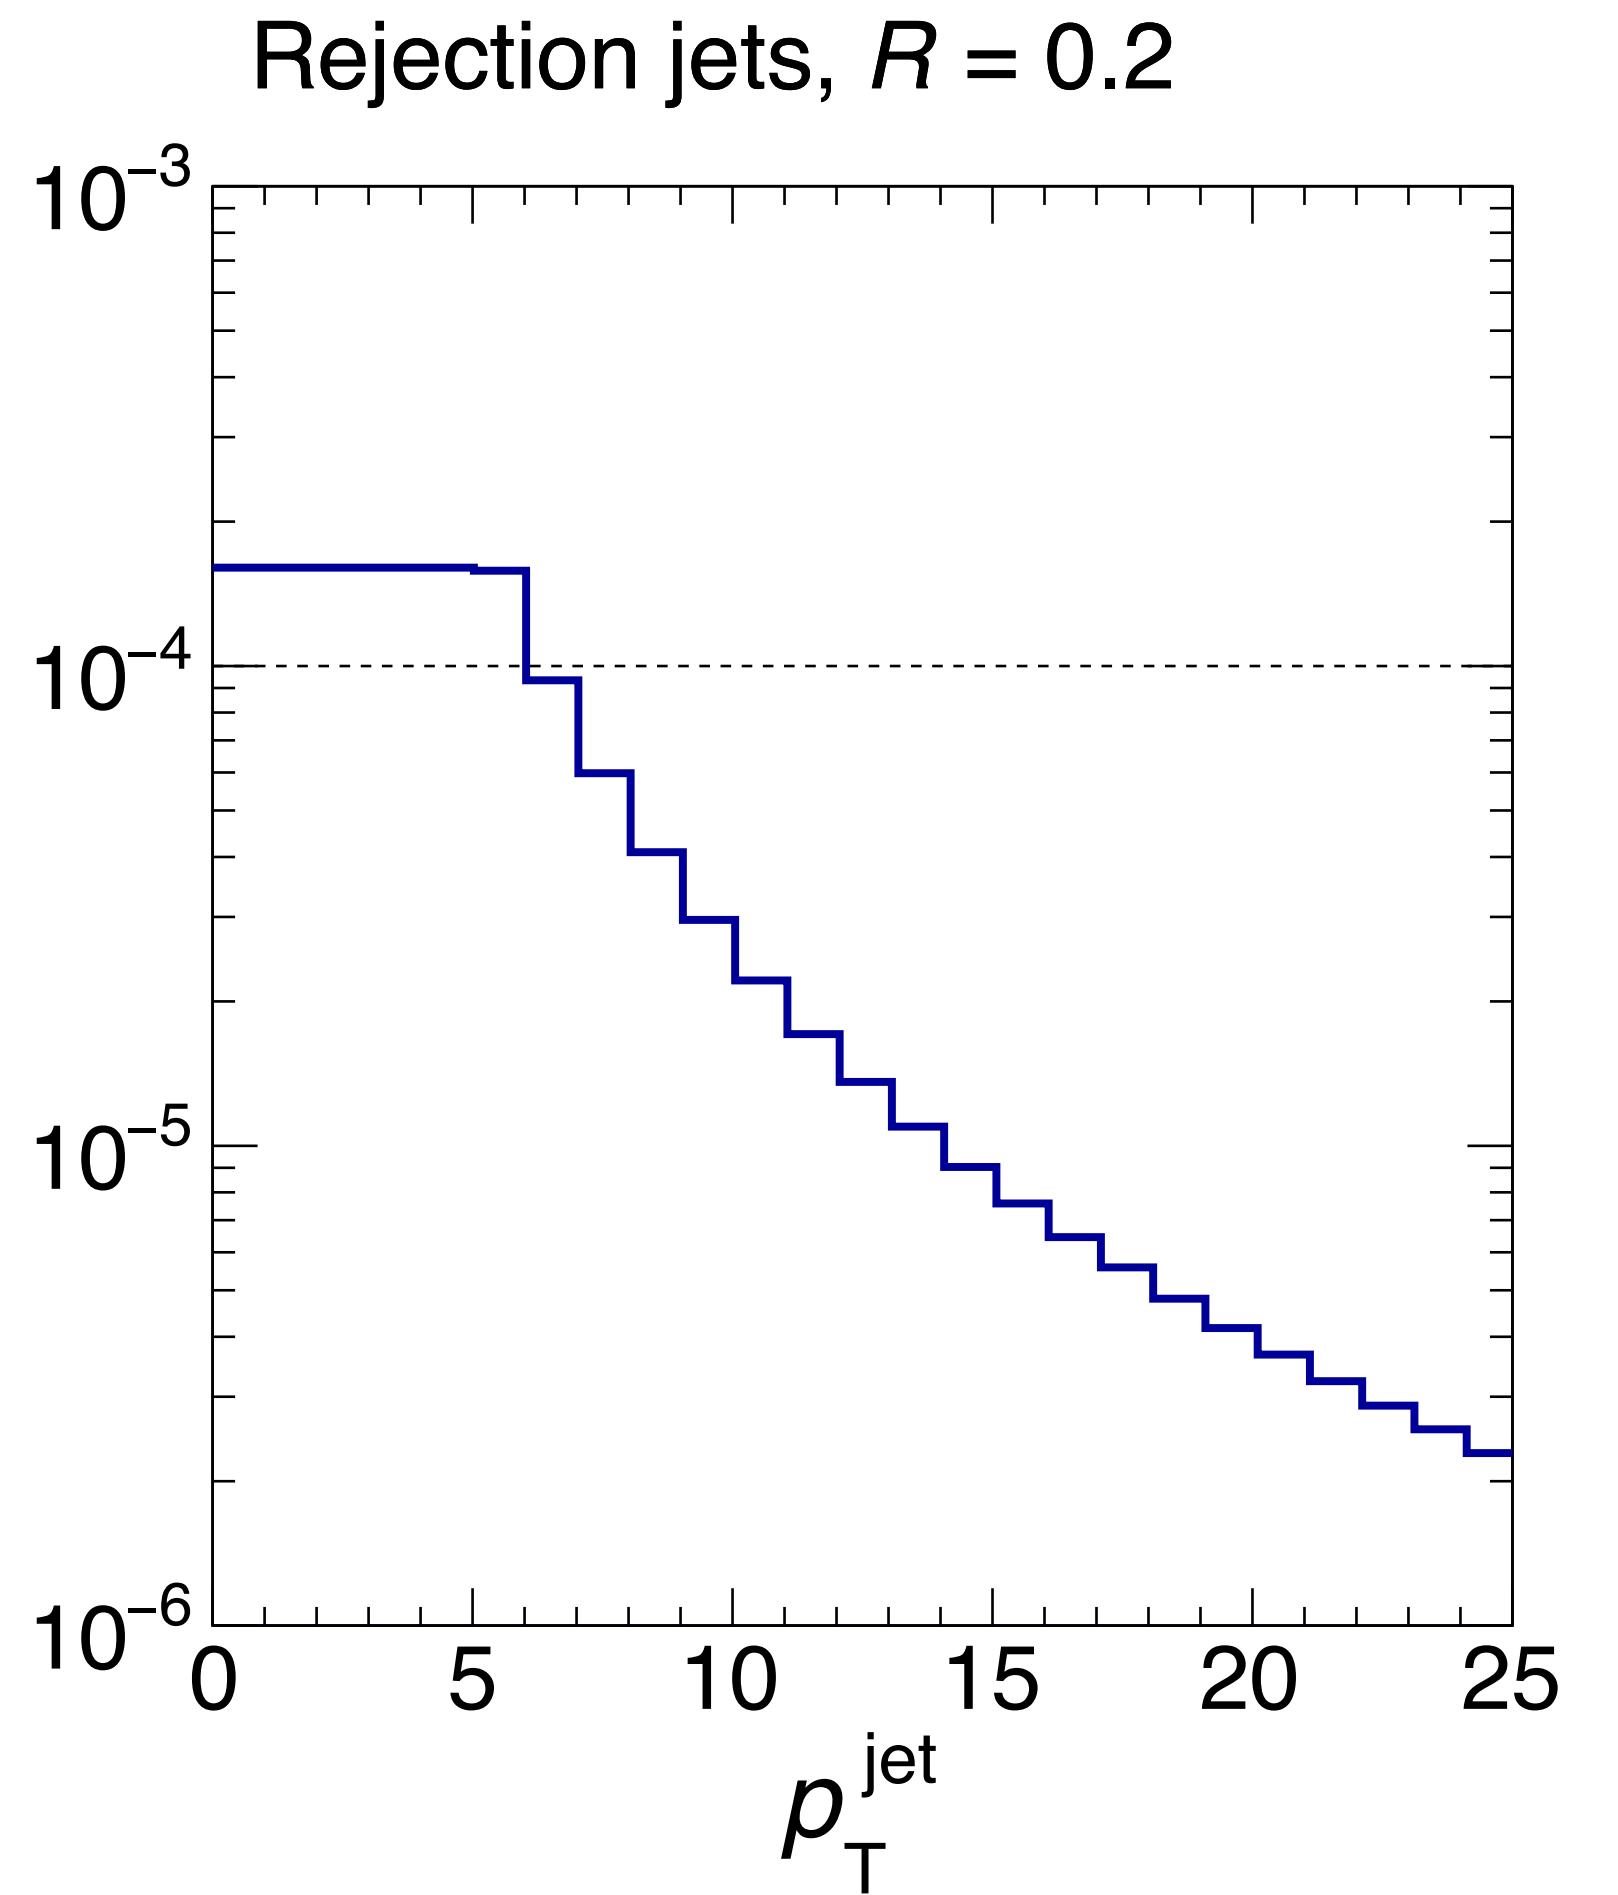

Software triggers

Jets trigger

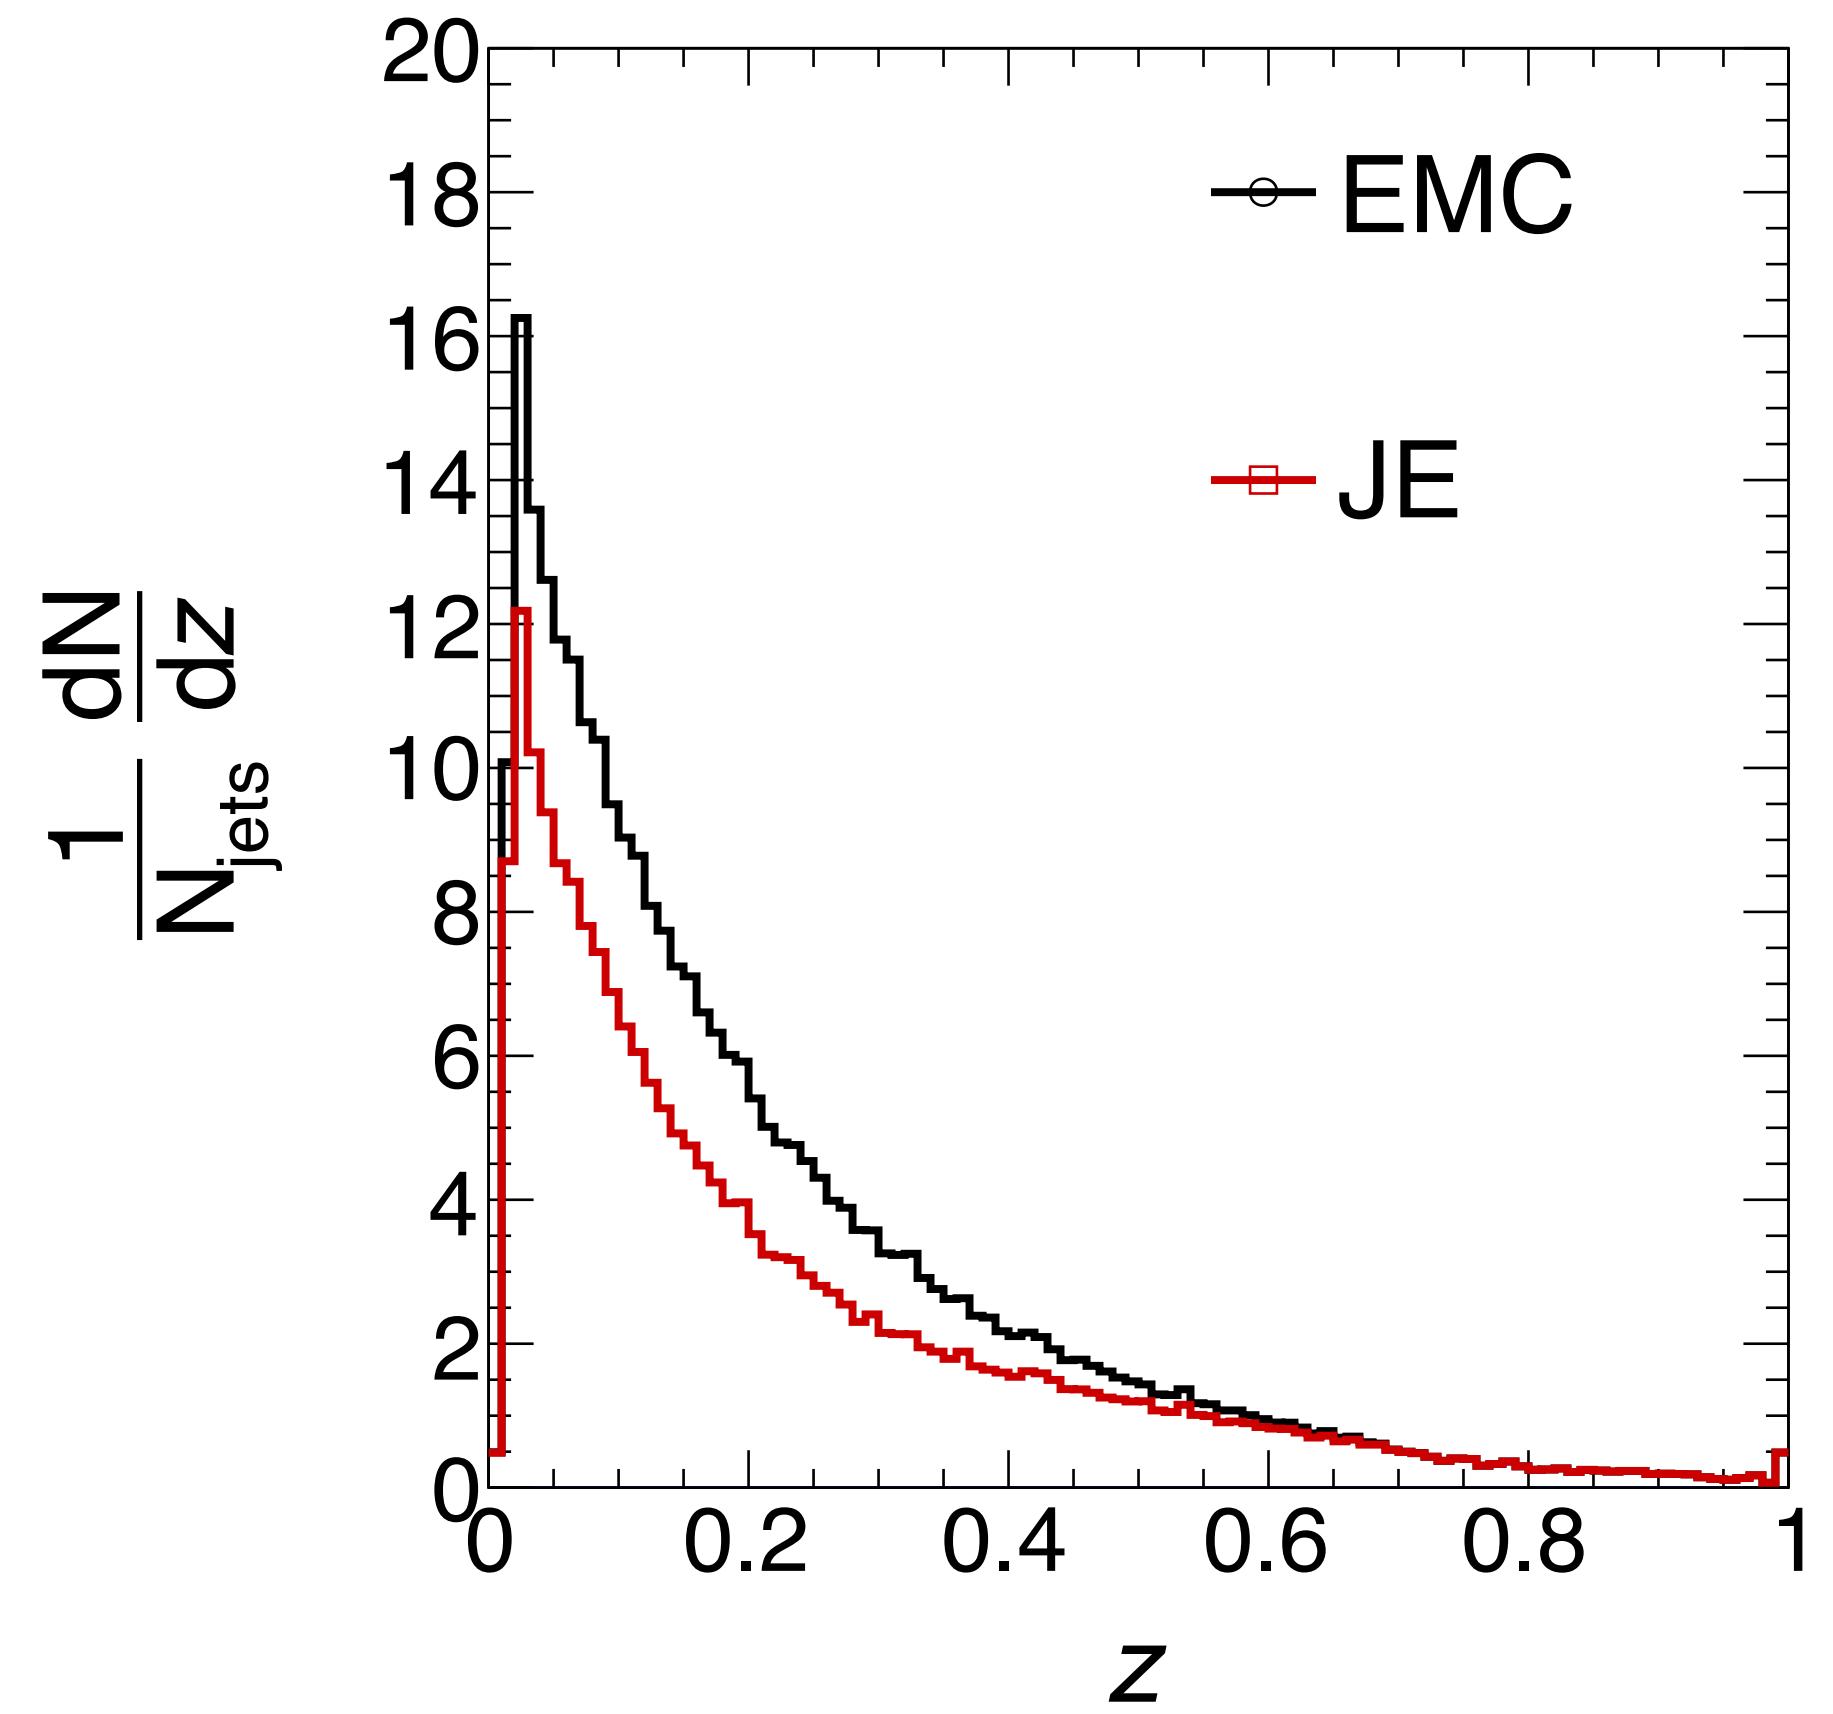

Jets trigger

Jet fragmentation

Trigger bias

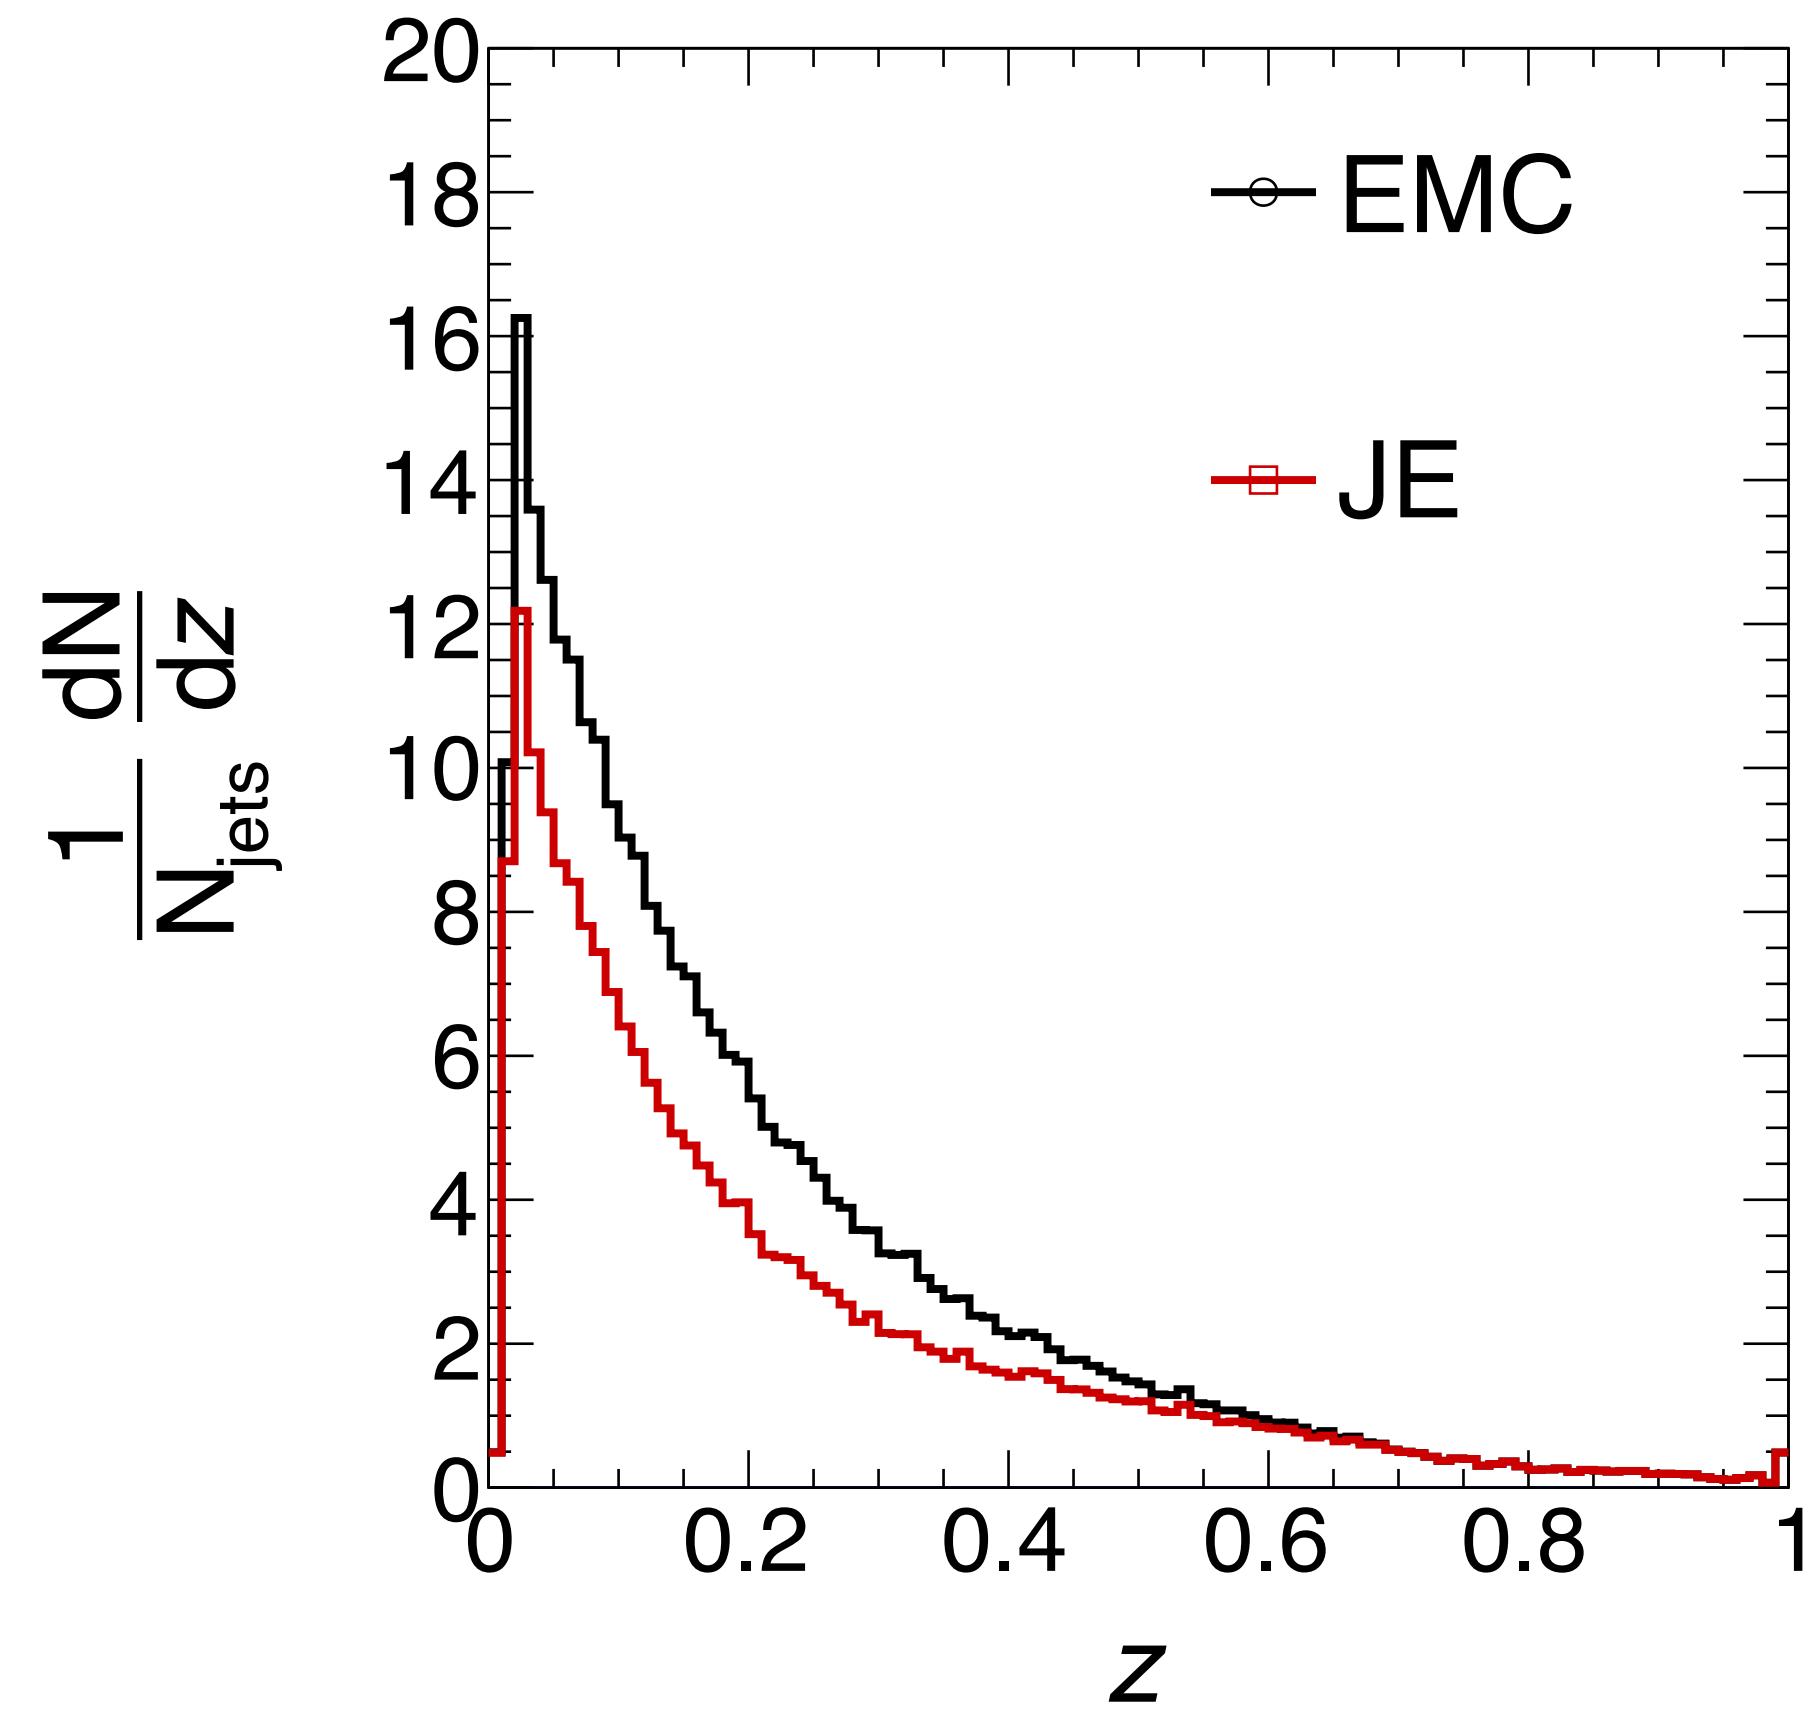

Jet fragmentation, $R = 0.4$ (8-20 GeV)

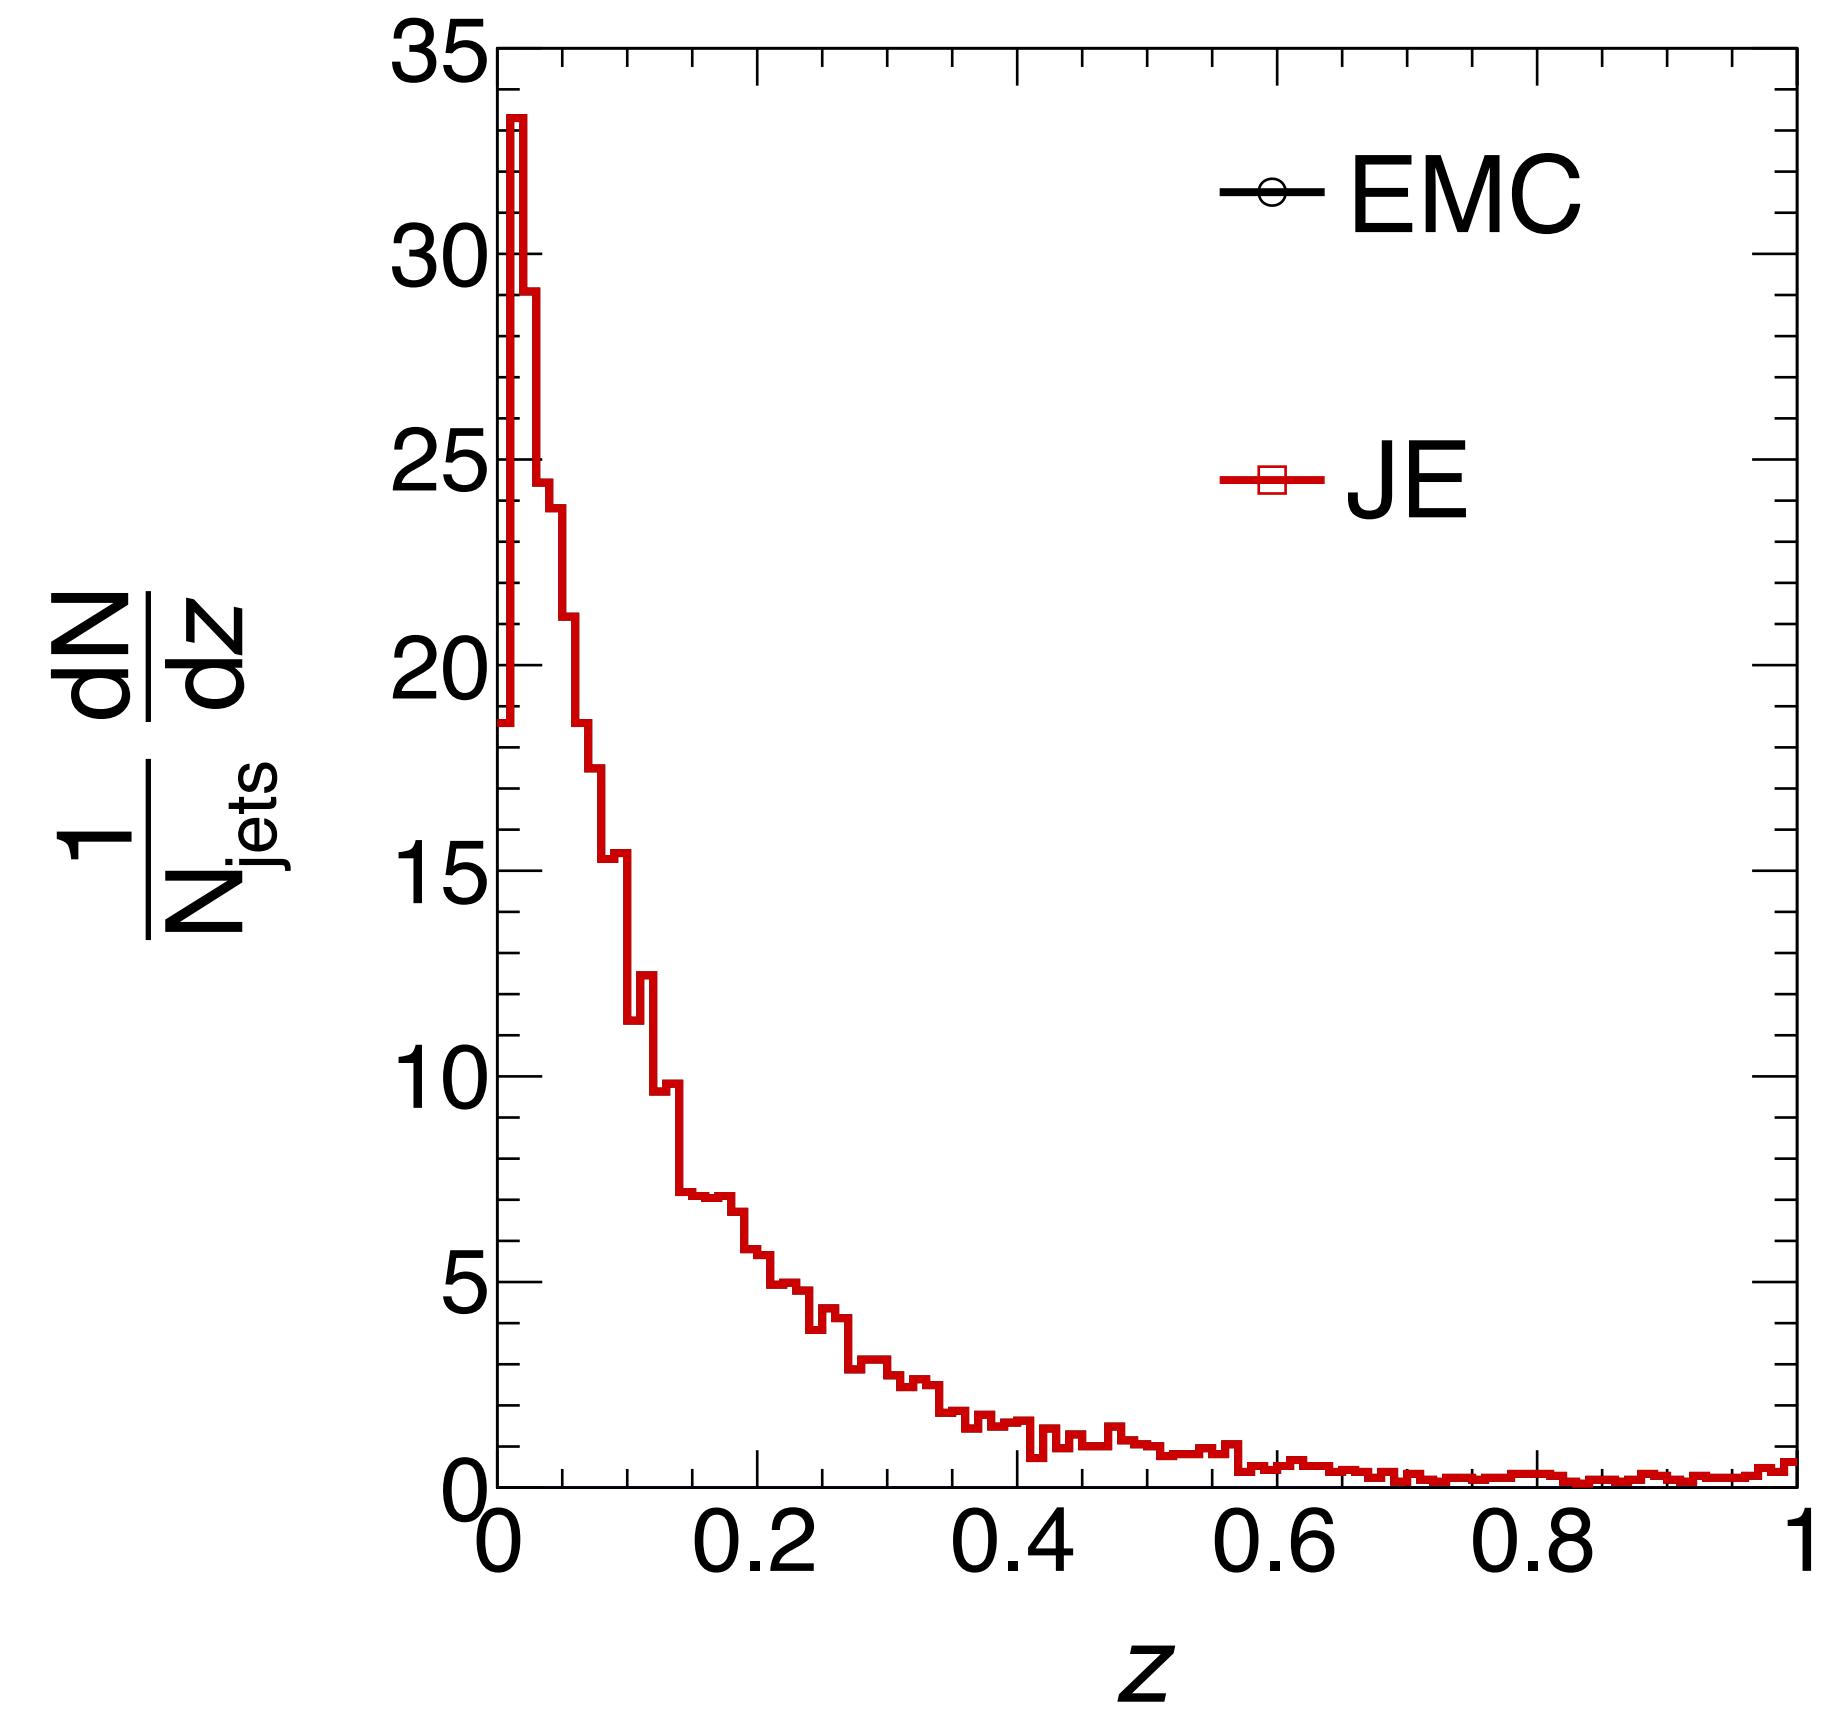

Jet fragmentation

Trigger bias

Jet fragmentation, $R = 0.4$ (8-20 GeV)

Jet fragmentation, $R = 0.4$ (20-30 GeV)

Summary

- Fragmentation of gluons is poorly constrained
- Using jets to understand fragmentation
- Measure fragmentation into K^0, Λ^0 in Run 3 pp data
- Data selection for jets using full jet trigger
