

# BGRem: Background noise removal for astronomical images

## Test Data

Predicted no background

simulated no background

simulated with background

- Diffusion model with attention U-net
- Trained on simulated MeerLICHT images
- Can remove complex backgrounds

## Real images

Original

Background removed

Original

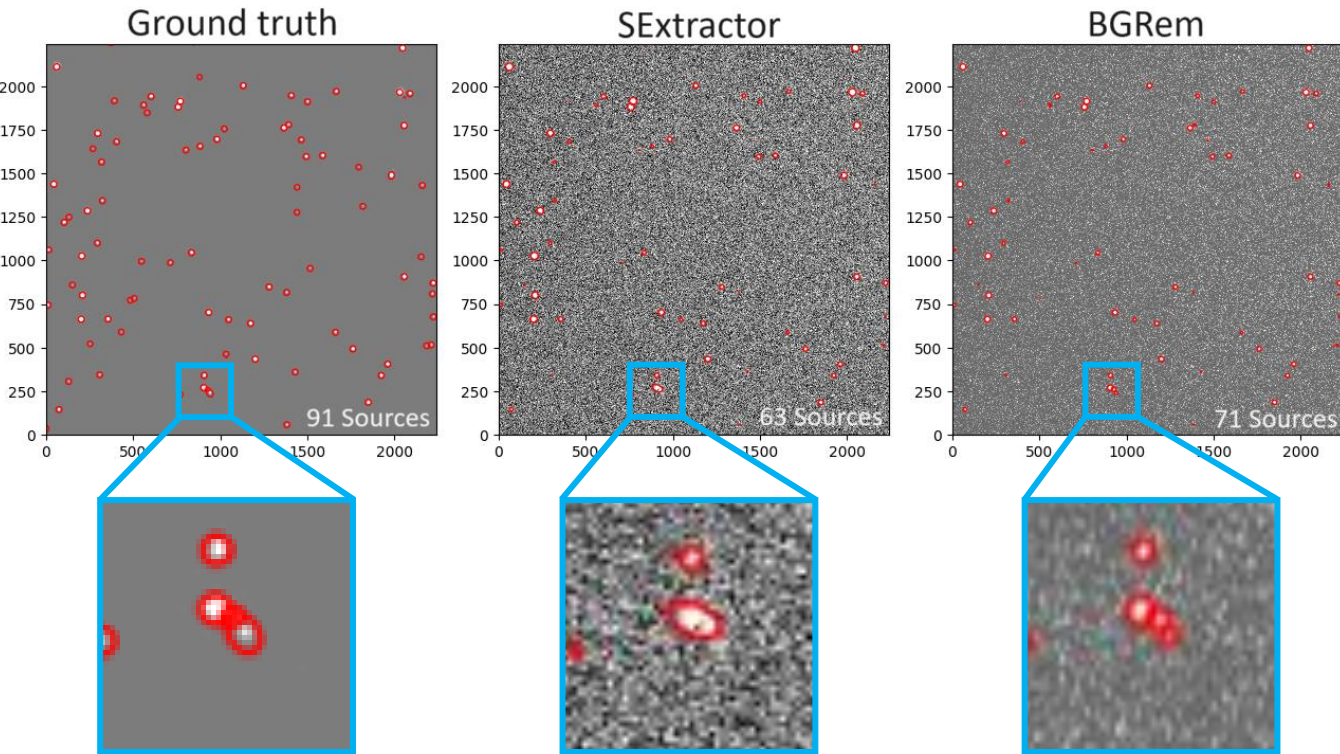

Background removed

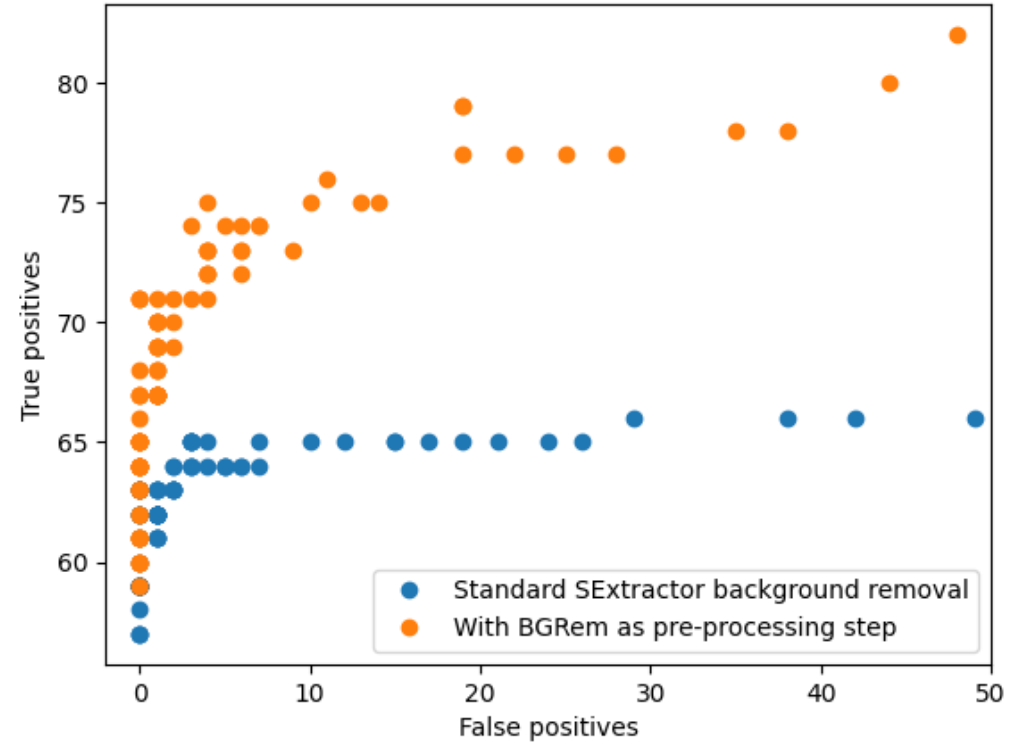

# Source Localisation

- Find more sources with SExtractor
- No increase in bogus sources
- Helps distinguish sources with close proximity

Number of true sources found as a function of number of bogus sources found
