

Future Colliders

Clara Nellist
with Patrick Koppenburg and Wouter Waalewijn

Nikhef Staff Meeting 06/02/2024

Planned activities at Nikhef

- Veldhoven
 - We had a great dedicated focus session in January.
 - There was also an overview plenary talk.
- Colloquium mini series:
 - theory motivation for FCC, energy recovery linac, ...
- Topical lectures:
 - March 2024 with information + discussion
- Working group on simulations for future colliders
 - Will be kick-started in the topical lectures with a dedicated tutorial
- A staff meeting on the physics goals
 - **This meeting!** February 2024
- ECFA ERC meeting first half of 2024

What do we do now / next?

- CERN will have the strategy document in 2025/26
- We need a Dutch strategy for spring 2025. For that we need to ensure we are well informed (see previous slide) and that we start to converge. So how do we do that?
- Should we (further) join a proto-detector?

Let's discuss.
