

ETpathfinder Milestone session

1.2.2024, 2nd ETpathfinder workshop

Summary of vacuum control in air cabling discussion

Goal commissioning as soon after cable trays are installed

Understand what is needed

Steps :

- Thomas provide a table of cables needed next week
- Mathijs will be asked to provide foreseen cable trays next week
- Hans will investigate cable length , connectors needed , labeling cost , manpower
- Details about connectors
- Testing strategy
- Ordering components (beginning March ???)
- Installation (after cable trays are installed) and connect connectors prefer someone from KIT for overview this activity (so connectors will be attached in situ of course not for the Ethernet cable)
- KIT will take over (make the connection to the system etc) for the commissioning.

Need review formal safety documentation

Power to the devices (pumps , cabinets

Summary of discussions on OPLEV

Summary of 120 vs 10K
