Exploring the reaction $^{64}\text{Ni} + ^{238}\text{U}$ at RITU

Jennifer B. Cipagauta Mora

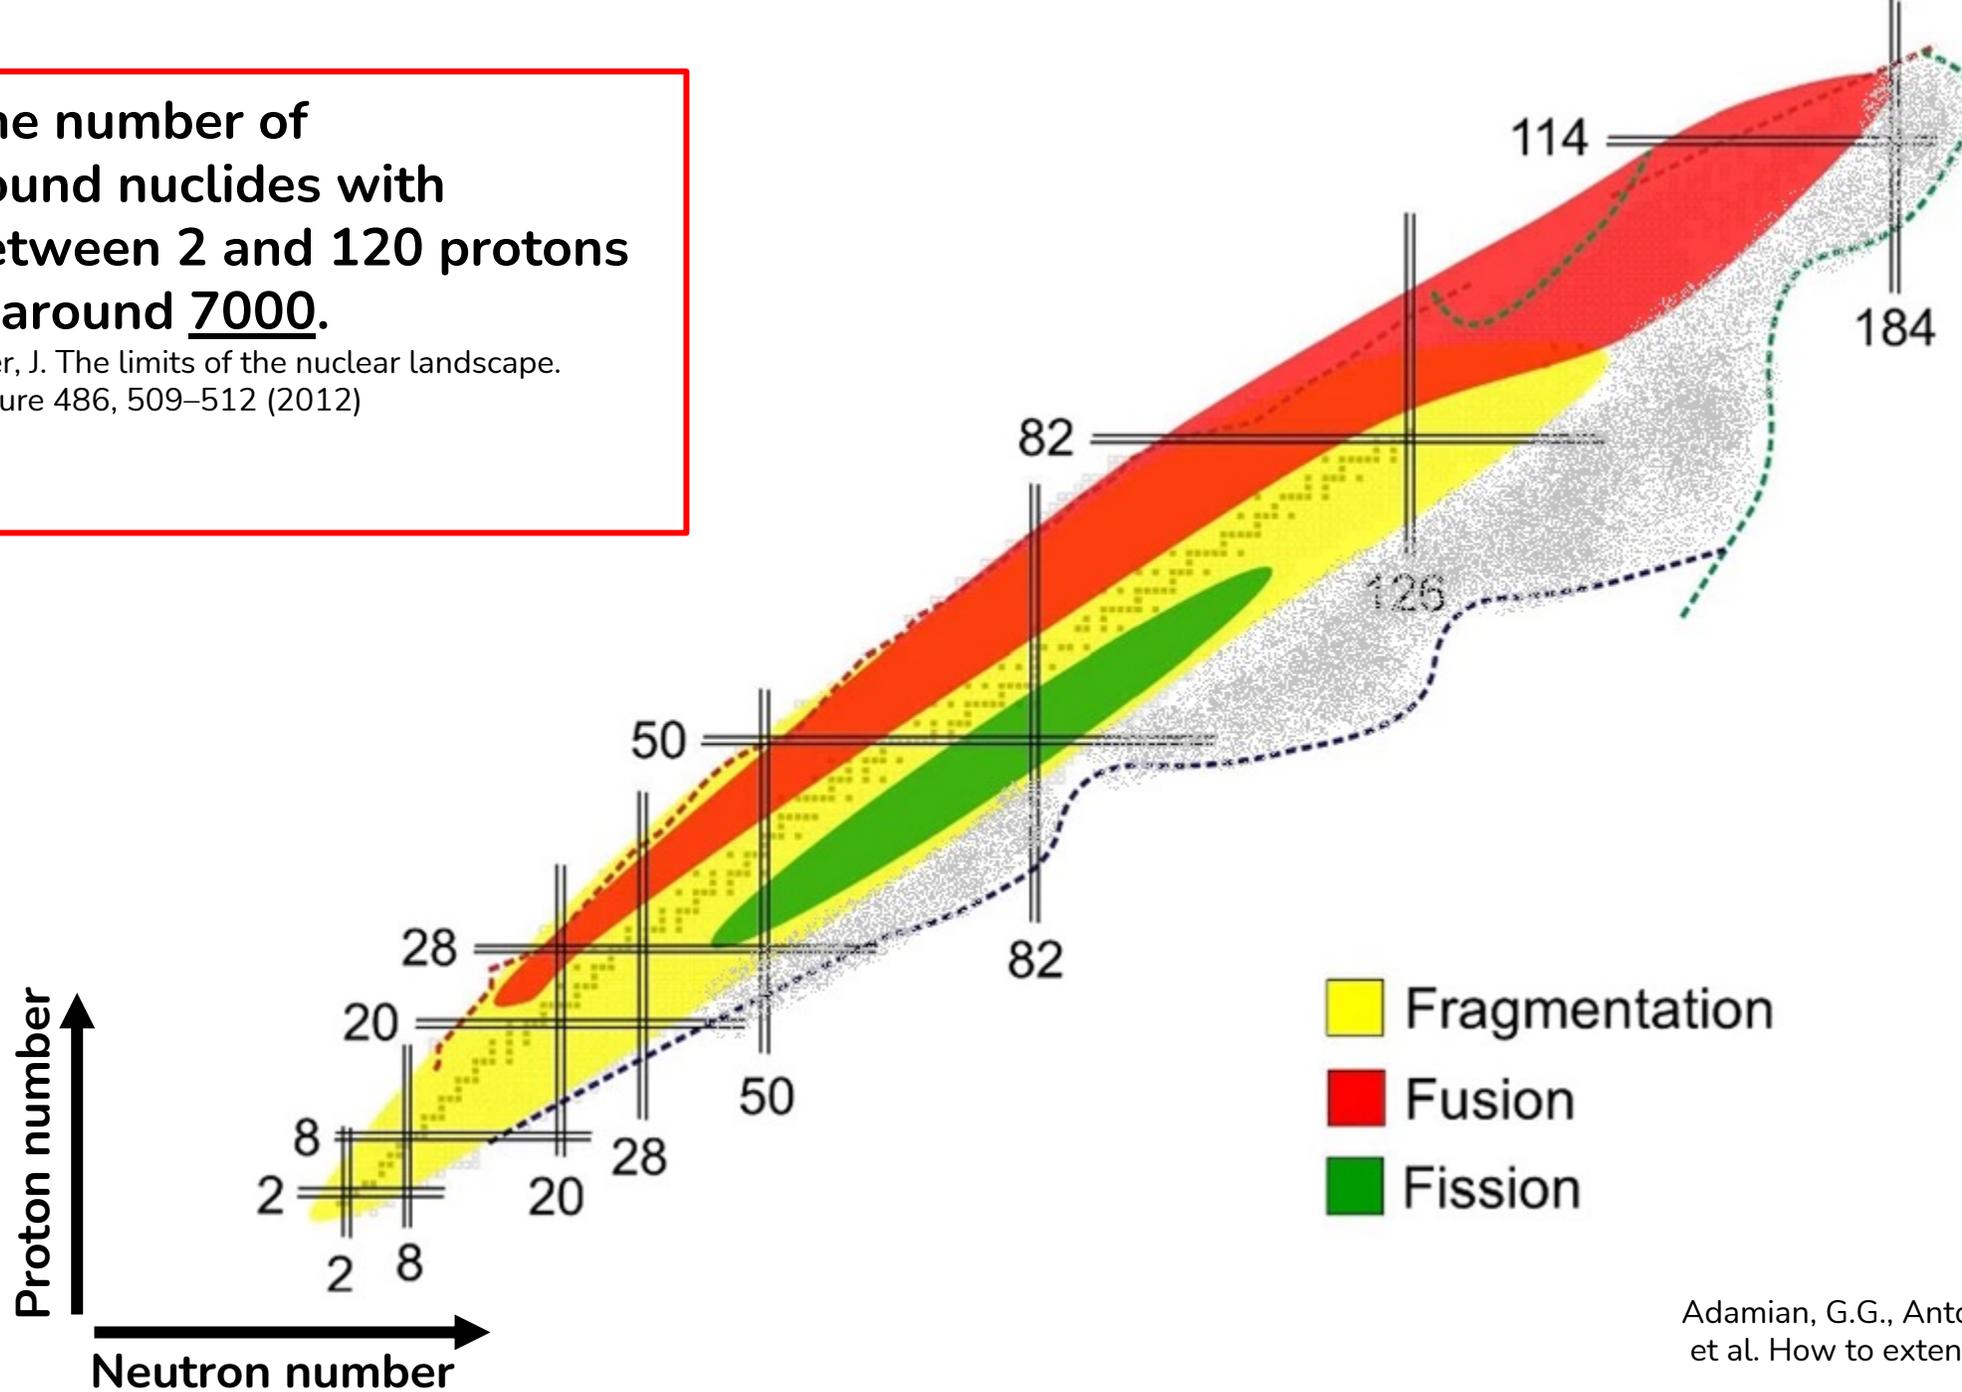

2022 Update of the discoveries of nuclides
 M. Thoennessen, International Journal of Modern Physics E 2023 32:01
 Adamian, G.G., Antonenko, N.V., Diaz-Torres, A. et al. How to extend the chart of
 nuclides?. Eur. Phys. J. A 56, 47 (2020)

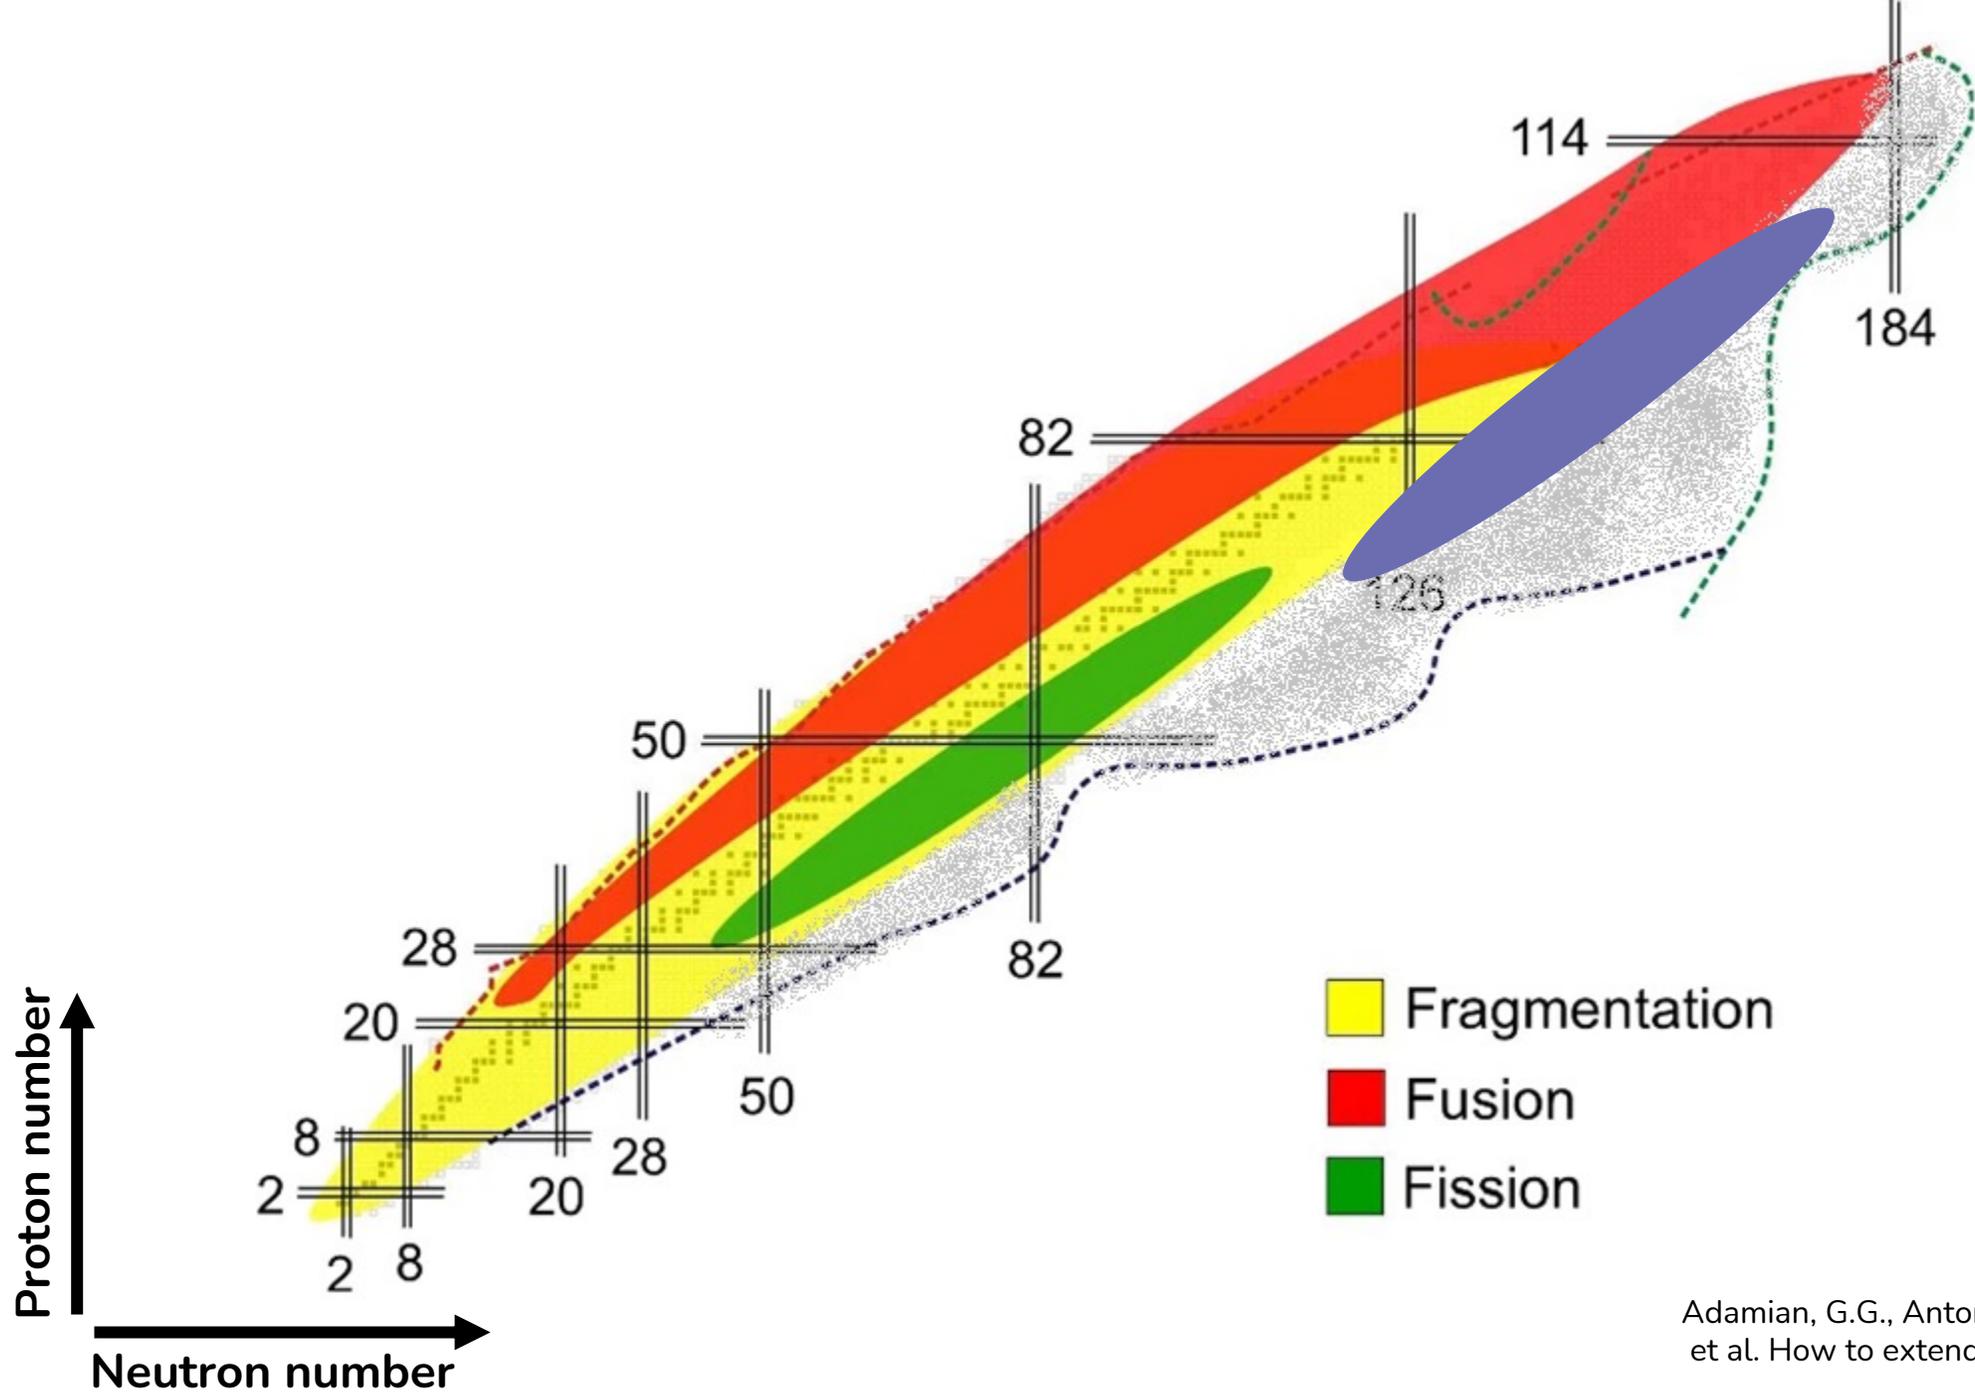

The number of bound nuclides with between 2 and 120 protons is around 7000.

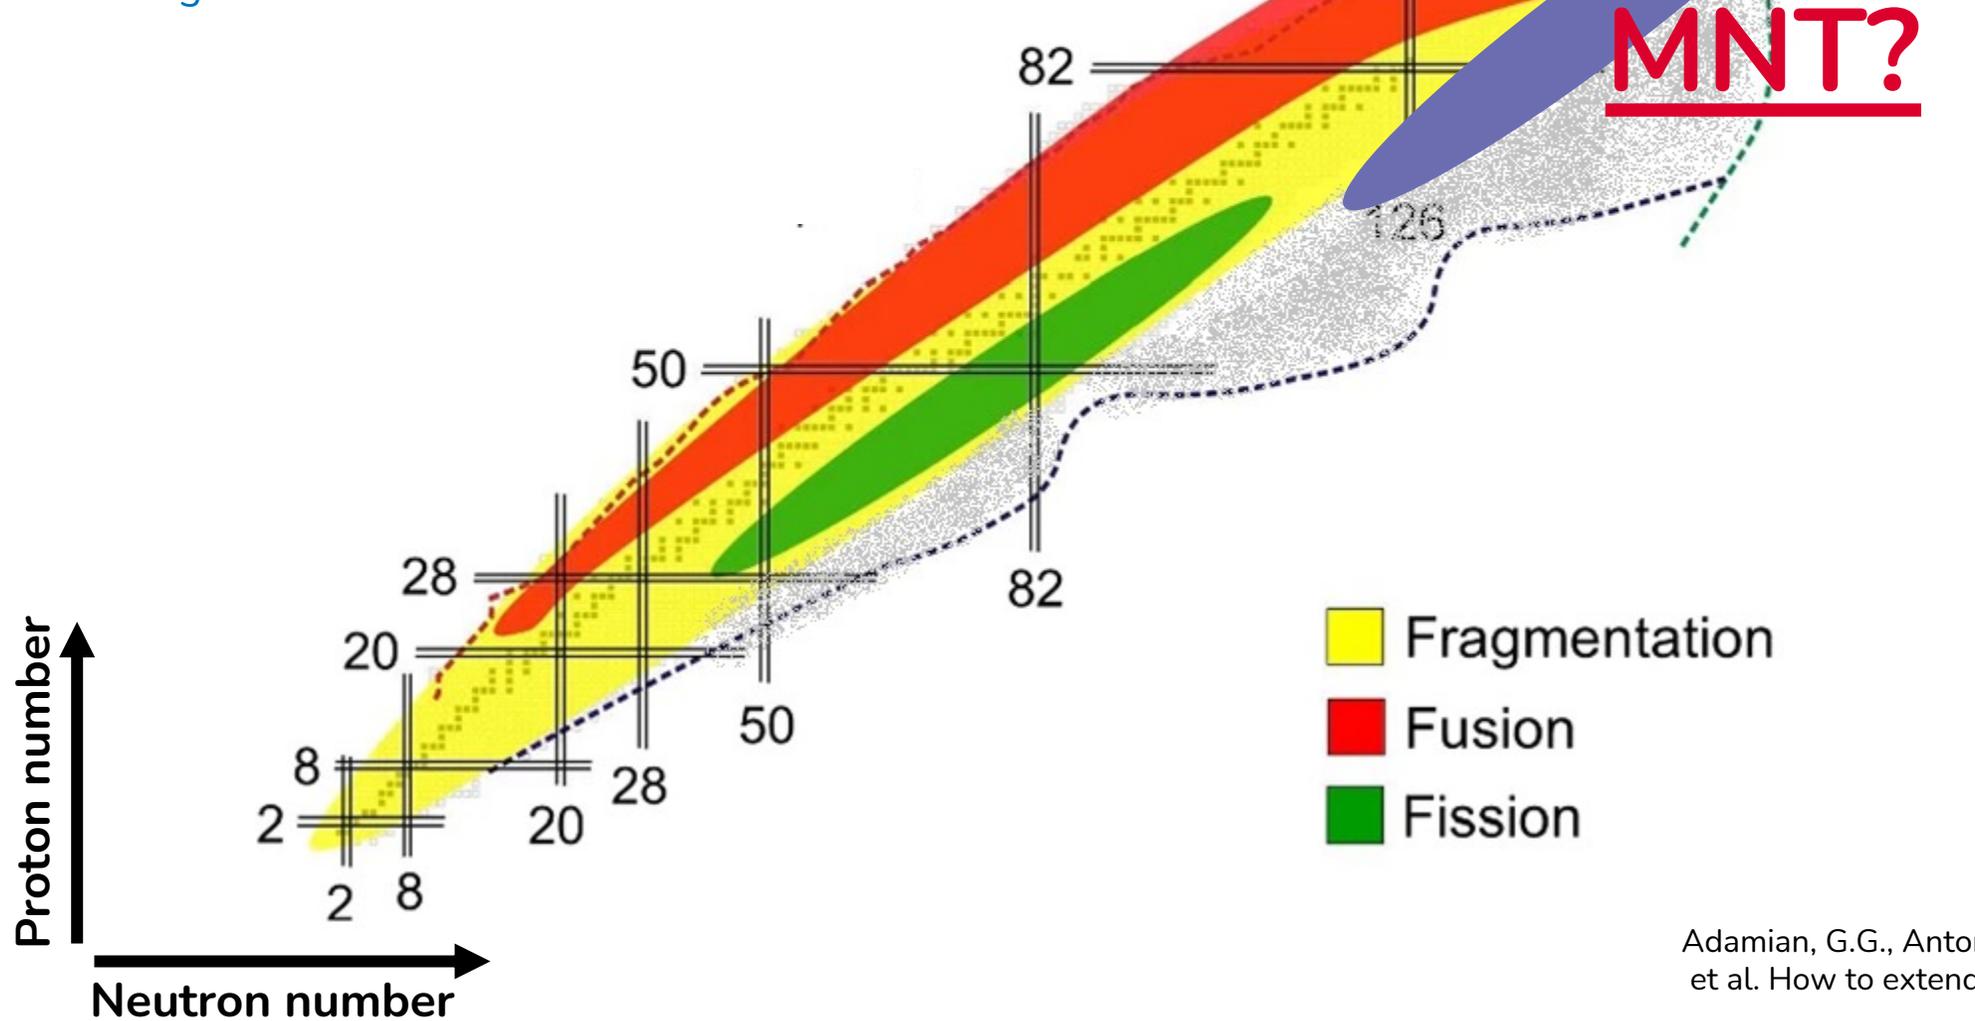

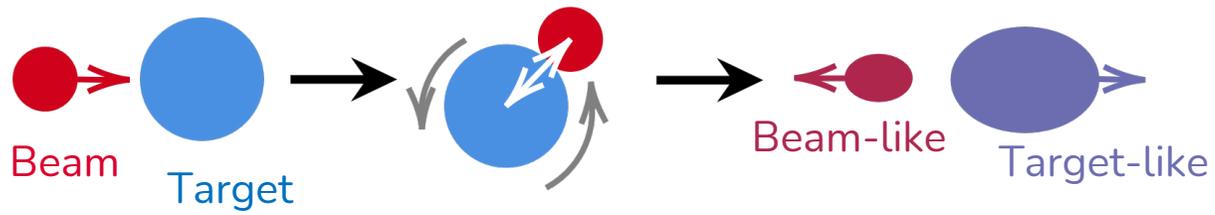

Erlor, J. The limits of the nuclear landscape. Nature 486, 509–512 (2012)

JUROGAM

Escaping α

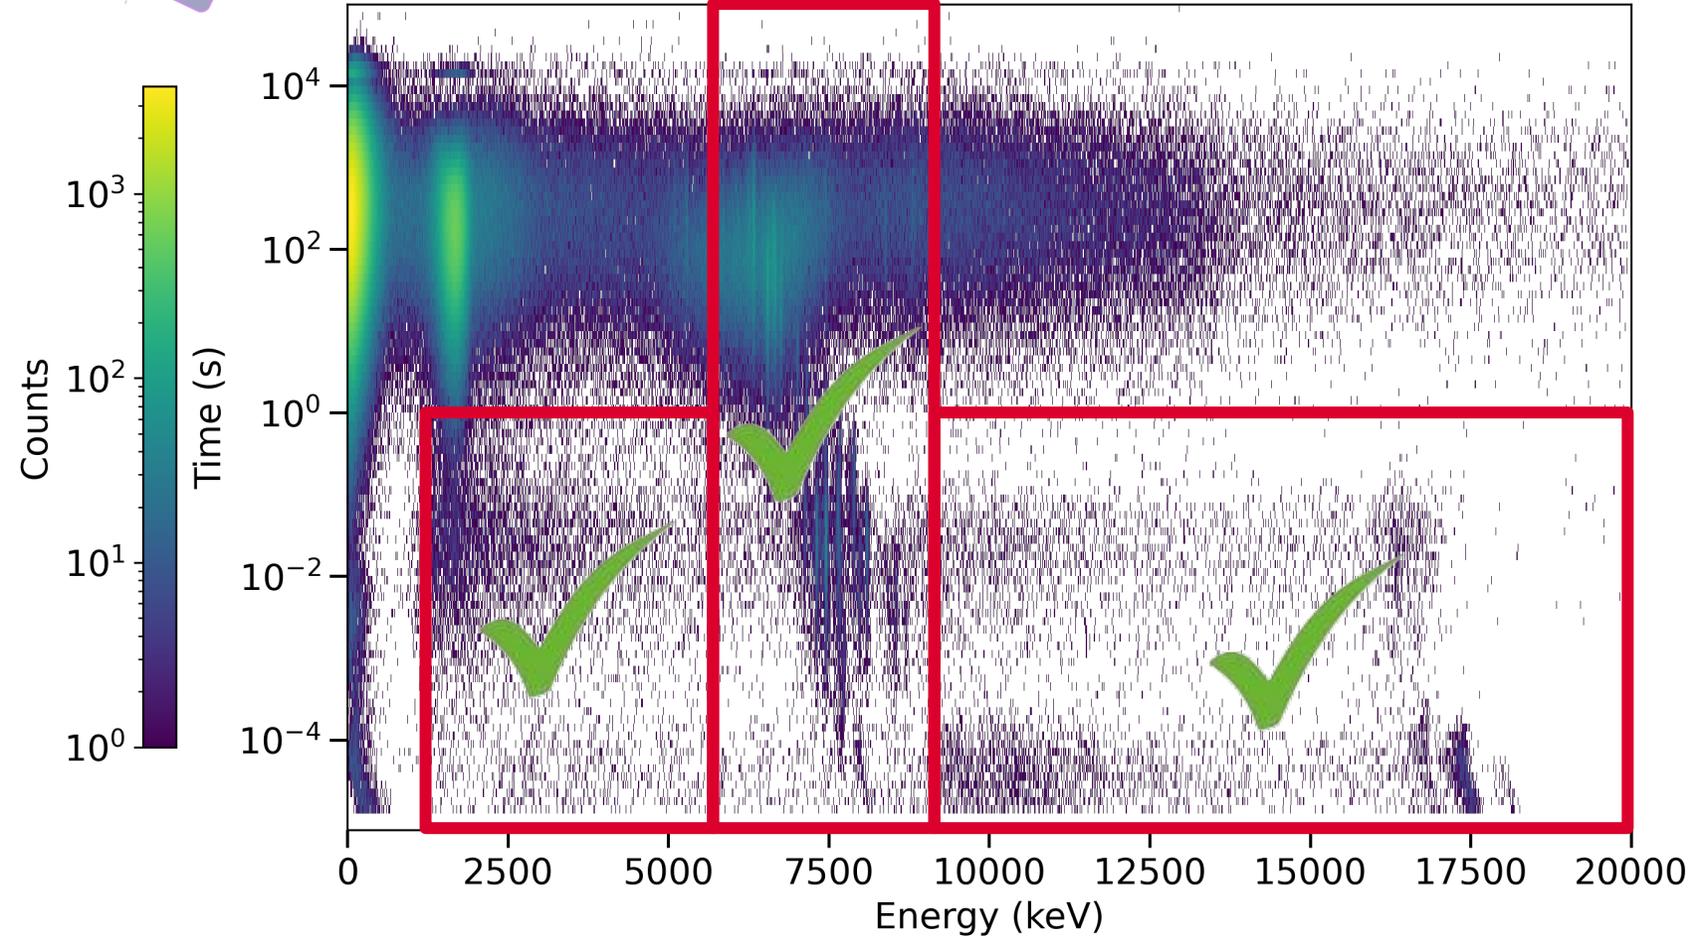

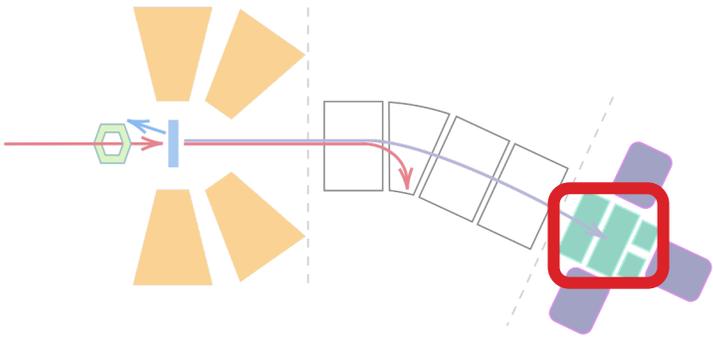

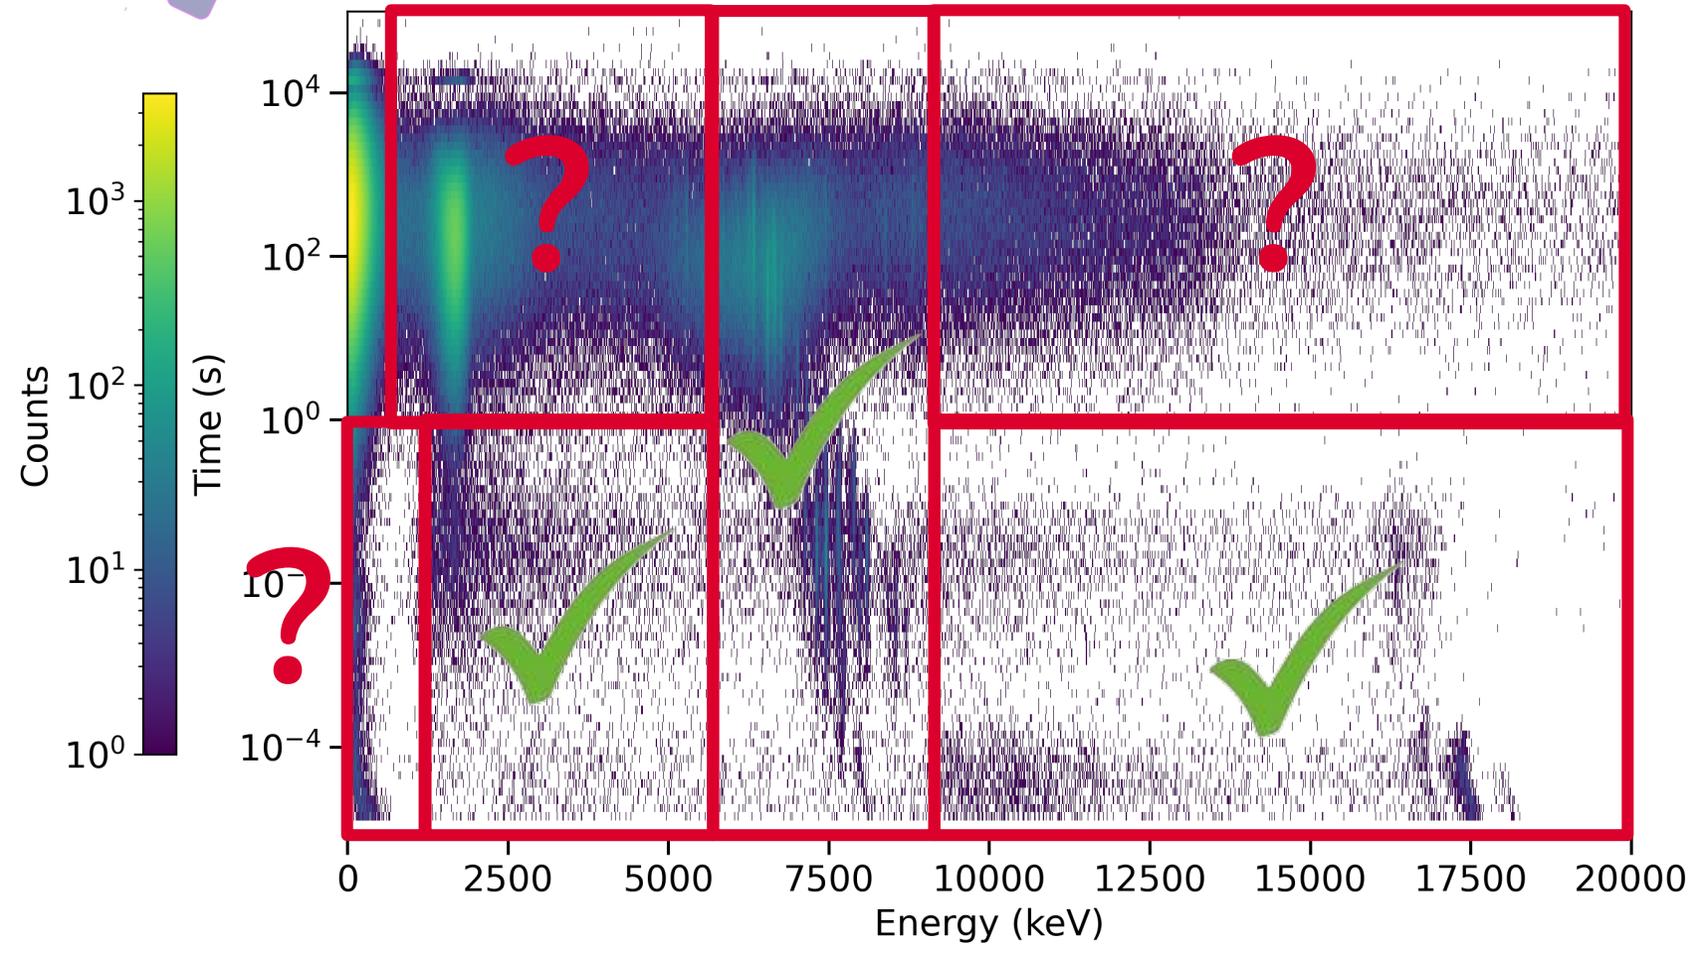

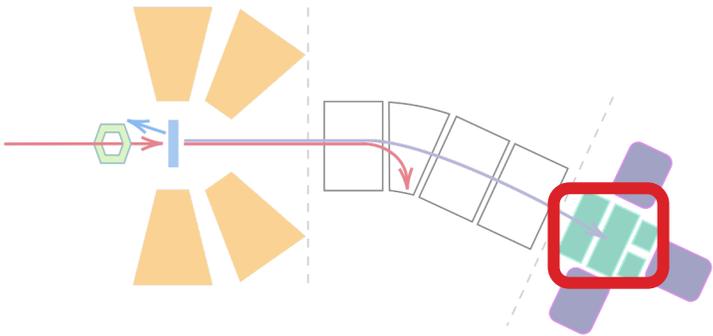

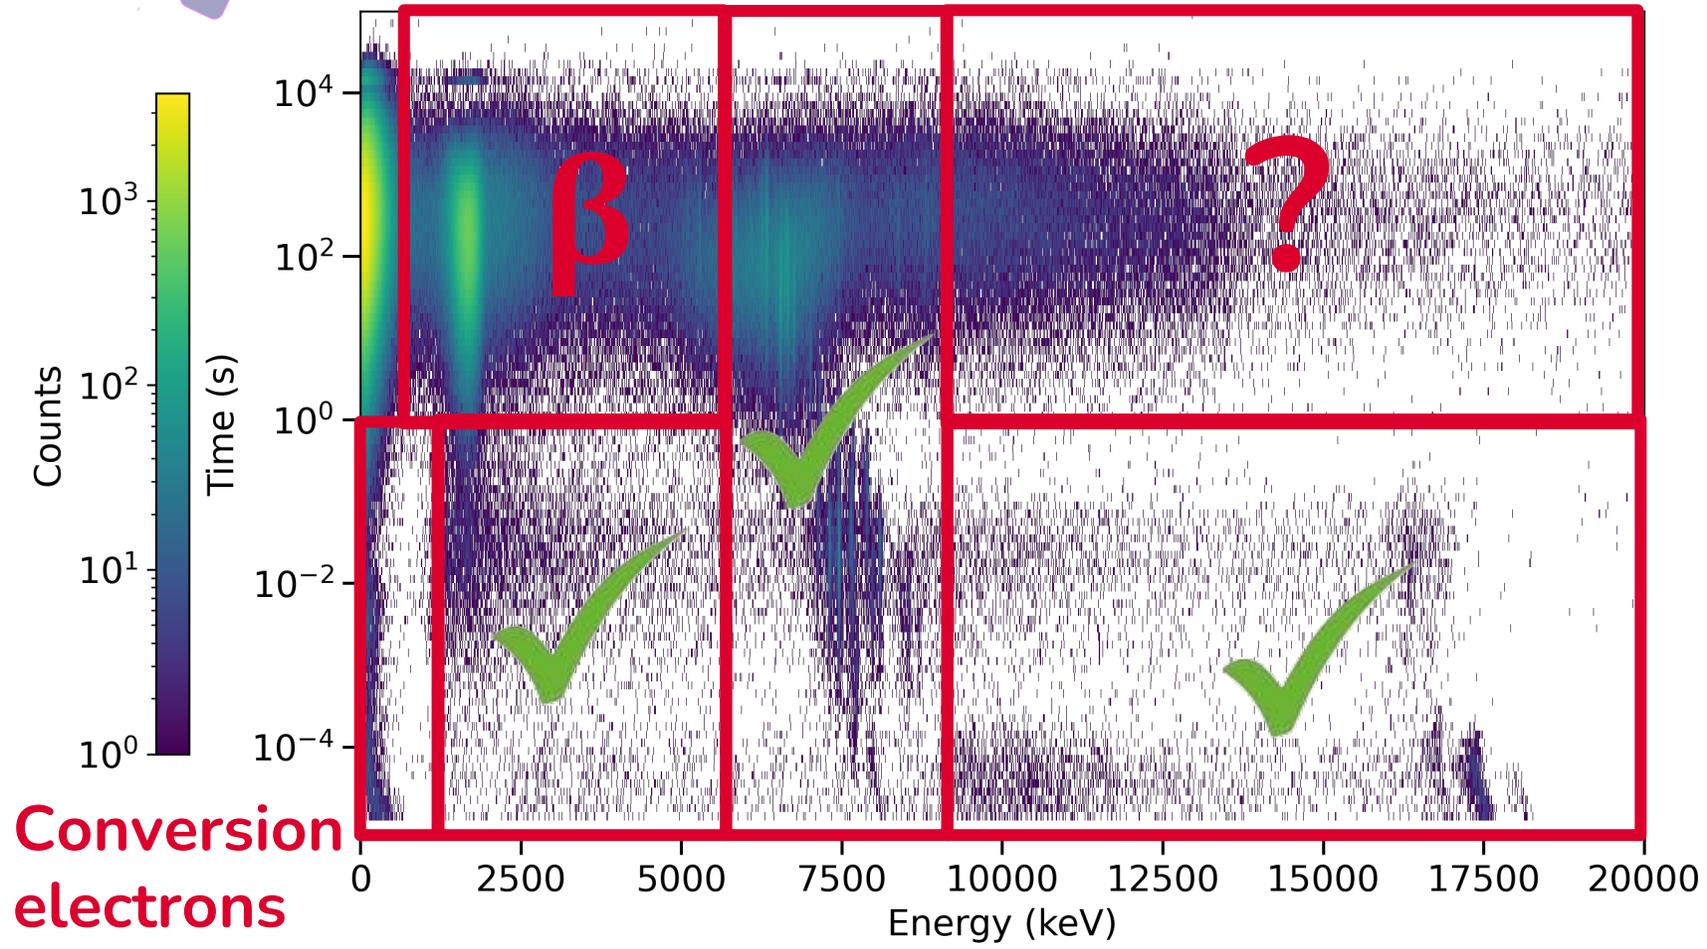

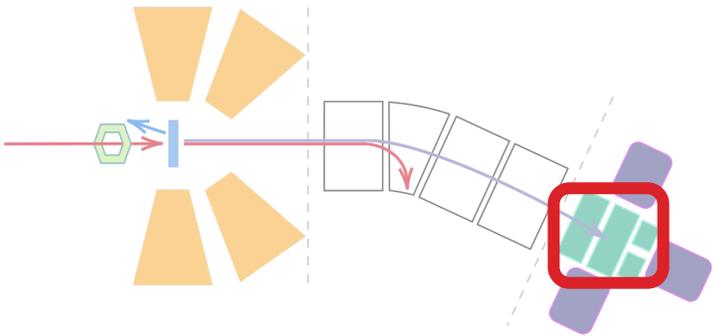

**Short
double α**

Status and Outlook

- RITU, combined with its focal plane detector setup and JUROGAM, provides a direct view of the reaction mechanism.
- So far, 32 isotopes have been identified, and the search for more is ongoing.
- The next steps include:
 - Analysis of the JYTube detector data to search for projectile-like partners emitted close to 180° ,
 - Analysis of the gamma spectra of JUROGAM,
 - Determination of cross-sections.
